} VkCopyMemoryIndirectCommandKHR;
```

- `srcAddress` is the starting address of the source device memory to copy from.
- `dstAddress` is the starting address of the destination device memory to copy to.
- `size` is the size of the copy in bytes.

Valid Usage

- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-10958
  The `srcAddress` **must** be 4 byte aligned
- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-10959
  The `dstAddress` **must** be 4 byte aligned
- VUID-VkCopyMemoryIndirectCommandKHR-size-10960
  The `size` **must** be 4 byte aligned
- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-10961
  The memory in range [`srcAddress`, `srcAddress` + `size` - 1] **must** be within the bounds of the

memory allocation backing `srcAddress`

- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-10962
  The memory in range [`dstAddress`, `dstAddress` + `size` - 1] **must** be within the bounds of the memory allocation backing `dstAddress`
- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-12211
  The range of memory defined by `srcAddress` and `size` **must** be a device address range allocated to the application from a buffer created with the VK_BUFFER_USAGE_TRANSFER_SRC_BIT usage flag set
- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-12212
  The range of memory defined by `dstAddress` and `size` **must** be a device address range allocated to the application from a buffer created with the VK_BUFFER_USAGE_TRANSFER_DST_BIT usage flag set

Valid Usage (Implicit)

- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-parameter
  `srcAddress` **must** be a valid VkDeviceAddress value
- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-parameter
  `dstAddress` **must** be a valid VkDeviceAddress value

Bits which **can** be set in a VkAddressCopyFlagsKHR mask are:

```
// Provided by VK_KHR_copy_memory_indirect
typedef enum VkAddressCopyFlagBitsKHR {
    VK_ADDRESS_COPY_DEVICE_LOCAL_BIT_KHR = 0x00000001,
    VK_ADDRESS_COPY_SPARSE_BIT_KHR = 0x00000002,
    VK_ADDRESS_COPY_PROTECTED_BIT_KHR = 0x00000004,
} VkAddressCopyFlagBitsKHR;
```

- VK_ADDRESS_COPY_DEVICE_LOCAL_BIT_KHR specifies that the address range is expected to be resident in device local memory. Specifying this value is optional, but **may** lead to improved performance if set accurately.
- VK_ADDRESS_COPY_PROTECTED_BIT_KHR specifies that the address range is allocated from protected memory.
- VK_ADDRESS_COPY_SPARSE_BIT_KHR specifies that the address range may not be fully bound to physical memory when accessed.

```
// Provided by VK_KHR_copy_memory_indirect
typedef VkFlags VkAddressCopyFlagsKHR;
```

`VkAddressCopyFlagsKHR` is a bitmask type for setting a mask of zero or more VkAddressCopyFlagBitsKHR.

To copy data from a memory region to an image object by specifying copy parameters in memory, call:

```
// Provided by VK_KHR_copy_memory_indirect
void vkCmdCopyMemoryToImageIndirectKHR(
    VkCommandBuffer                             commandBuffer,
    const VkCopyMemoryToImageIndirectInfoKHR*   pCopyMemoryToImageIndirectInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pCopyMemoryToImageIndirectInfo` is a pointer to a VkCopyMemoryToImageIndirectInfoKHR structure which contains the copy parameters, including the number of copies to execute and a strided array of VkCopyMemoryToImageIndirectCommandKHR structures.

Each region specified in the memory referenced by `pCopyMemoryToImageIndirectInfo->copyAddressRange` is copied from the source region to an image region in the destination image. If the destination image is of type VK_IMAGE_TYPE_3D, the starting slice and number of slices to copy are specified in `pImageSubresources->baseArrayLayer` and `pImageSubresources->layerCount` respectively as `imageOffset` and `imageExtent` from VkCopyMemoryToImageIndirectCommandKHR are only available at device execution time.

Valid Usage

- VUID-vkCmdCopyMemoryToImageIndirectKHR-indirectMemoryToImageCopy-10947
  The `indirectMemoryToImageCopy` feature **must** be enabled
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-10948
  The VkCommandPool that `commandBuffer` was allocated from **must** support at least one of the queue types specified in VkPhysicalDeviceCopyMemoryIndirectPropertiesKHR ::`supportedQueues`
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-10949
  `commandBuffer` must not be a protected command buffer

Valid Usage (Implicit)

- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdCopyMemoryToImageIndirectKHR-pCopyMemoryToImageIndirectInfo-parameter
  `pCopyMemoryToImageIndirectInfo` **must** be a valid pointer to a valid VkCopyMemoryToImageIndirectInfoKHR structure
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support

VK_QUEUE_COMPUTE_BIT, VK_QUEUE_GRAPHICS_BIT, or VK_QUEUE_TRANSFER_BIT operations

- VUID-vkCmdCopyMemoryToImageIndirectKHR-renderpass
  This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyMemoryToImageIndirectKHR-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyMemoryToImageIndirectKHR-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Outside	Outside	VK_QUEUE_COMPUTE_BIT VK_QUEUE_GRAPHICS_BIT VK_QUEUE_TRANSFER_BIT	Action

Conditional Rendering

vkCmdCopyMemoryToImageIndirectKHR is not affected by conditional rendering

The VkCopyMemoryToImageIndirectInfoKHR structure is defined as:

```
// Provided by VK_KHR_copy_memory_indirect
typedef struct VkCopyMemoryToImageIndirectInfoKHR {
    VkStructureType                     sType;
    const void*                         pNext;
    VkAddressCopyFlagsKHR               srcCopyFlags;
    uint32_t                            copyCount;
    VkStridedDeviceAddressRangeKHR      copyAddressRange;
    VkImage                             dstImage;
    VkImageLayout                       dstImageLayout;
    const VkImageSubresourceLayers*     pImageSubresources;
} VkCopyMemoryToImageIndirectInfoKHR;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcCopyFlags` is a VkAddressCopyFlagsKHR value defining the copy flags for the source address range.
- `copyCount` is the number of copies to execute, and **can** be zero.
- `copyAddressRange` is a memory region specifying the copy parameters. It is laid out as an array of VkCopyMemoryToImageIndirectCommandKHR structures.
- `dstImage` is the destination image.
- `dstImageLayout` is the layout of the destination image subresources for the copy.
- `pImageSubresources` is a pointer to an array of `copyCount` VkImageSubresourceLayers structures, specifying the image subresources of the destination image data for the copy operation.

Valid Usage

- VUID-VkCopyMemoryToImageIndirectInfoKHR-srcCopyFlags-10950
  If `srcCopyFlags` contains VK_ADDRESS_COPY_SPARSE_BIT_KHR, the source memory regions accessed **must** be bound to memory
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyCount-10951
  `copyCount` **must** be less than or equal to `copyAddressRange.size` / `copyAddressRange.stride`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-10952
  `copyAddressRange.address` **must** be 4 byte aligned
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-10953
  `copyAddressRange.stride` **must** be a multiple of `4` and **must** be greater than or equal to sizeof(VkCopyMemoryToImageIndirectCommandKHR)
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-10955
  The format features of `dstImage` **must** contain VK_FORMAT_FEATURE_2_COPY_IMAGE_INDIRECT_DST_BIT_KHR
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-12213
  `copyAddressRange` **must** be a device address range allocated to the application from a buffer created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set

- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07661
  `dstImage` **must** not be a protected image
- VUID-VkCopyMemoryToImageIndirectInfoKHR-aspectMask-07662
  The `aspectMask` member for every subresource in `pImageSubresources` **must** only have a single bit set
- VUID-VkCopyMemoryToImageIndirectInfoKHR-aspectMask-12287
  The `aspectMask` member for every subresource in `pImageSubresources` **must** specify an aspect present in `dstImage`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07664
  `dstImage` **must** have been created with the VK_IMAGE_USAGE_TRANSFER_DST_BIT usage flag set
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07665
  If `dstImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07973
  `dstImage` **must** have a sample count equal to VK_SAMPLE_COUNT_1_BIT
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImageLayout-07667
  `dstImageLayout` **must** specify the layout of the image subresources of `dstImage` at the time this command is executed on a `VkDevice`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImageLayout-07669
  `dstImageLayout` **must** be VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL, VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, or VK_IMAGE_LAYOUT_GENERAL
- VUID-VkCopyMemoryToImageIndirectInfoKHR-mipLevel-07670
  The specified `mipLevel` of each region in `pImageSubresources` **must** be less than the `mipLevels` specified in VkImageCreateInfo when `dstImage` was created
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12288
  If `dstImage` is not of type VK_IMAGE_TYPE_3D, and the specified `layerCount` of each region in `pImageSubresources` is not VK_REMAINING_ARRAY_LAYERS, the specified `baseArrayLayer` + `layerCount` of each region in `pImageSubresources` **must** be less than or equal to the `arrayLayers` specified in VkImageCreateInfo when `dstImage` was created
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12289
  If `dstImage` is of type VK_IMAGE_TYPE_3D, and the specified `layerCount` of each region in `pImageSubresources` is not VK_REMAINING_ARRAY_LAYERS, for each destination region, (`imageSubresource.baseArrayLayer` + `imageSubresource.layerCount`) **must** be less than or equal to the depth of the specified subresource
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12290
  If `dstImage` is of type VK_IMAGE_TYPE_3D, and the specified `layerCount` of each region in `pImageSubresources` is not VK_REMAINING_ARRAY_LAYERS, for each destination region, if (`imageSubresource.baseArrayLayer` + `imageSubresource.layerCount`) does not equal the depth of the specified subresource, `imageSubresource.layerCount` **must** be a multiple of the texel block extent depth of the VkFormat of `dstImage`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12291
  If `dstImage` is of type VK_IMAGE_TYPE_3D, for each destination region,

`imageSubresource.baseArrayLayer` **must** be a multiple of the texel block extent depth of the VkFormat of `dstImage`

- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12292
  If `dstImage` is of type VK_IMAGE_TYPE_3D, for each destination region, `imageSubresource.baseArrayLayer` **must** be less than or equal to the depth of the specified subresource
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07673
  `dstImage` **must** not have been created with `flags` containing VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT
- VUID-VkCopyMemoryToImageIndirectInfoKHR-commandBuffer-07674
  If the queue family used to create the VkCommandPool which `commandBuffer` was allocated from does not support VK_QUEUE_GRAPHICS_BIT, for each region, the `aspectMask` member of `pImageSubresources` **must** not be VK_IMAGE_ASPECT_DEPTH_BIT or VK_IMAGE_ASPECT_STENCIL_BIT
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-10974
  The format features of `dstImage` **must** contain VK_FORMAT_FEATURE_TRANSFER_DST_BIT
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-10975
  Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, and **must** not be accessed by more than one destination region, as specified in `copyAddressRange` and accessed according to Buffer and Image Addressing

Valid Usage (Implicit)

- VUID-VkCopyMemoryToImageIndirectInfoKHR-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_COPY_MEMORY_TO_IMAGE_INDIRECT_INFO_KHR
- VUID-VkCopyMemoryToImageIndirectInfoKHR-pNext-pNext
  `pNext` **must** be `NULL`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-srcCopyFlags-parameter
  If `srcCopyFlags` is not `0`, `srcCopyFlags` **must** be a valid combination of VkAddressCopyFlagBitsKHR values
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-parameter
  `dstImage` **must** be a valid VkImage handle
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImageLayout-parameter
  `dstImageLayout` **must** be a valid VkImageLayout value
- VUID-VkCopyMemoryToImageIndirectInfoKHR-pImageSubresources-parameter
  `pImageSubresources` **must** be a valid pointer to an array of `copyCount` valid VkImageSubresourceLayers structures
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyCount-arraylength
  `copyCount` **must** be greater than `0`

The structure describing source and destination memory regions,

VkCopyMemoryToImageIndirectCommandKHR is defined as:

```
// Provided by VK_KHR_copy_memory_indirect
typedef struct VkCopyMemoryToImageIndirectCommandKHR {
    VkDeviceAddress             srcAddress;
    uint32_t                    bufferRowLength;
    uint32_t                    bufferImageHeight;
    VkImageSubresourceLayers    imageSubresource;
    VkOffset3D                  imageOffset;
    VkExtent3D                  imageExtent;
} VkCopyMemoryToImageIndirectCommandKHR;
```

- srcAddress is the starting address of the source device memory to copy from.
- bufferRowLength and bufferImageHeight specify in texels a subregion of a larger two- or three-dimensional image in buffer memory, and control the addressing calculations. If either of these values is zero, that aspect of the buffer memory is considered to be tightly packed according to the imageExtent.
- imageSubresource is a VkImageSubresourceLayers structure used to specify the specific image subresources of the image used for the destination image data, which **must** match the value specified in corresponding index of the pCopyMemoryToImageIndirectInfo->pImageSubresources array of vkCmdCopyMemoryToImageIndirectKHR during command recording.
- imageOffset selects the initial x, y, z offsets in texels of the sub-region of the destination image data.
- imageExtent is the size in texels of the destination image in width, height and depth.

Valid Usage

- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-10963
  The srcAddress **must** be 4 byte aligned
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12282
  If dstImage does not have either a depth/stencil format or a multi-planar format, srcAddress **must** be a multiple of the texel block size
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12283
  If dstImage has a multi-planar format, srcAddress **must** be a multiple of the element size of the compatible format for the format and the aspectMask of the imageSubresource as defined in Compatible Formats of Planes of Multi-Planar Formats
- VUID-VkCopyMemoryToImageIndirectCommandKHR-bufferRowLength-10964
  bufferRowLength **must** be 0, or greater than or equal to the width member of imageExtent
- VUID-VkCopyMemoryToImageIndirectCommandKHR-bufferImageHeight-10965
  bufferImageHeight **must** be 0, or greater than or equal to the height member of imageExtent
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10966
  imageOffset **must** specify a valid offset in the destination image
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageExtent-10967

`imageExtent` **must** specify a valid region in the destination image and **can** be `0`

- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-10968
  The memory allocation backing `srcAddress` **must** be large enough to contain all locations that are accessed according to Buffer and Image Addressing
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10969
  The `imageOffset` and `imageExtent` region **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in VkQueueFamilyProperties
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10970
  For each destination region, `imageOffset.x` and (`imageExtent.width` + `imageOffset.x`) **must** both be greater than or equal to `0` and less than or equal to the width of the specified subresource
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10971
  For each destination region, `imageOffset.y` and (`imageExtent.height` + `imageOffset.y`) **must** both be greater than or equal to `0` and less than or equal to the height of the specified subresource
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageSubresource-12284
  The members of `imageSubresource` **must** be identical to the members of the VkImageSubresourceLayers structure specified in the corresponding index of the `pCopyMemoryToImageIndirectInfo->pImageSubresources` array of vkCmdCopyMemoryToImageIndirectKHR during command recording
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12285
  If `dstImage` is of type VK_IMAGE_TYPE_1D, `imageOffset.y` **must** be `0` and `imageExtent.height` **must** be `1`
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12286
  If `dstImage` is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, `imageOffset.z` **must** be `0` and `imageExtent.depth` **must** be `1`
- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-12214
  `srcAddress` **must** be a device address allocated to the application from a buffer created with the VK_BUFFER_USAGE_TRANSFER_SRC_BIT usage flag set

Valid Usage (Implicit)

- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-parameter
  `srcAddress` **must** be a valid VkDeviceAddress value
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageSubresource-parameter
  `imageSubresource` **must** be a valid VkImageSubresourceLayers structure

24.7. Image Copies With Scaling

To copy regions of a source image into a destination image, potentially performing format conversion, arbitrary scaling, and filtering, call:

```
// Provided by VK_VERSION_1_0
void vkCmdBlitImage(
    VkCommandBuffer                             commandBuffer,
    VkImage                                     srcImage,
    VkImageLayout                               srcImageLayout,
    VkImage                                     dstImage,
    VkImageLayout                               dstImageLayout,
    uint32_t                                    regionCount,
    const VkImageBlit*                          pRegions,
    VkFilter                                    filter);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `srcImage` is the source image.
- `srcImageLayout` is the layout of the source image subresources for the blit.
- `dstImage` is the destination image.
- `dstImageLayout` is the layout of the destination image subresources for the blit.
- `regionCount` is the number of regions to blit.
- `pRegions` is a pointer to an array of VkImageBlit structures specifying the regions to blit.
- `filter` is a VkFilter specifying the filter to apply if the blits require scaling.

`vkCmdBlitImage` **must** not be used for multisampled source or destination images. Use vkCmdResolveImage for this purpose.

As the sizes of the source and destination extents **can** differ in any dimension, texels in the source extent are scaled and filtered to the destination extent. Scaling occurs via the following operations:

- For each destination texel, the integer coordinate of that texel is converted to an unnormalized texture coordinate, using the effective inverse of the equations described in unnormalized to integer conversion:

$$u_{base} = i + \frac{1}{2}$$

$$v_{base} = j + \frac{1}{2}$$

$$w_{base} = k + \frac{1}{2}$$

- These base coordinates are then offset by the first destination offset:

$$u_{offset} = u_{base} - x_{dst0}$$

$$v_{offset} = v_{base} - y_{dst0}$$

$$w_{offset} = w_{base} - z_{dst0}$$

$$a_{offset} = a - \texttt{baseArrayCount}_{dst}$$

- The scale is determined from the source and destination regions, and applied to the offset coordinates:

$$scale_u = (x_{src1} - x_{src0}) / (x_{dst1} - x_{dst0})$$

$$scale_v = (y_{src1} - y_{src0}) / (y_{dst1} - y_{dst0})$$

$$scale_w = (z_{src1} - z_{src0}) / (z_{dst1} - z_{dst0})$$

$$u_{scaled} = u_{offset} \times scale_u$$

$$v_{scaled} = v_{offset} \times scale_v$$

$$w_{scaled} = w_{offset} \times scale_w$$

- Finally the source offset is added to the scaled coordinates, to determine the final unnormalized coordinates used to sample from `srcImage`:

$$u = u_{scaled} + x_{src0}$$

$$v = v_{scaled} + y_{src0}$$

$$w = w_{scaled} + z_{src0}$$

$$q = \texttt{mipLevel}$$

$$a = a_{offset} + \texttt{baseArrayCount}_{src}$$

These coordinates are used to sample from the source image, as described in Image Operations chapter, with the filter mode equal to that of `filter`, a mipmap mode of VK_SAMPLER_MIPMAP_MODE_NEAREST and an address mode of VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE. Implementations **must** clamp at the edge of the

source image, and **may** additionally clamp to the edge of the source region.

The destination offsets form a box which contains all texels which are written. A component in `dstOffsets`[1] **can** be smaller than the corresponding component in `dstOffsets`[0] and forms the same box as swapped `dstOffsets`. A destination texel exists if the half-texel coordinates u_{base}, v_{base} and w_{base} are all contained inside the region.

NOTE

Due to allowable rounding errors in the generation of the source texture coordinates, it is not always possible to guarantee exactly which source texels will be sampled for a given blit. As rounding errors are implementation-dependent, the exact results of a blitting operation are also implementation-dependent.

While blitting with equal destination coordinates is not permitted, blitting with source coordinates being equal is. However, the resulting coordinate is integer and will approximately land in-between texels when sampled, which may produce unexpected results. Especially for nearest filtering, allowed imprecision in generation of the source coordinate may end up sampling an unexpected texel due to rounding errors if the coordinate is off by one ULP. Implementations are not required to implement the formula above exactly as written. E.g., varying interpolation in a fragment shader may be used.

Blits are done layer by layer starting with the `baseArrayLayer` member of `srcSubresource` for the source and `dstSubresource` for the destination. `layerCount` layers are blitted to the destination image.

When blitting 3D textures, slices in the destination region bounded by `dstOffsets`[0].z and `dstOffsets`[1].z are sampled from slices in the source region bounded by `srcOffsets`[0].z and `srcOffsets`[1].z. If the `filter` parameter is VK_FILTER_LINEAR then the value sampled from the source image is taken by doing linear filtering using the interpolated **z** coordinate represented by **w** in the previous equations. If the `filter` parameter is VK_FILTER_NEAREST then the value sampled from the source image is taken from the single nearest slice, with an implementation-dependent arithmetic rounding mode.

The following filtering and conversion rules apply:

- Integer formats **can** only be converted to other integer formats with the same signedness.
- No format conversion is supported between depth/stencil images. The formats **must** match.
- Format conversions on unorm, snorm, scaled and packed float formats of the copied aspect of the image are performed by first converting the pixels to float values.
- For sRGB source formats, nonlinear RGB values are converted to linear representation prior to filtering.
- After filtering, the float values are first clamped and then cast to the destination image format. In case of sRGB destination format, linear RGB values are converted to nonlinear representation before writing the pixel to the image.

Signed and unsigned integers are converted by first clamping to the representable range of the destination format, then casting the value.

Valid Usage

- VUID-vkCmdBlitImage-commandBuffer-01834
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdBlitImage-commandBuffer-01835
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdBlitImage-commandBuffer-01836
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image
- VUID-vkCmdBlitImage-pRegions-00217
  The union of all destination regions, specified by the elements of `pRegions`, **must** not overlap in memory with any texel that **may** be sampled during the blit operation
- VUID-vkCmdBlitImage-srcImage-01999
  The format features of `srcImage` **must** contain VK_FORMAT_FEATURE_BLIT_SRC_BIT
- VUID-vkCmdBlitImage-srcImage-06421
  `srcImage` **must** not use a format that requires a sampler $Y'C_BC_R$ conversion
- VUID-vkCmdBlitImage-srcImage-00219
  `srcImage` **must** have been created with the VK_IMAGE_USAGE_TRANSFER_SRC_BIT usage flag set
- VUID-vkCmdBlitImage-srcImage-00220
  If `srcImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdBlitImage-srcImageLayout-00221
  `srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-vkCmdBlitImage-srcImageLayout-01398
  `srcImageLayout` **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-vkCmdBlitImage-srcImage-09459
  If `srcImage` and `dstImage` are the same, and an element of `pRegions` contains the `srcSubresource` and `dstSubresource` with matching `mipLevel` and overlapping array layers, then the `srcImageLayout` and `dstImageLayout` **must** be VK_IMAGE_LAYOUT_GENERAL or VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR
- VUID-vkCmdBlitImage-dstImage-02000
  The format features of `dstImage` **must** contain VK_FORMAT_FEATURE_BLIT_DST_BIT
- VUID-vkCmdBlitImage-dstImage-06422
  `dstImage` **must** not use a format that requires a sampler $Y'C_BC_R$ conversion
- VUID-vkCmdBlitImage-dstImage-00224
  `dstImage` **must** have been created with the VK_IMAGE_USAGE_TRANSFER_DST_BIT usage flag set

- VUID-vkCmdBlitImage-dstImage-00225
  If `dstImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdBlitImage-dstImageLayout-00226
  `dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-vkCmdBlitImage-dstImageLayout-01399
  `dstImageLayout` **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-vkCmdBlitImage-srcImage-00229
  If either of `srcImage` or `dstImage` was created with a signed integer VkFormat, the other **must** also have been created with a signed integer VkFormat
- VUID-vkCmdBlitImage-srcImage-00230
  If either of `srcImage` or `dstImage` was created with an unsigned integer color VkFormat, the other **must** also have been created with an unsigned integer color VkFormat
- VUID-vkCmdBlitImage-srcImage-00231
  If either of `srcImage` or `dstImage` was created with a depth/stencil format, the other **must** have exactly the same format
- VUID-vkCmdBlitImage-srcImage-00232
  If `srcImage` was created with a depth/stencil format, `filter` **must** be VK_FILTER_NEAREST
- VUID-vkCmdBlitImage-srcImage-00233
  `srcImage` **must** have been created with a `samples` value of VK_SAMPLE_COUNT_1_BIT
- VUID-vkCmdBlitImage-dstImage-00234
  `dstImage` **must** have been created with a `samples` value of VK_SAMPLE_COUNT_1_BIT
- VUID-vkCmdBlitImage-filter-02001
  If `filter` is VK_FILTER_LINEAR, then the format features of `srcImage` **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdBlitImage-filter-02002
  If `filter` is VK_FILTER_CUBIC_EXT, then the format features of `srcImage` **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdBlitImage-filter-00237
  If `filter` is VK_FILTER_CUBIC_EXT, `srcImage` **must** be of type VK_IMAGE_TYPE_2D
- VUID-vkCmdBlitImage-srcSubresource-01705
  The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in VkImageCreateInfo when `srcImage` was created
- VUID-vkCmdBlitImage-dstSubresource-01706
  The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in VkImageCreateInfo when `dstImage` was created
- VUID-vkCmdBlitImage-srcSubresource-01707
  If `srcSubresource.layerCount` is not VK_REMAINING_ARRAY_LAYERS, `srcSubresource.baseArrayLayer` + `srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in VkImageCreateInfo when

srcImage was created

- VUID-vkCmdBlitImage-dstSubresource-01708
  If dstSubresource.layerCount is not VK_REMAINING_ARRAY_LAYERS, dstSubresource.baseArrayLayer + dstSubresource.layerCount of each element of pRegions **must** be less than or equal to the arrayLayers specified in VkImageCreateInfo when dstImage was created
- VUID-vkCmdBlitImage-dstImage-02545
  dstImage and srcImage **must** not have been created with flags containing VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT
- VUID-vkCmdBlitImage-maintenance8-10207
  If the maintenance8 feature is enabled and srcImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, srcSubresource.baseArrayLayer **must** be 0, and srcSubresource.layerCount and dstSubresource.layerCount **must** each be 1
- VUID-vkCmdBlitImage-maintenance8-10208
  If the maintenance8 feature is enabled and dstImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, dstSubresource.baseArrayLayer **must** be 0, and srcSubresource.layerCount and dstSubresource.layerCount **must** each be 1
- VUID-vkCmdBlitImage-maintenance8-10579
  If the maintenance8 feature is enabled, dstImage is VK_IMAGE_TYPE_3D, and srcImage is not of type VK_IMAGE_TYPE_3D, then for each element of pRegions, the absolute difference of the z member of each member of dstOffsets **must** equal srcSubresource.layerCount
- VUID-vkCmdBlitImage-maintenance8-10580
  If the maintenance8 feature is enabled, srcImage is VK_IMAGE_TYPE_3D, and dstImage is not of type VK_IMAGE_TYPE_3D, then for each element of pRegions, the absolute difference of the z member of each member of srcOffsets **must** equal dstSubresource.layerCount
- VUID-vkCmdBlitImage-srcImage-00240
  If the maintenance8 feature is not enabled and either srcImage or dstImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, srcSubresource.baseArrayLayer and dstSubresource.baseArrayLayer **must** each be 0, and srcSubresource.layerCount and dstSubresource.layerCount **must** each be 1
- VUID-vkCmdBlitImage-aspectMask-00241
  For each element of pRegions, srcSubresource.aspectMask **must** specify aspects present in srcImage
- VUID-vkCmdBlitImage-aspectMask-00242
  For each element of pRegions, dstSubresource.aspectMask **must** specify aspects present in dstImage
- VUID-vkCmdBlitImage-srcOffset-00243
  For each element of pRegions, srcOffsets[0].x and srcOffsets[1].x **must** both be greater than or equal to 0 and less than or equal to the width of the specified srcSubresource of srcImage
- VUID-vkCmdBlitImage-srcOffset-00244
  For each element of pRegions, srcOffsets[0].y and srcOffsets[1].y **must** both be greater than or equal to 0 and less than or equal to the height of the specified srcSubresource of

srcImage

- VUID-vkCmdBlitImage-srcImage-00245
  If srcImage is of type VK_IMAGE_TYPE_1D, then for each element of pRegions, srcOffsets[0].y **must** be 0 and srcOffsets[1].y **must** be 1
- VUID-vkCmdBlitImage-srcOffset-00246
  For each element of pRegions, srcOffsets[0].z and srcOffsets[1].z **must** both be greater than or equal to 0 and less than or equal to the depth of the specified srcSubresource of srcImage
- VUID-vkCmdBlitImage-srcImage-00247
  If srcImage is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of pRegions, srcOffsets[0].z **must** be 0 and srcOffsets[1].z **must** be 1
- VUID-vkCmdBlitImage-dstOffset-00248
  For each element of pRegions, dstOffsets[0].x and dstOffsets[1].x **must** both be greater than or equal to 0 and less than or equal to the width of the specified dstSubresource of dstImage
- VUID-vkCmdBlitImage-dstOffset-00249
  For each element of pRegions, dstOffsets[0].y and dstOffsets[1].y **must** both be greater than or equal to 0 and less than or equal to the height of the specified dstSubresource of dstImage
- VUID-vkCmdBlitImage-dstImage-00250
  If dstImage is of type VK_IMAGE_TYPE_1D, then for each element of pRegions, dstOffsets[0].y **must** be 0 and dstOffsets[1].y **must** be 1
- VUID-vkCmdBlitImage-dstOffset-00251
  For each element of pRegions, dstOffsets[0].z and dstOffsets[1].z **must** both be greater than or equal to 0 and less than or equal to the depth of the specified dstSubresource of dstImage
- VUID-vkCmdBlitImage-dstImage-00252
  If dstImage is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of pRegions, dstOffsets[0].z **must** be 0 and dstOffsets[1].z **must** be 1
- VUID-vkCmdBlitImage-dstOffsets-12518
  dstOffsets[0].x **must** not be equal to dstOffsets[1].x
- VUID-vkCmdBlitImage-dstOffsets-12519
  dstOffsets[0].y **must** not be equal to dstOffsets[1].y
- VUID-vkCmdBlitImage-dstOffsets-12520
  dstOffsets[0].z **must** not be equal to dstOffsets[1].z

Valid Usage (Implicit)

- VUID-vkCmdBlitImage-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdBlitImage-srcImage-parameter
  srcImage **must** be a valid VkImage handle

- VUID-vkCmdBlitImage-srcImageLayout-parameter
  `srcImageLayout` **must** be a valid VkImageLayout value
- VUID-vkCmdBlitImage-dstImage-parameter
  `dstImage` **must** be a valid VkImage handle
- VUID-vkCmdBlitImage-dstImageLayout-parameter
  `dstImageLayout` **must** be a valid VkImageLayout value
- VUID-vkCmdBlitImage-pRegions-parameter
  `pRegions` **must** be a valid pointer to an array of `regionCount` valid VkImageBlit structures
- VUID-vkCmdBlitImage-filter-parameter
  `filter` **must** be a valid VkFilter value
- VUID-vkCmdBlitImage-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdBlitImage-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdBlitImage-renderpass
  This command **must** only be called outside of a render pass instance
- VUID-vkCmdBlitImage-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdBlitImage-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdBlitImage-regionCount-arraylength
  `regionCount` **must** be greater than `0`
- VUID-vkCmdBlitImage-commonparent
  Each of `commandBuffer`, `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Outside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdBlitImage is not affected by conditional rendering

The VkImageBlit structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkImageBlit {
    VkImageSubresourceLayers    srcSubresource;
    VkOffset3D                  srcOffsets[2];
    VkImageSubresourceLayers    dstSubresource;
    VkOffset3D                  dstOffsets[2];
} VkImageBlit;
```

- srcSubresource is the subresource to blit from.
- srcOffsets is a pointer to an array of two VkOffset3D structures specifying the bounds of the source region within srcSubresource.
- dstSubresource is the subresource to blit into.
- dstOffsets is a pointer to an array of two VkOffset3D structures specifying the bounds of the destination region within dstSubresource.

For each element of the pRegions array, a blit operation is performed for the specified source and destination regions.

Valid Usage

- VUID-VkImageBlit-aspectMask-00238
  The aspectMask member of srcSubresource and dstSubresource **must** match
- VUID-VkImageBlit-layerCount-08800
  If neither of the layerCount members of srcSubresource or dstSubresource are VK_REMAINING_ARRAY_LAYERS, the layerCount members of srcSubresource or dstSubresource **must** match
- VUID-VkImageBlit-layerCount-08801
  If one of the layerCount members of srcSubresource or dstSubresource is VK_REMAINING_ARRAY_LAYERS, the other member **must** be either VK_REMAINING_ARRAY_LAYERS or equal to the arrayLayers member of the VkImageCreateInfo used to create the image minus baseArrayLayer

Valid Usage (Implicit)

- VUID-VkImageBlit-srcSubresource-parameter
  srcSubresource **must** be a valid VkImageSubresourceLayers structure
- VUID-VkImageBlit-dstSubresource-parameter

`dstSubresource` **must** be a valid VkImageSubresourceLayers structure

A more extensible version of the blit image command is defined below.

To copy regions of a source image into a destination image, potentially performing format conversion, arbitrary scaling, and filtering, call:

```
// Provided by VK_VERSION_1_3
void vkCmdBlitImage2(
    VkCommandBuffer                             commandBuffer,
    const VkBlitImageInfo2*                     pBlitImageInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdBlitImage2
void vkCmdBlitImage2KHR(
    VkCommandBuffer                             commandBuffer,
    const VkBlitImageInfo2*                     pBlitImageInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pBlitImageInfo` is a pointer to a VkBlitImageInfo2 structure describing the blit parameters.

This command is functionally identical to vkCmdBlitImage, but includes extensible sub-structures that include `sType` and `pNext` parameters, allowing them to be more easily extended.

Valid Usage

- VUID-vkCmdBlitImage2-commandBuffer-01834
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdBlitImage2-commandBuffer-01835
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdBlitImage2-commandBuffer-01836
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image

Valid Usage (Implicit)

- VUID-vkCmdBlitImage2-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdBlitImage2-pBlitImageInfo-parameter
  `pBlitImageInfo` **must** be a valid pointer to a valid VkBlitImageInfo2 structure
- VUID-vkCmdBlitImage2-commandBuffer-recording

commandBuffer **must** be in the recording state

- VUID-vkCmdBlitImage2-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdBlitImage2-renderpass
  This command **must** only be called outside of a render pass instance
- VUID-vkCmdBlitImage2-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdBlitImage2-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to commandBuffer **must** be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Outside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdBlitImage2 is not affected by conditional rendering

The VkBlitImageInfo2 structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkBlitImageInfo2 {
    VkStructureType        sType;
    const void*            pNext;
    VkImage                srcImage;
    VkImageLayout          srcImageLayout;
    VkImage                dstImage;
    VkImageLayout          dstImageLayout;
    uint32_t               regionCount;
    const VkImageBlit2*    pRegions;
    VkFilter               filter;
} VkBlitImageInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkBlitImageInfo2
typedef VkBlitImageInfo2 VkBlitImageInfo2KHR;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcImage` is the source image.
- `srcImageLayout` is the layout of the source image subresources for the blit.
- `dstImage` is the destination image.
- `dstImageLayout` is the layout of the destination image subresources for the blit.
- `regionCount` is the number of regions to blit.
- `pRegions` is a pointer to an array of VkImageBlit2 structures specifying the regions to blit.
- `filter` is a VkFilter specifying the filter to apply if the blits require scaling.

Valid Usage

- VUID-VkBlitImageInfo2-pRegions-00217
  The union of all destination regions, specified by the elements of `pRegions`, **must** not overlap in memory with any texel that **may** be sampled during the blit operation
- VUID-VkBlitImageInfo2-srcImage-01999
  The format features of `srcImage` **must** contain VK_FORMAT_FEATURE_BLIT_SRC_BIT
- VUID-VkBlitImageInfo2-srcImage-06421
  `srcImage` **must** not use a format that requires a sampler $Y'C_BC_R$ conversion
- VUID-VkBlitImageInfo2-srcImage-00219
  `srcImage` **must** have been created with the VK_IMAGE_USAGE_TRANSFER_SRC_BIT usage flag set
- VUID-VkBlitImageInfo2-srcImage-00220
  If `srcImage` is non-sparse then it **must** be bound completely and contiguously to a single

VkDeviceMemory object

- VUID-VkBlitImageInfo2-srcImageLayout-00221
  srcImageLayout **must** specify the layout of the image subresources of srcImage specified in pRegions at the time this command is executed on a VkDevice
- VUID-VkBlitImageInfo2-srcImageLayout-01398
  srcImageLayout **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-VkBlitImageInfo2-srcImage-09459
  If srcImage and dstImage are the same, and an element of pRegions contains the srcSubresource and dstSubresource with matching mipLevel and overlapping array layers, then the srcImageLayout and dstImageLayout **must** be VK_IMAGE_LAYOUT_GENERAL or VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR
- VUID-VkBlitImageInfo2-dstImage-02000
  The format features of dstImage **must** contain VK_FORMAT_FEATURE_BLIT_DST_BIT
- VUID-VkBlitImageInfo2-dstImage-06422
  dstImage **must** not use a format that requires a sampler $Y'C_BC_R$ conversion
- VUID-VkBlitImageInfo2-dstImage-00224
  dstImage **must** have been created with the VK_IMAGE_USAGE_TRANSFER_DST_BIT usage flag set
- VUID-VkBlitImageInfo2-dstImage-00225
  If dstImage is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-VkBlitImageInfo2-dstImageLayout-00226
  dstImageLayout **must** specify the layout of the image subresources of dstImage specified in pRegions at the time this command is executed on a VkDevice
- VUID-VkBlitImageInfo2-dstImageLayout-01399
  dstImageLayout **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-VkBlitImageInfo2-srcImage-00229
  If either of srcImage or dstImage was created with a signed integer VkFormat, the other **must** also have been created with a signed integer VkFormat
- VUID-VkBlitImageInfo2-srcImage-00230
  If either of srcImage or dstImage was created with an unsigned integer color VkFormat, the other **must** also have been created with an unsigned integer color VkFormat
- VUID-VkBlitImageInfo2-srcImage-00231
  If either of srcImage or dstImage was created with a depth/stencil format, the other **must** have exactly the same format
- VUID-VkBlitImageInfo2-srcImage-00232
  If srcImage was created with a depth/stencil format, filter **must** be VK_FILTER_NEAREST
- VUID-VkBlitImageInfo2-srcImage-00233
  srcImage **must** have been created with a samples value of VK_SAMPLE_COUNT_1_BIT
- VUID-VkBlitImageInfo2-dstImage-00234

dstImage **must** have been created with a samples value of VK_SAMPLE_COUNT_1_BIT

- VUID-VkBlitImageInfo2-filter-02001
  If filter is VK_FILTER_LINEAR, then the format features of srcImage **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-VkBlitImageInfo2-filter-02002
  If filter is VK_FILTER_CUBIC_EXT, then the format features of srcImage **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-VkBlitImageInfo2-filter-00237
  If filter is VK_FILTER_CUBIC_EXT, srcImage **must** be of type VK_IMAGE_TYPE_2D
- VUID-VkBlitImageInfo2-srcSubresource-01705
  The srcSubresource.mipLevel member of each element of pRegions **must** be less than the mipLevels specified in VkImageCreateInfo when srcImage was created
- VUID-VkBlitImageInfo2-dstSubresource-01706
  The dstSubresource.mipLevel member of each element of pRegions **must** be less than the mipLevels specified in VkImageCreateInfo when dstImage was created
- VUID-VkBlitImageInfo2-srcSubresource-01707
  If srcSubresource.layerCount is not VK_REMAINING_ARRAY_LAYERS, srcSubresource.baseArrayLayer + srcSubresource.layerCount of each element of pRegions **must** be less than or equal to the arrayLayers specified in VkImageCreateInfo when srcImage was created
- VUID-VkBlitImageInfo2-dstSubresource-01708
  If dstSubresource.layerCount is not VK_REMAINING_ARRAY_LAYERS, dstSubresource.baseArrayLayer + dstSubresource.layerCount of each element of pRegions **must** be less than or equal to the arrayLayers specified in VkImageCreateInfo when dstImage was created
- VUID-VkBlitImageInfo2-dstImage-02545
  dstImage and srcImage **must** not have been created with flags containing VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT
- VUID-VkBlitImageInfo2-maintenance8-10207
  If the maintenance8 feature is enabled and srcImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, srcSubresource.baseArrayLayer **must** be 0, and srcSubresource.layerCount and dstSubresource.layerCount **must** each be 1
- VUID-VkBlitImageInfo2-maintenance8-10208
  If the maintenance8 feature is enabled and dstImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, dstSubresource.baseArrayLayer **must** be 0, and srcSubresource.layerCount and dstSubresource.layerCount **must** each be 1
- VUID-VkBlitImageInfo2-maintenance8-10579
  If the maintenance8 feature is enabled, dstImage is VK_IMAGE_TYPE_3D, and srcImage is not of type VK_IMAGE_TYPE_3D, then for each element of pRegions, the absolute difference of the z member of each member of dstOffsets **must** equal srcSubresource.layerCount
- VUID-VkBlitImageInfo2-maintenance8-10580
  If the maintenance8 feature is enabled, srcImage is VK_IMAGE_TYPE_3D, and dstImage is not of type VK_IMAGE_TYPE_3D, then for each element of pRegions, the absolute difference of

the z member of each member of srcOffsets **must** equal dstSubresource.layerCount

- VUID-VkBlitImageInfo2-srcImage-00240
  If the maintenance8 feature is not enabled and either srcImage or dstImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, srcSubresource.baseArrayLayer and dstSubresource.baseArrayLayer **must** each be 0, and srcSubresource.layerCount and dstSubresource.layerCount **must** each be 1
- VUID-VkBlitImageInfo2-aspectMask-00241
  For each element of pRegions, srcSubresource.aspectMask **must** specify aspects present in srcImage
- VUID-VkBlitImageInfo2-aspectMask-00242
  For each element of pRegions, dstSubresource.aspectMask **must** specify aspects present in dstImage
- VUID-VkBlitImageInfo2-srcOffset-00243
  For each element of pRegions, srcOffsets[0].x and srcOffsets[1].x **must** both be greater than or equal to 0 and less than or equal to the width of the specified srcSubresource of srcImage
- VUID-VkBlitImageInfo2-srcOffset-00244
  For each element of pRegions, srcOffsets[0].y and srcOffsets[1].y **must** both be greater than or equal to 0 and less than or equal to the height of the specified srcSubresource of srcImage
- VUID-VkBlitImageInfo2-srcImage-00245
  If srcImage is of type VK_IMAGE_TYPE_1D, then for each element of pRegions, srcOffsets[0].y **must** be 0 and srcOffsets[1].y **must** be 1
- VUID-VkBlitImageInfo2-srcOffset-00246
  For each element of pRegions, srcOffsets[0].z and srcOffsets[1].z **must** both be greater than or equal to 0 and less than or equal to the depth of the specified srcSubresource of srcImage
- VUID-VkBlitImageInfo2-srcImage-00247
  If srcImage is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of pRegions, srcOffsets[0].z **must** be 0 and srcOffsets[1].z **must** be 1
- VUID-VkBlitImageInfo2-dstOffset-00248
  For each element of pRegions, dstOffsets[0].x and dstOffsets[1].x **must** both be greater than or equal to 0 and less than or equal to the width of the specified dstSubresource of dstImage
- VUID-VkBlitImageInfo2-dstOffset-00249
  For each element of pRegions, dstOffsets[0].y and dstOffsets[1].y **must** both be greater than or equal to 0 and less than or equal to the height of the specified dstSubresource of dstImage
- VUID-VkBlitImageInfo2-dstImage-00250
  If dstImage is of type VK_IMAGE_TYPE_1D, then for each element of pRegions, dstOffsets[0].y **must** be 0 and dstOffsets[1].y **must** be 1
- VUID-VkBlitImageInfo2-dstOffset-00251
  For each element of pRegions, dstOffsets[0].z and dstOffsets[1].z **must** both be greater

than or equal to `0` and less than or equal to the depth of the specified `dstSubresource` of `dstImage`

- VUID-VkBlitImageInfo2-dstImage-00252
  If `dstImage` is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of `pRegions`, `dstOffsets`[0].z **must** be `0` and `dstOffsets`[1].z **must** be `1`
- VUID-VkBlitImageInfo2-dstOffsets-12518
  `dstOffsets`[0].x **must** not be equal to `dstOffsets`[1].x
- VUID-VkBlitImageInfo2-dstOffsets-12519
  `dstOffsets`[0].y **must** not be equal to `dstOffsets`[1].y
- VUID-VkBlitImageInfo2-dstOffsets-12520
  `dstOffsets`[0].z **must** not be equal to `dstOffsets`[1].z

Valid Usage (Implicit)

- VUID-VkBlitImageInfo2-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_BLIT_IMAGE_INFO_2
- VUID-VkBlitImageInfo2-pNext-pNext
  `pNext` **must** be `NULL`
- VUID-VkBlitImageInfo2-srcImage-parameter
  `srcImage` **must** be a valid VkImage handle
- VUID-VkBlitImageInfo2-srcImageLayout-parameter
  `srcImageLayout` **must** be a valid VkImageLayout value
- VUID-VkBlitImageInfo2-dstImage-parameter
  `dstImage` **must** be a valid VkImage handle
- VUID-VkBlitImageInfo2-dstImageLayout-parameter
  `dstImageLayout` **must** be a valid VkImageLayout value
- VUID-VkBlitImageInfo2-pRegions-parameter
  `pRegions` **must** be a valid pointer to an array of `regionCount` valid VkImageBlit2 structures
- VUID-VkBlitImageInfo2-filter-parameter
  `filter` **must** be a valid VkFilter value
- VUID-VkBlitImageInfo2-regionCount-arraylength
  `regionCount` **must** be greater than `0`
- VUID-VkBlitImageInfo2-commonparent
  Both of `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same VkDevice

The `VkImageBlit2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkImageBlit2 {
    VkStructureType             sType;
    const void*                 pNext;
    VkImageSubresourceLayers    srcSubresource;
    VkOffset3D                  srcOffsets[2];
    VkImageSubresourceLayers    dstSubresource;
    VkOffset3D                  dstOffsets[2];
} VkImageBlit2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkImageBlit2
typedef VkImageBlit2 VkImageBlit2KHR;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcSubresource` is the subresource to blit from.
- `srcOffsets` is a pointer to an array of two VkOffset3D structures specifying the bounds of the source region within `srcSubresource`.
- `dstSubresource` is the subresource to blit into.
- `dstOffsets` is a pointer to an array of two VkOffset3D structures specifying the bounds of the destination region within `dstSubresource`.

For each element of the `pRegions` array, a blit operation is performed for the specified source and destination regions.

Valid Usage

- VUID-VkImageBlit2-aspectMask-00238
  The `aspectMask` member of `srcSubresource` and `dstSubresource` **must** match
- VUID-VkImageBlit2-layerCount-08800
  If neither of the `layerCount` members of `srcSubresource` or `dstSubresource` are VK_REMAINING_ARRAY_LAYERS, the `layerCount` members of `srcSubresource` or `dstSubresource` **must** match
- VUID-VkImageBlit2-layerCount-08801
  If one of the `layerCount` members of `srcSubresource` or `dstSubresource` is VK_REMAINING_ARRAY_LAYERS, the other member **must** be either VK_REMAINING_ARRAY_LAYERS or equal to the `arrayLayers` member of the VkImageCreateInfo used to create the image minus `baseArrayLayer`

Valid Usage (Implicit)

- VUID-VkImageBlit2-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_IMAGE_BLIT_2
- VUID-VkImageBlit2-pNext-pNext
  `pNext` **must** be `NULL`
- VUID-VkImageBlit2-srcSubresource-parameter
  `srcSubresource` **must** be a valid VkImageSubresourceLayers structure
- VUID-VkImageBlit2-dstSubresource-parameter
  `dstSubresource` **must** be a valid VkImageSubresourceLayers structure

24.8. Resolving Multisample Images

To resolve a multisample color image to a non-multisample color image, call:

```
// Provided by VK_VERSION_1_0
void vkCmdResolveImage(
    VkCommandBuffer                             commandBuffer,
    VkImage                                     srcImage,
    VkImageLayout                               srcImageLayout,
    VkImage                                     dstImage,
    VkImageLayout                               dstImageLayout,
    uint32_t                                    regionCount,
    const VkImageResolve*                       pRegions);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `srcImage` is the source image.
- `srcImageLayout` is the layout of the source image subresources for the resolve.
- `dstImage` is the destination image.
- `dstImageLayout` is the layout of the destination image subresources for the resolve.
- `regionCount` is the number of regions to resolve.
- `pRegions` is a pointer to an array of VkImageResolve structures specifying the regions to resolve.

During the resolve the samples corresponding to each pixel location in the source are converted to a single sample before being written to the destination.

If the source format is a floating-point or normalized type, the resolve mode is chosen as implementation-dependent behavior. If the resolve mode requires to calculate the result from multiple samples, such as by computing an average or weighted average of the samples, the values for each pixel are resolved with implementation-defined numerical precision.

If the numeric format of `srcImage` uses sRGB encoding and the resolve mode requires the implementation to convert the samples to floating-point to perform the calculations, the

implementation **should** convert samples from nonlinear to linear before resolving the samples as described in the "sRGB EOTF" section of the Khronos Data Format Specification. In this case, the implementation **must** convert the linear averaged value to nonlinear before writing the resolved result to `dstImage`. If the `maintenance10` feature is enabled, whether a nonlinear to linear conversion happens for sRGB encoded resolve is controlled by `resolveSrgbFormatAppliesTransferFunction`.

If the source format is an integer type, a single sample's value is selected for each pixel.

`srcOffset` and `dstOffset` select the initial `x`, `y`, and `z` offsets in texels of the sub-regions of the source and destination image data. `extent` is the size in texels of the source image to resolve in `width`, `height` and `depth`. Each element of `pRegions` **must** be a region that is contained within its corresponding image.

Resolves are done layer by layer starting with `baseArrayLayer` member of `srcSubresource` for the source and `dstSubresource` for the destination. `layerCount` layers are resolved to the destination image.

Valid Usage

- VUID-vkCmdResolveImage-commandBuffer-01837
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdResolveImage-commandBuffer-01838
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdResolveImage-commandBuffer-01839
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image
- VUID-vkCmdResolveImage-pRegions-00255
  The union of all source regions, and the union of all destination regions, specified by the elements of `pRegions`, **must** not overlap in memory
- VUID-vkCmdResolveImage-srcImage-00256
  If `srcImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdResolveImage-srcImage-00257
  `srcImage` **must** have a sample count equal to any valid sample count value other than VK_SAMPLE_COUNT_1_BIT
- VUID-vkCmdResolveImage-dstImage-00258
  If `dstImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdResolveImage-dstImage-00259
  `dstImage` **must** have a sample count equal to VK_SAMPLE_COUNT_1_BIT
- VUID-vkCmdResolveImage-srcImageLayout-00260
  `srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`

- VUID-vkCmdResolveImage-srcImageLayout-01400
  `srcImageLayout` **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-vkCmdResolveImage-dstImageLayout-00262
  `dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-vkCmdResolveImage-dstImageLayout-01401
  `dstImageLayout` **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-vkCmdResolveImage-maintenance10-11799
  If the `maintenance10` feature is enabled, the format features of `dstImage` **must** contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT or VK_FORMAT_FEATURE_DEPTH_STENCIL_ATTACHMENT_BIT
- VUID-vkCmdResolveImage-dstImage-02003
  The format features of `dstImage` **must** contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT if the `maintenance10` feature is not enabled
- VUID-vkCmdResolveImage-srcImage-01386
  `srcImage` and `dstImage` **must** have been created with the same image format
- VUID-vkCmdResolveImage-srcSubresource-01709
  The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in VkImageCreateInfo when `srcImage` was created
- VUID-vkCmdResolveImage-dstSubresource-01710
  The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in VkImageCreateInfo when `dstImage` was created
- VUID-vkCmdResolveImage-srcSubresource-01711
  If `srcSubresource.layerCount` is not VK_REMAINING_ARRAY_LAYERS, `srcSubresource.baseArrayLayer` + `srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in VkImageCreateInfo when `srcImage` was created
- VUID-vkCmdResolveImage-dstSubresource-01712
  If `dstSubresource.layerCount` is not VK_REMAINING_ARRAY_LAYERS, `dstSubresource.baseArrayLayer` + `dstSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in VkImageCreateInfo when `dstImage` was created
- VUID-vkCmdResolveImage-dstImage-02546
  `dstImage` and `srcImage` **must** not have been created with `flags` containing VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT
- VUID-vkCmdResolveImage-srcImage-04446
  If `dstImage` is of type VK_IMAGE_TYPE_3D, then for each element of `pRegions`, `srcSubresource.layerCount` **must** be `1`
- VUID-vkCmdResolveImage-srcImage-04447
  If `dstImage` is of type VK_IMAGE_TYPE_3D, then for each element of `pRegions`,

dstSubresource.baseArrayLayer **must** be 0 and dstSubresource.layerCount **must** be 1

- VUID-vkCmdResolveImage-srcOffset-00269
  For each element of pRegions, srcOffset.x and (extent.width + srcOffset.x) **must** both be greater than or equal to 0 and less than or equal to the width of the specified srcSubresource of srcImage
- VUID-vkCmdResolveImage-srcOffset-00270
  For each element of pRegions, srcOffset.y and (extent.height + srcOffset.y) **must** both be greater than or equal to 0 and less than or equal to the height of the specified srcSubresource of srcImage
- VUID-vkCmdResolveImage-srcImage-00271
  If srcImage is of type VK_IMAGE_TYPE_1D, then for each element of pRegions, srcOffset.y **must** be 0 and extent.height **must** be 1
- VUID-vkCmdResolveImage-srcOffset-00272
  For each element of pRegions, srcOffset.z and (extent.depth + srcOffset.z) **must** both be greater than or equal to 0 and less than or equal to the depth of the specified srcSubresource of srcImage
- VUID-vkCmdResolveImage-srcImage-00273
  If srcImage is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of pRegions, srcOffset.z **must** be 0 and extent.depth **must** be 1
- VUID-vkCmdResolveImage-dstOffset-00274
  For each element of pRegions, dstOffset.x and (extent.width + dstOffset.x) **must** both be greater than or equal to 0 and less than or equal to the width of the specified dstSubresource of dstImage
- VUID-vkCmdResolveImage-dstOffset-00275
  For each element of pRegions, dstOffset.y and (extent.height + dstOffset.y) **must** both be greater than or equal to 0 and less than or equal to the height of the specified dstSubresource of dstImage
- VUID-vkCmdResolveImage-dstImage-00276
  If dstImage is of type VK_IMAGE_TYPE_1D, then for each element of pRegions, dstOffset.y **must** be 0 and extent.height **must** be 1
- VUID-vkCmdResolveImage-dstOffset-00277
  For each element of pRegions, dstOffset.z and (extent.depth + dstOffset.z) **must** both be greater than or equal to 0 and less than or equal to the depth of the specified dstSubresource of dstImage
- VUID-vkCmdResolveImage-dstImage-00278
  If dstImage is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of pRegions, dstOffset.z **must** be 0 and extent.depth **must** be 1
- VUID-vkCmdResolveImage-srcImage-06762
  srcImage **must** have been created with the VK_IMAGE_USAGE_TRANSFER_SRC_BIT usage flag set
- VUID-vkCmdResolveImage-srcImage-06763
  The format features of srcImage **must** contain VK_FORMAT_FEATURE_TRANSFER_SRC_BIT
- VUID-vkCmdResolveImage-dstImage-06764

`dstImage` **must** have been created with the VK_IMAGE_USAGE_TRANSFER_DST_BIT usage flag set

- VUID-vkCmdResolveImage-dstImage-06765
  The format features of `dstImage` **must** contain VK_FORMAT_FEATURE_TRANSFER_DST_BIT
- VUID-vkCmdResolveImage-srcSubresource-11800
  `srcSubresource.aspectMask` for each element in `pRegions` **must** not specify an aspect which is not part of the image format of `srcImage`
- VUID-vkCmdResolveImage-dstSubresource-11801
  `dstSubresource.aspectMask` for each element in `pRegions` **must** not specify an aspect which is not part of the image format of `dstImage`
- VUID-vkCmdResolveImage-srcSubresource-11802
  `srcSubresource.aspectMask` **must** equal `dstSubresource.aspectMask` for each element in `pRegions`

Valid Usage (Implicit)

- VUID-vkCmdResolveImage-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdResolveImage-srcImage-parameter
  `srcImage` **must** be a valid VkImage handle
- VUID-vkCmdResolveImage-srcImageLayout-parameter
  `srcImageLayout` **must** be a valid VkImageLayout value
- VUID-vkCmdResolveImage-dstImage-parameter
  `dstImage` **must** be a valid VkImage handle
- VUID-vkCmdResolveImage-dstImageLayout-parameter
  `dstImageLayout` **must** be a valid VkImageLayout value
- VUID-vkCmdResolveImage-pRegions-parameter
  `pRegions` **must** be a valid pointer to an array of `regionCount` valid VkImageResolve structures
- VUID-vkCmdResolveImage-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdResolveImage-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdResolveImage-renderpass
  This command **must** only be called outside of a render pass instance
- VUID-vkCmdResolveImage-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdResolveImage-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdResolveImage-regionCount-arraylength

`regionCount` **must** be greater than `0`

- VUID-vkCmdResolveImage-commonparent
  Each of `commandBuffer`, `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Outside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdResolveImage is not affected by conditional rendering

The `VkImageResolve` structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkImageResolve {
    VkImageSubresourceLayers    srcSubresource;
    VkOffset3D                  srcOffset;
    VkImageSubresourceLayers    dstSubresource;
    VkOffset3D                  dstOffset;
    VkExtent3D                  extent;
} VkImageResolve;
```

- `srcSubresource` and `dstSubresource` are VkImageSubresourceLayers structures specifying the image subresources of the images used for the source and destination image data, respectively. Resolve of depth/stencil images is not supported. VkImageResolve2 **can** support resolve of depth/stencil images with `maintenance10` instead.
- `srcOffset` and `dstOffset` select the initial `x`, `y`, and `z` offsets in texels of the sub-regions of the source and destination image data.
- `extent` is the size in texels of the source image to resolve in `width`, `height` and `depth`.

Valid Usage

- VUID-VkImageResolve-aspectMask-10981
  The `aspectMask` member of `srcSubresource` and `dstSubresource` **must** only contain VK_IMAGE_ASPECT_COLOR_BIT
- VUID-VkImageResolve-layerCount-08803
  If neither of the `layerCount` members of `srcSubresource` or `dstSubresource` are VK_REMAINING_ARRAY_LAYERS, the `layerCount` member of `srcSubresource` and `dstSubresource` **must** match
- VUID-VkImageResolve-layerCount-08804
  If one of the `layerCount` members of `srcSubresource` or `dstSubresource` is VK_REMAINING_ARRAY_LAYERS, the other member **must** be either VK_REMAINING_ARRAY_LAYERS or equal to the `arrayLayers` member of the VkImageCreateInfo used to create the image minus `baseArrayLayer`

Valid Usage (Implicit)

- VUID-VkImageResolve-srcSubresource-parameter
  `srcSubresource` **must** be a valid VkImageSubresourceLayers structure
- VUID-VkImageResolve-dstSubresource-parameter
  `dstSubresource` **must** be a valid VkImageSubresourceLayers structure

A more extensible version of the resolve image command is defined below.

To resolve a multisample image to a non-multisample image, call:

```
// Provided by VK_VERSION_1_3
void vkCmdResolveImage2(
    VkCommandBuffer                             commandBuffer,
    const VkResolveImageInfo2*                  pResolveImageInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdResolveImage2
void vkCmdResolveImage2KHR(
    VkCommandBuffer                             commandBuffer,
    const VkResolveImageInfo2*                  pResolveImageInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pResolveImageInfo` is a pointer to a VkResolveImageInfo2 structure describing the resolve parameters.

This command is functionally identical to vkCmdResolveImage, but includes extensible sub-

structures that include `sType` and `pNext` parameters, allowing them to be more easily extended.

Valid Usage

- VUID-vkCmdResolveImage2-commandBuffer-01837
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdResolveImage2-commandBuffer-01838
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdResolveImage2-commandBuffer-01839
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image

Valid Usage (Implicit)

- VUID-vkCmdResolveImage2-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdResolveImage2-pResolveImageInfo-parameter
  `pResolveImageInfo` **must** be a valid pointer to a valid VkResolveImageInfo2 structure
- VUID-vkCmdResolveImage2-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdResolveImage2-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdResolveImage2-renderpass
  This command **must** only be called outside of a render pass instance
- VUID-vkCmdResolveImage2-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdResolveImage2-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Outside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdResolveImage2 is not affected by conditional rendering

The VkResolveImageInfo2 structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkResolveImageInfo2 {
    VkStructureType           sType;
    const void*               pNext;
    VkImage                   srcImage;
    VkImageLayout             srcImageLayout;
    VkImage                   dstImage;
    VkImageLayout             dstImageLayout;
    uint32_t                  regionCount;
    const VkImageResolve2*    pRegions;
} VkResolveImageInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkResolveImageInfo2
typedef VkResolveImageInfo2 VkResolveImageInfo2KHR;
```

- sType is a VkStructureType value identifying this structure.
- pNext is NULL or a pointer to a structure extending this structure.
- srcImage is the source image.
- srcImageLayout is the layout of the source image subresources for the resolve.
- dstImage is the destination image.
- dstImageLayout is the layout of the destination image subresources for the resolve.
- regionCount is the number of regions to resolve.
- pRegions is a pointer to an array of VkImageResolve2 structures specifying the regions to resolve.

If the source format is a floating-point or normalized type, the resolve mode is chosen as implementation-dependent behavior, unless VkResolveImageModeInfoKHR is included in the pNext

chain, in which case it is defined by VkResolveImageModeInfoKHR::resolveMode. If the resolve mode requires to calculate the result from multiple samples, such as by computing an average or weighted average of the samples, the values for each pixel are resolved with implementation-defined numerical precision.

If the numeric format of srcImage uses sRGB encoding and the resolve mode requires the implementation to convert the samples to floating-point to perform the calculations, the implementation **should** convert samples from nonlinear to linear before resolving the samples as described in the "sRGB EOTF" section of the Khronos Data Format Specification. In this case, the implementation **must** convert the linear averaged value to nonlinear before writing the resolved result to dstImage. If the maintenance10 feature is enabled, whether a nonlinear to linear conversion happens for sRGB encoded resolve is controlled by resolveSrgbFormatAppliesTransferFunction. If VkResolveImageModeInfoKHR is included in the pNext chain, this default behavior **can** be overridden with VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR or VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR flags.

If the source format is an integer type, a single sample's value is selected for each pixel, unless VkResolveImageModeInfoKHR is included in the pNext chain, in which case it is defined by VkResolveImageModeInfoKHR::resolveMode or VkResolveImageModeInfoKHR::stencilResolveMode depending on which aspect is being resolved.

Valid Usage

- VUID-VkResolveImageInfo2-pRegions-00255
  The union of all source regions, and the union of all destination regions, specified by the elements of pRegions, **must** not overlap in memory
- VUID-VkResolveImageInfo2-srcImage-00256
  If srcImage is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-VkResolveImageInfo2-srcImage-00257
  srcImage **must** have a sample count equal to any valid sample count value other than VK_SAMPLE_COUNT_1_BIT
- VUID-VkResolveImageInfo2-dstImage-00258
  If dstImage is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-VkResolveImageInfo2-dstImage-00259
  dstImage **must** have a sample count equal to VK_SAMPLE_COUNT_1_BIT
- VUID-VkResolveImageInfo2-srcImageLayout-00260
  srcImageLayout **must** specify the layout of the image subresources of srcImage specified in pRegions at the time this command is executed on a VkDevice
- VUID-VkResolveImageInfo2-srcImageLayout-01400
  srcImageLayout **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-VkResolveImageInfo2-dstImageLayout-00262
  dstImageLayout **must** specify the layout of the image subresources of dstImage specified in

pRegions at the time this command is executed on a VkDevice

- VUID-VkResolveImageInfo2-dstImageLayout-01401
  dstImageLayout **must** be VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR, VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL or VK_IMAGE_LAYOUT_GENERAL
- VUID-VkResolveImageInfo2-maintenance10-11799
  If the maintenance10 feature is enabled, the format features of dstImage **must** contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT or VK_FORMAT_FEATURE_DEPTH_STENCIL_ATTACHMENT_BIT
- VUID-VkResolveImageInfo2-dstImage-02003
  The format features of dstImage **must** contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT if the maintenance10 feature is not enabled
- VUID-VkResolveImageInfo2-srcImage-01386
  srcImage and dstImage **must** have been created with the same image format
- VUID-VkResolveImageInfo2-srcSubresource-01709
  The srcSubresource.mipLevel member of each element of pRegions **must** be less than the mipLevels specified in VkImageCreateInfo when srcImage was created
- VUID-VkResolveImageInfo2-dstSubresource-01710
  The dstSubresource.mipLevel member of each element of pRegions **must** be less than the mipLevels specified in VkImageCreateInfo when dstImage was created
- VUID-VkResolveImageInfo2-srcSubresource-01711
  If srcSubresource.layerCount is not VK_REMAINING_ARRAY_LAYERS, srcSubresource.baseArrayLayer + srcSubresource.layerCount of each element of pRegions **must** be less than or equal to the arrayLayers specified in VkImageCreateInfo when srcImage was created
- VUID-VkResolveImageInfo2-dstSubresource-01712
  If dstSubresource.layerCount is not VK_REMAINING_ARRAY_LAYERS, dstSubresource.baseArrayLayer + dstSubresource.layerCount of each element of pRegions **must** be less than or equal to the arrayLayers specified in VkImageCreateInfo when dstImage was created
- VUID-VkResolveImageInfo2-dstImage-02546
  dstImage and srcImage **must** not have been created with flags containing VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT
- VUID-VkResolveImageInfo2-srcImage-04446
  If dstImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, srcSubresource.layerCount **must** be 1
- VUID-VkResolveImageInfo2-srcImage-04447
  If dstImage is of type VK_IMAGE_TYPE_3D, then for each element of pRegions, dstSubresource.baseArrayLayer **must** be 0 and dstSubresource.layerCount **must** be 1
- VUID-VkResolveImageInfo2-srcOffset-00269
  For each element of pRegions, srcOffset.x and (extent.width + srcOffset.x) **must** both be greater than or equal to 0 and less than or equal to the width of the specified srcSubresource of srcImage

- VUID-VkResolveImageInfo2-srcOffset-00270
  For each element of `pRegions`, `srcOffset.y` and (`extent.height` + `srcOffset.y`) **must** both be greater than or equal to `0` and less than or equal to the height of the specified `srcSubresource` of `srcImage`
- VUID-VkResolveImageInfo2-srcImage-00271
  If `srcImage` is of type VK_IMAGE_TYPE_1D, then for each element of `pRegions`, `srcOffset.y` **must** be `0` and `extent.height` **must** be `1`
- VUID-VkResolveImageInfo2-srcOffset-00272
  For each element of `pRegions`, `srcOffset.z` and (`extent.depth` + `srcOffset.z`) **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `srcSubresource` of `srcImage`
- VUID-VkResolveImageInfo2-srcImage-00273
  If `srcImage` is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of `pRegions`, `srcOffset.z` **must** be `0` and `extent.depth` **must** be `1`
- VUID-VkResolveImageInfo2-dstOffset-00274
  For each element of `pRegions`, `dstOffset.x` and (`extent.width` + `dstOffset.x`) **must** both be greater than or equal to `0` and less than or equal to the width of the specified `dstSubresource` of `dstImage`
- VUID-VkResolveImageInfo2-dstOffset-00275
  For each element of `pRegions`, `dstOffset.y` and (`extent.height` + `dstOffset.y`) **must** both be greater than or equal to `0` and less than or equal to the height of the specified `dstSubresource` of `dstImage`
- VUID-VkResolveImageInfo2-dstImage-00276
  If `dstImage` is of type VK_IMAGE_TYPE_1D, then for each element of `pRegions`, `dstOffset.y` **must** be `0` and `extent.height` **must** be `1`
- VUID-VkResolveImageInfo2-dstOffset-00277
  For each element of `pRegions`, `dstOffset.z` and (`extent.depth` + `dstOffset.z`) **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `dstSubresource` of `dstImage`
- VUID-VkResolveImageInfo2-dstImage-00278
  If `dstImage` is of type VK_IMAGE_TYPE_1D or VK_IMAGE_TYPE_2D, then for each element of `pRegions`, `dstOffset.z` **must** be `0` and `extent.depth` **must** be `1`
- VUID-VkResolveImageInfo2-srcImage-06762
  `srcImage` **must** have been created with the VK_IMAGE_USAGE_TRANSFER_SRC_BIT usage flag set
- VUID-VkResolveImageInfo2-srcImage-06763
  The format features of `srcImage` **must** contain VK_FORMAT_FEATURE_TRANSFER_SRC_BIT
- VUID-VkResolveImageInfo2-dstImage-06764
  `dstImage` **must** have been created with the VK_IMAGE_USAGE_TRANSFER_DST_BIT usage flag set
- VUID-VkResolveImageInfo2-dstImage-06765
  The format features of `dstImage` **must** contain VK_FORMAT_FEATURE_TRANSFER_DST_BIT
- VUID-VkResolveImageInfo2-srcSubresource-11800

srcSubresource.aspectMask for each element in pRegions **must** not specify an aspect which is not part of the image format of srcImage

- VUID-VkResolveImageInfo2-dstSubresource-11801
  dstSubresource.aspectMask for each element in pRegions **must** not specify an aspect which is not part of the image format of dstImage
- VUID-VkResolveImageInfo2-srcSubresource-11802
  srcSubresource.aspectMask **must** equal dstSubresource.aspectMask for each element in pRegions
- VUID-VkResolveImageInfo2-pNext-10982
  If VkResolveImageModeInfoKHR is included in the pNext chain, flags includes VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR or VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR, then the format of srcImage and dstImage **must** use sRGB encoding
- VUID-VkResolveImageInfo2-srcImage-10983
  If srcImage has a color format and VkResolveImageModeInfoKHR is included in the pNext chain, its resolveMode **must** not be VK_RESOLVE_MODE_NONE
- VUID-VkResolveImageInfo2-srcImage-10984
  If srcImage has a non-integer color format, and VkResolveImageModeInfoKHR is included in the pNext chain, its resolveMode **must** be VK_RESOLVE_MODE_AVERAGE_BIT
- VUID-VkResolveImageInfo2-srcImage-10985
  If srcImage has an integer color format, and VkResolveImageModeInfoKHR is included in the pNext chain, its resolveMode **must** be VK_RESOLVE_MODE_SAMPLE_ZERO_BIT
- VUID-VkResolveImageInfo2-srcImage-10986
  If srcImage has a depth-stencil format, VkResolveImageModeInfoKHR **must** be included in the pNext chain
- VUID-VkResolveImageInfo2-srcImage-10987
  If srcImage has a depth-stencil format, and a depth aspect is referenced by pRegions, VkResolveImageModeInfoKHR::resolveMode **must** not be VK_RESOLVE_MODE_NONE
- VUID-VkResolveImageInfo2-srcImage-10988
  If srcImage has a depth-stencil format, and a stencil aspect is referenced by pRegions, VkResolveImageModeInfoKHR::stencilResolveMode **must** not be VK_RESOLVE_MODE_NONE
- VUID-VkResolveImageInfo2-srcImage-10989
  If srcImage has a depth-stencil format, and a depth aspect is referenced by pRegions, VkResolveImageModeInfoKHR::resolveMode **must** be one of the bits set in VkPhysicalDeviceDepthStencilResolveProperties::supportedDepthResolveModes
- VUID-VkResolveImageInfo2-srcImage-10990
  If srcImage has a depth-stencil format, and a stencil aspect is referenced by pRegions, VkResolveImageModeInfoKHR::stencilResolveMode **must** be one of the bits set in VkPhysicalDeviceDepthStencilResolveProperties::supportedStencilResolveModes
- VUID-VkResolveImageInfo2-srcImage-10991
  If srcImage has a depth-stencil format, and both a depth aspect and stencil aspect is referenced by pRegions, and VkPhysicalDeviceDepthStencilResolveProperties

::independentResolve is VK_FALSE, VkResolveImageModeInfoKHR::resolveMode **must** be equal to VkResolveImageModeInfoKHR::stencilResolveMode

- VUID-VkResolveImageInfo2-srcImage-10992
  If srcImage has a depth-stencil format containing both a depth aspect and stencil aspect, and VkPhysicalDeviceDepthStencilResolveProperties::independentResolveNone is VK_FALSE, every element of pRegions **must** contain both depth and stencil aspects

Valid Usage (Implicit)

- VUID-VkResolveImageInfo2-sType-sType
  sType **must** be VK_STRUCTURE_TYPE_RESOLVE_IMAGE_INFO_2
- VUID-VkResolveImageInfo2-pNext-pNext
  pNext **must** be NULL or a pointer to a valid instance of VkResolveImageModeInfoKHR
- VUID-VkResolveImageInfo2-sType-unique
  The sType value of each structure in the pNext chain **must** be unique
- VUID-VkResolveImageInfo2-srcImage-parameter
  srcImage **must** be a valid VkImage handle
- VUID-VkResolveImageInfo2-srcImageLayout-parameter
  srcImageLayout **must** be a valid VkImageLayout value
- VUID-VkResolveImageInfo2-dstImage-parameter
  dstImage **must** be a valid VkImage handle
- VUID-VkResolveImageInfo2-dstImageLayout-parameter
  dstImageLayout **must** be a valid VkImageLayout value
- VUID-VkResolveImageInfo2-pRegions-parameter
  pRegions **must** be a valid pointer to an array of regionCount valid VkImageResolve2 structures
- VUID-VkResolveImageInfo2-regionCount-arraylength
  regionCount **must** be greater than 0
- VUID-VkResolveImageInfo2-commonparent
  Both of dstImage, and srcImage **must** have been created, allocated, or retrieved from the same VkDevice

The VkImageResolve2 structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkImageResolve2 {
    VkStructureType            sType;
    const void*                pNext;
    VkImageSubresourceLayers   srcSubresource;
    VkOffset3D                 srcOffset;
    VkImageSubresourceLayers   dstSubresource;
    VkOffset3D                 dstOffset;
    VkExtent3D                 extent;
} VkImageResolve2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkImageResolve2
typedef VkImageResolve2 VkImageResolve2KHR;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcSubresource` and `dstSubresource` are VkImageSubresourceLayers structures specifying the image subresources of the images used for the source and destination image data, respectively.
- `srcOffset` and `dstOffset` select the initial `x`, `y`, and `z` offsets in texels of the sub-regions of the source and destination image data.
- `extent` is the size in texels of the source image to resolve in `width`, `height` and `depth`.

Valid Usage

- VUID-VkImageResolve2-aspectMask-10993
  The `aspectMask` member of `srcSubresource` and `dstSubresource` **must** only contain VK_IMAGE_ASPECT_DEPTH_BIT, VK_IMAGE_ASPECT_STENCIL_BIT, or VK_IMAGE_ASPECT_COLOR_BIT
- VUID-VkImageResolve2-maintenance10-10994
  If `maintenance10` feature is not enabled, `srcSubresource` and `dstSubresource` **must** not contain VK_IMAGE_ASPECT_DEPTH_BIT or VK_IMAGE_ASPECT_STENCIL_BIT
- VUID-VkImageResolve2-layerCount-08803
  If neither of the `layerCount` members of `srcSubresource` or `dstSubresource` are VK_REMAINING_ARRAY_LAYERS, the `layerCount` member of `srcSubresource` and `dstSubresource` **must** match
- VUID-VkImageResolve2-layerCount-08804
  If one of the `layerCount` members of `srcSubresource` or `dstSubresource` is VK_REMAINING_ARRAY_LAYERS, the other member **must** be either VK_REMAINING_ARRAY_LAYERS or equal to the `arrayLayers` member of the VkImageCreateInfo used to create the image minus `baseArrayLayer`

Valid Usage (Implicit)

- VUID-VkImageResolve2-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_IMAGE_RESOLVE_2
- VUID-VkImageResolve2-pNext-pNext
  `pNext` **must** be `NULL`
- VUID-VkImageResolve2-srcSubresource-parameter
  `srcSubresource` **must** be a valid VkImageSubresourceLayers structure
- VUID-VkImageResolve2-dstSubresource-parameter
  `dstSubresource` **must** be a valid VkImageSubresourceLayers structure

The `VkResolveImageModeInfoKHR` structure is defined as:

```
// Provided by VK_KHR_maintenance10
typedef struct VkResolveImageModeInfoKHR {
    VkStructureType           sType;
    const void*               pNext;
    VkResolveImageFlagsKHR    flags;
    VkResolveModeFlagBits     resolveMode;
    VkResolveModeFlagBits     stencilResolveMode;
} VkResolveImageModeInfoKHR;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `flags` is a bitmask of VkResolveImageFlagBitsKHR.
- `resolveMode` is a VkResolveModeFlagBits value defining how `srcImage` will be resolved into `dstImage` when resolving non-stencil values.
- `stencilResolveMode` is a VkResolveModeFlagBits value defining how `srcImage` will be resolved into `dstImage` when resolving stencil values.

Valid Usage

- VUID-VkResolveImageModeInfoKHR-flags-10995
  If `flags` includes VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR, `flags` **must** not include VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR
- VUID-VkResolveImageModeInfoKHR-flags-10996
  If `flags` includes VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR or VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR, `resolveSrgbFormatSupportsTransferFunctionControl` **must** be VK_TRUE
- VUID-VkResolveImageModeInfoKHR-flags-10997
  If `flags` includes VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR or VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR, `resolveMode` **must** be

equal to VK_RESOLVE_MODE_AVERAGE_BIT

Valid Usage (Implicit)

- VUID-VkResolveImageModeInfoKHR-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_RESOLVE_IMAGE_MODE_INFO_KHR
- VUID-VkResolveImageModeInfoKHR-flags-parameter
  If `flags` is not `0`, `flags` **must** be a valid combination of VkResolveImageFlagBitsKHR values
- VUID-VkResolveImageModeInfoKHR-resolveMode-parameter
  If `resolveMode` is not `0`, `resolveMode` **must** be a valid VkResolveModeFlagBits value
- VUID-VkResolveImageModeInfoKHR-stencilResolveMode-parameter
  If `stencilResolveMode` is not `0`, `stencilResolveMode` **must** be a valid VkResolveModeFlagBits value

Structure Chaining

Extends the structure

- VkResolveImageInfo2

Bits which **can** be set in VkResolveImageModeInfoKHR::`flags`, describing additional properties of a resolve operation, are:

```
// Provided by VK_KHR_maintenance10
typedef enum VkResolveImageFlagBitsKHR {
  // Provided by VK_KHR_maintenance10 with VK_VERSION_1_3 or VK_KHR_copy_commands2
    VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR = 0x00000001,
  // Provided by VK_KHR_maintenance10 with VK_VERSION_1_3 or VK_KHR_copy_commands2
    VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR = 0x00000002,
} VkResolveImageFlagBitsKHR;
```

- VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR specifies that resolve operations happening to an sRGB encoded image **must** not convert samples from nonlinear to linear before averaging.
- VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR specifies that resolve operations happening to an sRGB encoded image **must** convert samples from nonlinear to linear before averaging.

```
// Provided by VK_KHR_maintenance10
typedef VkFlags VkResolveImageFlagsKHR;
```

`VkResolveImageFlagsKHR` is a bitmask type for setting a mask of zero or more VkResolveImageFlagBitsKHR.

Chapter 25. Drawing Commands

Drawing commands (commands with `Draw` in the name) provoke work in a graphics pipeline. Drawing commands are recorded into a command buffer and when executed by a queue, will produce work which executes according to the bound graphics pipeline, or if the `shaderObject` feature is enabled, any shader objects bound to graphics stages. A graphics pipeline or a combination of one or more graphics shader objects **must** be bound to a command buffer before any drawing commands are recorded in that command buffer.

Drawing can be achieved in two modes:

- Programmable Mesh Shading, the mesh shader assembles primitives, or
- Programmable Primitive Shading, the input primitives are assembled as follows.

Each draw is made up of zero or more vertices and zero or more instances, which are processed by the device and result in the assembly of primitives. Primitives are assembled according to the `pInputAssemblyState` member of the VkGraphicsPipelineCreateInfo structure, which is of type `VkPipelineInputAssemblyStateCreateInfo`:

```
// Provided by VK_VERSION_1_0
typedef struct VkPipelineInputAssemblyStateCreateInfo {
    VkStructureType                            sType;
    const void*                                pNext;
    VkPipelineInputAssemblyStateCreateFlags    flags;
    VkPrimitiveTopology                        topology;
    VkBool32                                   primitiveRestartEnable;
} VkPipelineInputAssemblyStateCreateInfo;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `flags` is reserved for future use.
- `topology` is a VkPrimitiveTopology defining the primitive topology, as described below.
- `primitiveRestartEnable` controls whether a special vertex index value is treated as restarting the assembly of primitives. This enable only applies to indexed draws (vkCmdDrawIndexed, vkCmdDrawMultiIndexedEXT, and vkCmdDrawIndexedIndirect), and the special index value is either 0xFFFFFFFF when the `indexType` parameter of Vulkan 1.4 or `vkCmdBindIndexBuffer2` or `vkCmdBindIndexBuffer` is equal to VK_INDEX_TYPE_UINT32; 0xFF when `indexType` is equal to VK_INDEX_TYPE_UINT8; or 0xFFFF when `indexType` is equal to VK_INDEX_TYPE_UINT16. Primitive restart is not allowed for “list” topologies, unless one of the features `primitiveTopologyPatchListRestart` (for VK_PRIMITIVE_TOPOLOGY_PATCH_LIST) or `primitiveTopologyListRestart` (for all other list topologies) is enabled. If the `primitiveRestartIndex` feature is enabled, vkCmdSetPrimitiveRestartIndexEXT **can** be used to set a custom index for primitive restart.

Restarting the assembly of primitives discards the most recent index values if those elements formed an incomplete primitive, and restarts the primitive assembly using the subsequent indices,

but only assembling the immediately following element through the end of the originally specified elements. The primitive restart index value comparison is performed before adding the `vertexOffset` value to the index value.

Valid Usage

- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-06252
  If the `primitiveTopologyListRestart` feature is not enabled, and `topology` is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, `primitiveRestartEnable` **must** be VK_FALSE
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-06253
  If the `primitiveTopologyPatchListRestart` feature is not enabled, and `topology` is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, `primitiveRestartEnable` **must** be VK_FALSE
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-00429
  If the `geometryShader` feature is not enabled, `topology` **must** not be any of VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-00430
  If the `tessellationShader` feature is not enabled, `topology` **must** not be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST
- VUID-VkPipelineInputAssemblyStateCreateInfo-triangleFans-04452
  If the `VK_KHR_portability_subset` extension is enabled, and VkPhysicalDevicePortabilitySubsetFeaturesKHR::`triangleFans` is VK_FALSE, `topology` **must** not be VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN

Valid Usage (Implicit)

- VUID-VkPipelineInputAssemblyStateCreateInfo-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_PIPELINE_INPUT_ASSEMBLY_STATE_CREATE_INFO
- VUID-VkPipelineInputAssemblyStateCreateInfo-pNext-pNext
  `pNext` **must** be `NULL`
- VUID-VkPipelineInputAssemblyStateCreateInfo-flags-zerobitmask
  `flags` **must** be `0`
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-parameter
  `topology` **must** be a valid VkPrimitiveTopology value

```
// Provided by VK_VERSION_1_0
typedef VkFlags VkPipelineInputAssemblyStateCreateFlags;
```

VkPipelineInputAssemblyStateCreateFlags is a bitmask type for setting a mask, but is currently reserved for future use.

To dynamically control whether a special vertex index value is treated as restarting the assembly of primitives, call:

```
// Provided by VK_VERSION_1_3
void vkCmdSetPrimitiveRestartEnable(
    VkCommandBuffer                             commandBuffer,
    VkBool32                                    primitiveRestartEnable);
```

```
// Provided by VK_EXT_extended_dynamic_state2, VK_EXT_shader_object
// Equivalent to vkCmdSetPrimitiveRestartEnable
void vkCmdSetPrimitiveRestartEnableEXT(
    VkCommandBuffer                             commandBuffer,
    VkBool32                                    primitiveRestartEnable);
```

- commandBuffer is the command buffer into which the command will be recorded.
- primitiveRestartEnable controls whether a special vertex index value is treated as restarting the assembly of primitives. It behaves in the same way as VkPipelineInputAssemblyStateCreateInfo ::primitiveRestartEnable

This command sets the primitive restart enable for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE set in VkPipelineDynamicStateCreateInfo ::pDynamicStates. Otherwise, this state is specified by the VkPipelineInputAssemblyStateCreateInfo ::primitiveRestartEnable value used to create the currently active pipeline.

Valid Usage

- VUID-vkCmdSetPrimitiveRestartEnable-None-08970
  At least one of the following **must** be true:
  - the extendedDynamicState2 feature is enabled
  - the shaderObject feature is enabled
  - the value of VkApplicationInfo::apiVersion used to create the VkInstance parent of commandBuffer is greater than or equal to Version 1.3

Valid Usage (Implicit)

- VUID-vkCmdSetPrimitiveRestartEnable-commandBuffer-parameter

`commandBuffer` **must** be a valid VkCommandBuffer handle

- VUID-vkCmdSetPrimitiveRestartEnable-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdSetPrimitiveRestartEnable-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdSetPrimitiveRestartEnable-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_GRAPHICS_BIT	State

Conditional Rendering

vkCmdSetPrimitiveRestartEnable is not affected by conditional rendering

To dynamically control which special vertex index value is treated as restarting the assembly of primitives, call:

```
// Provided by VK_EXT_primitive_restart_index
void vkCmdSetPrimitiveRestartIndexEXT(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    primitiveRestartIndex);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `primitiveRestartIndex` controls which special vertex index value is treated as restarting the assembly of primitives. This overrides the default restart index value as defined as part of the description of the VkPipelineInputAssemblyStateCreateInfo::`primitiveRestartEnable` state. Default values are applied when binding an index buffer.

This command sets a custom primitive restart index for subsequent drawing commands. Binding

an index buffer invalidates the custom index value.

Valid Usage

- VUID-vkCmdSetPrimitiveRestartIndexEXT-primitiveRestartIndex-12395
  The `primitiveRestartIndex` feature **must** be enabled

Valid Usage (Implicit)

- VUID-vkCmdSetPrimitiveRestartIndexEXT-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdSetPrimitiveRestartIndexEXT-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdSetPrimitiveRestartIndexEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdSetPrimitiveRestartIndexEXT-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_GRAPHICS_BIT	State

Conditional Rendering

vkCmdSetPrimitiveRestartIndexEXT is not affected by conditional rendering

25.1. Primitive Topologies

Primitive topology determines how consecutive vertices are organized into primitives, and determines the type of primitive that is used at the beginning of the graphics pipeline. The effective

topology for later stages of the pipeline is altered by tessellation or geometry shading (if either is in use) and depends on the execution modes of those shaders. In the case of mesh shading the only effective topology is defined by the execution mode of the mesh shader.

The primitive topologies defined by VkPrimitiveTopology are:

```
// Provided by VK_VERSION_1_0
typedef enum VkPrimitiveTopology {
    VK_PRIMITIVE_TOPOLOGY_POINT_LIST = 0,
    VK_PRIMITIVE_TOPOLOGY_LINE_LIST = 1,
    VK_PRIMITIVE_TOPOLOGY_LINE_STRIP = 2,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST = 3,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP = 4,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN = 5,
    VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY = 6,
    VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY = 7,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY = 8,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY = 9,
    VK_PRIMITIVE_TOPOLOGY_PATCH_LIST = 10,
} VkPrimitiveTopology;
```

- VK_PRIMITIVE_TOPOLOGY_POINT_LIST specifies a series of separate point primitives.
- VK_PRIMITIVE_TOPOLOGY_LINE_LIST specifies a series of separate line primitives.
- VK_PRIMITIVE_TOPOLOGY_LINE_STRIP specifies a series of connected line primitives with consecutive lines sharing a vertex.
- VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST specifies a series of separate triangle primitives.
- VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP specifies a series of connected triangle primitives with consecutive triangles sharing an edge.
- VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN specifies a series of connected triangle primitives with all triangles sharing a common vertex. If the VK_KHR_portability_subset extension is enabled, and VkPhysicalDevicePortabilitySubsetFeaturesKHR::triangleFans is VK_FALSE, then triangle fans are not supported by the implementation, and VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN **must** not be used.
- VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY specifies a series of separate line primitives with adjacency.
- VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY specifies a series of connected line primitives with adjacency, with consecutive primitives sharing three vertices.
- VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY specifies a series of separate triangle primitives with adjacency.
- VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY specifies connected triangle primitives with adjacency, with consecutive triangles sharing an edge.
- VK_PRIMITIVE_TOPOLOGY_PATCH_LIST specifies separate patch primitives.

Each primitive topology, and its construction from a list of vertices, is described in detail below

with a supporting diagram, according to the following key:

•	Vertex	A point in 3-dimensional space. Positions chosen within the diagrams are arbitrary and for illustration only.
5	Vertex Number	Sequence position of a vertex within the provided vertex data.
	Provoking Vertex	Provoking vertex within the main primitive. The tail is angled towards the relevant primitive. Used in flat shading.
	Primitive Edge	An edge connecting the points of a main primitive.
	Adjacency Edge	Points connected by these lines do not contribute to a main primitive, and are only accessible in a geometry shader.
	Winding Order	The relative order in which vertices are defined within a primitive, used in the facing determination. This ordering has no specific start or end point.

The diagrams are supported with mathematical definitions where the vertices (v) and primitives (p) are numbered starting from 0; v_0 is the first vertex in the provided data and p_0 is the first primitive in the set of primitives defined by the vertices and topology.

To dynamically set primitive topology, call:

```
// Provided by VK_VERSION_1_3
void vkCmdSetPrimitiveTopology(
    VkCommandBuffer                             commandBuffer,
    VkPrimitiveTopology                         primitiveTopology);
```

```
// Provided by VK_EXT_extended_dynamic_state, VK_EXT_shader_object
// Equivalent to vkCmdSetPrimitiveTopology
void vkCmdSetPrimitiveTopologyEXT(
    VkCommandBuffer                             commandBuffer,
    VkPrimitiveTopology                         primitiveTopology);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `primitiveTopology` specifies the primitive topology to use for drawing.

This command sets the primitive topology for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY set in VkPipelineDynamicStateCreateInfo ::`pDynamicStates`. Otherwise, this state is specified by the VkPipelineInputAssemblyStateCreateInfo ::`topology` value used to create the currently active pipeline.

Valid Usage

- VUID-vkCmdSetPrimitiveTopology-None-08971
  At least one of the following **must** be true:

- the `extendedDynamicState` feature is enabled
- the `shaderObject` feature is enabled
- the value of VkApplicationInfo::`apiVersion` used to create the VkInstance parent of `commandBuffer` is greater than or equal to Version 1.3

Valid Usage (Implicit)

- VUID-vkCmdSetPrimitiveTopology-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdSetPrimitiveTopology-primitiveTopology-parameter
  `primitiveTopology` **must** be a valid VkPrimitiveTopology value
- VUID-vkCmdSetPrimitiveTopology-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdSetPrimitiveTopology-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdSetPrimitiveTopology-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_GRAPHICS_BIT	State

Conditional Rendering

vkCmdSetPrimitiveTopology is not affected by conditional rendering

25.1.1. Topology Class

The primitive topologies are grouped into the following topology classes:

Table 30. Topology Classes

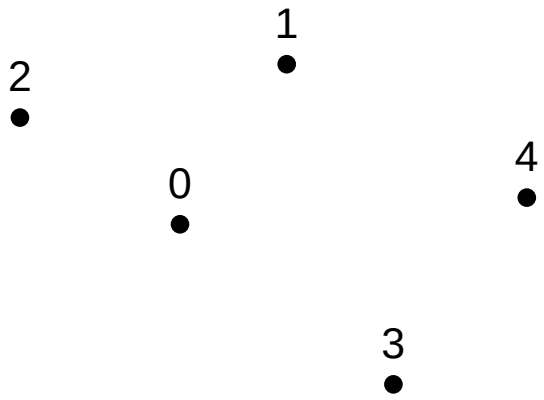
Topology Class	Primitive Topology
Point	VK_PRIMITIVE_TOPOLOGY_POINT_LIST
Line	VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_STRIP, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY
Triangle	VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY
Patch	VK_PRIMITIVE_TOPOLOGY_PATCH_LIST

25.1.2. Point Lists

When the topology is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, each consecutive vertex defines a single point primitive, according to the equation:

$$p_i = \{v_i\}$$

As there is only one vertex, that vertex is the provoking vertex. The number of primitives generated is equal to `vertexCount`.



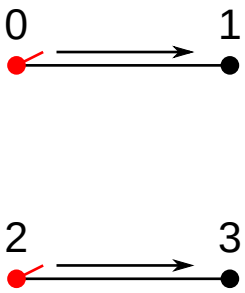
25.1.3. Line Lists

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_LINE_LIST, each consecutive pair of vertices defines a single line primitive, according to the equation:

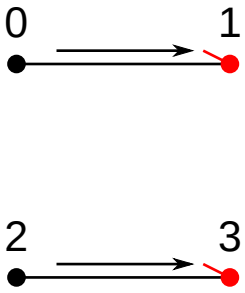
$$p_i = \{v_{2i}, v_{2i+1}\}$$

The number of primitives generated is equal to ⌊vertexCount/2⌋.

When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is v_{2i}.



When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{2i+1}.



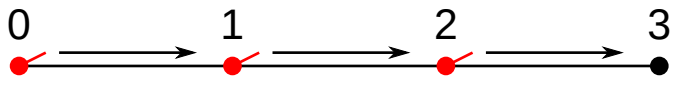
25.1.4. Line Strips

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_LINE_STRIP, one line primitive is defined by each vertex and the following vertex, according to the equation:

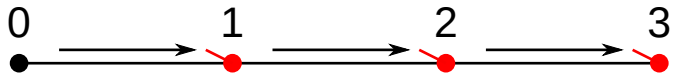
$$p_i = \{v_i, v_{i+1}\}$$

The number of primitives generated is equal to max(0,vertexCount-1).

When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is v_i.



When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{i+1}.



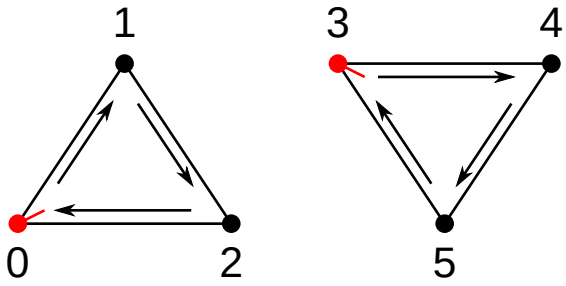
25.1.5. Triangle Lists

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, each consecutive set of three vertices defines a single triangle primitive, according to the equation:

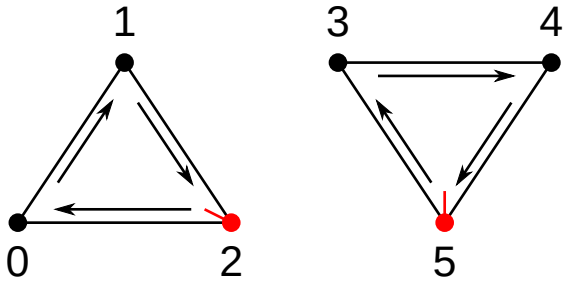
$p_i = \{v_{3i}, v_{3i+1}, v_{3i+2}\}$

The number of primitives generated is equal to ⌊vertexCount/3⌋.

When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is v_{3i}.



When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{3i+2}.



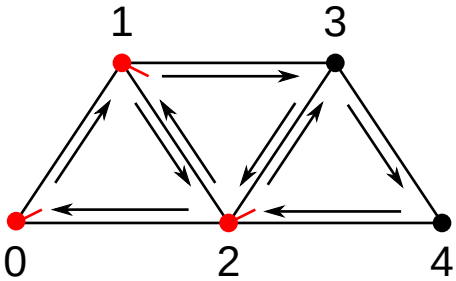
25.1.6. Triangle Strips

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP, one triangle primitive is defined by each vertex and the two vertices that follow it, according to the equation:

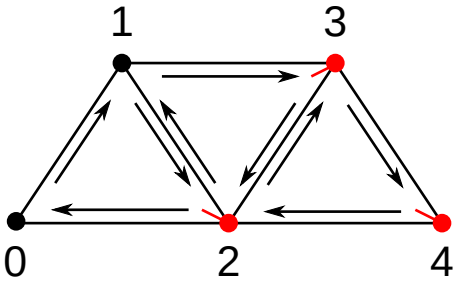
$p_i = \{v_i, v_{i+(1+i\%2)}, v_{i+(2-i\%2)}\}$

The number of primitives generated is equal to max(0,vertexCount-2).

When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is v_i.



When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{i+2}.



NOTE The ordering of the vertices in each successive triangle is reversed, so that the winding order is consistent throughout the strip.

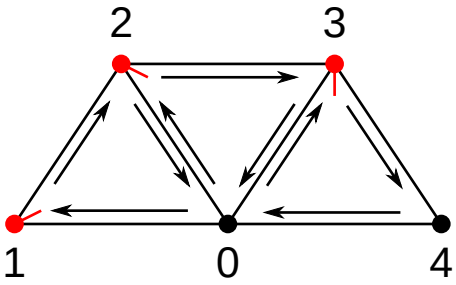
25.1.7. Triangle Fans

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN, triangle primitives are defined around a shared common vertex, according to the equation:

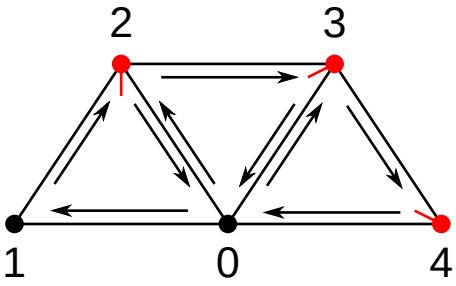
$$p_i = \{v_{i+1}, v_{i+2}, v_0\}$$

The number of primitives generated is equal to max(0,`vertexCount`-2).

When the `provokingVertexMode` is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is v_{i+1}.



When the `provokingVertexMode` is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{i+2}.



NOTE If the VK_KHR_portability_subset extension is enabled, and VkPhysicalDevicePortabilitySubsetFeaturesKHR::`triangleFans` is VK_FALSE, then triangle fans are not supported by the implementation, and VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN **must** not be used.

25.1.8. Line Lists With Adjacency

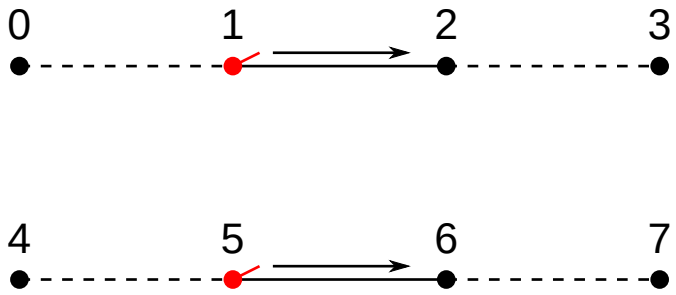
When the primitive topology is VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, each consecutive set of four vertices defines a single line primitive with adjacency, according to the equation:

$$p_i = \{v_{4i}, v_{4i+1}, v_{4i+2}, v_{4i+3}\}$$

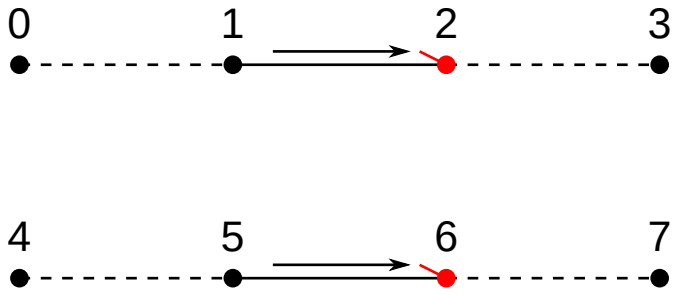
A line primitive is described by the second and third vertices of the total primitive, with the remaining two vertices only accessible in a geometry shader.

The number of primitives generated is equal to ⌊vertexCount/4⌋.

When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is v_{4i+1}.



When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{4i+2}.



25.1.9. Line Strips With Adjacency

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY, one line primitive with adjacency is defined by each vertex and the following vertex, according to the equation:

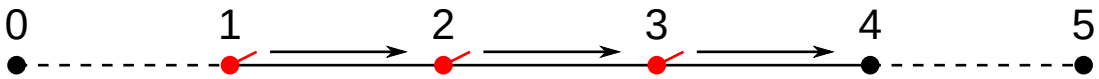
$$p_i = \{v_i, v_{i+1}, v_{i+2}, v_{i+3}\}$$

A line primitive is described by the second and third vertices of the total primitive, with the remaining two vertices only accessible in a geometry shader.

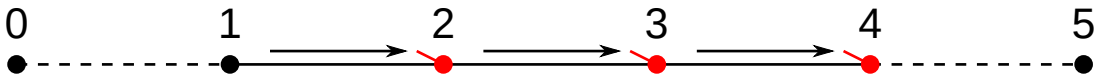
The number of primitives generated is equal to max(0,vertexCount-3).

When the provokingVertexMode is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the

provoking vertex for p_i is v_{i+1}.



When the `provokingVertexMode` is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{i+2}.



25.1.10. Triangle Lists With Adjacency

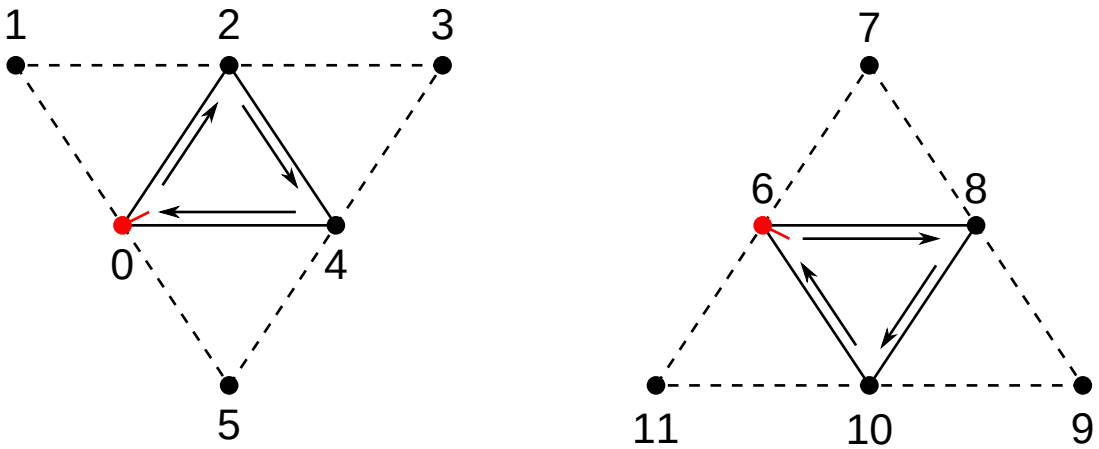
When the primitive topology is VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, each consecutive set of six vertices defines a single triangle primitive with adjacency, according to the equations:

$$p_i = \{v_{6i}, v_{6i+1}, v_{6i+2}, v_{6i+3}, v_{6i+4}, v_{6i+5}\}$$

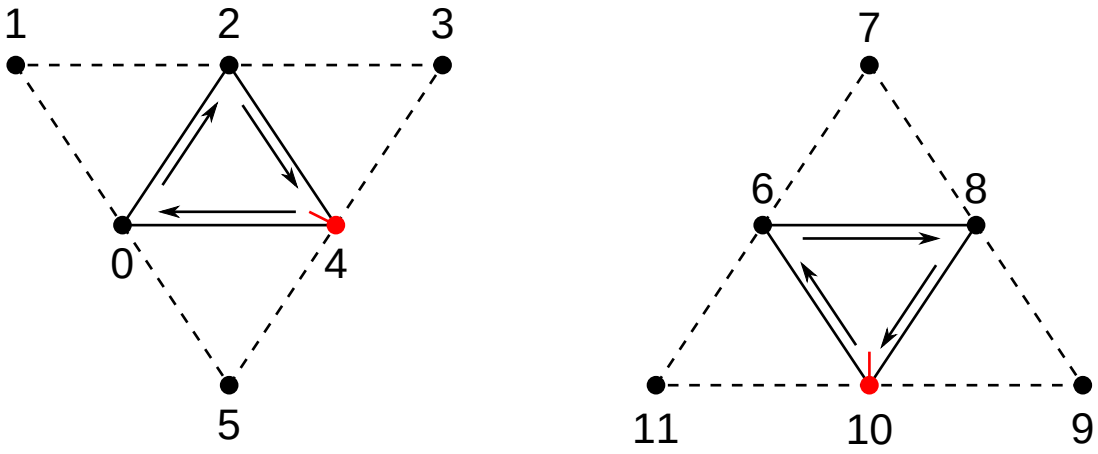
A triangle primitive is described by the first, third, and fifth vertices of the total primitive, with the remaining three vertices only accessible in a geometry shader.

The number of primitives generated is equal to ⌊`vertexCount`/6⌋.

When the `provokingVertexMode` is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is v_{6i}.



When the `provokingVertexMode` is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is v_{6i+4}.



25.1.11. Triangle Strips With Adjacency

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY, one triangle primitive with adjacency is defined by each vertex and the following 5 vertices.

The number of primitives generated, n, is equal to ⌊max(0, `vertexCount` - 4)/2⌋.

If n=1, the primitive is defined as:

$$p = \{v_0, v_1, v_2, v_5, v_4, v_3\}$$

If n>1, the total primitive consists of different vertices according to where it is in the strip:

$$p_i = \{v_{2i}, v_{2i+1}, v_{2i+2}, v_{2i+6}, v_{2i+4}, v_{2i+3}\} \text{ when } i=0$$

$$p_i = \{v_{2i}, v_{2i+3}, v_{2i+4}, v_{2i+6}, v_{2i+2}, v_{2i-2}\} \text{ when } i>0,\ i<n-1, \text{ and } i\%2=1$$

$$p_i = \{v_{2i}, v_{2i-2}, v_{2i+2}, v_{2i+6}, v_{2i+4}, v_{2i+3}\} \text{ when } i>0,\ i<n-1, \text{ and } i\%2=0$$

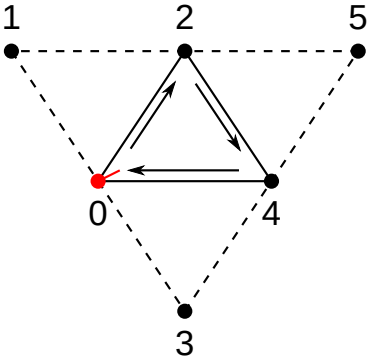
$$p_i = \{v_{2i}, v_{2i+3}, v_{2i+4}, v_{2i+5}, v_{2i+2}, v_{2i-2}\} \text{ when } i=n-1 \text{ and } i\%2=1$$

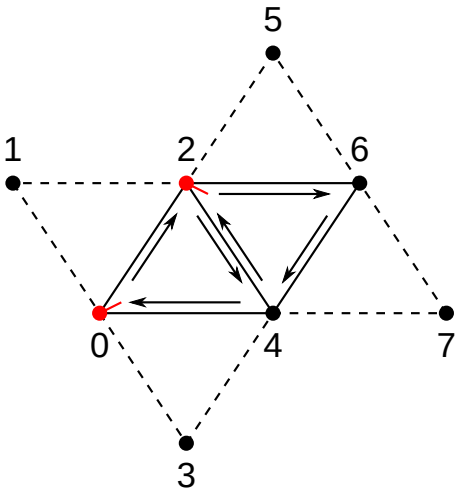
$$p_i = \{v_{2i}, v_{2i-2}, v_{2i+2}, v_{2i+5}, v_{2i+4}, v_{2i+3}\} \text{ when } i=n-1 \text{ and } i\%2=0$$

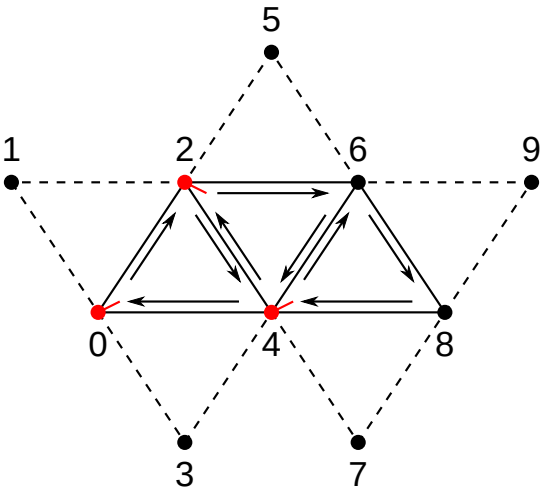
A triangle primitive is described by the first, third, and fifth vertices of the total primitive in all cases, with the remaining three vertices only accessible in a geometry shader.

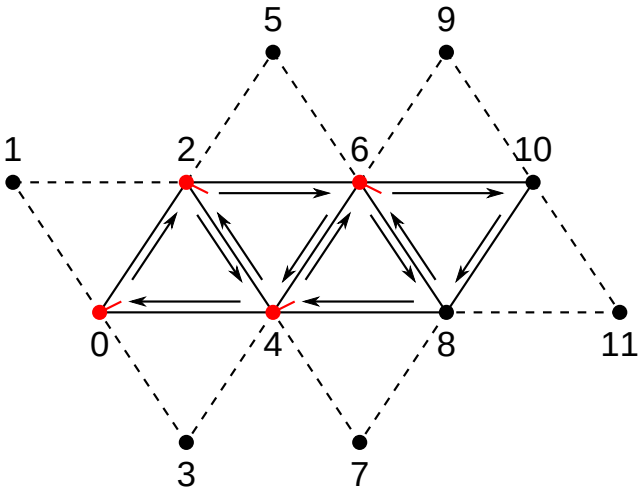
NOTE	The ordering of the vertices in each successive triangle is altered so that the winding order is consistent throughout the strip.

When the `provokingVertexMode` is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the provoking vertex for p_i is always v_{2i}.

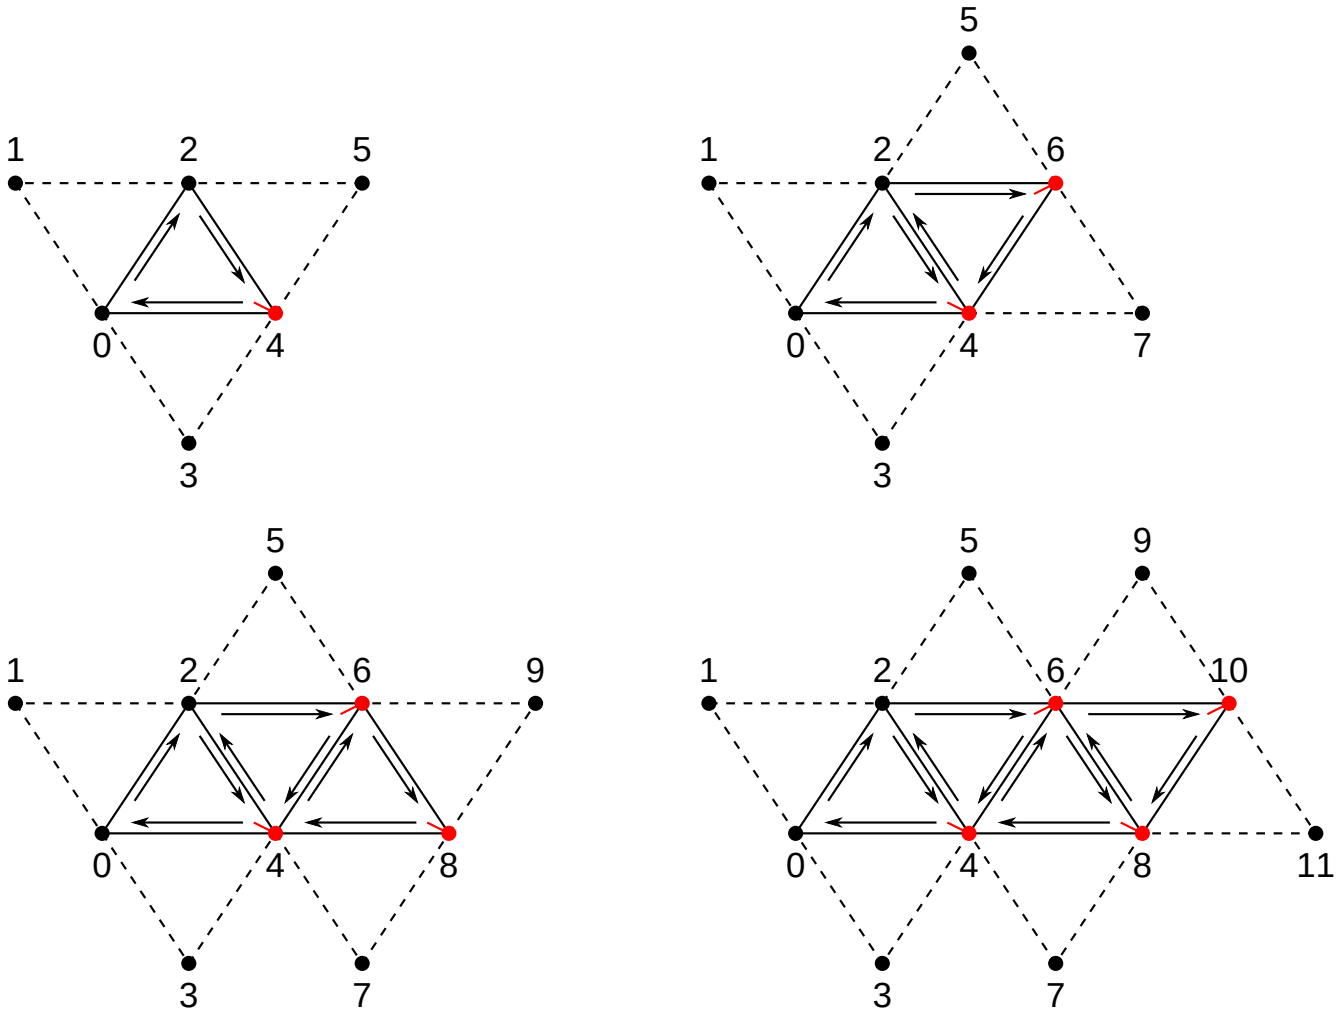








When the `provokingVertexMode` is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the provoking vertex for p_i is always v_{2i+4}.



25.1.12. Patch Lists

When the primitive topology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, each consecutive set of m vertices defines a single patch primitive, according to the equation:

$$p_i = \{v_{mi}, v_{mi+1}, \ldots, v_{mi+(m-2)}, v_{mi+(m-1)}\}$$

where m is equal to VkPipelineTessellationStateCreateInfo::`patchControlPoints`.

Patch lists are never passed to vertex post-processing, and as such no provoking vertex is defined for patch primitives. The number of primitives generated is equal to ⌊`vertexCount`/m⌋.

The vertices comprising a patch have no implied geometry, and are used as inputs to tessellation shaders and the fixed-function tessellator to generate new point, line, or triangle primitives.

25.2. Effective Primitive Topology

The effective primitive topology is the primitive topology that is consumed or produced by a given stage of the graphics pipeline. The interpretation of this topology depends on the active shader stages and other state set in the graphics pipeline.

25.2.1. Vertex Input Assembler Topology

This is the topology set when the VK_SHADER_STAGE_VERTEX_BIT stage is used and Programmable Primitive Shading occurs. It **can** be set with VkPipelineInputAssemblyStateCreateInfo::`topology` or vkCmdSetPrimitiveTopology.

25.2.2. Clip Space Topology

This is the output of the last pre-rasterization shader stage involved.

- If VK_SHADER_STAGE_VERTEX_BIT is the last pre-rasterization stage, the topology is not changed from what was set in the input assembly.
- If VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT is the last pre-rasterization stage, the topology depends on the `OpExecutionMode` found in either tessellation stage.
  - The `Isolines` `Execution Mode` is in line topology class.
  - The `Triangles` and `Quads` `Execution Mode` is in triangle topology class.
  - The `PointMode` `Execution Mode` is in point topology class and will take precedence over the other tessellation stage `Execution Mode`.
- If VK_SHADER_STAGE_GEOMETRY_BIT is the last pre-rasterization stage, the topology depends on the `OpExecutionMode` found in this shader stage.
  - The `OutputPoints` `Execution Mode` is in point topology class.
  - The `OutputLineStrip` `Execution Mode` is in line topology class.
  - The `OutputTriangleStrip` `Execution Mode` is in triangle topology class.
- If VK_SHADER_STAGE_MESH_BIT_EXT is the last pre-rasterization stage, the topology depends on the `OpExecutionMode` found in this shader stage.
  - The `OutputPoints` `Execution Mode` is in point topology class.
  - The `OutputLinesEXT` `Execution Mode` is in line topology class.
  - The `OutputTrianglesEXT` `Execution Mode` is in triangle topology class.

25.2.3. Rasterization Input Topology

After clipping and viewport transformations, the Polygon Mode **can** set a topology as an input for rasterization. This **can** be different from what was used in Clip Space Topology.

If VkPipelineRasterizationStateCreateInfo::`rasterizerDiscardEnable` or vkCmdSetRasterizerDiscardEnable::`rasterizerDiscardEnable` is set to VK_FALSE, then this Rasterization Input Topology is not observed.

If the clip space topology is in triangle topology class then VK_POLYGON_MODE_LINE will turn it into line topology and VK_POLYGON_MODE_POINT will turn it into point topology.

If the clip space topology is in line topology class then VK_POLYGON_MODE_POINT will turn it into point topology.

25.3. Primitive Order

Primitives generated by drawing commands progress through the stages of the graphics pipeline in *primitive order*. Primitive order is initially determined in the following way:

1. Submission order determines the initial ordering
2. For indirect drawing commands, the order in which accessed instances of the VkDrawIndirectCommand are stored in `buffer`, from lower indirect buffer addresses to higher addresses.
3. If a drawing command includes multiple instances, the order in which instances are executed, from lower numbered instances to higher.
4. The order in which primitives are specified by a drawing command:
    - For non-indexed draws, from vertices with a lower numbered `vertexIndex` to a higher numbered `vertexIndex`.
    - For indexed draws, vertices sourced from a lower index buffer addresses to higher addresses.
    - For draws using mesh shaders, the order is provided by mesh shading.

Within this order implementations further sort primitives:

5. If tessellation shading is active, by an implementation-dependent order of new primitives generated by tessellation.
6. If geometry shading is active, by the order new primitives are generated by geometry shading.
7. If the polygon mode is not VK_POLYGON_MODE_FILL, by an implementation-dependent ordering of the new primitives generated within the original primitive.

Primitive order is later used to define rasterization order, which determines the order in which fragments output results to a framebuffer.

25.4. Programmable Primitive Shading

Once primitives are assembled, they proceed to the vertex shading stage of the pipeline. If the draw includes multiple instances, then the set of primitives is sent to the vertex shading stage multiple times, once for each instance.

It is implementation-dependent whether vertex shading occurs on vertices that are discarded as part of incomplete primitives, but if it does occur then it operates as if they were vertices in complete primitives and such invocations **can** have side effects.

Vertex shading receives two per-vertex inputs from the primitive assembly stage - the `vertexIndex` and the `instanceIndex`. How these values are generated is defined below, with each command.

Drawing commands fall roughly into two categories:

- Non-indexed drawing commands present a sequential `vertexIndex` to the vertex shader. The sequential index is generated automatically by the device (see Fixed-Function Vertex Processing

for details on both specifying the vertex attributes indexed by `vertexIndex`, as well as binding vertex buffers containing those attributes to a command buffer). These commands are:

  - vkCmdDraw
  - vkCmdDrawIndirect
  - vkCmdDrawIndirectCount
  - vkCmdDrawIndirectCountKHR
  - vkCmdDrawMultiEXT

- Indexed drawing commands read index values from an *index buffer* and use this to compute the `vertexIndex` value for the vertex shader. These commands are:
  - vkCmdDrawIndexed
  - vkCmdDrawIndexedIndirect
  - vkCmdDrawIndexedIndirectCount
  - vkCmdDrawIndexedIndirectCountKHR
  - vkCmdDrawMultiIndexedEXT

For indexed drawing commands, indices are sourced from a range of memory bound to the command buffer, referred to as the *bound index buffer range*, and specified by one of the following commands.

To bind an address range as an index buffer to a command buffer, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdBindIndexBuffer3KHR(
    VkCommandBuffer                             commandBuffer,
    const VkBindIndexBuffer3InfoKHR*            pInfo);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `pInfo` is a pointer to a VkBindIndexBuffer3InfoKHR structure defining parameters of this command.

The bound index buffer range is set to the range of memory indicated by `pInfo->addressRange`.

If the `nullDescriptor` feature is enabled, `pInfo->addressRange.size` and `pInfo->addressRange.address` **can** be 0. When the size and address are 0, every index read from this binding will return a value of zero.

Valid Usage (Implicit)

- VUID-vkCmdBindIndexBuffer3KHR-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdBindIndexBuffer3KHR-pInfo-parameter
  `pInfo` **must** be a valid pointer to a valid VkBindIndexBuffer3InfoKHR structure

- VUID-vkCmdBindIndexBuffer3KHR-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdBindIndexBuffer3KHR-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdBindIndexBuffer3KHR-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_GRAPHICS_BIT	State

Conditional Rendering

vkCmdBindIndexBuffer3KHR is not affected by conditional rendering

`VkBindIndexBuffer3InfoKHR` is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkBindIndexBuffer3InfoKHR {
    VkStructureType             sType;
    const void*                 pNext;
    VkDeviceAddressRangeKHR     addressRange;
    VkAddressCommandFlagsKHR    addressFlags;
    VkIndexType                 indexType;
} VkBindIndexBuffer3InfoKHR;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `addressRange` is the VkDeviceAddressRangeKHR of the address range to bind.
- `addressFlags` is a VkAddressCommandFlagsKHR value defining the flags for the address range.

- `indexType` is a VkIndexType value specifying the size of the indices.

Valid Usage

- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13097
  If the range specified by `addressRange` is not bound completely to memory when accessed, `addressFlags` **must** not include VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13098
  If the buffer from which the range specified by `addressRange` was created with VK_BUFFER_CREATE_PROTECTED_BIT, and `protectedNoFault` is not supported, `addressFlags` **must** include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13099
  If the buffer from which the range specified by `addressRange` was created without VK_BUFFER_CREATE_PROTECTED_BIT, and `protectedNoFault` is not supported, `addressFlags` **must** not include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressFlags-13100
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13122
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13123
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** not include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressFlags-13101
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13124
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `addressFlags` **must** include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13125
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without

VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, addressFlags **must** not include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR

- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13051
  If addressRange.address is not 0, the buffer from which addressRange was queried **must** have been created with VK_BUFFER_USAGE_INDEX_BUFFER_BIT
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13052
  addressRange.address **must** be a multiple of the size of the type indicated by indexType
- VUID-VkBindIndexBuffer3InfoKHR-indexType-13053
  indexType **must** not be VK_INDEX_TYPE_NONE_KHR
- VUID-VkBindIndexBuffer3InfoKHR-indexType-13054
  If indexType is VK_INDEX_TYPE_UINT8_KHR, the indexTypeUint8 feature **must** be enabled
- VUID-VkBindIndexBuffer3InfoKHR-None-13055
  If the nullDescriptor feature is not enabled, addressRange.size **must** be greater than 0
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13056
  If addressRange.size is 0, addressRange.address **must** be 0

Valid Usage (Implicit)

- VUID-VkBindIndexBuffer3InfoKHR-sType-sType
  sType **must** be VK_STRUCTURE_TYPE_BIND_INDEX_BUFFER_3_INFO_KHR
- VUID-VkBindIndexBuffer3InfoKHR-pNext-pNext
  pNext **must** be NULL
- VUID-VkBindIndexBuffer3InfoKHR-addressFlags-parameter
  If addressFlags is not 0, addressFlags **must** be a valid combination of VkAddressCommandFlagBitsKHR values
- VUID-VkBindIndexBuffer3InfoKHR-indexType-parameter
  indexType **must** be a valid VkIndexType value

To bind an index buffer, along with its size, to a command buffer, call:

```
// Provided by VK_VERSION_1_4
void vkCmdBindIndexBuffer2(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    VkDeviceSize                                size,
    VkIndexType                                 indexType);
```

```
// Provided by VK_KHR_maintenance5
// Equivalent to vkCmdBindIndexBuffer2
void vkCmdBindIndexBuffer2KHR(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    VkDeviceSize                                size,
    VkIndexType                                 indexType);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer being bound.
- `offset` is the starting offset in bytes within `buffer` used in index buffer address calculations.
- `size` is the size in bytes of index data bound from `buffer`.
- `indexType` is a VkIndexType value specifying the size of the indices.

`buffer`, `offset`, and `size` specify the bound index buffer range, with a range of memory bound from [`base` + `offset`, `base` + `offset` + `size`), where `base` is the start of `buffer`. If `size` is VK_WHOLE_SIZE then the range is from `offset` to the end of the `buffer`.

If the `maintenance6` feature is enabled, `buffer` **can** be VK_NULL_HANDLE. If `buffer` is VK_NULL_HANDLE and the `nullDescriptor` feature is enabled, every index fetched results in a value of zero.

Valid Usage

- VUID-vkCmdBindIndexBuffer2-offset-08782
  `offset` **must** be less than the size of `buffer`
- VUID-vkCmdBindIndexBuffer2-offset-08783
  The sum of `offset` and the base address of the range of `VkDeviceMemory` object that is backing `buffer`, **must** be a multiple of the size of the type indicated by `indexType`
- VUID-vkCmdBindIndexBuffer2-buffer-08784
  `buffer` **must** have been created with the VK_BUFFER_USAGE_INDEX_BUFFER_BIT usage flag set
- VUID-vkCmdBindIndexBuffer2-buffer-08785
  If `buffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdBindIndexBuffer2-indexType-08786
  `indexType` **must** not be VK_INDEX_TYPE_NONE_KHR
- VUID-vkCmdBindIndexBuffer2-indexType-08787
  If `indexType` is VK_INDEX_TYPE_UINT8, the `indexTypeUint8` feature **must** be enabled
- VUID-vkCmdBindIndexBuffer2-None-09493
  If the `maintenance6` feature is not enabled, `buffer` **must** not be VK_NULL_HANDLE
- VUID-vkCmdBindIndexBuffer2-buffer-09494

If `buffer` is VK_NULL_HANDLE, offset **must** be zero

- VUID-vkCmdBindIndexBuffer2-size-08767
  If `size` is not VK_WHOLE_SIZE, `size` **must** be a multiple of the size of the type indicated by `indexType`
- VUID-vkCmdBindIndexBuffer2-size-08768
  If `size` is not VK_WHOLE_SIZE, the sum of `offset` and `size` **must** be less than or equal to the size of `buffer`

Valid Usage (Implicit)

- VUID-vkCmdBindIndexBuffer2-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdBindIndexBuffer2-buffer-parameter
  If `buffer` is not VK_NULL_HANDLE, `buffer` **must** be a valid VkBuffer handle
- VUID-vkCmdBindIndexBuffer2-indexType-parameter
  `indexType` **must** be a valid VkIndexType value
- VUID-vkCmdBindIndexBuffer2-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdBindIndexBuffer2-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdBindIndexBuffer2-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdBindIndexBuffer2-commonparent
  Both of `buffer`, and `commandBuffer` that are valid handles of non-ignored parameters **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_GRAPHICS_BIT	State

Conditional Rendering

vkCmdBindIndexBuffer2 is not affected by conditional rendering

To bind an index buffer to a command buffer, call:

```
// Provided by VK_VERSION_1_0
void vkCmdBindIndexBuffer(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    VkIndexType                                 indexType);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer being bound.
- `offset` is the starting offset in bytes within `buffer` used in index buffer address calculations.
- `indexType` is a VkIndexType value specifying the size of the indices.

`buffer` and `offset` specify the bound index buffer range, with a range of memory bound from [`base` + `offset`, `base` + `offset` + `size`), where `size` is from `offset` to the end of the `buffer`.

If the `maintenance6` feature is enabled, `buffer` **can** be VK_NULL_HANDLE. If `buffer` is VK_NULL_HANDLE and the `nullDescriptor` feature is enabled, every index fetched results in a value of zero.

Valid Usage

- VUID-vkCmdBindIndexBuffer-offset-08782
  `offset` **must** be less than the size of `buffer`
- VUID-vkCmdBindIndexBuffer-offset-08783
  The sum of `offset` and the base address of the range of `VkDeviceMemory` object that is backing `buffer`, **must** be a multiple of the size of the type indicated by `indexType`
- VUID-vkCmdBindIndexBuffer-buffer-08784
  `buffer` **must** have been created with the VK_BUFFER_USAGE_INDEX_BUFFER_BIT usage flag set
- VUID-vkCmdBindIndexBuffer-buffer-08785
  If `buffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdBindIndexBuffer-indexType-08786
  `indexType` **must** not be VK_INDEX_TYPE_NONE_KHR
- VUID-vkCmdBindIndexBuffer-indexType-08787
  If `indexType` is VK_INDEX_TYPE_UINT8, the `indexTypeUint8` feature **must** be enabled
- VUID-vkCmdBindIndexBuffer-None-09493

If the maintenance6 feature is not enabled, buffer **must** not be VK_NULL_HANDLE

- VUID-vkCmdBindIndexBuffer-buffer-09494
  If buffer is VK_NULL_HANDLE, offset **must** be zero

Valid Usage (Implicit)

- VUID-vkCmdBindIndexBuffer-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdBindIndexBuffer-buffer-parameter
  If buffer is not VK_NULL_HANDLE, buffer **must** be a valid VkBuffer handle
- VUID-vkCmdBindIndexBuffer-indexType-parameter
  indexType **must** be a valid VkIndexType value
- VUID-vkCmdBindIndexBuffer-commandBuffer-recording
  commandBuffer **must** be in the recording state
- VUID-vkCmdBindIndexBuffer-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdBindIndexBuffer-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdBindIndexBuffer-commonparent
  Both of buffer, and commandBuffer that are valid handles of non-ignored parameters **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to commandBuffer **must** be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_GRAPHICS_BIT	State

Conditional Rendering

vkCmdBindIndexBuffer is not affected by conditional rendering

Possible values of vkCmdBindIndexBuffer2::indexType and vkCmdBindIndexBuffer::indexType, specifying the size of indices, are:

```
// Provided by VK_VERSION_1_0
typedef enum VkIndexType {
    VK_INDEX_TYPE_UINT16 = 0,
    VK_INDEX_TYPE_UINT32 = 1,
  // Provided by VK_VERSION_1_4
    VK_INDEX_TYPE_UINT8 = 1000265000,
  // Provided by VK_KHR_acceleration_structure
    VK_INDEX_TYPE_NONE_KHR = 1000165000,
  // Provided by VK_KHR_index_type_uint8
    VK_INDEX_TYPE_UINT8_KHR = VK_INDEX_TYPE_UINT8,
} VkIndexType;
```

- VK_INDEX_TYPE_UINT16 specifies that indices are 16-bit unsigned integer values.
- VK_INDEX_TYPE_UINT32 specifies that indices are 32-bit unsigned integer values.
- VK_INDEX_TYPE_NONE_KHR specifies that no indices are provided.
- VK_INDEX_TYPE_UINT8 specifies that indices are 8-bit unsigned integer values.

The parameters for each drawing command are specified directly in the command or read from buffer memory, depending on the command. Drawing commands that source their parameters from buffer memory are known as *indirect* drawing commands.

All drawing commands interact with the robustBufferAccess feature.

To record a non-indexed draw, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDraw(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    vertexCount,
    uint32_t                                    instanceCount,
    uint32_t                                    firstVertex,
    uint32_t                                    firstInstance);
```

- commandBuffer is the command buffer into which the command is recorded.
- vertexCount is the number of vertices to draw.
- instanceCount is the number of instances to draw.
- firstVertex is the index of the first vertex to draw.
- firstInstance is the instance ID of the first instance to draw.

When the command is executed, primitives are assembled using the current primitive topology and vertexCount consecutive vertex indices with the first vertexIndex value equal to firstVertex. The primitives are drawn instanceCount times with instanceIndex starting with firstInstance and

increasing sequentially for each instance. The assembled primitives execute the bound graphics pipeline.

Valid Usage

- VUID-vkCmdDraw-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDraw-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDraw-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDraw-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDraw-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDraw-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDraw-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDraw-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any

of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values

- VUID-vkCmdDraw-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDraw-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDraw-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDraw-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDraw-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDraw-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDraw-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDraw-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDraw-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDraw-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format

field of the OpTypeImage is Unknown, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDraw-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDraw-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDraw-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDraw-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDraw-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDraw-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDraw-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDraw-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDraw-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDraw-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a VkDescriptorSetLayout that was created with

VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident

- VUID-vkCmdDraw-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDraw-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDraw-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDraw-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDraw-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDraw-None-08613
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDraw-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDraw-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDraw-format-07753

If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match

- VUID-vkCmdDraw-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDraw-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDraw-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDraw-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDraw-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDraw-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDraw-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDraw-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDraw-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDraw-None-07288
  Any shader invocation executed by this command **must** terminate

- VUID-vkCmdDraw-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDraw-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDraw-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDraw-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDraw-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with flags that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDraw-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDraw-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a OpTypeStruct decorated with Block or BufferBlock using that mapping, the

calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDraw-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDraw-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDraw-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDraw-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDraw-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress

- VUID-vkCmdDraw-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location

in push data **must** be a multiple of 8

- VUID-vkCmdDraw-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDraw-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDraw-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDraw-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDraw-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDraw-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDraw-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or

storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDraw-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDraw-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT

- VUID-vkCmdDraw-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDraw-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDraw-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDraw-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses

a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDraw-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDraw-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDraw-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDraw-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDraw-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDraw-protectedNoFault-11456

If protectedNoFault is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDraw-renderPass-02684
  The current render pass **must** be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDraw-subpass-02685
  The subpass index of the current render pass **must** be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDraw-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDraw-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDraw-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDraw-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are non-NULL
- VUID-vkCmdDraw-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDraw-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDraw-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDraw-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDraw-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDraw-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDraw-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDraw-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDraw-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDraw-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDraw-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDraw-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must**

have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDraw-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDraw-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-06666
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `sampleLocationsEnable` is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDraw-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDraw-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDraw-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of

vkCmdSetViewportWithCount **must** be 1

- VUID-vkCmdDraw-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE
- VUID-vkCmdDraw-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and none of the following is enabled:
  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDraw-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDraw-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDraw-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDraw-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDraw-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDraw-None-07880

If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound

graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDraw-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDraw-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDraw-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDraw-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDraw-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and

vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView

- VUID-vkCmdDraw-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDraw-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDraw-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the

VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDraw-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDraw-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDraw-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDraw-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and `alphaToCoverageEnable` was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDraw-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDraw-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current

value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDraw-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated

in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDraw-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDraw-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDraw-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDraw-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDraw-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDraw-firstAttachment-07478

If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDraw-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDraw-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDraw-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDraw-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDraw-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDraw-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDraw-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDraw-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDraw-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDraw-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDraw-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDraw-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDraw-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDraw-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDraw-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDraw-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled

- VUID-vkCmdDraw-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDraw-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDraw-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDraw-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDraw-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDraw-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDraw-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDraw-None-08687

If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

- VUID-vkCmdDraw-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDraw-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDraw-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDraw-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDraw-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDraw-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDraw-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDraw-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDraw-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDraw-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics

pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE

- VUID-vkCmdDraw-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0
- VUID-vkCmdDraw-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDraw-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDraw-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDraw-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDraw-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDraw-None-10928

If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match

- VUID-vkCmdDraw-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDraw-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDraw-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDraw-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDraw-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDraw-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDraw-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDraw-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDraw-None-11861

If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount

- VUID-vkCmdDraw-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDraw-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a

custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDraw-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDraw-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDraw-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDraw-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the

sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView

- VUID-vkCmdDraw-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDraw-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDraw-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDraw-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDraw-flags-12491
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a pushConstantRangeCount not equal to 0, and with pPushConstantRanges not equal to NULL, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDraw-flags-13363
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDraw-commandBuffer-02712
  If commandBuffer is a protected command buffer and protectedNoFault is not supported, any resource written to by the VkPipeline object bound to the pipeline bind point used by this command **must** not be an unprotected resource
- VUID-vkCmdDraw-commandBuffer-02713
  If commandBuffer is a protected command buffer and protectedNoFault is not supported,

pipeline stages other than the framebuffer-space and compute stages in the VkPipeline object bound to the pipeline bind point used by this command **must** not write to any resource

- VUID-vkCmdDraw-commandBuffer-04617
  If any of the shader stages of the VkPipeline bound to the pipeline bind point used by this command uses the RayQueryKHR capability, then commandBuffer **must** not be a protected command buffer

- VUID-vkCmdDraw-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound

- VUID-vkCmdDraw-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE

- VUID-vkCmdDraw-None-02721
  If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDraw-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format

- VUID-vkCmdDraw-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format

- VUID-vkCmdDraw-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter

of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDraw-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDraw-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDraw-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDraw-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDraw-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDraw-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDraw-Input-07939
  If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT ::location
- VUID-vkCmdDraw-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the

bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format

- VUID-vkCmdDraw-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit

- VUID-vkCmdDraw-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT ::format **must** have a 64-bit component

- VUID-vkCmdDraw-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format

- VUID-vkCmdDraw-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST,

VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE

- VUID-vkCmdDraw-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDraw-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDraw-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDraw-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDraw-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDraw-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDraw-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDraw-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the pNext chain of VkGraphicsPipelineCreateInfo::pVertexInputState, any member of VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0
- VUID-vkCmdDraw-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the pVertexBindingDescriptions parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0

Valid Usage (Implicit)

- VUID-vkCmdDraw-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDraw-commandBuffer-recording
  commandBuffer **must** be in the recording state
- VUID-vkCmdDraw-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDraw-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDraw-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDraw-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to commandBuffer **must** be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDraw is affected by conditional rendering

To record an indexed draw, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDrawIndexed(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    indexCount,
    uint32_t                                    instanceCount,
    uint32_t                                    firstIndex,
    int32_t                                     vertexOffset,
    uint32_t                                    firstInstance);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `indexCount` is the number of vertices to draw.
- `instanceCount` is the number of instances to draw.
- `firstIndex` is the base index within the index buffer.
- `vertexOffset` is the value added to the vertex index before indexing into the vertex buffer.
- `firstInstance` is the instance ID of the first instance to draw.

When the command is executed, primitives are assembled using the current primitive topology and `indexCount` vertices whose indices are retrieved from the index buffer. The index buffer is treated as an array of tightly packed unsigned integers of size defined by the vkCmdBindIndexBuffer2::`indexType` or the vkCmdBindIndexBuffer::`indexType` parameter with which the buffer was bound.

The first vertex index is read from `indexAddress` + (`firstIndex` × `indexSize`), where `indexAddress` is the effective address specified for the index buffer by vkCmdBindIndexBuffer3KHR, vkCmdBindIndexBuffer2, or vkCmdBindIndexBuffer, and `indexSize` is the byte size of the type specified by `indexType`. Subsequent index values are retrieved from consecutive locations in the index buffer. Indices are first compared to the primitive restart value, then zero extended to 32 bits (if the `indexType` is VK_INDEX_TYPE_UINT8 or VK_INDEX_TYPE_UINT16) and have `vertexOffset` added to them, before being supplied as the `vertexIndex` value.

The primitives are drawn `instanceCount` times with `instanceIndex` starting with `firstInstance` and

increasing sequentially for each instance. The assembled primitives execute the bound graphics pipeline.

Valid Usage

- VUID-vkCmdDrawIndexed-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexed-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexed-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexed-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexed-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndexed-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndexed-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndexed-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any

of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndexed-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndexed-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndexed-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndexed-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndexed-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndexed-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexed-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexed-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexed-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexed-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format

field of the OpTypeImage is Unknown, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawIndexed-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexed-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndexed-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndexed-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndexed-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexed-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndexed-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexed-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndexed-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexed-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a VkDescriptorSetLayout that was created with

VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident

- VUID-vkCmdDrawIndexed-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexed-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndexed-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexed-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexed-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexed-None-08613
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexed-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndexed-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndexed-format-07753

If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match

- VUID-vkCmdDrawIndexed-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndexed-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexed-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexed-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndexed-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndexed-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndexed-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndexed-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexed-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexed-None-07288
  Any shader invocation executed by this command **must** terminate

- VUID-vkCmdDrawIndexed-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndexed-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndexed-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndexed-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndexed-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with flags that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndexed-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndexed-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a OpTypeStruct decorated with Block or BufferBlock using that mapping, the

calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawIndexed-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndexed-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`
- VUID-vkCmdDrawIndexed-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndexed-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexed-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexed-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location

in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndexed-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexed-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexed-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndexed-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndexed-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexed-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexed-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or

storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawIndexed-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawIndexed-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT

- VUID-vkCmdDrawIndexed-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndexed-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndexed-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndexed-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses

a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDrawIndexed-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexed-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawIndexed-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndexed-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndexed-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndexed-protectedNoFault-11456

If protectedNoFault is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawIndexed-renderPass-02684
  The current render pass **must** be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexed-subpass-02685
  The subpass index of the current render pass **must** be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexed-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndexed-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndexed-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndexed-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are non-NULL
- VUID-vkCmdDrawIndexed-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndexed-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexed-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexed-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexed-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexed-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexed-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexed-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexed-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndexed-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndexed-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndexed-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must**

have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndexed-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndexed-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-06666
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `sampleLocationsEnable` is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndexed-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawIndexed-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndexed-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of

vkCmdSetViewportWithCount **must** be 1

- VUID-vkCmdDrawIndexed-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexed-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and none of the following is enabled:
  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawIndexed-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndexed-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawIndexed-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndexed-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndexed-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndexed-None-07880

If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound

graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndexed-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndexed-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndexed-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndexed-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexed-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and

vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView

- VUID-vkCmdDrawIndexed-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndexed-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndexed-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the

VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexed-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndexed-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndexed-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndexed-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and `alphaToCoverageEnable` was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndexed-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndexed-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current

value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndexed-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated

in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawIndexed-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndexed-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexed-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexed-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndexed-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexed-firstAttachment-07478

If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexed-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`
- VUID-vkCmdDrawIndexed-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexed-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexed-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexed-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero
- VUID-vkCmdDrawIndexed-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndexed-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexed-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndexed-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled

- VUID-vkCmdDrawIndexed-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndexed-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDrawIndexed-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndexed-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndexed-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndexed-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndexed-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndexed-None-08687

If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

- VUID-vkCmdDrawIndexed-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndexed-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndexed-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexed-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawIndexed-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndexed-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndexed-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawIndexed-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndexed-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndexed-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics

pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE

- VUID-vkCmdDrawIndexed-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0
- VUID-vkCmdDrawIndexed-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndexed-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndexed-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndexed-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndexed-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndexed-None-10928

If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match

- VUID-vkCmdDrawIndexed-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawIndexed-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndexed-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndexed-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndexed-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexed-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexed-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexed-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexed-None-11861

If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount

- VUID-vkCmdDrawIndexed-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexed-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a

custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexed-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexed-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndexed-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexed-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the

sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView

- VUID-vkCmdDrawIndexed-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexed-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexed-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndexed-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexed-flags-12491
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a pushConstantRangeCount not equal to 0, and with pPushConstantRanges not equal to NULL, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexed-flags-13363
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexed-commandBuffer-02712
  If commandBuffer is a protected command buffer and protectedNoFault is not supported, any resource written to by the VkPipeline object bound to the pipeline bind point used by this command **must** not be an unprotected resource
- VUID-vkCmdDrawIndexed-commandBuffer-02713
  If commandBuffer is a protected command buffer and protectedNoFault is not supported,

pipeline stages other than the framebuffer-space and compute stages in the VkPipeline object bound to the pipeline bind point used by this command **must** not write to any resource

- VUID-vkCmdDrawIndexed-commandBuffer-04617
  If any of the shader stages of the VkPipeline bound to the pipeline bind point used by this command uses the RayQueryKHR capability, then commandBuffer **must** not be a protected command buffer

- VUID-vkCmdDrawIndexed-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound

- VUID-vkCmdDrawIndexed-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE

- VUID-vkCmdDrawIndexed-None-02721
  If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawIndexed-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format

- VUID-vkCmdDrawIndexed-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format

- VUID-vkCmdDrawIndexed-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter

of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDrawIndexed-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndexed-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndexed-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndexed-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexed-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDrawIndexed-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexed-Input-07939
  If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT::location
- VUID-vkCmdDrawIndexed-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the

bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format

- VUID-vkCmdDrawIndexed-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit

- VUID-vkCmdDrawIndexed-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT ::format **must** have a 64-bit component

- VUID-vkCmdDrawIndexed-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format

- VUID-vkCmdDrawIndexed-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST,

VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE

- VUID-vkCmdDrawIndexed-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexed-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexed-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndexed-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndexed-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndexed-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndexed-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawIndexed-None-07312
  If the `maintenance6` feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexed-primitiveRestartIndex-12401
  If the primitive restart index for this draw operation was set with vkCmdSetPrimitiveRestartIndexEXT, then `primitiveRestartIndex` **must** not be greater than the maximum representable value for the bound VkIndexType
- VUID-vkCmdDrawIndexed-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the `pNext` chain of VkGraphicsPipelineCreateInfo::`pVertexInputState`, any member of VkPipelineVertexInputDivisorStateCreateInfo::`pVertexBindingDivisors` has a value other than `1` in `divisor`, and VkPhysicalDeviceVertexAttributeDivisorProperties::`supportsNonZeroFirstInstance` is VK_FALSE, then `firstInstance` **must** be `0`
- VUID-vkCmdDrawIndexed-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than `1` in `divisor`, and VkPhysicalDeviceVertexAttributeDivisorProperties::`supportsNonZeroFirstInstance` is VK_FALSE, then `firstInstance` **must** be `0`
- VUID-vkCmdDrawIndexed-robustBufferAccess2-08798
  If the `robustBufferAccess2` feature is not enabled, (`indexSize` × (`firstIndex` + `indexCount`)) **must** be less than or equal to the size of the bound index buffer range, with `indexSize` being based on the type specified by `indexType`, and the other parameters sourced from this command

Valid Usage (Implicit)

- VUID-vkCmdDrawIndexed-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndexed-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdDrawIndexed-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndexed-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexed-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexed-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndexed is affected by conditional rendering

To record an ordered sequence of draws which have no state changes between them, call:

```
// Provided by VK_EXT_multi_draw
void vkCmdDrawMultiEXT(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    drawCount,
    const VkMultiDrawInfoEXT*                   pVertexInfo,
    uint32_t                                    instanceCount,
    uint32_t                                    firstInstance,
    uint32_t                                    stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `drawCount` is the number of draws to execute, and **can** be zero.
- `pVertexInfo` is a pointer to an array of VkMultiDrawInfoEXT with vertex information to be drawn.
- `instanceCount` is the number of instances per draw.
- `firstInstance` is the instance ID of the first instance in each draw.
- `stride` is the byte stride between consecutive elements of `pVertexInfo`.

The number of draws recorded is `drawCount`, with each draw reading, sequentially, a `firstVertex` and a `vertexCount` from `pVertexInfo`. For each recorded draw, primitives are assembled as for vkCmdDraw, and drawn `instanceCount` times with `instanceIndex` starting with `firstInstance` and sequentially for each instance.

Valid Usage

- VUID-vkCmdDrawMultiEXT-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawMultiEXT-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawMultiEXT-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawMultiEXT-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawMultiEXT-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawMultiEXT-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawMultiEXT-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawMultiEXT-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawMultiEXT-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawMultiEXT-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawMultiEXT-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawMultiEXT-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawMultiEXT-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawMultiEXT-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawMultiEXT-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMultiEXT-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMultiEXT-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawMultiEXT-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMultiEXT-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawMultiEXT-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawMultiEXT-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawMultiEXT-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMultiEXT-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawMultiEXT-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawMultiEXT-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident

- VUID-vkCmdDrawMultiEXT-None-08606
  If the shaderObject feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawMultiEXT-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawMultiEXT-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiEXT-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiEXT-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiEXT-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiEXT-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawMultiEXT-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType **must** match the Dim operand of the OpTypeImage as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawMultiEXT-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match

- VUID-vkCmdDrawMultiEXT-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawMultiEXT-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDrawMultiEXT-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawMultiEXT-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawMultiEXT-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawMultiEXT-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawMultiEXT-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawMultiEXT-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawMultiEXT-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawMultiEXT-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawMultiEXT-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all

image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawMultiEXT-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawMultiEXT-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawMultiEXT-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawMultiEXT-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with flags that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawMultiEXT-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a OpTypeStruct decorated with Block or BufferBlock using that mapping, the calculated offset for the resource heap **must** be a multiple of bufferDescriptorAlignment
- VUID-vkCmdDrawMultiEXT-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping

using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an OpTypeImage or OpTypeSampledImage using that mapping, the calculated offset for the resource heap **must** be a multiple of imageDescriptorAlignment

- VUID-vkCmdDrawMultiEXT-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an OpTypeSampler or OpTypeSampledImage using that mapping, the calculated offset for the sampler heap **must** be a multiple of samplerDescriptorAlignment
- VUID-vkCmdDrawMultiEXT-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawMultiEXT-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawMultiEXT-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawMultiEXT-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawMultiEXT-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping

using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawMultiEXT-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawMultiEXT-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawMultiEXT-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawMultiEXT-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMultiEXT-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMultiEXT-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMultiEXT-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of

pBindInfo->reservedRangeSize set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to minSamplerHeapReservedRangeWithEmbedded

- VUID-vkCmdDrawMultiEXT-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawMultiEXT-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawMultiEXT-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawMultiEXT-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawMultiEXT-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to minUniformBufferOffsetAlignment
- VUID-vkCmdDrawMultiEXT-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set

- VUID-vkCmdDrawMultiEXT-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawMultiEXT-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawMultiEXT-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawMultiEXT-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawMultiEXT-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the

address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawMultiEXT-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawMultiEXT-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawMultiEXT-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawMultiEXT-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawMultiEXT-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by VkRenderingInputAttachmentIndexInfo, or no `InputAttachmentIndex` if VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` or VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are `NULL`, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawMultiEXT-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` and VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawMultiEXT-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawMultiEXT-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiEXT-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMultiEXT-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiEXT-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiEXT-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiEXT-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiEXT-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiEXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawMultiEXT-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawMultiEXT-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawMultiEXT-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not

subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called

and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawMultiEXT-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-06666
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `sampleLocationsEnable` is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing

- VUID-vkCmdDrawMultiEXT-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawMultiEXT-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawMultiEXT-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawMultiEXT-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current

value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE

- VUID-vkCmdDrawMultiEXT-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and none of the following is enabled:

  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawMultiEXT-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawMultiEXT-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawMultiEXT-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have

been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiEXT-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawMultiEXT-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount
- VUID-vkCmdDrawMultiEXT-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles
- VUID-vkCmdDrawMultiEXT-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently

invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo

::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiEXT-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawMultiEXT-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawMultiEXT-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawMultiEXT-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawMultiEXT-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawMultiEXT-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawMultiEXT-pNext-07935

If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples

- VUID-vkCmdDrawMultiEXT-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawMultiEXT-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo ::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance,

there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo ::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiEXT-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo ::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawMultiEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawMultiEXT-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawMultiEXT-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawMultiEXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawMultiEXT-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07625
  If the alphaToOne feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07626
  If the logicOp feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics

pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawMultiEXT-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled,

and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawMultiEXT-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics

stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawMultiEXT-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawMultiEXT-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiEXT-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawMultiEXT-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawMultiEXT-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawMultiEXT-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`
- VUID-vkCmdDrawMultiEXT-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawMultiEXT-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawMultiEXT-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawMultiEXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero
- VUID-vkCmdDrawMultiEXT-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` member of the VkPipelineMultisampleStateCreateInfo structure the

bound graphics pipeline has been created with

- VUID-vkCmdDrawMultiEXT-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::`maxSampleLocationGridSize.width` as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a `samples` parameter equaling `rasterizationSamples`
- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::`maxSampleLocationGridSize.height` as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a `samples` parameter equaling `rasterizationSamples`
- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use

the extended instruction InterpolateAtSample

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode

state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled

- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDrawMultiEXT-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawMultiEXT-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawMultiEXT-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawMultiEXT-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawMultiEXT-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawMultiEXT-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawMultiEXT-None-08688

If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT

- VUID-vkCmdDrawMultiEXT-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawMultiEXT-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawMultiEXT-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawMultiEXT-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawMultiEXT-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawMultiEXT-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawMultiEXT-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to

vkCmdSetDepthWriteEnable **must** be VK_FALSE

- VUID-vkCmdDrawMultiEXT-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to vkCmdSetStencilWriteMask **must** be `0`
- VUID-vkCmdDrawMultiEXT-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the `pColorWriteMasks` parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawMultiEXT-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of `Location` for any output attachment statically used in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`
- VUID-vkCmdDrawMultiEXT-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::`pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawMultiEXT-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::`pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices`[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** much
- VUID-vkCmdDrawMultiEXT-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match
- VUID-vkCmdDrawMultiEXT-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is

statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match

- VUID-vkCmdDrawMultiEXT-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawMultiEXT-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawMultiEXT-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawMultiEXT-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawMultiEXT-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawMultiEXT-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawMultiEXT-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawMultiEXT-None-11861
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount

- VUID-vkCmdDrawMultiEXT-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawMultiEXT-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be

VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiEXT-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiEXT-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawMultiEXT-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawMultiEXT-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawMultiEXT-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound

must have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE

- VUID-vkCmdDrawMultiEXT-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawMultiEXT-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawMultiEXT-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawMultiEXT-flags-12491
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a pushConstantRangeCount not equal to 0, and with pPushConstantRanges not equal to NULL, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawMultiEXT-flags-13363
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawMultiEXT-commandBuffer-02712
  If commandBuffer is a protected command buffer and protectedNoFault is not supported, any resource written to by the VkPipeline object bound to the pipeline bind point used by this command **must** not be an unprotected resource
- VUID-vkCmdDrawMultiEXT-commandBuffer-02713
  If commandBuffer is a protected command buffer and protectedNoFault is not supported, pipeline stages other than the framebuffer-space and compute stages in the VkPipeline object bound to the pipeline bind point used by this command **must** not write to any resource
- VUID-vkCmdDrawMultiEXT-commandBuffer-04617
  If any of the shader stages of the VkPipeline bound to the pipeline bind point used by this

command uses the RayQueryKHR capability, then commandBuffer **must** not be a protected command buffer

- VUID-vkCmdDrawMultiEXT-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawMultiEXT-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawMultiEXT-None-02721
  If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description
- VUID-vkCmdDrawMultiEXT-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format
- VUID-vkCmdDrawMultiEXT-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format
- VUID-vkCmdDrawMultiEXT-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawMultiEXT-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this

drawing command

- VUID-vkCmdDrawMultiEXT-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawMultiEXT-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawMultiEXT-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawMultiEXT-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDrawMultiEXT-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawMultiEXT-Input-07939
  If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT ::location
- VUID-vkCmdDrawMultiEXT-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding

Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format

- VUID-vkCmdDrawMultiEXT-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit
- VUID-vkCmdDrawMultiEXT-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT ::format **must** have a 64-bit component
- VUID-vkCmdDrawMultiEXT-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format
- VUID-vkCmdDrawMultiEXT-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state

enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE

- VUID-vkCmdDrawMultiEXT-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawMultiEXT-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawMultiEXT-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawMultiEXT-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawMultiEXT-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the `pNext` chain of VkGraphicsPipelineCreateInfo::`pVertexInputState`, any member of VkPipelineVertexInputDivisorStateCreateInfo::`pVertexBindingDivisors` has a value other

than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties ::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0

- VUID-vkCmdDrawMultiEXT-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the pVertexBindingDescriptions parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0
- VUID-vkCmdDrawMultiEXT-None-04933
  The multiDraw feature **must** be enabled
- VUID-vkCmdDrawMultiEXT-drawCount-04934
  drawCount **must** be less than VkPhysicalDeviceMultiDrawPropertiesEXT::maxMultiDrawCount
- VUID-vkCmdDrawMultiEXT-drawCount-04935
  If drawCount is greater than zero, pVertexInfo **must** be a valid pointer to memory containing one or more valid instances of VkMultiDrawInfoEXT structures
- VUID-vkCmdDrawMultiEXT-drawCount-09628
  If drawCount is greater than 1, stride **must** be a multiple of 4 and **must** be greater than or equal to sizeof(VkMultiDrawInfoEXT)

Valid Usage (Implicit)

- VUID-vkCmdDrawMultiEXT-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawMultiEXT-commandBuffer-recording
  commandBuffer **must** be in the recording state
- VUID-vkCmdDrawMultiEXT-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawMultiEXT-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawMultiEXT-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawMultiEXT-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to commandBuffer **must** be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawMultiEXT is affected by conditional rendering

To record an ordered sequence of indexed draws which have no state changes between them, call:

```
// Provided by VK_EXT_multi_draw
void vkCmdDrawMultiIndexedEXT(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    drawCount,
    const VkMultiDrawIndexedInfoEXT*            pIndexInfo,
    uint32_t                                    instanceCount,
    uint32_t                                    firstInstance,
    uint32_t                                    stride,
    const int32_t*                              pVertexOffset);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `drawCount` is the number of draws to execute, and **can** be zero.
- `pIndexInfo` is a pointer to an array of VkMultiDrawIndexedInfoEXT with index information to be drawn.
- `instanceCount` is the number of instances per draw.
- `firstInstance` is the instance ID of the first instance in each draw.
- `stride` is the byte stride between consecutive elements of `pIndexInfo`.
- `pVertexOffset` is `NULL` or a pointer to the value added to the vertex index before indexing into the vertex buffer. When specified, `VkMultiDrawIndexedInfoEXT::offset` is ignored.

The number of draws recorded is `drawCount`, with each draw reading, sequentially, a `firstIndex` and an `indexCount` from `pIndexInfo`. For each recorded draw, primitives are assembled as for vkCmdDrawIndexed, and drawn `instanceCount` times with `instanceIndex` starting with `firstInstance` and sequentially for each instance. If `pVertexOffset` is `NULL`, a `vertexOffset` is also read from `pIndexInfo`, otherwise the value from dereferencing `pVertexOffset` is used.

Valid Usage

- VUID-vkCmdDrawMultiIndexedEXT-magFilter-04553

If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawMultiIndexedEXT-magFilter-09598
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawMultiIndexedEXT-mipmapMode-04770
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawMultiIndexedEXT-mipmapMode-09599
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawMultiIndexedEXT-unnormalizedCoordinates-09635
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's levelCount and layerCount **must** be 1
- VUID-vkCmdDrawMultiIndexedEXT-None-08609
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's viewType **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawMultiIndexedEXT-None-08610
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name
- VUID-vkCmdDrawMultiIndexedEXT-None-08611
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawMultiIndexedEXT-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT

- VUID-vkCmdDrawMultiIndexedEXT-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawMultiIndexedEXT-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawMultiIndexedEXT-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawMultiIndexedEXT-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawMultiIndexedEXT-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain

VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawMultiIndexedEXT-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawMultiIndexedEXT-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawMultiIndexedEXT-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawMultiIndexedEXT-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawMultiIndexedEXT-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawMultiIndexedEXT-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command

- VUID-vkCmdDrawMultiIndexedEXT-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawMultiIndexedEXT-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiIndexedEXT-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiIndexedEXT-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiIndexedEXT-None-08613
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawMultiIndexedEXT-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawMultiIndexedEXT-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match
- VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that

instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components
- VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-04469
  If a VkBufferView is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawMultiIndexedEXT-sparseImageInt64Atomics-04474
  If the `sparseImageInt64Atomics` feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command
- VUID-vkCmdDrawMultiIndexedEXT-sparseImageInt64Atomics-04475
  If the `sparseImageInt64Atomics` feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawMultiIndexedEXT-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawMultiIndexedEXT-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawMultiIndexedEXT-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawMultiIndexedEXT-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawMultiIndexedEXT-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with flags that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawMultiIndexedEXT-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a OpTypeStruct decorated with Block or BufferBlock using that mapping, the calculated offset for the resource heap **must** be a multiple of bufferDescriptorAlignment
- VUID-vkCmdDrawMultiIndexedEXT-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT,

VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an OpTypeImage or OpTypeSampledImage using that mapping, the calculated offset for the resource heap **must** be a multiple of imageDescriptorAlignment

- VUID-vkCmdDrawMultiIndexedEXT-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an OpTypeSampler or OpTypeSampledImage using that mapping, the calculated offset for the sampler heap **must** be a multiple of samplerDescriptorAlignment
- VUID-vkCmdDrawMultiIndexedEXT-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawMultiIndexedEXT-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawMultiIndexedEXT-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawMultiIndexedEXT-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawMultiIndexedEXT-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location

in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawMultiIndexedEXT-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawMultiIndexedEXT-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawMultiIndexedEXT-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawMultiIndexedEXT-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMultiIndexedEXT-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMultiIndexedEXT-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMultiIndexedEXT-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawMultiIndexedEXT-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawMultiIndexedEXT-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawMultiIndexedEXT-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawMultiIndexedEXT-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawMultiIndexedEXT-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawMultiIndexedEXT-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or

VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set

- VUID-vkCmdDrawMultiIndexedEXT-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawMultiIndexedEXT-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawMultiIndexedEXT-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawMultiIndexedEXT-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawMultiIndexedEXT-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawMultiIndexedEXT-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawMultiIndexedEXT-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawMultiIndexedEXT-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawMultiIndexedEXT-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by VkRenderingInputAttachmentIndexInfo, or no `InputAttachmentIndex` if VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` or VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are `NULL`, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawMultiIndexedEXT-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` and VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawMultiIndexedEXT-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawMultiIndexedEXT-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load,

store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMultiIndexedEXT-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawMultiIndexedEXT-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawMultiIndexedEXT-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties ::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawMultiIndexedEXT-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-06666
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `sampleLocationsEnable` is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled,

and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07846
  If the depthBounds feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently

invalidated in the current command buffer prior to this drawing

- VUID-vkCmdDrawMultiIndexedEXT-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawMultiIndexedEXT-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1
- VUID-vkCmdDrawMultiIndexedEXT-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1
- VUID-vkCmdDrawMultiIndexedEXT-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current

value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE

- VUID-vkCmdDrawMultiIndexedEXT-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and none of the following is enabled:

  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawMultiIndexedEXT-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawMultiIndexedEXT-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawMultiIndexedEXT-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have

been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiIndexedEXT-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawMultiIndexedEXT-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount
- VUID-vkCmdDrawMultiIndexedEXT-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles
- VUID-vkCmdDrawMultiIndexedEXT-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently

invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo

::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiIndexedEXT-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawMultiIndexedEXT-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawMultiIndexedEXT-pNext-07935

If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples

- VUID-vkCmdDrawMultiIndexedEXT-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawMultiIndexedEXT-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo ::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance,

there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo ::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiIndexedEXT-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo ::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawMultiIndexedEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawMultiIndexedEXT-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawMultiIndexedEXT-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently

invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and `alphaToCoverageEnable` was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawMultiIndexedEXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawMultiIndexedEXT-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the

VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08666
  If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-08669
  If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07849
  If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stippledLineEnable` is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be VK_FALSE
- VUID-vkCmdDrawMultiIndexedEXT-None-07639
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawMultiIndexedEXT-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawMultiIndexedEXT-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiIndexedEXT-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE,

then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawMultiIndexedEXT-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawMultiIndexedEXT-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDrawMultiIndexedEXT-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDrawMultiIndexedEXT-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDrawMultiIndexedEXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the

VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound

graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07497

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled

- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDrawMultiIndexedEXT-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawMultiIndexedEXT-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawMultiIndexedEXT-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawMultiIndexedEXT-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawMultiIndexedEXT-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawMultiIndexedEXT-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled,

vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

- VUID-vkCmdDrawMultiIndexedEXT-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawMultiIndexedEXT-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawMultiIndexedEXT-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawMultiIndexedEXT-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawMultiIndexedEXT-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawMultiIndexedEXT-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawMultiIndexedEXT-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawMultiIndexedEXT-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the

VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE

- VUID-vkCmdDrawMultiIndexedEXT-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0
- VUID-vkCmdDrawMultiIndexedEXT-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawMultiIndexedEXT-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawMultiIndexedEXT-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawMultiIndexedEXT-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawMultiIndexedEXT-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawMultiIndexedEXT-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader

object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match

- VUID-vkCmdDrawMultiIndexedEXT-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawMultiIndexedEXT-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawMultiIndexedEXT-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawMultiIndexedEXT-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawMultiIndexedEXT-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawMultiIndexedEXT-None-11861
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render

pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount

- VUID-vkCmdDrawMultiIndexedEXT-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawMultiIndexedEXT-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled,

VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMultiIndexedEXT-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMultiIndexedEXT-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawMultiIndexedEXT-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawMultiIndexedEXT-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView

- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_TRUE
- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE
- VUID-vkCmdDrawMultiIndexedEXT-flags-13361
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawMultiIndexedEXT-flags-13362
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawMultiIndexedEXT-flags-12491
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawMultiIndexedEXT-flags-13363
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02712
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, any resource written to by the `VkPipeline` object bound to the pipeline bind point used by this command **must** not be an unprotected resource
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02713
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, pipeline stages other than the framebuffer-space and compute stages in the `VkPipeline` object bound to the pipeline bind point used by this command **must** not write to any

resource

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-04617
  If any of the shader stages of the VkPipeline bound to the pipeline bind point used by this command uses the RayQueryKHR capability, then commandBuffer **must** not be a protected command buffer

- VUID-vkCmdDrawMultiIndexedEXT-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound

- VUID-vkCmdDrawMultiIndexedEXT-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE

- VUID-vkCmdDrawMultiIndexedEXT-None-02721
  If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawMultiIndexedEXT-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format

- VUID-vkCmdDrawMultiIndexedEXT-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format

- VUID-vkCmdDrawMultiIndexedEXT-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDrawMultiIndexedEXT-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of `primitiveTopology` **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set `primitiveTopology` to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawMultiIndexedEXT-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set `primitiveTopology` to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the `maintenance5` feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to
- VUID-vkCmdDrawMultiIndexedEXT-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-`NULL` `pStrides` parameter or vkCmdBindVertexBuffers3KHR with `setStride` set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawMultiIndexedEXT-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been VK_FALSE
- VUID-vkCmdDrawMultiIndexedEXT-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawMultiIndexedEXT-Input-07939
  If the `maintenance9` feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in VkVertexInputAttributeDescription2EXT ::`location`
- VUID-vkCmdDrawMultiIndexedEXT-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the

legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format

- VUID-vkCmdDrawMultiIndexedEXT-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit

- VUID-vkCmdDrawMultiIndexedEXT-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT::format **must** have a 64-bit component

- VUID-vkCmdDrawMultiIndexedEXT-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format

- VUID-vkCmdDrawMultiIndexedEXT-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or

VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE

- VUID-vkCmdDrawMultiIndexedEXT-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawMultiIndexedEXT-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawMultiIndexedEXT-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawMultiIndexedEXT-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawMultiIndexedEXT-None-07312
  If the `maintenance6` feature is not enabled, a valid index buffer **must** be bound

- VUID-vkCmdDrawMultiIndexedEXT-primitiveRestartIndex-12401
  If the primitive restart index for this draw operation was set with vkCmdSetPrimitiveRestartIndexEXT, then `primitiveRestartIndex` **must** not be greater than the maximum representable value for the bound VkIndexType

- VUID-vkCmdDrawMultiIndexedEXT-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the `pNext` chain of VkGraphicsPipelineCreateInfo::`pVertexInputState`, any member of VkPipelineVertexInputDivisorStateCreateInfo::`pVertexBindingDivisors` has a value other than `1` in `divisor`, and VkPhysicalDeviceVertexAttributeDivisorProperties::`supportsNonZeroFirstInstance` is VK_FALSE, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawMultiIndexedEXT-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than `1` in `divisor`, and VkPhysicalDeviceVertexAttributeDivisorProperties::`supportsNonZeroFirstInstance` is VK_FALSE, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawMultiIndexedEXT-robustBufferAccess2-08798
  If the `robustBufferAccess2` feature is not enabled, (`indexSize` × (`firstIndex` + `indexCount`)) **must** be less than or equal to the size of the bound index buffer range, with `indexSize` being based on the type specified by `indexType`, and the other parameters sourced from this command

- VUID-vkCmdDrawMultiIndexedEXT-None-04937
  The `multiDraw` feature **must** be enabled

- VUID-vkCmdDrawMultiIndexedEXT-drawCount-04939
  `drawCount` **must** be less than VkPhysicalDeviceMultiDrawPropertiesEXT::`maxMultiDrawCount`

- VUID-vkCmdDrawMultiIndexedEXT-drawCount-04940
  If `drawCount` is greater than zero, `pIndexInfo` **must** be a valid pointer to memory containing one or more valid instances of VkMultiDrawIndexedInfoEXT structures

- VUID-vkCmdDrawMultiIndexedEXT-drawCount-09629
  If `drawCount` is greater than `1`, `stride` **must** be a multiple of `4` and **must** be greater than or equal to `sizeof`(`VkMultiDrawIndexedInfoEXT`)

Valid Usage (Implicit)

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle

- VUID-vkCmdDrawMultiIndexedEXT-pVertexOffset-parameter
  If `pVertexOffset` is not `NULL`, `pVertexOffset` **must** be a valid pointer to a valid `int32_t` value

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-recording
  `commandBuffer` **must** be in the recording state

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawMultiIndexedEXT-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawMultiIndexedEXT-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawMultiIndexedEXT-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawMultiIndexedEXT is affected by conditional rendering

The `VkMultiDrawInfoEXT` structure is defined as:

```
// Provided by VK_EXT_multi_draw
typedef struct VkMultiDrawInfoEXT {
    uint32_t    firstVertex;
    uint32_t    vertexCount;
} VkMultiDrawInfoEXT;
```

- `firstVertex` is the first vertex to draw.
- `vertexCount` is the number of vertices to draw.

The members of `VkMultiDrawInfoEXT` have the same meaning as the `firstVertex` and `vertexCount` parameters in vkCmdDraw.

The VkMultiDrawIndexedInfoEXT structure is defined as:

```
// Provided by VK_EXT_multi_draw
typedef struct VkMultiDrawIndexedInfoEXT {
    uint32_t    firstIndex;
    uint32_t    indexCount;
    int32_t     vertexOffset;
} VkMultiDrawIndexedInfoEXT;
```

- firstIndex is the first index to draw.
- indexCount is the number of vertices to draw.
- vertexOffset is the value added to the vertex index before indexing into the vertex buffer for indexed multidraws.

The firstIndex, indexCount, and vertexOffset members of VkMultiDrawIndexedInfoEXT have the same meaning as the firstIndex, indexCount, and vertexOffset parameters, respectively, of vkCmdDrawIndexed.

VkDrawIndirect2InfoKHR is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkDrawIndirect2InfoKHR {
    VkStructureType                   sType;
    const void*                       pNext;
    VkStridedDeviceAddressRangeKHR    addressRange;
    VkAddressCommandFlagsKHR          addressFlags;
    uint32_t                          drawCount;
} VkDrawIndirect2InfoKHR;
```

- sType is a VkStructureType value identifying this structure.
- pNext is NULL or a pointer to a structure extending this structure.
- addressRange is the VkStridedDeviceAddressRangeKHR containing draw parameters.
- addressFlags is a VkAddressCommandFlagsKHR value defining the flags for the address range.
- drawCount is the number of draws to execute, and **can** be zero.

Valid Usage

- VUID-VkDrawIndirect2InfoKHR-addressRange-13097
  If the range specified by addressRange is not bound completely to memory when accessed, addressFlags **must** not include VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressRange-13098
  If the buffer from which the range specified by addressRange was created with VK_BUFFER_CREATE_PROTECTED_BIT, and protectedNoFault is not supported, addressFlags **must** include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR

- VUID-VkDrawIndirect2InfoKHR-addressRange-13099
  If the buffer from which the range specified by `addressRange` was created without VK_BUFFER_CREATE_PROTECTED_BIT, and `protectedNoFault` is not supported, `addressFlags` **must** not include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressFlags-13100
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressRange-13122
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressRange-13123
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** not include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressFlags-13101
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressRange-13124
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `addressFlags` **must** include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressRange-13125
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `addressFlags` **must** not include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirect2InfoKHR-addressRange-13107
  The buffer from which `addressRange` was queried **must** have been created with VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag
- VUID-VkDrawIndirect2InfoKHR-protectedNoFault-13108
  If `protectedNoFault` is not supported, the buffer from which `addressRange` was queried **must** not have been created with VK_BUFFER_CREATE_PROTECTED_BIT
- VUID-VkDrawIndirect2InfoKHR-addressRange-13109
  `addressRange.address` **must** be a multiple of 4

- VUID-VkDrawIndirect2InfoKHR-drawCount-02718
  If the multiDrawIndirect feature is not enabled, drawCount **must** be 0 or 1
- VUID-VkDrawIndirect2InfoKHR-drawCount-02719
  drawCount **must** be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount

Valid Usage (Implicit)

- VUID-VkDrawIndirect2InfoKHR-sType-sType
  sType **must** be VK_STRUCTURE_TYPE_DRAW_INDIRECT_2_INFO_KHR
- VUID-VkDrawIndirect2InfoKHR-pNext-pNext
  pNext **must** be NULL
- VUID-VkDrawIndirect2InfoKHR-addressFlags-parameter
  If addressFlags is not 0, addressFlags **must** be a valid combination of VkAddressCommandFlagBitsKHR values

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdDrawIndirect2KHR(
    VkCommandBuffer                             commandBuffer,
    const VkDrawIndirect2InfoKHR*               pInfo);
```

- commandBuffer is the command buffer into which the command is recorded.
- pInfo is a pointer to a VkDrawIndirect2InfoKHR structure defining parameters of this command.

vkCmdDrawIndirect2KHR behaves similarly to vkCmdDraw except that the parameters are read by the device from an address range during execution. pInfo->drawCount draws are executed by the command, with parameters taken from pInfo->addressRange starting at addressRange.address and increasing by addressRange.stride bytes for each successive draw. The parameters of each draw are encoded in an array of VkDrawIndirectCommand structures.

Valid Usage

- VUID-vkCmdDrawIndirect2KHR-magFilter-04553
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirect2KHR-magFilter-09598
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or

VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT

- VUID-vkCmdDrawIndirect2KHR-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirect2KHR-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirect2KHR-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndirect2KHR-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndirect2KHR-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndirect2KHR-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndirect2KHR-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndirect2KHR-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndirect2KHR-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT

- VUID-vkCmdDrawIndirect2KHR-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndirect2KHR-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirect2KHR-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirect2KHR-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndirect2KHR-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges

and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader

- VUID-vkCmdDrawIndirect2KHR-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndirect2KHR-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndirect2KHR-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndirect2KHR-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirect2KHR-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirect2KHR-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndirect2KHR-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either

VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect2KHR-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirect2KHR-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirect2KHR-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirect2KHR-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndirect2KHR-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType **must** match the Dim operand of the OpTypeImage as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndirect2KHR-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match
- VUID-vkCmdDrawIndirect2KHR-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirect2KHR-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDrawIndirect2KHR-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the

Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDrawIndirect2KHR-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirect2KHR-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirect2KHR-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirect2KHR-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirect2KHR-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirect2KHR-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirect2KHR-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndirect2KHR-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndirect2KHR-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndirect2KHR-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndirect2KHR-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndirect2KHR-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with `flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndirect2KHR-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawIndirect2KHR-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndirect2KHR-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT,

VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndirect2KHR-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndirect2KHR-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirect2KHR-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirect2KHR-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndirect2KHR-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirect2KHR-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress

- VUID-vkCmdDrawIndirect2KHR-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndirect2KHR-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndirect2KHR-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirect2KHR-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirect2KHR-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirect2KHR-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawIndirect2KHR-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndirect2KHR-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT,

VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndirect2KHR-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirect2KHR-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirect2KHR-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndirect2KHR-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirect2KHR-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT,

VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndirect2KHR-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndirect2KHR-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndirect2KHR-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirect2KHR-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirect2KHR-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirect2KHR-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndirect2KHR-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndirect2KHR-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by VkRenderingInputAttachmentIndexInfo, or no `InputAttachmentIndex` if VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` or VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are `NULL`, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndirect2KHR-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` and VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawIndirect2KHR-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndirect2KHR-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect2KHR-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect2KHR-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect2KHR-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndirect2KHR-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect2KHR-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect2KHR-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect2KHR-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirect2KHR-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndirect2KHR-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndirect2KHR-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirect2KHR-None-07634
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-06666
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been

called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndirect2KHR-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawIndirect2KHR-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirect2KHR-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of `blendEnable` **must** be VK_FALSE
- VUID-vkCmdDrawIndirect2KHR-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is enabled:

- the multisampledRenderToSingleSampled feature

then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirect2KHR-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndirect2KHR-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawIndirect2KHR-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then

vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirect2KHR-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndirect2KHR-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndirect2KHR-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with

VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndirect2KHR-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirect2KHR-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirect2KHR-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirect2KHR-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndirect2KHR-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal

to VK_NULL_HANDLE

- VUID-vkCmdDrawIndirect2KHR-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the

VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect2KHR-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndirect2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndirect2KHR-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to

vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0

- VUID-vkCmdDrawIndirect2KHR-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndirect2KHR-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07630
  If the `geometryStreams` feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the

VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndirect2KHR-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization

input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-08669
  If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-07849
  If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stippledLineEnable` is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be VK_FALSE
- VUID-vkCmdDrawIndirect2KHR-None-07639
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-09650
  If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of `depthClampEnable` is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the

rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass

- VUID-vkCmdDrawIndirect2KHR-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirect2KHR-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect2KHR-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndirect2KHR-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirect2KHR-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirect2KHR-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and an active color attachment current value of blendEnable is VK_TRUE, then the number of active color attachments **must** not exceed advancedBlendMaxColorAttachments
- VUID-vkCmdDrawIndirect2KHR-None-10862

If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE

- VUID-vkCmdDrawIndirect2KHR-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirect2KHR-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the rasterizationStream to zero
- VUID-vkCmdDrawIndirect2KHR-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndirect2KHR-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by

vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines

feature **must** be enabled and VkPhysicalDeviceLimits::`strictLines` **must** be VK_TRUE

- VUID-vkCmdDrawIndirect2KHR-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::`stage` member of an element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndirect2KHR-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndirect2KHR-None-08684
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndirect2KHR-None-08685
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndirect2KHR-None-08686
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndirect2KHR-None-08687
  If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndirect2KHR-None-08688
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndirect2KHR-None-08689
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-08690

If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndirect2KHR-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawIndirect2KHR-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndirect2KHR-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndirect2KHR-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawIndirect2KHR-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndirect2KHR-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndirect2KHR-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirect2KHR-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0

- VUID-vkCmdDrawIndirect2KHR-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndirect2KHR-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndirect2KHR-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirect2KHR-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndirect2KHR-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirect2KHR-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirect2KHR-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-09643

If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag

- VUID-vkCmdDrawIndirect2KHR-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndirect2KHR-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::`flags` which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndirect2KHR-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirect2KHR-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirect2KHR-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT ::`customResolve` as VK_TRUE
- VUID-vkCmdDrawIndirect2KHR-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE
- VUID-vkCmdDrawIndirect2KHR-None-11861
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT ::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndirect2KHR-None-11862
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `resolveImageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::`pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirect2KHR-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect2KHR-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect2KHR-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirect2KHR-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirect2KHR-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirect2KHR-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirect2KHR-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE

- VUID-vkCmdDrawIndirect2KHR-flags-13361
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndirect2KHR-flags-13362
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirect2KHR-flags-12491
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirect2KHR-flags-13363
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndirect2KHR-None-04008
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawIndirect2KHR-None-02721
  If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description
- VUID-vkCmdDrawIndirect2KHR-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is a packed format, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in Vertex Input Calculation, **must** be a

multiple of the size of the format

- VUID-vkCmdDrawIndirect2KHR-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format
- VUID-vkCmdDrawIndirect2KHR-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndirect2KHR-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndirect2KHR-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndirect2KHR-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirect2KHR-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and

vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE

- VUID-vkCmdDrawIndirect2KHR-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirect2KHR-Input-07939
  If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT::location

- VUID-vkCmdDrawIndirect2KHR-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format

- VUID-vkCmdDrawIndirect2KHR-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit

- VUID-vkCmdDrawIndirect2KHR-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT::format **must** have a 64-bit component

- VUID-vkCmdDrawIndirect2KHR-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must**

not use components that are not present in the format

- VUID-vkCmdDrawIndirect2KHR-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of `primitiveTopology` is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-None-09637
  If the `primitiveTopologyListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirect2KHR-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirect2KHR-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirect2KHR-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndirect2KHR-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-pInfo-13110
  If pInfo->drawCount is greater than 0, pInfo->addressRange.size **must** be greater than or equal to (pInfo->drawCount - 1) × pInfo->addressRange.stride + sizeof (VkDrawIndirectCommand)
- VUID-vkCmdDrawIndirect2KHR-pInfo-13111
  If pInfo->drawCount is greater than 1, pInfo->addressRange.stride **must** not be 0
- VUID-vkCmdDrawIndirect2KHR-pInfo-13112
  If pInfo->addressRange.stride is not 0, pInfo->addressRange.stride **must** be greater than or equal to sizeof(VkDrawIndirectCommand)
- VUID-vkCmdDrawIndirect2KHR-pInfo-13113
  If pInfo->addressRange.stride is not 0, pInfo->addressRange.stride **must** be a multiple of 4
- VUID-vkCmdDrawIndirect2KHR-commandBuffer-13057
  commandBuffer **must** not be a protected command buffer

Valid Usage (Implicit)

- VUID-vkCmdDrawIndirect2KHR-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndirect2KHR-pInfo-parameter
  pInfo **must** be a valid pointer to a valid VkDrawIndirect2InfoKHR structure
- VUID-vkCmdDrawIndirect2KHR-commandBuffer-recording
  commandBuffer **must** be in the recording state
- VUID-vkCmdDrawIndirect2KHR-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations

- VUID-vkCmdDrawIndirect2KHR-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirect2KHR-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirect2KHR-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndirect2KHR is affected by conditional rendering

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDrawIndirect(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    uint32_t                                    drawCount,
    uint32_t                                    stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `drawCount` is the number of draws to execute, and **can** be zero.
- `stride` is the byte stride between successive sets of draw parameters.

vkCmdDrawIndirect behaves similarly to vkCmdDraw except that the parameters are read by the device from a buffer during execution. drawCount draws are executed by the command, with parameters taken from buffer starting at offset and increasing by stride bytes for each successive draw. The parameters of each draw are encoded in an array of VkDrawIndirectCommand structures. If drawCount is less than or equal to one, stride is ignored.

Valid Usage

- VUID-vkCmdDrawIndirect-magFilter-04553
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirect-magFilter-09598
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirect-mipmapMode-04770
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirect-mipmapMode-09599
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirect-unnormalizedCoordinates-09635
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's levelCount and layerCount **must** be 1
- VUID-vkCmdDrawIndirect-None-08609
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's viewType **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndirect-None-08610
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name

- VUID-vkCmdDrawIndirect-None-08611
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndirect-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndirect-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndirect-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndirect-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndirect-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndirect-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirect-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirect-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirect-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain

VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawIndirect-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirect-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirect-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndirect-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndirect-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndirect-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirect-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndirect-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirect-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndirect-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawIndirect-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirect-None-08606
  If the shaderObject feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirect-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndirect-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirect-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirect-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirect-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirect-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndirect-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType

must match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types

- VUID-vkCmdDrawIndirect-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match
- VUID-vkCmdDrawIndirect-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirect-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components
- VUID-vkCmdDrawIndirect-OpImageWrite-04469
  If a VkBufferView is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndirect-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawIndirect-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawIndirect-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawIndirect-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawIndirect-sparseImageInt64Atomics-04474
  If the `sparseImageInt64Atomics` feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command
- VUID-vkCmdDrawIndirect-sparseImageInt64Atomics-04475
  If the `sparseImageInt64Atomics` feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command

- VUID-vkCmdDrawIndirect-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndirect-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndirect-micromap-11636
  If an acceleration structure is accessed as a result of this command through an `OpRayQueryProceedKHR` operation , the `VK_EXT_opacity_micromap` extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its `pNext` chain, the shader **must** have specified a `OpacityMicromapIdKHR` execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndirect-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndirect-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndirect-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with `flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndirect-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndirect-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or

VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a OpTypeStruct decorated with Block or BufferBlock using that mapping, the calculated offset for the resource heap **must** be a multiple of bufferDescriptorAlignment

- VUID-vkCmdDrawIndirect-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an OpTypeImage or OpTypeSampledImage using that mapping, the calculated offset for the resource heap **must** be a multiple of imageDescriptorAlignment
- VUID-vkCmdDrawIndirect-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an OpTypeSampler or OpTypeSampledImage using that mapping, the calculated offset for the sampler heap **must** be a multiple of samplerDescriptorAlignment
- VUID-vkCmdDrawIndirect-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndirect-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirect-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirect-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping

using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndirect-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirect-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirect-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndirect-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndirect-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirect-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirect-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not

enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawIndirect-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawIndirect-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT

- VUID-vkCmdDrawIndirect-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndirect-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndirect-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndirect-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT,

VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDrawIndirect-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirect-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawIndirect-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndirect-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndirect-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawIndirect-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirect-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirect-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirect-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndirect-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndirect-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by VkRenderingInputAttachmentIndexInfo, or no `InputAttachmentIndex` if VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` or VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are `NULL`, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndirect-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` and VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawIndirect-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndirect-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndirect-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirect-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndirect-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndirect-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must**

have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndirect-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirect-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-06666
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `sampleLocationsEnable` is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndirect-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawIndirect-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirect-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of

vkCmdSetViewportWithCount **must** be 1

- VUID-vkCmdDrawIndirect-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirect-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and none of the following is enabled:
  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawIndirect-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndirect-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawIndirect-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirect-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndirect-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndirect-None-07880

If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound

graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndirect-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndirect-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and

vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView

- VUID-vkCmdDrawIndirect-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndirect-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndirect-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the

VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndirect-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and `alphaToCoverageEnable` was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndirect-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndirect-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current

value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndirect-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated

in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawIndirect-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndirect-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirect-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndirect-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirect-firstAttachment-07478

If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirect-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`
- VUID-vkCmdDrawIndirect-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndirect-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndirect-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero
- VUID-vkCmdDrawIndirect-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirect-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirect-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndirect-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled

- VUID-vkCmdDrawIndirect-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndirect-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDrawIndirect-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndirect-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndirect-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndirect-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndirect-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndirect-None-08687

If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

- VUID-vkCmdDrawIndirect-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndirect-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndirect-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirect-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawIndirect-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndirect-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndirect-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawIndirect-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndirect-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndirect-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics

pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE

- VUID-vkCmdDrawIndirect-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0
- VUID-vkCmdDrawIndirect-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndirect-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndirect-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirect-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndirect-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirect-None-10928

If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match

- VUID-vkCmdDrawIndirect-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawIndirect-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndirect-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndirect-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndirect-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirect-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirect-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirect-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndirect-None-11861

If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount

- VUID-vkCmdDrawIndirect-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirect-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a

custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirect-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirect-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirect-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the

sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView

- VUID-vkCmdDrawIndirect-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirect-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndirect-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndirect-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirect-flags-12491
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a pushConstantRangeCount not equal to 0, and with pPushConstantRanges not equal to NULL, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirect-flags-13363
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirect-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndirect-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex

input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE

- VUID-vkCmdDrawIndirect-None-02721
  If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description
- VUID-vkCmdDrawIndirect-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is a packed format, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the `format`
- VUID-vkCmdDrawIndirect-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is not a packed format, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the `format`
- VUID-vkCmdDrawIndirect-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is VK_FALSE, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::`topology` state
- VUID-vkCmdDrawIndirect-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of `primitiveTopology` **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndirect-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set `primitiveTopology` to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndirect-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set `primitiveTopology` to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the `maintenance5` feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and

VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to

- VUID-vkCmdDrawIndirect-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirect-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDrawIndirect-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirect-Input-07939
  If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT::location
- VUID-vkCmdDrawIndirect-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format
- VUID-vkCmdDrawIndirect-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit

- VUID-vkCmdDrawIndirect-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex` `Execution` `Model` `OpEntryPoint` is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT ::`format` **must** have a 64-bit component
- VUID-vkCmdDrawIndirect-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex` `Execution` `Model` `OpEntryPoint` **must** not use components that are not present in the format
- VUID-vkCmdDrawIndirect-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of `primitiveTopology` is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-09637
  If the `primitiveTopologyListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirect-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirect-stage-06481
  The bound graphics pipeline **must** not have been created with the

VkPipelineShaderStageCreateInfo::stage member of any element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndirect-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndirect-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndirect-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndirect-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndirect-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirect-buffer-02708
  If buffer is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-vkCmdDrawIndirect-buffer-02709
  buffer **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirect-offset-02710
  offset **must** be a multiple of 4
- VUID-vkCmdDrawIndirect-commandBuffer-02711
  commandBuffer **must** not be a protected command buffer
- VUID-vkCmdDrawIndirect-drawCount-02718
  If the multiDrawIndirect feature is not enabled, drawCount **must** be 0 or 1

- VUID-vkCmdDrawIndirect-drawCount-02719
  `drawCount` **must** be less than or equal to `VkPhysicalDeviceLimits`::`maxDrawIndirectCount`
- VUID-vkCmdDrawIndirect-drawCount-00476
  If `drawCount` is greater than `1`, `stride` **must** be a multiple of `4` and **must** be greater than or equal to `sizeof`(`VkDrawIndirectCommand`)
- VUID-vkCmdDrawIndirect-drawCount-00487
  If `drawCount` is equal to `1`, (`offset` + `sizeof`(VkDrawIndirectCommand)) **must** be less than or equal to the size of `buffer`
- VUID-vkCmdDrawIndirect-drawCount-00488
  If `drawCount` is greater than `1`, (`stride` × (`drawCount` - 1) + `offset` + `sizeof`(VkDrawIndirectCommand)) **must** be less than or equal to the size of `buffer`

Valid Usage (Implicit)

- VUID-vkCmdDrawIndirect-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndirect-buffer-parameter
  `buffer` **must** be a valid VkBuffer handle
- VUID-vkCmdDrawIndirect-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdDrawIndirect-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndirect-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirect-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirect-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndirect-commonparent
  Both of `buffer`, and `commandBuffer` **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndirect is affected by conditional rendering

The VkDrawIndirectCommand structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkDrawIndirectCommand {
    uint32_t    vertexCount;
    uint32_t    instanceCount;
    uint32_t    firstVertex;
    uint32_t    firstInstance;
} VkDrawIndirectCommand;
```

- vertexCount is the number of vertices to draw.
- instanceCount is the number of instances to draw.
- firstVertex is the index of the first vertex to draw.
- firstInstance is the instance ID of the first instance to draw.

The members of VkDrawIndirectCommand have the same meaning as the similarly named parameters of vkCmdDraw.

Valid Usage

- VUID-VkDrawIndirectCommand-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the pNext chain of VkGraphicsPipelineCreateInfo::pVertexInputState, any member of VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties ::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0
- VUID-VkDrawIndirectCommand-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the pVertexBindingDescriptions parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than 1 in divisor, and

VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0

- VUID-VkDrawIndirectCommand-firstInstance-00501
  If the drawIndirectFirstInstance feature is not enabled, firstInstance **must** be 0

VkDrawIndirectCount2InfoKHR is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkDrawIndirectCount2InfoKHR {
    VkStructureType                   sType;
    const void*                       pNext;
    VkStridedDeviceAddressRangeKHR    addressRange;
    VkAddressCommandFlagsKHR          addressFlags;
    VkDeviceAddressRangeKHR           countAddressRange;
    VkAddressCommandFlagsKHR          countAddressFlags;
    uint32_t                          maxDrawCount;
} VkDrawIndirectCount2InfoKHR;
```

- sType is a VkStructureType value identifying this structure.
- pNext is NULL or a pointer to a structure extending this structure.
- addressRange is the VkStridedDeviceAddressRangeKHR containing draw parameters.
- addressFlags is a VkAddressCommandFlagsKHR value defining the flags for the address range.
- countAddressRange is the VkDeviceAddressRangeKHR containing the draw count.
- countAddressFlags is a VkAddressCommandFlagsKHR value defining the flags for the count address range.
- maxDrawCount specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in countAddressRange and maxDrawCount.

Valid Usage

- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13097
  If the range specified by addressRange is not bound completely to memory when accessed, addressFlags **must** not include VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13098
  If the buffer from which the range specified by addressRange was created with VK_BUFFER_CREATE_PROTECTED_BIT, and protectedNoFault is not supported, addressFlags **must** include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13099
  If the buffer from which the range specified by addressRange was created without VK_BUFFER_CREATE_PROTECTED_BIT, and protectedNoFault is not supported, addressFlags **must** not include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR

- VUID-VkDrawIndirectCount2InfoKHR-addressFlags-13100
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13122
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13123
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** not include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressFlags-13101
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13124
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `addressFlags` **must** include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13125
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `addressFlags` **must** not include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13107
  The buffer from which `addressRange` was queried **must** have been created with VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag
- VUID-VkDrawIndirectCount2InfoKHR-protectedNoFault-13108
  If `protectedNoFault` is not supported, the buffer from which `addressRange` was queried **must** not have been created with VK_BUFFER_CREATE_PROTECTED_BIT
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13109
  `addressRange.address` **must** be a multiple of 4
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13097
  If the range specified by `countAddressRange` is not bound completely to memory when accessed, `countAddressFlags` **must** not include VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13098
  If the buffer from which the range specified by `countAddressRange` was created with VK_BUFFER_CREATE_PROTECTED_BIT, and `protectedNoFault` is not supported, `countAddressFlags` **must** include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13099
  If the buffer from which the range specified by `countAddressRange` was created without VK_BUFFER_CREATE_PROTECTED_BIT, and `protectedNoFault` is not supported, `countAddressFlags` **must** not include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressFlags-13100
  `countAddressFlags` **must** not include both VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13122
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `countAddressRange`, was created with VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `countAddressFlags` **must** include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13123
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `countAddressRange`, was created without VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `countAddressFlags` **must** not include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressFlags-13101
  `countAddressFlags` **must** not include both VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13124
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `countAddressRange`, was created with VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `countAddressFlags` **must** include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13125
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `countAddressRange`, was created without VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `countAddressFlags` **must** not include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13114
  The buffer from which `countAddressRange` was queried **must** have been created with VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13115

countAddressRange.address **must** be a multiple of 4

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13116
  The count stored in countAddressRange **must** be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount
- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13117
  countAddressRange.size **must** be greater than or equal to 4

Valid Usage (Implicit)

- VUID-VkDrawIndirectCount2InfoKHR-sType-sType
  sType **must** be VK_STRUCTURE_TYPE_DRAW_INDIRECT_COUNT_2_INFO_KHR
- VUID-VkDrawIndirectCount2InfoKHR-pNext-pNext
  pNext **must** be NULL
- VUID-VkDrawIndirectCount2InfoKHR-addressFlags-parameter
  If addressFlags is not 0, addressFlags **must** be a valid combination of VkAddressCommandFlagBitsKHR values
- VUID-VkDrawIndirectCount2InfoKHR-countAddressFlags-parameter
  If countAddressFlags is not 0, countAddressFlags **must** be a valid combination of VkAddressCommandFlagBitsKHR values

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands with VK_KHR_draw_indirect_count or
VK_VERSION_1_2
void vkCmdDrawIndirectCount2KHR(
    VkCommandBuffer                             commandBuffer,
    const VkDrawIndirectCount2InfoKHR*          pInfo);
```

- commandBuffer is the command buffer into which the command is recorded.
- pInfo is a pointer to a VkDrawIndirectCount2InfoKHR structure defining parameters of this command.

vkCmdDrawIndirectCount2KHR behaves similarly to vkCmdDrawIndirect2KHR except that the draw count is read by the device from an address range during execution. The command will read an unsigned 32-bit integer from pInfo->countAddressRange and use this as the draw count.

Valid Usage

- VUID-vkCmdDrawIndirectCount2KHR-magFilter-04553
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain

VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawIndirectCount2KHR-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirectCount2KHR-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirectCount2KHR-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirectCount2KHR-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndirectCount2KHR-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndirectCount2KHR-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndirectCount2KHR-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndirectCount2KHR-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndirectCount2KHR-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT

- VUID-vkCmdDrawIndirectCount2KHR-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndirectCount2KHR-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndirectCount2KHR-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirectCount2KHR-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount2KHR-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts

compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawIndirectCount2KHR-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndirectCount2KHR-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndirectCount2KHR-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndirectCount2KHR-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirectCount2KHR-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that

pipeline was bound

- VUID-vkCmdDrawIndirectCount2KHR-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectCount2KHR-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectCount2KHR-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectCount2KHR-None-08613
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndirectCount2KHR-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndirectCount2KHR-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match
- VUID-vkCmdDrawIndirectCount2KHR-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirectCount2KHR-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using

OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components

- VUID-vkCmdDrawIndirectCount2KHR-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectCount2KHR-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectCount2KHR-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndirectCount2KHR-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndirectCount2KHR-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a

VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE

- VUID-vkCmdDrawIndirectCount2KHR-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndirectCount2KHR-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndirectCount2KHR-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with flags that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndirectCount2KHR-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a OpTypeStruct decorated with Block or BufferBlock using that mapping, the calculated offset for the resource heap **must** be a multiple of bufferDescriptorAlignment
- VUID-vkCmdDrawIndirectCount2KHR-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an OpTypeImage or OpTypeSampledImage using that mapping, the calculated offset for the resource heap **must** be a multiple of imageDescriptorAlignment

- VUID-vkCmdDrawIndirectCount2KHR-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`
- VUID-vkCmdDrawIndirectCount2KHR-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndirectCount2KHR-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirectCount2KHR-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirectCount2KHR-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndirectCount2KHR-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirectCount2KHR-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress

- VUID-vkCmdDrawIndirectCount2KHR-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndirectCount2KHR-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndirectCount2KHR-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectCount2KHR-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectCount2KHR-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectCount2KHR-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawIndirectCount2KHR-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses

a push constant value, that value **must** have been set by vkCmdPushDataEXT

- VUID-vkCmdDrawIndirectCount2KHR-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawIndirectCount2KHR-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectCount2KHR-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectCount2KHR-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndirectCount2KHR-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndirectCount2KHR-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawIndirectCount2KHR-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndirectCount2KHR-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndirectCount2KHR-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectCount2KHR-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectCount2KHR-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawIndirectCount2KHR-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndirectCount2KHR-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndirectCount2KHR-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by VkRenderingInputAttachmentIndexInfo, or no `InputAttachmentIndex` if VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` or VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are `NULL`, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndirectCount2KHR-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` and VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawIndirectCount2KHR-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndirectCount2KHR-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-10797

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndirectCount2KHR-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndirectCount2KHR-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndirectCount2KHR-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been

called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of

stencilTestEnable is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectCount2KHR-None-07634
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-06666
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndirectCount2KHR-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and

VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the viewportCount parameter of vkCmdSetViewportWithCount **must** match the scissorCount parameter of vkCmdSetScissorWithCount

- VUID-vkCmdDrawIndirectCount2KHR-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of logicOpEnable is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount **must** be 1
- VUID-vkCmdDrawIndirectCount2KHR-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, and any shader object bound to a graphics stage writes to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount **must** be 1
- VUID-vkCmdDrawIndirectCount2KHR-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE

- VUID-vkCmdDrawIndirectCount2KHR-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is enabled:

  - the `multisampledRenderToSingleSampled` feature

  then the current value of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirectCount2KHR-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndirectCount2KHR-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::`viewMask` equal to VkRenderingInfo::`viewMask`
- VUID-vkCmdDrawIndirectCount2KHR-colorAttachmentCount-06179
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08910
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `imageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08912
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `imageView` equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats` used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08911
  If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `imageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats`, if it exists, **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectCount2KHR-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirectCount2KHR-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndirectCount2KHR-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndirectCount2KHR-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be

VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectCount2KHR-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndirectCount2KHR-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount2KHR-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectCount2KHR-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectCount2KHR-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of

rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples

- VUID-vkCmdDrawIndirectCount2KHR-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndirectCount2KHR-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectCount2KHR-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo ::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndirectCount2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndirectCount2KHR-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled,

and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndirectCount2KHR-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndirectCount2KHR-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07625
  If the alphaToOne feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07626
  If the logicOp feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current

value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently

invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawIndirectCount2KHR-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current

value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndirectCount2KHR-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount2KHR-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount2KHR-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndirectCount2KHR-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectCount2KHR-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectCount2KHR-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics

pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndirectCount2KHR-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndirectCount2KHR-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndirectCount2KHR-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::`maxSampleLocationGridSize.width` as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a `samples` parameter equaling `rasterizationSamples`
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::`maxSampleLocationGridSize.height` as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a `samples` parameter equaling `rasterizationSamples`
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled

- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the `stippledRectangularLines` feature **must** be enabled and VkPhysicalDeviceLimits::`strictLines` **must** be VK_TRUE
- VUID-vkCmdDrawIndirectCount2KHR-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::`stage` member of an element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndirectCount2KHR-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndirectCount2KHR-None-08684
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndirectCount2KHR-None-08685
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndirectCount2KHR-None-08686
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndirectCount2KHR-None-08687
  If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndirectCount2KHR-None-08688
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_FRAGMENT_BIT

- VUID-vkCmdDrawIndirectCount2KHR-None-08689
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-08690
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-08693
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound
- VUID-vkCmdDrawIndirectCount2KHR-None-08696
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no `VkShaderEXT` bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndirectCount2KHR-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndirectCount2KHR-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any `VkShaderEXT` bound
- VUID-vkCmdDrawIndirectCount2KHR-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndirectCount2KHR-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndirectCount2KHR-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectCount2KHR-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics

pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0

- VUID-vkCmdDrawIndirectCount2KHR-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndirectCount2KHR-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndirectCount2KHR-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirectCount2KHR-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndirectCount2KHR-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectCount2KHR-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectCount2KHR-None-09642

If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT

- VUID-vkCmdDrawIndirectCount2KHR-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndirectCount2KHR-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndirectCount2KHR-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::`flags` which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndirectCount2KHR-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectCount2KHR-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_TRUE
- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE
- VUID-vkCmdDrawIndirectCount2KHR-None-11861
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndirectCount2KHR-None-11862
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and

VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount2KHR-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-None-11868

If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectCount2KHR-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount2KHR-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount2KHR-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount2KHR-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE

- VUID-vkCmdDrawIndirectCount2KHR-flags-13361
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndirectCount2KHR-flags-13362
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirectCount2KHR-flags-12491
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirectCount2KHR-flags-13363
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndirectCount2KHR-None-04008
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawIndirectCount2KHR-None-02721
  If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawIndirectCount2KHR-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format
- VUID-vkCmdDrawIndirectCount2KHR-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format
- VUID-vkCmdDrawIndirectCount2KHR-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndirectCount2KHR-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndirectCount2KHR-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndirectCount2KHR-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and

not subsequently invalidated in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirectCount2KHR-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been VK_FALSE
- VUID-vkCmdDrawIndirectCount2KHR-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectCount2KHR-Input-07939
  If the `maintenance9` feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in VkVertexInputAttributeDescription2EXT::`location`
- VUID-vkCmdDrawIndirectCount2KHR-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as VkVertexInputAttributeDescription2EXT::`format`
- VUID-vkCmdDrawIndirectCount2KHR-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit
- VUID-vkCmdDrawIndirectCount2KHR-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT::`format` **must** have a 64-bit component
- VUID-vkCmdDrawIndirectCount2KHR-None-09203

If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format

- VUID-vkCmdDrawIndirectCount2KHR-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectCount2KHR-None-10909
  If the primitiveTopologyPatchListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectCount2KHR-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::stage member of any element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectCount2KHR-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndirectCount2KHR-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT

stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13110
  If `pInfo->maxDrawCount` is greater than `0`, `pInfo->addressRange.size` **must** be greater than or equal to (`pInfo->maxDrawCount` - 1) × `pInfo->addressRange.stride` + `sizeof`(VkDrawIndirectCommand)
- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13111
  If `pInfo->maxDrawCount` is greater than 1, `pInfo->addressRange.stride` **must** not be 0
- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13112
  If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be greater than or equal to `sizeof`(VkDrawIndirectCommand)
- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13113
  If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be a multiple of `4`
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-13058
  `commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawIndirectCount2KHR-drawIndirectCount-13119
  If the `drawIndirectCount` feature is not enabled this function **must** not be used

Valid Usage (Implicit)

- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle

- VUID-vkCmdDrawIndirectCount2KHR-pInfo-parameter
  `pInfo` **must** be a valid pointer to a valid VkDrawIndirectCount2InfoKHR structure
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndirectCount2KHR-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirectCount2KHR-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirectCount2KHR-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndirectCount2KHR is affected by conditional rendering

To record a non-indexed draw call with a draw call count sourced from a buffer, call:

```
// Provided by VK_VERSION_1_2
void vkCmdDrawIndirectCount(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    VkBuffer                                    countBuffer,
    VkDeviceSize                                countBufferOffset,
    uint32_t                                    maxDrawCount,
    uint32_t                                    stride);
```

```
// Provided by VK_KHR_draw_indirect_count
// Equivalent to vkCmdDrawIndirectCount
void vkCmdDrawIndirectCountKHR(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    VkBuffer                                    countBuffer,
    VkDeviceSize                                countBufferOffset,
    uint32_t                                    maxDrawCount,
    uint32_t                                    stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `countBuffer` is the buffer containing the draw count.
- `countBufferOffset` is the byte offset into `countBuffer` where the draw count begins.
- `maxDrawCount` specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in `countBuffer` and `maxDrawCount`.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndirectCount` behaves similarly to vkCmdDrawIndirect except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from `countBuffer` located at `countBufferOffset` and use this as the draw count.

Valid Usage

- VUID-vkCmdDrawIndirectCount-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirectCount-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and

reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT

- VUID-vkCmdDrawIndirectCount-mipmapMode-04770
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirectCount-mipmapMode-09599
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirectCount-unnormalizedCoordinates-09635
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's levelCount and layerCount **must** be 1
- VUID-vkCmdDrawIndirectCount-None-08609
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's viewType **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndirectCount-None-08610
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name
- VUID-vkCmdDrawIndirectCount-None-08611
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndirectCount-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndirectCount-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndirectCount-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features

must contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT

- VUID-vkCmdDrawIndirectCount-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndirectCount-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndirectCount-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirectCount-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirectCount-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectCount-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndirectCount-None-08601

If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader

- VUID-vkCmdDrawIndirectCount-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndirectCount-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectCount-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndirectCount-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectCount-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndirectCount-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectCount-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirectCount-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirectCount-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndirectCount-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this

command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectCount-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectCount-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectCount-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndirectCount-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType **must** match the Dim operand of the OpTypeImage as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndirectCount-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match
- VUID-vkCmdDrawIndirectCount-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirectCount-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDrawIndirectCount-OpImageWrite-04469

If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDrawIndirectCount-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirectCount-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectCount-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirectCount-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectCount-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectCount-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectCount-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndirectCount-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndirectCount-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE

- VUID-vkCmdDrawIndirectCount-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndirectCount-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndirectCount-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with `flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndirectCount-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndirectCount-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawIndirectCount-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndirectCount-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping

using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndirectCount-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndirectCount-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirectCount-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirectCount-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndirectCount-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirectCount-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address

in push data **must** be a valid VkDeviceAddress

- VUID-vkCmdDrawIndirectCount-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndirectCount-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndirectCount-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectCount-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectCount-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectCount-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawIndirectCount-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndirectCount-None-11398
  If a bound shader was created with a descriptor mapping using

VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndirectCount-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectCount-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectCount-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndirectCount-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectCount-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping

using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndirectCount-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndirectCount-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndirectCount-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectCount-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectCount-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirectCount-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to

VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawIndirectCount-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndirectCount-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndirectCount-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndirectCount-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are non-NULL
- VUID-vkCmdDrawIndirectCount-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndirectCount-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way

other than as an attachment by this command

- VUID-vkCmdDrawIndirectCount-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirectCount-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndirectCount-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndirectCount-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex
- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectCount-None-07634
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-06666
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the current

value of depthTestEnable is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07846
  If the depthBounds feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndirectCount-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the viewportCount parameter of vkCmdSetViewportWithCount **must** match the scissorCount parameter of vkCmdSetScissorWithCount

- VUID-vkCmdDrawIndirectCount-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirectCount-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of `blendEnable` **must** be VK_FALSE
- VUID-vkCmdDrawIndirectCount-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is

enabled:

  - the `multisampledRenderToSingleSampled` feature

  then the current value of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirectCount-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndirectCount-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo ::`viewMask` equal to VkRenderingInfo::`viewMask`
- VUID-vkCmdDrawIndirectCount-colorAttachmentCount-06179
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08910
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo ::`pColorAttachments` array with an `imageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08912
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo ::`pColorAttachments` array with an `imageView` equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats` used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08911
  If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo ::`pColorAttachments` array with an `imageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::`pColorAttachmentFormats`, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-None-07749
  If the `colorWriteEnable` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was

created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirectCount-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndirectCount-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndirectCount-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have

been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and

VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

- VUID-vkCmdDrawIndirectCount-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndirectCount-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectCount-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndirectCount-renderPass-06198

If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE

- VUID-vkCmdDrawIndirectCount-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a

graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectCount-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndirectCount-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0

- VUID-vkCmdDrawIndirectCount-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndirectCount-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07625
  If the alphaToOne feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07626
  If the logicOp feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the

VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndirectCount-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawIndirectCount-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass

- VUID-vkCmdDrawIndirectCount-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndirectCount-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectCount-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectCount-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and an active color attachment current value of blendEnable is VK_TRUE, then the number of active color attachments **must** not

exceed advancedBlendMaxColorAttachments

- VUID-vkCmdDrawIndirectCount-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirectCount-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirectCount-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the rasterizationStream to zero
- VUID-vkCmdDrawIndirectCount-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndirectCount-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of

pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then

sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if

the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE

- VUID-vkCmdDrawIndirectCount-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndirectCount-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndirectCount-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndirectCount-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndirectCount-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndirectCount-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndirectCount-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndirectCount-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages

with an element of VK_SHADER_STAGE_TASK_BIT_EXT

- VUID-vkCmdDrawIndirectCount-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectCount-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawIndirectCount-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndirectCount-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndirectCount-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawIndirectCount-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndirectCount-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndirectCount-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectCount-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses

OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0

- VUID-vkCmdDrawIndirectCount-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndirectCount-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndirectCount-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirectCount-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndirectCount-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectCount-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectCount-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with

VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT

- VUID-vkCmdDrawIndirectCount-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndirectCount-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndirectCount-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::`flags` which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndirectCount-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectCount-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectCount-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_TRUE
- VUID-vkCmdDrawIndirectCount-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE
- VUID-vkCmdDrawIndirectCount-None-11861
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndirectCount-None-11862
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `resolveImageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding

element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the

value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectCount-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectCount-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectCount-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirectCount-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called,

then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE

- VUID-vkCmdDrawIndirectCount-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndirectCount-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirectCount-flags-12491
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a pushConstantRangeCount not equal to 0, and with pPushConstantRanges not equal to NULL, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirectCount-flags-13363
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectCount-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndirectCount-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawIndirectCount-None-02721
  If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description
- VUID-vkCmdDrawIndirectCount-format-10389
  For each vertex attribute accessed by this command, if its

VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format

- VUID-vkCmdDrawIndirectCount-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format
- VUID-vkCmdDrawIndirectCount-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndirectCount-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndirectCount-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndirectCount-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndirectCount-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectCount-None-13118

If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been VK_FALSE

- VUID-vkCmdDrawIndirectCount-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectCount-Input-07939
  If the `maintenance9` feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in VkVertexInputAttributeDescription2EXT::`location`
- VUID-vkCmdDrawIndirectCount-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as VkVertexInputAttributeDescription2EXT::`format`
- VUID-vkCmdDrawIndirectCount-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit
- VUID-vkCmdDrawIndirectCount-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT::`format` **must** have a 64-bit component
- VUID-vkCmdDrawIndirectCount-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format

- VUID-vkCmdDrawIndirectCount-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectCount-None-10909
  If the primitiveTopologyPatchListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectCount-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::stage member of any element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectCount-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndirectCount-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the

VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirectCount-buffer-02708
  If buffer is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-vkCmdDrawIndirectCount-buffer-02709
  buffer **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectCount-offset-02710
  offset **must** be a multiple of 4
- VUID-vkCmdDrawIndirectCount-commandBuffer-02711
  commandBuffer **must** not be a protected command buffer
- VUID-vkCmdDrawIndirectCount-countBuffer-02714
  If countBuffer is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-vkCmdDrawIndirectCount-countBuffer-02715
  countBuffer **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectCount-countBufferOffset-02716
  countBufferOffset **must** be a multiple of 4
- VUID-vkCmdDrawIndirectCount-countBuffer-02717
  The count stored in countBuffer **must** be less than or equal to VkPhysicalDeviceLimits ::maxDrawIndirectCount
- VUID-vkCmdDrawIndirectCount-countBufferOffset-04129

(countBufferOffset + sizeof(uint32_t)) **must** be less than or equal to the size of countBuffer

- VUID-vkCmdDrawIndirectCount-None-04445
  If the drawIndirectCount feature is not enabled this function **must** not be used
- VUID-vkCmdDrawIndirectCount-stride-03110
  stride **must** be a multiple of 4 and **must** be greater than or equal to sizeof(VkDrawIndirectCommand)
- VUID-vkCmdDrawIndirectCount-maxDrawCount-03111
  If maxDrawCount is greater than or equal to 1, (stride × (maxDrawCount - 1) + offset + sizeof(VkDrawIndirectCommand)) **must** be less than or equal to the size of buffer

Valid Usage (Implicit)

- VUID-vkCmdDrawIndirectCount-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndirectCount-buffer-parameter
  buffer **must** be a valid VkBuffer handle
- VUID-vkCmdDrawIndirectCount-countBuffer-parameter
  countBuffer **must** be a valid VkBuffer handle
- VUID-vkCmdDrawIndirectCount-commandBuffer-recording
  commandBuffer **must** be in the recording state
- VUID-vkCmdDrawIndirectCount-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndirectCount-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirectCount-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirectCount-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndirectCount-commonparent
  Each of buffer, commandBuffer, and countBuffer **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to commandBuffer **must** be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndirectCount is affected by conditional rendering

To record an indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdDrawIndexedIndirect2KHR(
    VkCommandBuffer                             commandBuffer,
    const VkDrawIndirect2InfoKHR*               pInfo);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `pInfo` is a pointer to a VkDrawIndirect2InfoKHR structure defining parameters of this command.

`vkCmdDrawIndexedIndirect2KHR` behaves similarly to vkCmdDrawIndexed except that the parameters are read by the device from an address range during execution. `pInfo->drawCount` draws are executed by the command, with parameters taken from `pInfo->addressRange` starting at `addressRange.address` and increasing by `addressRange.stride` bytes for each successive draw. The parameters of each draw are encoded in an array of VkDrawIndexedIndirectCommand structures.

Valid Usage

- VUID-vkCmdDrawIndexedIndirect2KHR-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-mipmapMode-04770

If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawIndexedIndirect2KHR-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndexedIndirect2KHR-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT

- VUID-vkCmdDrawIndexedIndirect2KHR-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndexedIndirect2KHR-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexedIndirect2KHR-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10068

For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndexedIndirect2KHR-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to

the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect2KHR-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndexedIndirect2KHR-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType **must** match the Dim operand of the OpTypeImage as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndexedIndirect2KHR-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match
- VUID-vkCmdDrawIndexedIndirect2KHR-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndexedIndirect2KHR-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexedIndirect2KHR-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a

result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64

- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndexedIndirect2KHR-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding

micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with `flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset

for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11309

If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect2KHR-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or

VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndexedIndirect2KHR-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndexedIndirect2KHR-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndexedIndirect2KHR-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndexedIndirect2KHR-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexedIndirect2KHR-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by VkRenderingInputAttachmentIndexInfo, or no `InputAttachmentIndex` if VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` or VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are `NULL`, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` and VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawIndexedIndirect2KHR-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndexedIndirect2KHR-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndexedIndirect2KHR-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with

VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07634
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-06666
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled,

the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07846
  If the depthBounds feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndexedIndirect2KHR-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the viewportCount parameter of vkCmdSetViewportWithCount **must** match the scissorCount parameter of vkCmdSetScissorWithCount
- VUID-vkCmdDrawIndexedIndirect2KHR-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndexedIndirect2KHR-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of `blendEnable` **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is enabled:
  - the `multisampledRenderToSingleSampled` feature

  then the current value of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering

- VUID-vkCmdDrawIndexedIndirect2KHR-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo ::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawIndexedIndirect2KHR-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was

created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndexedIndirect2KHR-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics

pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the

VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR

- VUID-vkCmdDrawIndexedIndirect2KHR-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect2KHR-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect2KHR-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndexedIndirect2KHR-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndexedIndirect2KHR-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color

attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirect2KHR-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have

VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set

- VUID-vkCmdDrawIndexedIndirect2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndexedIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndexedIndirect2KHR-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07630
  If the `geometryStreams` feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndexedIndirect2KHR-samples-07472

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect2KHR-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndexedIndirect2KHR-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirect2KHR-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirect2KHR-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and an active color attachment current value of blendEnable is VK_TRUE, then the number of active color attachments **must** not exceed advancedBlendMaxColorAttachments
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the

current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE

- VUID-vkCmdDrawIndexedIndirect2KHR-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the rasterizationStream to zero
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound

graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide VkMultisamplePropertiesEXT::`maxSampleLocationGridSize.height` as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the `stippledRectangularLines` feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the `stippledBresenhamLines` feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the `stippledSmoothLines` feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the `stippledRectangularLines` feature **must** be enabled and VkPhysicalDeviceLimits::`strictLines` **must** be VK_TRUE
- VUID-vkCmdDrawIndexedIndirect2KHR-stage-07073

If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages

with an element of VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndexedIndirect2KHR-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect2KHR-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was

created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them

- VUID-vkCmdDrawIndexedIndirect2KHR-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass

must have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::`flags` which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT ::`customResolve` as VK_TRUE
- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11861
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT ::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11862
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `resolveImageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::`pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11863
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render

pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a

custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect2KHR-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirect2KHR-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-13361
  If there are any shader objects bound that were created with flags that includes the

VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit

- VUID-vkCmdDrawIndexedIndirect2KHR-flags-13362
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-12491
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-13363
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-04008
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawIndexedIndirect2KHR-None-02721
  If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description
- VUID-vkCmdDrawIndexedIndirect2KHR-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is a packed format, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the `format`

- VUID-vkCmdDrawIndexedIndirect2KHR-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndexedIndirect2KHR-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the

current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been VK_FALSE

- VUID-vkCmdDrawIndexedIndirect2KHR-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirect2KHR-Input-07939
  If the `maintenance9` feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in VkVertexInputAttributeDescription2EXT ::`location`
- VUID-vkCmdDrawIndexedIndirect2KHR-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as VkVertexInputAttributeDescription2EXT::`format`
- VUID-vkCmdDrawIndexedIndirect2KHR-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit
- VUID-vkCmdDrawIndexedIndirect2KHR-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT ::`format` **must** have a 64-bit component
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawIndexedIndirect2KHR-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of `primitiveTopology` is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09637
  If the `primitiveTopologyListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect2KHR-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12239

If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07312
  If the maintenance6 feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveRestartIndex-12401
  If the primitive restart index for this draw operation was set with vkCmdSetPrimitiveRestartIndexEXT, then primitiveRestartIndex **must** not be greater than the maximum representable value for the bound VkIndexType
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13110
  If pInfo->drawCount is greater than 0, pInfo->addressRange.size **must** be greater than or equal to (pInfo->drawCount - 1) × pInfo->addressRange.stride + sizeof(VkDrawIndexedIndirectCommand)
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13111
  If pInfo->drawCount is greater than 1, pInfo->addressRange.stride **must** not be 0
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13112
  If pInfo->addressRange.stride is not 0, pInfo->addressRange.stride **must** be greater than or equal to sizeof(VkDrawIndexedIndirectCommand)
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13113
  If pInfo->addressRange.stride is not 0, pInfo->addressRange.stride **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-13059
  commandBuffer **must** not be a protected command buffer

Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-parameter
  pInfo **must** be a valid pointer to a valid VkDrawIndirect2InfoKHR structure

- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndexedIndirect2KHR-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexedIndirect2KHR-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirect2KHR-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndexedIndirect2KHR is affected by conditional rendering

To record an indexed indirect drawing command, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDrawIndexedIndirect(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    uint32_t                                    drawCount,
    uint32_t                                    stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.

- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `drawCount` is the number of draws to execute, and **can** be zero.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndexedIndirect` behaves similarly to vkCmdDrawIndexed except that the parameters are read by the device from a buffer during execution. `drawCount` draws are executed by the command, with parameters taken from `buffer` starting at `offset` and increasing by `stride` bytes for each successive draw. The parameters of each draw are encoded in an array of VkDrawIndexedIndirectCommand structures. If `drawCount` is less than or equal to one, `stride` is ignored.

Valid Usage

- VUID-vkCmdDrawIndexedIndirect-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexedIndirect-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirect-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexedIndirect-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirect-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndexedIndirect-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample

a VkImageView as a result of this command, then the image view's viewType **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D

- VUID-vkCmdDrawIndexedIndirect-None-08610
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name
- VUID-vkCmdDrawIndexedIndirect-None-08611
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndexedIndirect-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndexedIndirect-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirect-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirect-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndexedIndirect-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexedIndirect-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirect-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndexedIndirect-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndexedIndirect-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndexedIndirect-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndexedIndirect-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-08116

Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed

- VUID-vkCmdDrawIndexedIndirect-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirect-None-08606
  If the shaderObject feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexedIndirect-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndexedIndirect-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor

set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndexedIndirect-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndexedIndirect-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match
- VUID-vkCmdDrawIndexedIndirect-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndexedIndirect-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexedIndirect-OpImageWrite-04469
  If a VkBufferView is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexedIndirect-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawIndexedIndirect-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawIndexedIndirect-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawIndexedIndirect-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawIndexedIndirect-sparseImageInt64Atomics-04474
  If the `sparseImageInt64Atomics` feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic

instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawIndexedIndirect-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexedIndirect-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndexedIndirect-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndexedIndirect-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndexedIndirect-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndexedIndirect-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with flags that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndexedIndirect-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirect-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirect-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirect-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirect-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirect-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress

- VUID-vkCmdDrawIndexedIndirect-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndexedIndirect-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirect-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexedIndirect-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndexedIndirect-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndexedIndirect-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either

VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawIndexedIndirect-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndexedIndirect-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawIndexedIndirect-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirect-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to

must have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndexedIndirect-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndexedIndirect-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirect-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawIndexedIndirect-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndexedIndirect-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndexedIndirect-protectedNoFault-11455

If protectedNoFault is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawIndexedIndirect-protectedNoFault-11456
  If protectedNoFault is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndexedIndirect-renderPass-02684
  The current render pass **must** be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexedIndirect-subpass-02685
  The subpass index of the current render pass **must** be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndexedIndirect-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndexedIndirect-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndexedIndirect-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo

::pStencilInputAttachmentIndex are non-NULL

- VUID-vkCmdDrawIndexedIndirect-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndexedIndirect-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndexedIndirect-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only

layout for the depth aspect, depth writes **must** be disabled

- VUID-vkCmdDrawIndexedIndirect-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndexedIndirect-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing

command

- VUID-vkCmdDrawIndexedIndirect-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndexedIndirect-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-06666
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `sampleLocationsEnable` is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndexedIndirect-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawIndexedIndirect-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the

shader stages of the bound graphics pipeline write to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount **must** be 1

- VUID-vkCmdDrawIndexedIndirect-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, and any shader object bound to a graphics stage writes to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount **must** be 1
- VUID-vkCmdDrawIndexedIndirect-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and none of the following is enabled:
  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawIndexedIndirect-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndexedIndirect-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawIndexedIndirect-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have

been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndexedIndirect-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount
- VUID-vkCmdDrawIndexedIndirect-rasterizerDiscardEnable-09236

If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles

- VUID-vkCmdDrawIndexedIndirect-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndexedIndirect-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of

the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirect-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndexedIndirect-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndexedIndirect-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-pDepthAttachment-08964

If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirect-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndexedIndirect-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndexedIndirect-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndexedIndirect-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a

graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and `alphaToCoverageEnable` was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndexedIndirect-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndexedIndirect-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then

vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07630
  If the `geometryStreams` feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07631
  If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07632
  If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `conservativeRasterizationMode` is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not

subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndexedIndirect-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been

called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect-None-07639
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-09650
  If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of `depthClampEnable` is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndexedIndirect-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the `samples` parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::`rasterizationSamples` parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the `samples` parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the `rasterizationSamples` parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is

bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with `multisampledRenderToSingleSampledEnable` equal to VK_TRUE, then the `rasterizationSamples` in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirect-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`
- VUID-vkCmdDrawIndexedIndirect-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirect-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirect-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT

and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE

- VUID-vkCmdDrawIndexedIndirect-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the rasterizationStream to zero
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by

vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDrawIndexedIndirect-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndexedIndirect-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage

in the logical pipeline

- VUID-vkCmdDrawIndexedIndirect-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndexedIndirect-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndexedIndirect-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndexedIndirect-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndexedIndirect-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndexedIndirect-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawIndexedIndirect-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndexedIndirect-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound

- VUID-vkCmdDrawIndexedIndirect-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawIndexedIndirect-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndexedIndirect-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndexedIndirect-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0
- VUID-vkCmdDrawIndexedIndirect-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndexedIndirect-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndexedIndirect-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndexedIndirect-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndexedIndirect-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirect-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirect-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndexedIndirect-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndexedIndirect-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndexedIndirect-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexedIndirect-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not

contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT

- VUID-vkCmdDrawIndexedIndirect-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexedIndirect-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexedIndirect-None-11861
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndexedIndirect-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-None-11865

If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirect-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirect-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for

each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirect-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirect-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexedIndirect-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexedIndirect-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndexedIndirect-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexedIndirect-flags-12491
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a pushConstantRangeCount not equal to 0, and with pPushConstantRanges not equal to NULL, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexedIndirect-flags-13363
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set

layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndexedIndirect-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndexedIndirect-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawIndexedIndirect-None-02721
  If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description
- VUID-vkCmdDrawIndexedIndirect-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format
- VUID-vkCmdDrawIndexedIndirect-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format
- VUID-vkCmdDrawIndexedIndirect-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline

VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDrawIndexedIndirect-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndexedIndirect-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndexedIndirect-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirect-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDrawIndexedIndirect-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirect-Input-07939
  If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT::location
- VUID-vkCmdDrawIndexedIndirect-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format

- VUID-vkCmdDrawIndexedIndirect-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit
- VUID-vkCmdDrawIndexedIndirect-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT ::format **must** have a 64-bit component
- VUID-vkCmdDrawIndexedIndirect-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format
- VUID-vkCmdDrawIndexedIndirect-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST,

VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE

- VUID-vkCmdDrawIndexedIndirect-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirect-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirect-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndexedIndirect-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect-buffer-02708

If `buffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-vkCmdDrawIndexedIndirect-buffer-02709
  `buffer` **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirect-offset-02710
  `offset` **must** be a multiple of `4`
- VUID-vkCmdDrawIndexedIndirect-commandBuffer-02711
  `commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawIndexedIndirect-drawCount-02718
  If the `multiDrawIndirect` feature is not enabled, `drawCount` **must** be `0` or `1`
- VUID-vkCmdDrawIndexedIndirect-drawCount-02719
  `drawCount` **must** be less than or equal to `VkPhysicalDeviceLimits`::`maxDrawIndirectCount`
- VUID-vkCmdDrawIndexedIndirect-None-07312
  If the `maintenance6` feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirect-primitiveRestartIndex-12401
  If the primitive restart index for this draw operation was set with vkCmdSetPrimitiveRestartIndexEXT, then `primitiveRestartIndex` **must** not be greater than the maximum representable value for the bound VkIndexType
- VUID-vkCmdDrawIndexedIndirect-drawCount-00528
  If `drawCount` is greater than `1`, `stride` **must** be a multiple of `4` and **must** be greater than or equal to `sizeof`(`VkDrawIndexedIndirectCommand`)
- VUID-vkCmdDrawIndexedIndirect-drawCount-00539
  If `drawCount` is equal to `1`, (`offset` + `sizeof`(`VkDrawIndexedIndirectCommand`)) **must** be less than or equal to the size of `buffer`
- VUID-vkCmdDrawIndexedIndirect-drawCount-00540
  If `drawCount` is greater than `1`, (`stride` × (`drawCount` - 1) + `offset` + `sizeof`(`VkDrawIndexedIndirectCommand`)) **must** be less than or equal to the size of `buffer`

Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndexedIndirect-buffer-parameter
  `buffer` **must** be a valid VkBuffer handle
- VUID-vkCmdDrawIndexedIndirect-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdDrawIndexedIndirect-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations

- VUID-vkCmdDrawIndexedIndirect-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexedIndirect-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirect-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndexedIndirect-commonparent
  Both of `buffer`, and `commandBuffer` **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndexedIndirect is affected by conditional rendering

The `VkDrawIndexedIndirectCommand` structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkDrawIndexedIndirectCommand {
    uint32_t    indexCount;
    uint32_t    instanceCount;
    uint32_t    firstIndex;
    int32_t     vertexOffset;
    uint32_t    firstInstance;
} VkDrawIndexedIndirectCommand;
```

- `indexCount` is the number of vertices to draw.
- `instanceCount` is the number of instances to draw.

- `firstIndex` is the base index within the index buffer.
- `vertexOffset` is the value added to the vertex index before indexing into the vertex buffer.
- `firstInstance` is the instance ID of the first instance to draw.

The members of `VkDrawIndexedIndirectCommand` have the same meaning as the similarly named parameters of vkCmdDrawIndexed.

Valid Usage

- VUID-VkDrawIndexedIndirectCommand-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the `pNext` chain of VkGraphicsPipelineCreateInfo::`pVertexInputState`, any member of VkPipelineVertexInputDivisorStateCreateInfo::`pVertexBindingDivisors` has a value other than `1` in `divisor`, and VkPhysicalDeviceVertexAttributeDivisorProperties::`supportsNonZeroFirstInstance` is VK_FALSE, then `firstInstance` **must** be `0`
- VUID-VkDrawIndexedIndirectCommand-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than `1` in `divisor`, and VkPhysicalDeviceVertexAttributeDivisorProperties::`supportsNonZeroFirstInstance` is VK_FALSE, then `firstInstance` **must** be `0`
- VUID-VkDrawIndexedIndirectCommand-robustBufferAccess2-08798
  If the `robustBufferAccess2` feature is not enabled, (`indexSize` × (`firstIndex` + `indexCount`)) **must** be less than or equal to the size of the bound index buffer range, with `indexSize` being based on the type specified by `indexType`, and the other parameters sourced from this command
- VUID-VkDrawIndexedIndirectCommand-firstInstance-00554
  If the `drawIndirectFirstInstance` feature is not enabled, `firstInstance` **must** be `0`

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands with VK_KHR_draw_indirect_count or
VK_VERSION_1_2
void vkCmdDrawIndexedIndirectCount2KHR(
    VkCommandBuffer                             commandBuffer,
    const VkDrawIndirectCount2InfoKHR*          pInfo);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `pInfo` is a pointer to a VkDrawIndirectCount2InfoKHR structure defining parameters of this command.

`vkCmdDrawIndexedIndirectCount2KHR` behaves similarly to vkCmdDrawIndexedIndirect2KHR except

that the draw count is read by the device from an address range during execution. The command will read an unsigned 32-bit integer from pInfo->countAddressRange and use this as the draw count.

Valid Usage

- VUID-vkCmdDrawIndexedIndirectCount2KHR-magFilter-04553
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-magFilter-09598
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-mipmapMode-04770
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-mipmapMode-09599
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and reductionMode equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-unnormalizedCoordinates-09635
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's levelCount and layerCount **must** be 1
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08609
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's viewType **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08610
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08611
  If a VkSampler created with unnormalizedCoordinates equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any

of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndexedIndirectCount2KHR-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexedIndirectCount2KHR-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format

field of the OpTypeImage is Unknown, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a VkDescriptorSetLayout that was created with

VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount2KHR-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08613
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-07753

If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07288
  Any shader invocation executed by this command **must** terminate

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with flags that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a OpTypeStruct decorated with Block or BufferBlock using that mapping, the

calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location

in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or

storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses

a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndexedIndirectCount2KHR-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndexedIndirectCount2KHR-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-protectedNoFault-11456

If protectedNoFault is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-renderPass-02684
  The current render pass **must** be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexedIndirectCount2KHR-subpass-02685
  The subpass index of the current render pass **must** be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are non-NULL
- VUID-vkCmdDrawIndexedIndirectCount2KHR-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must**

have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06666
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `sampleLocationsEnable` is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in,

then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of `blendEnable` **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is enabled:
    - the `multisampledRenderToSingleSampled` feature

  then the current value of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::`viewMask` equal to VkRenderingInfo::`viewMask`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-colorAttachmentCount-06179
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08910
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `imageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::`pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08912
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo

::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndexedIndirectCount2KHR-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is

VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the

dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndexedIndirectCount2KHR-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a

VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount2KHR-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndexedIndirectCount2KHR-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of

VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in

VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndexedIndirectCount2KHR-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07625
  If the alphaToOne feature is enabled, a shader object is bound to any graphics stage or a

graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07626
  If the logicOp feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value

of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines

features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stippledLineEnable` is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07639
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09650
  If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of `depthClampEnable` is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndexedIndirectCount2KHR-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the `samples` parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::`rasterizationSamples` parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount2KHR-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the `samples` parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the

rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndexedIndirectCount2KHR-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirectCount2KHR-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirectCount2KHR-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and an active color attachment current value of blendEnable is VK_TRUE, then the number of active color attachments **must** not exceed advancedBlendMaxColorAttachments
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently

invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the

VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then

vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08684
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08685
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08686
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08687
  If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08688
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08689
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08690
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08693
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08696
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no `VkShaderEXT` bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any `VkShaderEXT` bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to vkCmdSetStencilWriteMask **must** be `0`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the `pColorWriteMasks` parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndexedIndirectCount2KHR-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of `Location` for any output attachment statically used in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09548

If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11522

If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11861
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to

VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and

the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-12491

If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-13363
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04008
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02721
  If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is a packed format, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the `format`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is not a packed format, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the `format`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-Input-07939

If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT::location

- VUID-vkCmdDrawIndexedIndirectCount2KHR-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format
- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit
- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT::format **must** have a 64-bit component
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04879

If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09637
  If the `primitiveTopologyListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount2KHR-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12241

If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13110
  If pInfo->maxDrawCount is greater than 0, pInfo->addressRange.size **must** be greater than or equal to (pInfo->maxDrawCount - 1) × pInfo->addressRange.stride + sizeof (VkDrawIndexedIndirectCommand)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13111
  If pInfo->maxDrawCount is greater than 1, pInfo->addressRange.stride **must** not be 0
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13112
  If pInfo->addressRange.stride is not 0, pInfo->addressRange.stride **must** be greater than or equal to sizeof(VkDrawIndexedIndirectCommand)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13113
  If pInfo->addressRange.stride is not 0, pInfo->addressRange.stride **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07312
  If the maintenance6 feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveRestartIndex-12401
  If the primitive restart index for this draw operation was set with vkCmdSetPrimitiveRestartIndexEXT, then primitiveRestartIndex **must** not be greater than the maximum representable value for the bound VkIndexType
- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-13060
  commandBuffer **must** not be a protected command buffer
- VUID-vkCmdDrawIndexedIndirectCount2KHR-drawIndirectCount-13120
  If the drawIndirectCount feature is not enabled this function **must** not be used

Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-parameter
  pInfo **must** be a valid pointer to a valid VkDrawIndirectCount2InfoKHR structure
- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-recording
  commandBuffer **must** be in the recording state
- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndexedIndirectCount2KHR-renderpass

This command **must** only be called inside of a render pass instance

- VUID-vkCmdDrawIndexedIndirectCount2KHR-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirectCount2KHR-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndexedIndirectCount2KHR is affected by conditional rendering

To record an indexed draw call with a draw call count sourced from a buffer, call:

```
// Provided by VK_VERSION_1_2
void vkCmdDrawIndexedIndirectCount(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    VkBuffer                                    countBuffer,
    VkDeviceSize                                countBufferOffset,
    uint32_t                                    maxDrawCount,
    uint32_t                                    stride);
```

```
// Provided by VK_KHR_draw_indirect_count
// Equivalent to vkCmdDrawIndexedIndirectCount
void vkCmdDrawIndexedIndirectCountKHR(
    VkCommandBuffer                             commandBuffer,
    VkBuffer                                    buffer,
    VkDeviceSize                                offset,
    VkBuffer                                    countBuffer,
    VkDeviceSize                                countBufferOffset,
    uint32_t                                    maxDrawCount,
    uint32_t                                    stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `countBuffer` is the buffer containing the draw count.
- `countBufferOffset` is the byte offset into `countBuffer` where the draw count begins.
- `maxDrawCount` specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in `countBuffer` and `maxDrawCount`.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndexedIndirectCount` behaves similarly to vkCmdDrawIndexedIndirect except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from `countBuffer` located at `countBufferOffset` and use this as the draw count.

Valid Usage

- VUID-vkCmdDrawIndexedIndirectCount-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndexedIndirectCount-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirectCount-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain

VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawIndexedIndirectCount-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndexedIndirectCount-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndexedIndirectCount-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndexedIndirectCount-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndexedIndirectCount-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndexedIndirectCount-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or

VK_IMAGE_VIEW_TYPE_CUBE_ARRAY

- VUID-vkCmdDrawIndexedIndirectCount-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexedIndirectCount-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndexedIndirectCount-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndexedIndirectCount-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-08114

Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawIndexedIndirectCount-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndexedIndirectCount-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndexedIndirectCount-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirectCount-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndexedIndirectCount-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform

buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirectCount-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount-None-08613
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndexedIndirectCount-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndexedIndirectCount-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match
- VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-04469
  If a VkBufferView is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is

accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32

- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndexedIndirectCount-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexedIndirectCount-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndexedIndirectCount-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndexedIndirectCount-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndexedIndirectCount-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration

structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR

- VUID-vkCmdDrawIndexedIndirectCount-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with `flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndexedIndirectCount-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirectCount-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirectCount-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`
- VUID-vkCmdDrawIndexedIndirectCount-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping

using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndexedIndirectCount-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirectCount-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexedIndirectCount-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndexedIndirectCount-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndexedIndirectCount-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndexedIndirectCount-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the

respective heap bound by vkCmdBind*HeapEXT commands

- VUID-vkCmdDrawIndexedIndirectCount-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for uniformBuffers, the robustBufferAccess2 feature is not enabled, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirectCount-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, the robustBufferAccess2 feature is not enabled, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirectCount-None-11374
  If the robustBufferAccess2 feature is not enabled, the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndexedIndirectCount-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of pBindInfo->reservedRangeSize set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to minSamplerHeapReservedRangeWithEmbedded
- VUID-vkCmdDrawIndexedIndirectCount-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndexedIndirectCount-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawIndexedIndirectCount-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndexedIndirectCount-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirectCount-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndexedIndirectCount-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirectCount-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawIndexedIndirectCount-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT,

VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR

- VUID-vkCmdDrawIndexedIndirectCount-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndexedIndirectCount-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawIndexedIndirectCount-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set

- VUID-vkCmdDrawIndexedIndirectCount-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawIndexedIndirectCount-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndexedIndirectCount-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments`

[InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility

- VUID-vkCmdDrawIndexedIndirectCount-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndexedIndirectCount-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are non-NULL
- VUID-vkCmdDrawIndexedIndirectCount-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndexedIndirectCount-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback

loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndexedIndirectCount-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndexedIndirectCount-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS

dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawIndexedIndirectCount-None-07634
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-06666
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing

command

- VUID-vkCmdDrawIndexedIndirectCount-None-07846
  If the depthBounds feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndexedIndirectCount-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the viewportCount parameter of vkCmdSetViewportWithCount **must** match the scissorCount parameter of vkCmdSetScissorWithCount
- VUID-vkCmdDrawIndexedIndirectCount-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then

vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndexedIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndexedIndirectCount-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of `blendEnable` **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is enabled:
  - the `multisampledRenderToSingleSampled` feature

  then the current value of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawIndexedIndirectCount-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering

- VUID-vkCmdDrawIndexedIndirectCount-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo ::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawIndexedIndirectCount-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the

attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawIndexedIndirectCount-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndexedIndirectCount-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndexedIndirectCount-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is

specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR

- VUID-vkCmdDrawIndexedIndirectCount-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndexedIndirectCount-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndexedIndirectCount-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndexedIndirectCount-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the

corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless

VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set

- VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndexedIndirectCount-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndexedIndirectCount-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to

vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0

- VUID-vkCmdDrawIndexedIndirectCount-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07630
  If the `geometryStreams` feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07631

If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-08669

If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndexedIndirectCount-samples-07472
  If the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the `samples` parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::`rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the `samples` parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the `rasterizationSamples` parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirectCount-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with `multisampledRenderToSingleSampledEnable` equal to VK_TRUE, then the `rasterizationSamples` in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the `rasterizationSamples` member of that structure
- VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndexedIndirectCount-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`
- VUID-vkCmdDrawIndexedIndirectCount-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then

vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDrawIndexedIndirectCount-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the

VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage

member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active

- VUID-vkCmdDrawIndexedIndirectCount-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndexedIndirectCount-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndexedIndirectCount-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndexedIndirectCount-None-08693
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound
- VUID-vkCmdDrawIndexedIndirectCount-None-08696
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no `VkShaderEXT` bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndexedIndirectCount-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndexedIndirectCount-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any `VkShaderEXT` bound
- VUID-vkCmdDrawIndexedIndirectCount-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndexedIndirectCount-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndexedIndirectCount-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to vkCmdSetStencilWriteMask **must** be `0`
- VUID-vkCmdDrawIndexedIndirectCount-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element

of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them

- VUID-vkCmdDrawIndexedIndirectCount-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndexedIndirectCount-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndexedIndirectCount-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndexedIndirectCount-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag

- VUID-vkCmdDrawIndexedIndirectCount-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndexedIndirectCount-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::`flags` which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndexedIndirectCount-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexedIndirectCount-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-None-11861
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndexedIndirectCount-None-11862
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `resolveImageView` not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::`pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount-None-11863
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::`colorAttachmentCount` greater than `0`, then each element of the VkRenderingInfo::`pColorAttachments` array with an `resolveImageView` equal to

VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the

bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndexedIndirectCount-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndexedIndirectCount-flags-13362

If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set

- VUID-vkCmdDrawIndexedIndirectCount-flags-12491
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndexedIndirectCount-flags-13363
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndexedIndirectCount-None-04008
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawIndexedIndirectCount-None-02721
  If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description
- VUID-vkCmdDrawIndexedIndirectCount-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is a packed format, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the `format`
- VUID-vkCmdDrawIndexedIndirectCount-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::`format` or VkVertexInputAttributeDescription2EXT::`format` is not a packed format, and either the `legacyVertexAttributes` feature is not

enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format

- VUID-vkCmdDrawIndexedIndirectCount-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndexedIndirectCount-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndexedIndirectCount-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirectCount-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the

bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexedIndirectCount-Input-07939
  If the `maintenance9` feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in VkVertexInputAttributeDescription2EXT ::`location`
- VUID-vkCmdDrawIndexedIndirectCount-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as VkVertexInputAttributeDescription2EXT::`format`
- VUID-vkCmdDrawIndexedIndirectCount-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit
- VUID-vkCmdDrawIndexedIndirectCount-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT ::`format` **must** have a 64-bit component
- VUID-vkCmdDrawIndexedIndirectCount-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format
- VUID-vkCmdDrawIndexedIndirectCount-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage

and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of `primitiveTopology` is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-None-09637
  If the `primitiveTopologyListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndexedIndirectCount-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndexedIndirectCount-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndexedIndirectCount-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12240

If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndexedIndirectCount-buffer-02708
  If buffer is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-vkCmdDrawIndexedIndirectCount-buffer-02709
  buffer **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirectCount-offset-02710
  offset **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-02711
  commandBuffer **must** not be a protected command buffer
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02714
  If countBuffer is non-sparse then it **must** be bound completely and contiguously to a single VkDeviceMemory object
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02715
  countBuffer **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndexedIndirectCount-countBufferOffset-02716
  countBufferOffset **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02717
  The count stored in countBuffer **must** be less than or equal to VkPhysicalDeviceLimits ::maxDrawIndirectCount
- VUID-vkCmdDrawIndexedIndirectCount-countBufferOffset-04129
  (countBufferOffset + sizeof(uint32_t)) **must** be less than or equal to the size of countBuffer
- VUID-vkCmdDrawIndexedIndirectCount-None-04445
  If the drawIndirectCount feature is not enabled this function **must** not be used
- VUID-vkCmdDrawIndexedIndirectCount-None-07312
  If the maintenance6 feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount-primitiveRestartIndex-12401
  If the primitive restart index for this draw operation was set with

vkCmdSetPrimitiveRestartIndexEXT, then primitiveRestartIndex **must** not be greater than the maximum representable value for the bound VkIndexType

- VUID-vkCmdDrawIndexedIndirectCount-stride-03142
  stride **must** be a multiple of 4 and **must** be greater than or equal to sizeof(VkDrawIndexedIndirectCommand)
- VUID-vkCmdDrawIndexedIndirectCount-maxDrawCount-03143
  If maxDrawCount is greater than or equal to 1, (stride × (maxDrawCount - 1) + offset + sizeof(VkDrawIndexedIndirectCommand)) **must** be less than or equal to the size of buffer

Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndexedIndirectCount-buffer-parameter
  buffer **must** be a valid VkBuffer handle
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-parameter
  countBuffer **must** be a valid VkBuffer handle
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-recording
  commandBuffer **must** be in the recording state
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndexedIndirectCount-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexedIndirectCount-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirectCount-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndexedIndirectCount-commonparent
  Each of buffer, commandBuffer, and countBuffer **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to commandBuffer **must** be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndexedIndirectCount is affected by conditional rendering

25.4.1. Drawing Transform Feedback

It is possible to draw vertex data that was previously captured during active transform feedback by binding one or more of the transform feedback buffers as vertex buffers. A pipeline barrier is required between using the buffers as transform feedback buffers and vertex buffers to ensure all writes to the transform feedback buffers are visible when the data is read as vertex attributes. The source access is VK_ACCESS_TRANSFORM_FEEDBACK_WRITE_BIT_EXT and the destination access is VK_ACCESS_VERTEX_ATTRIBUTE_READ_BIT for the pipeline stages VK_PIPELINE_STAGE_TRANSFORM_FEEDBACK_BIT_EXT and VK_PIPELINE_STAGE_VERTEX_INPUT_BIT respectively. The value written to the counter buffer by vkCmdEndTransformFeedbackEXT **can** be used to determine the vertex count for the draw. A pipeline barrier is required between using the counter buffer for vkCmdEndTransformFeedbackEXT and vkCmdDrawIndirectByteCountEXT where the source access is VK_ACCESS_TRANSFORM_FEEDBACK_COUNTER_WRITE_BIT_EXT and the destination access is VK_ACCESS_INDIRECT_COMMAND_READ_BIT for the pipeline stages VK_PIPELINE_STAGE_TRANSFORM_FEEDBACK_BIT_EXT and VK_PIPELINE_STAGE_DRAW_INDIRECT_BIT respectively.

To record a non-indexed draw call, where the vertex count is based on a byte count read from a memory range and the passed in vertex stride parameter, call:

```
// Provided by VK_KHR_device_address_commands with VK_EXT_transform_feedback
void vkCmdDrawIndirectByteCount2EXT(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    instanceCount,
    uint32_t                                    firstInstance,
    const VkBindTransformFeedbackBuffer2InfoEXT* pCounterInfo,
    uint32_t                                    counterOffset,
    uint32_t                                    vertexStride);
```

- commandBuffer is the command buffer into which the command is recorded.
- instanceCount is the number of instances to draw.
- firstInstance is the instance ID of the first instance to draw.

- `pCounterInfo` is a pointer to a VkBindTransformFeedbackBuffer2InfoEXT defining the range of memory that the byte count is read from.
- `counterOffset` is subtracted from the byte count.
- `vertexStride` is the stride in bytes between each element of the vertex data that is used to calculate the vertex count from the counter value. This value is typically the same value that was used in the graphics pipeline state when the transform feedback was captured as the `XfbStride`.

When the command is executed, primitives are assembled in the same way as done with vkCmdDraw except the `vertexCount` is calculated based on the byte count read from `counterBuffer` at offset `counterBufferOffset`. The assembled primitives execute the bound graphics pipeline.

The effective `vertexCount` is calculated as follows:

```
const uint32_t * counterBufferPtr = (const uint8_t *)counterRange.address;
vertexCount = floor(max(0, (*counterBufferPtr - counterOffset)) / vertexStride);
```

The effective `firstVertex` is zero.

Valid Usage

- VUID-vkCmdDrawIndirectByteCount2EXT-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT

- VUID-vkCmdDrawIndirectByteCount2EXT-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndirectByteCount2EXT-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndirectByteCount2EXT-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirectByteCount2EXT-filterCubicMinmax-02695

Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching

rules

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndirectByteCount2EXT-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectByteCount2EXT-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for

storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectByteCount2EXT-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndirectByteCount2EXT-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType **must** match the Dim operand of the OpTypeImage as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndirectByteCount2EXT-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match
- VUID-vkCmdDrawIndirectByteCount2EXT-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirectByteCount2EXT-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components
- VUID-vkCmdDrawIndirectByteCount2EXT-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64

- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectByteCount2EXT-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndirectByteCount2EXT-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawIndirectByteCount2EXT-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndirectByteCount2EXT-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndirectByteCount2EXT-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with `flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT

- VUID-vkCmdDrawIndirectByteCount2EXT-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping

using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirectByteCount2EXT-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for

uniformBuffers, the robustBufferAccess2 feature is not enabled, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawIndirectByteCount2EXT-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, the robustBufferAccess2 feature is not enabled, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11374
  If the robustBufferAccess2 feature is not enabled, the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectByteCount2EXT-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of pBindInfo->reservedRangeSize set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to minSamplerHeapReservedRangeWithEmbedded
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawIndirectByteCount2EXT-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndirectByteCount2EXT-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and

that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::index **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndirectByteCount2EXT-protectedNoFault-11455
  If protectedNoFault is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectByteCount2EXT-protectedNoFault-11456
  If protectedNoFault is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectByteCount2EXT-renderPass-02684
  The current render pass **must** be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirectByteCount2EXT-subpass-02685
  The subpass index of the current render pass **must** be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndirectByteCount2EXT-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be

created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo

- VUID-vkCmdDrawIndirectByteCount2EXT-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both VkRenderingInputAttachmentIndexInfo ::`pDepthInputAttachmentIndex` and VkRenderingInputAttachmentIndexInfo ::`pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawIndirectByteCount2EXT-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndirectByteCount2EXT-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command

- VUID-vkCmdDrawIndirectByteCount2EXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndirectByteCount2EXT-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::`maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::`sampleLocationsEnable` set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07634
  If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-06666

If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07846
  If the depthBounds feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndirectByteCount2EXT-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this

drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirectByteCount2EXT-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirectByteCount2EXT-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of `blendEnable` **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is enabled:
  - the `multisampledRenderToSingleSampled` feature

  then the current value of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndirectByteCount2EXT-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::`viewMask` equal to VkRenderingInfo::`viewMask`
- VUID-vkCmdDrawIndirectByteCount2EXT-colorAttachmentCount-06179
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::`colorAttachmentCount` equal to

VkRenderingInfo::colorAttachmentCount

- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of

rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount

- VUID-vkCmdDrawIndirectByteCount2EXT-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndirectByteCount2EXT-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with

VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT

- VUID-vkCmdDrawIndirectByteCount2EXT-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCount2EXT-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectByteCount2EXT-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectByteCount2EXT-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndirectByteCount2EXT-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE
- VUID-vkCmdDrawIndirectByteCount2EXT-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color

attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectByteCount2EXT-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndirectByteCount2EXT-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndirectByteCount2EXT-primitivesGeneratedQueryWithNonZeroStreams-06709

If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndirectByteCount2EXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha Component word in Location 0 at Index 0
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently

invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07625
  If the alphaToOne feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07626
  If the logicOp feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to

any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08669
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07849
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stippledLineEnable is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current lineRasterizationMode is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current alphaToCoverageEnable, alphaToOneEnable and sampleShadingEnable states **must** all be VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09650
  If the depthClampControl feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of depthClampEnable is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndirectByteCount2EXT-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCount2EXT-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and

VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectByteCount2EXT-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndirectByteCount2EXT-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectByteCount2EXT-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectByteCount2EXT-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and an active color attachment current value of blendEnable is VK_TRUE, then the number of active color attachments **must** not exceed advancedBlendMaxColorAttachments
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirectByteCount2EXT-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then

vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE

- VUID-vkCmdDrawIndirectByteCount2EXT-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of VK_TRUE
- VUID-vkCmdDrawIndirectByteCount2EXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the `rasterizationStream` to zero
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to vkCmdSetSampleLocationsEXT **must** equal the `rasterizationSamples` parameter of the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and `sampleLocationsEnable` was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectByteCount2EXT-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of `sampleLocationsEnable` is VK_TRUE, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectByteCount2EXT-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the `stippledRectangularLines` feature **must** be enabled
- VUID-vkCmdDrawIndirectByteCount2EXT-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the `stippledBresenhamLines` feature **must** be enabled
- VUID-vkCmdDrawIndirectByteCount2EXT-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the `stippledSmoothLines` feature **must** be enabled
- VUID-vkCmdDrawIndirectByteCount2EXT-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current `stippledLineEnable` state is VK_TRUE and the current `lineRasterizationMode` state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the `stippledRectangularLines` feature **must** be enabled and VkPhysicalDeviceLimits::`strictLines` **must** be VK_TRUE
- VUID-vkCmdDrawIndirectByteCount2EXT-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::`stage` member of an element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state

enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid VkShaderEXT bound, and the other **must** have no VkShaderEXT bound
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no VkShaderEXT bound to either the

VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any VkShaderEXT bound
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndirectByteCount2EXT-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndirectByteCount2EXT-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments

- VUID-vkCmdDrawIndirectByteCount2EXT-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09642
  If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndirectByteCount2EXT-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::flags which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndirectByteCount2EXT-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the dynamicRenderingUnusedAttachments feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectByteCount2EXT-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirectByteCount2EXT-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11861
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11862
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to

VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectByteCount2EXT-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11868
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCount2EXT-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo

::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectByteCount2EXT-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCount2EXT-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCount2EXT-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCount2EXT-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirectByteCount2EXT-customResolve-11530
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-flags-13361
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndirectByteCount2EXT-flags-13362
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a setLayoutCount not equal to 0, and with pSetLayouts not equal to NULL, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirectByteCount2EXT-flags-12491
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a pushConstantRangeCount

not equal to 0, and with pPushConstantRanges not equal to NULL, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set

- VUID-vkCmdDrawIndirectByteCount2EXT-flags-13363
  If there are any shader objects bound that were created with flags that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::stageFlags set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndirectByteCount2EXT-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound

- VUID-vkCmdDrawIndirectByteCount2EXT-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE

- VUID-vkCmdDrawIndirectByteCount2EXT-None-02721
  If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawIndirectByteCount2EXT-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format

- VUID-vkCmdDrawIndirectByteCount2EXT-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT ::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in

the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndirectByteCount2EXT-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndirectByteCount2EXT-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndirectByteCount2EXT-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of setStride in each of its pBindInfos elements must have been VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectByteCount2EXT-Input-07939
  If the maintenance9 feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all

variables with the Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint **must** contain a location in VkVertexInputAttributeDescription2EXT::location

- VUID-vkCmdDrawIndirectByteCount2EXT-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the legacyVertexAttributes feature is not enabled or the SPIR-V Type associated with a given Input variable of the corresponding Location in the Vertex Execution Model OpEntryPoint is 64-bit, then the numeric type associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be the same as VkVertexInputAttributeDescription2EXT::format
- VUID-vkCmdDrawIndirectByteCount2EXT-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint **must** be 64-bit
- VUID-vkCmdDrawIndirectByteCount2EXT-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT::format **must** have a 64-bit component
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09203
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format
- VUID-vkCmdDrawIndirectByteCount2EXT-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then

vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCount2EXT-None-09637
  If the `primitiveTopologyListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-None-10909
  If the `primitiveTopologyPatchListRestart` feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCount2EXT-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::`stage` member of any element of VkGraphicsPipelineCreateInfo::`pStages` set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndirectByteCount2EXT-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCount2EXT-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndirectByteCount2EXT-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndirectByteCount2EXT-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndirectByteCount2EXT-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirectByteCount2EXT-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the pNext chain of VkGraphicsPipelineCreateInfo::pVertexInputState, any member of VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties ::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0
- VUID-vkCmdDrawIndirectByteCount2EXT-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the pVertexBindingDescriptions parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0
- VUID-vkCmdDrawIndirectByteCount2EXT-counterOffset-09474
  counterOffset **must** be a multiple of 4
- VUID-vkCmdDrawIndirectByteCount2EXT-transformFeedback-02287
  VkPhysicalDeviceTransformFeedbackFeaturesEXT::transformFeedback **must** be enabled
- VUID-vkCmdDrawIndirectByteCount2EXT-transformFeedbackDraw-02288
  The implementation **must** support VkPhysicalDeviceTransformFeedbackPropertiesEXT ::transformFeedbackDraw
- VUID-vkCmdDrawIndirectByteCount2EXT-vertexStride-02289
  vertexStride **must** be greater than 0 and less than or equal to VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBufferDataStride
- VUID-vkCmdDrawIndirectByteCount2EXT-vertexStride-09475
  vertexStride **must** be a multiple of 4
- VUID-vkCmdDrawIndirectByteCount2EXT-commandBuffer-02646
  commandBuffer **must** not be a protected command buffer
- VUID-vkCmdDrawIndirectByteCount2EXT-pInfo-13061
  The VkBuffer that pInfo->counterRange was queried from **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set
- VUID-vkCmdDrawIndirectByteCount2EXT-pInfo-13062
  pInfo->counterRange.address **must** be a multiple of 4

Valid Usage (Implicit)

- VUID-vkCmdDrawIndirectByteCount2EXT-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle

- VUID-vkCmdDrawIndirectByteCount2EXT-pCounterInfo-parameter
  `pCounterInfo` **must** be a valid pointer to a valid VkBindTransformFeedbackBuffer2InfoEXT structure
- VUID-vkCmdDrawIndirectByteCount2EXT-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdDrawIndirectByteCount2EXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndirectByteCount2EXT-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirectByteCount2EXT-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirectByteCount2EXT-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Conditional Rendering

vkCmdDrawIndirectByteCount2EXT is affected by conditional rendering

To record a non-indexed draw call, where the vertex count is based on a byte count read from a buffer and the passed in vertex stride parameter, call:

WARNING This functionality is superseded by vkCmdDrawIndirectByteCount2EXT. See Legacy Functionality for more information.

```
// Provided by VK_EXT_transform_feedback
void vkCmdDrawIndirectByteCountEXT(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    instanceCount,
    uint32_t                                    firstInstance,
    VkBuffer                                    counterBuffer,
    VkDeviceSize                                counterBufferOffset,
    uint32_t                                    counterOffset,
    uint32_t                                    vertexStride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `instanceCount` is the number of instances to draw.
- `firstInstance` is the instance ID of the first instance to draw.
- `counterBuffer` is the buffer handle from where the byte count is read.
- `counterBufferOffset` is the offset into the buffer used to read the byte count, which is used to calculate the vertex count for this draw call.
- `counterOffset` is subtracted from the byte count read from the `counterBuffer` at the `counterBufferOffset`
- `vertexStride` is the stride in bytes between each element of the vertex data that is used to calculate the vertex count from the counter value. This value is typically the same value that was used in the graphics pipeline state when the transform feedback was captured as the `XfbStride`.

When the command is executed, primitives are assembled in the same way as done with vkCmdDraw except the `vertexCount` is calculated based on the byte count read from `counterBuffer` at offset `counterBufferOffset`. The assembled primitives execute the bound graphics pipeline.

The effective `vertexCount` is calculated as follows:

```
const uint32_t * counterBufferPtr = (const uint8_t *)counterBuffer.address +
counterBufferOffset;
vertexCount = floor(max(0, (*counterBufferPtr - counterOffset)) / vertexStride);
```

The effective `firstVertex` is zero.

Valid Usage

- VUID-vkCmdDrawIndirectByteCountEXT-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-magFilter-09598

If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndirectByteCountEXT-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawIndirectByteCountEXT-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndirectByteCountEXT-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndirectByteCountEXT-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic

operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawIndirectByteCountEXT-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirectByteCountEXT-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawIndirectByteCountEXT-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawIndirectByteCountEXT-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawIndirectByteCountEXT-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawIndirectByteCountEXT-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawIndirectByteCountEXT-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirectByteCountEXT-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndirectByteCountEXT-uniformBuffers-06935

If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectByteCountEXT-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectByteCountEXT-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectByteCountEXT-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawIndirectByteCountEXT-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType **must** match the Dim operand of the OpTypeImage as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawIndirectByteCountEXT-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's format and the Sampled Type operand of the OpTypeImage **must** match
- VUID-vkCmdDrawIndirectByteCountEXT-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirectByteCountEXT-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components

- VUID-vkCmdDrawIndirectByteCountEXT-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 64
- VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction **must** have a Width of 32
- VUID-vkCmdDrawIndirectByteCountEXT-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectByteCountEXT-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawIndirectByteCountEXT-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndirectByteCountEXT-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its

specialization constant operand equal to VK_TRUE

- VUID-vkCmdDrawIndirectByteCountEXT-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawIndirectByteCountEXT-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawIndirectByteCountEXT-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with `flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawIndirectByteCountEXT-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawIndirectByteCountEXT-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawIndirectByteCountEXT-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndirectByteCountEXT-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawIndirectByteCountEXT-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirectByteCountEXT-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawIndirectByteCountEXT-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawIndirectByteCountEXT-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawIndirectByteCountEXT-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader

accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress

- VUID-vkCmdDrawIndirectByteCountEXT-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawIndirectByteCountEXT-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawIndirectByteCountEXT-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectByteCountEXT-None-11373
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectByteCountEXT-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawIndirectByteCountEXT-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawIndirectByteCountEXT-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-11398

If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndirectByteCountEXT-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectByteCountEXT-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectByteCountEXT-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawIndirectByteCountEXT-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectByteCountEXT-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndirectByteCountEXT-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawIndirectByteCountEXT-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color
- VUID-vkCmdDrawIndirectByteCountEXT-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectByteCountEXT-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawIndirectByteCountEXT-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawIndirectByteCountEXT-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the

VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawIndirectByteCountEXT-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndirectByteCountEXT-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawIndirectByteCountEXT-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a InputAttachmentIndex referenced by VkRenderingInputAttachmentIndexInfo, or no InputAttachmentIndex if VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex or VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are NULL, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawIndirectByteCountEXT-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are non-NULL
- VUID-vkCmdDrawIndirectByteCountEXT-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawIndirectByteCountEXT-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for

VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndirectByteCountEXT-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirectByteCountEXT-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawIndirectByteCountEXT-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawIndirectByteCountEXT-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBoundsTestEnable` is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectByteCountEXT-None-07634
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-06666
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, and the current

value of depthTestEnable is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of depthTestEnable is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07846
  If the depthBounds feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the viewportCount parameter of vkCmdSetViewportWithCount **must** match the scissorCount parameter of vkCmdSetScissorWithCount

- VUID-vkCmdDrawIndirectByteCountEXT-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirectByteCountEXT-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be `1`
- VUID-vkCmdDrawIndirectByteCountEXT-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of `blendEnable` **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCountEXT-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is VK_FALSE, and none of the following is

enabled:

  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirectByteCountEXT-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawIndirectByteCountEXT-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawIndirectByteCountEXT-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was

created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirectByteCountEXT-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount
- VUID-vkCmdDrawIndirectByteCountEXT-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawIndirectByteCountEXT-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have

been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and

VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawIndirectByteCountEXT-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCountEXT-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawIndirectByteCountEXT-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawIndirectByteCountEXT-pNext-07935
  If this command is called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the bound graphics pipeline **must** be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples
- VUID-vkCmdDrawIndirectByteCountEXT-renderPass-06198

If the current render pass instance was begun with vkCmdBeginRendering, the bound pipeline **must** have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE

- VUID-vkCmdDrawIndirectByteCountEXT-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-pColorAttachments-11539
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->resolveImageView was not VK_NULL_HANDLE, then the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-pDepthAttachment-11540
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-pStencilAttachment-11860
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, there is a

graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, then the VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the pipeline **must** not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectByteCountEXT-flags-10582
  If the current render pass instance was begun with a vkCmdBeginRendering call in commandBuffer, its VkRenderingInfo::flags parameter **must** not have VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT set unless VK_RENDERING_CONTENTS_INLINE_BIT_KHR is also set
- VUID-vkCmdDrawIndirectByteCountEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard **must** not be enabled
- VUID-vkCmdDrawIndirectByteCountEXT-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline **must** not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream
- VUID-vkCmdDrawIndirectByteCountEXT-None-07620
  If the depthClamp feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDepthClampEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07621
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetPolygonModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07622
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetRasterizationSamplesEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07623
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and `alphaToCoverageEnable` was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndirectByteCountEXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to VK_TRUE, then the Fragment Output Interface **must** contain a variable for the alpha `Component` word in `Location` 0 at `Index` 0
- VUID-vkCmdDrawIndirectByteCountEXT-None-07624
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07625
  If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetAlphaToOneEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07626
  If the `logicOp` feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetLogicOpEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07627
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorBlendEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07629
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and there are color attachments bound, then vkCmdSetColorWriteMaskEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07630
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_GEOMETRY_BIT stage and the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled, then vkCmdSetRasterizationStreamEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07631
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07632
  If the VK_EXT_conservative_rasterization extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of conservativeRasterizationMode is VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-conservativePointAndLineRasterization-07499
  If the VK_EXT_conservative_rasterization extension is enabled, conservativePointAndLineRasterization is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and the effective rasterization input topology is in the line or point topology class, then the current value of conservativeRasterizationMode **must** be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-07633
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state, then vkCmdSetDepthClipEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07636
  If the VK_EXT_provoking_vertex extension is enabled, a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetProvokingVertexModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-08666
  If any of the stippledRectangularLines, stippledBresenhamLines or stippledSmoothLines

features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineRasterizationModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08669
  If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineStippleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-07849
  If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `stippledLineEnable` is VK_TRUE, then vkCmdSetLineStipple **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-10608
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is VK_LINE_RASTERIZATION_MODE_BRESENHAM or VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be VK_FALSE
- VUID-vkCmdDrawIndirectByteCountEXT-None-07639
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled, then vkCmdSetDepthClipNegativeOneToOneEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-09650
  If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT dynamic state enabled, and the current value of `depthClampEnable` is VK_TRUE, then vkCmdSetDepthClampRangeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** follow the rules for a zero-attachment subpass
- VUID-vkCmdDrawIndirectByteCountEXT-samples-07472
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCountEXT-samples-07473
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT **must** be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT **must** be the same as the rasterizationSamples member of that structure
- VUID-vkCmdDrawIndirectByteCountEXT-firstAttachment-07476
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorBlendEnableEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectByteCountEXT-firstAttachment-07478
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic states enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the last call to vkCmdSetColorWriteMaskEXT in the current command buffer prior to this drawing command **must** have set a value for all active color attachments
- VUID-vkCmdDrawIndirectByteCountEXT-advancedBlendMaxColorAttachments-07480
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled, the current

value of rasterizerDiscardEnable is VK_FALSE, and an active color attachment current value of blendEnable is VK_TRUE, then the number of active color attachments **must** not exceed advancedBlendMaxColorAttachments

- VUID-vkCmdDrawIndirectByteCountEXT-None-10862
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT , but not the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirectByteCountEXT-rasterizerDiscardEnable-10863
  If a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT, but not the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorBlendAdvancedEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirectByteCountEXT-None-10864
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then either vkCmdSetColorBlendAdvancedEXT or vkCmdSetColorBlendEquationEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for all active color attachments with the blendEnable current value of VK_TRUE
- VUID-vkCmdDrawIndirectByteCountEXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage or a graphics pipeline is bound was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT **must** have set the rasterizationStream to zero
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsPerPixel-07483
  If a shader object is bound to any graphics stage or the bound graphics pipeline state was

created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT **must** equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07484
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT then the current active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07485
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07486
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT ::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07487
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the

VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current value of sampleLocationsEnable is VK_TRUE, then sampleLocationsInfo.sampleLocationsPerPixel **must** equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
- VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR, then the stippledRectangularLines feature **must** be enabled
- VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM, then the stippledBresenhamLines feature **must** be enabled
- VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH, then the stippledSmoothLines feature **must** be enabled
- VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07498

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT, then the stippledRectangularLines feature **must** be enabled and VkPhysicalDeviceLimits::strictLines **must** be VK_TRUE

- VUID-vkCmdDrawIndirectByteCountEXT-stage-07073
  If the bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries **must** not be active
- VUID-vkCmdDrawIndirectByteCountEXT-None-08877
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetAttachmentFeedbackLoopEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-nextStage-10745
  For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a nextStage including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawIndirectByteCountEXT-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT **must** have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-None-08689
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_TASK_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08690
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08693
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound
- VUID-vkCmdDrawIndirectByteCountEXT-None-08696
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there **must** be no `VkShaderEXT` bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage
- VUID-vkCmdDrawIndirectByteCountEXT-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call **must** also be bound
- VUID-vkCmdDrawIndirectByteCountEXT-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call **must** not have any `VkShaderEXT` bound
- VUID-vkCmdDrawIndirectByteCountEXT-None-08878
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
- VUID-vkCmdDrawIndirectByteCountEXT-None-08879
  All bound graphics shader objects **must** have either been created with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag set, or with identical or identically defined arrays of descriptor set layouts
- VUID-vkCmdDrawIndirectByteCountEXT-pDynamicStates-08715
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to vkCmdSetDepthWriteEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCountEXT-pDynamicStates-08716
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics

pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask **must** be 0

- VUID-vkCmdDrawIndirectByteCountEXT-None-09116
  If a shader object is bound to any graphics stage or the bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT **must** either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, VK_COLOR_COMPONENT_B_BIT, and VK_COLOR_COMPONENT_A_BIT, or none of them
- VUID-vkCmdDrawIndirectByteCountEXT-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command **must** be less than maxFragmentDualSrcAttachments
- VUID-vkCmdDrawIndirectByteCountEXT-None-09548
  If the current render pass was begun with vkCmdBeginRendering, there is no shader object bound to any graphics stage, the value of each element of VkRenderingAttachmentLocationInfo::pColorAttachmentLocations in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirectByteCountEXT-None-09549
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, for each element of VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices in the bound pipeline, if either pColorAttachmentInputIndices[i] or the value for the corresponding index set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** much
- VUID-vkCmdDrawIndirectByteCountEXT-None-10927
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectByteCountEXT-None-10928
  If the current render pass was begun with vkCmdBeginRendering, and there is no shader object bound to any graphics stage, if either the value of VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an InputAttachmentIndex decoration, the two values **must** match
- VUID-vkCmdDrawIndirectByteCountEXT-None-09642

If the current render pass was begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT

- VUID-vkCmdDrawIndirectByteCountEXT-None-09643
  If the bound graphics pipeline was created with VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT, the current render pass **must** have begun with vkCmdBeginRendering with the VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT flag
- VUID-vkCmdDrawIndirectByteCountEXT-None-10772
  If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndirectByteCountEXT-flags-11521
  If current render pass instance was begun with vkCmdBeginRendering with VkRenderingInfo::`flags` which includes VK_RENDERING_FRAGMENT_REGION_BIT_EXT, and if sample shading is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndirectByteCountEXT-None-11522
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-11523
  If the current render pass instance was begun with vkCmdBeginRendering and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a VkCustomResolveCreateInfoEXT
- VUID-vkCmdDrawIndirectByteCountEXT-customResolve-11524
  If the current render pass instance was begun with vkCmdBeginRendering and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT ::`customResolve` as VK_TRUE
- VUID-vkCmdDrawIndirectByteCountEXT-customResolve-11525
  If the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, and vkCmdBeginCustomResolveEXT has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE
- VUID-vkCmdDrawIndirectByteCountEXT-None-11861
  If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, the bound graphics pipeline **must** have been created with a VkCustomResolveCreateInfoEXT ::`colorAttachmentCount` equal to VkRenderingInfo::`colorAttachmentCount`
- VUID-vkCmdDrawIndirectByteCountEXT-None-11862
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and

VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectByteCountEXT-None-11863
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-11864
  If the dynamicRenderingUnusedAttachments feature is enabled, the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, and VkRenderingInfo::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with an resolveImageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkCustomResolveCreateInfoEXT::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-None-11865
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-None-11866
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-11867
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-None-11868

If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirectByteCountEXT-None-11869
  If current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicRenderingUnusedAttachments-11870
  If the current render pass instance was begun with vkCmdBeginRendering, it contains a custom resolve, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, and the value of VkCustomResolveCreateInfoEXT::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->resolveImageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawIndirectByteCountEXT-colorAttachmentCount-11871
  If the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0 and vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, then for each element of the VkRenderingInfo::pColorAttachments array with a resolveImageView not equal to VK_NULL_HANDLE, the resolveImageView **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline
- VUID-vkCmdDrawIndirectByteCountEXT-pDepthAttachment-11872
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCountEXT-pStencilAttachment-11873
  If the current render pass instance was begun with vkCmdBeginRendering, vkCmdBeginCustomResolveEXT has been recorded in the render pass instance, VkRenderingInfo::pStencilAttachment->resolveImageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->resolveImageView
- VUID-vkCmdDrawIndirectByteCountEXT-customResolve-11529
  If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::customResolve as VK_TRUE
- VUID-vkCmdDrawIndirectByteCountEXT-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with vkCmdBeginRendering and contains a custom resolve, a fragment density map attachment is active, and vkCmdBeginCustomResolveEXT has not yet been called, then the fragment shader object bound **must** have been created with VkCustomResolveCreateInfoEXT::`customResolve` as VK_FALSE

- VUID-vkCmdDrawIndirectByteCountEXT-flags-13361
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, then all bound shader objects **must** have been created with the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit
- VUID-vkCmdDrawIndirectByteCountEXT-flags-13362
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirectByteCountEXT-flags-12491
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT set
- VUID-vkCmdDrawIndirectByteCountEXT-flags-13363
  If there are any shader objects bound that were created with `flags` that includes the VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then there **must** be no binding with VkDescriptorSetLayoutBinding::`stageFlags` set with VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK_NULL_HANDLE buffers bound
- VUID-vkCmdDrawIndirectByteCountEXT-None-04008
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK_NULL_HANDLE
- VUID-vkCmdDrawIndirectByteCountEXT-None-02721
  If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawIndirectByteCountEXT-format-10389
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format
- VUID-vkCmdDrawIndirectByteCountEXT-format-10390
  For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format
- VUID-vkCmdDrawIndirectByteCountEXT-None-07842
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
- VUID-vkCmdDrawIndirectByteCountEXT-primitiveTopology-10286
  If a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage is bound, then the current value of primitiveTopology **must** be VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-primitiveTopology-10747
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_PATCH_LIST prior to this drawing command, then a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage **must** be bound
- VUID-vkCmdDrawIndirectByteCountEXT-primitiveTopology-10748
  If vkCmdSetPrimitiveTopology set primitiveTopology to VK_PRIMITIVE_TOPOLOGY_POINT_LIST prior to this drawing command, the maintenance5 feature is not enabled, both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT and VK_SHADER_STAGE_GEOMETRY_BIT stage are not bound, then the Vertex Execution Model **must** have a PointSize decorated variable that is statically written to
- VUID-vkCmdDrawIndirectByteCountEXT-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, but without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2 with a non-NULL pStrides parameter or vkCmdBindVertexBuffers3KHR with setStride set to VK_TRUE **must** have been called and

not subsequently invalidated in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirectByteCountEXT-None-13118
  If the bound graphics pipeline was created without the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, without the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and vkCmdBindVertexBuffers3KHR was called and not subsequently invalidated in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been VK_FALSE
- VUID-vkCmdDrawIndirectByteCountEXT-None-04914
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then vkCmdSetVertexInputEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectByteCountEXT-Input-07939
  If the `maintenance9` feature is not enabled, and there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in VkVertexInputAttributeDescription2EXT::`location`
- VUID-vkCmdDrawIndirectByteCountEXT-Input-08734
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as VkVertexInputAttributeDescription2EXT::`format`
- VUID-vkCmdDrawIndirectByteCountEXT-format-08936
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::`format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit
- VUID-vkCmdDrawIndirectByteCountEXT-format-08937
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding VkVertexInputAttributeDescription2EXT::`format` **must** have a 64-bit component
- VUID-vkCmdDrawIndirectByteCountEXT-None-09203

If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled and VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint **must** not use components that are not present in the format

- VUID-vkCmdDrawIndirectByteCountEXT-None-04875
  If there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with both a VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage and the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled, and the current value of primitiveTopology is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, then vkCmdSetPatchControlPointsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-04879
  If there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectByteCountEXT-None-09637
  If the primitiveTopologyListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_POINT_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST, VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST, VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY, or VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY, there is a shader object bound to the VK_SHADER_STAGE_VERTEX_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCountEXT-None-10909
  If the primitiveTopologyPatchListRestart feature is not enabled, the input assembly is VK_PRIMITIVE_TOPOLOGY_PATCH_LIST, there is a shader object bound to the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT stage or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK_FALSE
- VUID-vkCmdDrawIndirectByteCountEXT-stage-06481
  The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::stage member of any element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT
- VUID-vkCmdDrawIndirectByteCountEXT-None-08885
  There **must** be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages
- VUID-vkCmdDrawIndirectByteCountEXT-None-07619
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT

stage or a graphics pipeline is bound which was created with both a VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage and the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-OpExecutionMode-12239
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndirectByteCountEXT-OpExecutionMode-12240
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndirectByteCountEXT-OpExecutionMode-12241
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndirectByteCountEXT-OpExecutionMode-12242
  If a shader is bound to both the VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT and VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirectByteCountEXT-pNext-09461
  If the bound graphics pipeline state was created with VkPipelineVertexInputDivisorStateCreateInfo in the pNext chain of VkGraphicsPipelineCreateInfo::pVertexInputState, any member of VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties ::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0
- VUID-vkCmdDrawIndirectByteCountEXT-None-09462
  If shader objects are used for drawing or the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, any member of the pVertexBindingDescriptions parameter to the vkCmdSetVertexInputEXT call that sets this dynamic state has a value other than 1 in divisor, and VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance is VK_FALSE, then firstInstance **must** be 0
- VUID-vkCmdDrawIndirectByteCountEXT-counterOffset-09474
  counterOffset **must** be a multiple of 4
- VUID-vkCmdDrawIndirectByteCountEXT-transformFeedback-02287
  VkPhysicalDeviceTransformFeedbackFeaturesEXT::transformFeedback **must** be enabled
- VUID-vkCmdDrawIndirectByteCountEXT-transformFeedbackDraw-02288
  The implementation **must** support VkPhysicalDeviceTransformFeedbackPropertiesEXT ::transformFeedbackDraw

- VUID-vkCmdDrawIndirectByteCountEXT-vertexStride-02289
  `vertexStride` **must** be greater than 0 and less than or equal to `VkPhysicalDeviceTransformFeedbackPropertiesEXT`::`maxTransformFeedbackBufferDataStride`
- VUID-vkCmdDrawIndirectByteCountEXT-vertexStride-09475
  `vertexStride` **must** be a multiple of `4`
- VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-02646
  `commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawIndirectByteCountEXT-counterBuffer-04567
  If `counterBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdDrawIndirectByteCountEXT-counterBuffer-02290
  `counterBuffer` **must** have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT usage flag set
- VUID-vkCmdDrawIndirectByteCountEXT-counterBufferOffset-04568
  `counterBufferOffset` **must** be a multiple of `4`

Valid Usage (Implicit)

- VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndirectByteCountEXT-counterBuffer-parameter
  `counterBuffer` **must** be a valid VkBuffer handle
- VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdDrawIndirectByteCountEXT-renderpass
  This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirectByteCountEXT-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirectByteCountEXT-videocoding
  This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndirectByteCountEXT-commonparent
  Both of `commandBuffer`, and `counterBuffer` **must** have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized

- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Inside	Outside	VK_QUEUE_GRAPHICS_BIT	Action

Conditional Rendering

vkCmdDrawIndirectByteCountEXT is affected by conditional rendering

25.5. Conditional Rendering

Certain rendering commands **can** be executed conditionally based on a value in buffer memory. These rendering commands are limited to drawing commands, dispatching commands, and clearing attachments with vkCmdClearAttachments within a conditional rendering block which is defined by commands vkCmdBeginConditionalRenderingEXT and vkCmdEndConditionalRenderingEXT. Other rendering commands remain unaffected by conditional rendering.

The complete list of commands affected by conditional rendering is:

Commands Affected by Conditional Rendering

- vkCmdBeginCustomResolveEXT
- vkCmdClearAttachments
- vkCmdDispatch
- vkCmdDispatchBase
- vkCmdDispatchBaseKHR
- vkCmdDispatchIndirect
- vkCmdDispatchIndirect2KHR
- vkCmdDraw
- vkCmdDrawIndexed
- vkCmdDrawIndexedIndirect
- vkCmdDrawIndexedIndirect2KHR
- vkCmdDrawIndexedIndirectCount

- vkCmdDrawIndexedIndirectCount2KHR
- vkCmdDrawIndexedIndirectCountKHR
- vkCmdDrawIndirect
- vkCmdDrawIndirect2KHR
- vkCmdDrawIndirectByteCount2EXT
- vkCmdDrawIndirectByteCountEXT
- vkCmdDrawIndirectCount
- vkCmdDrawIndirectCount2KHR
- vkCmdDrawIndirectCountKHR
- vkCmdDrawMeshTasksEXT
- vkCmdDrawMeshTasksIndirect2EXT
- vkCmdDrawMeshTasksIndirectCount2EXT
- vkCmdDrawMeshTasksIndirectCountEXT
- vkCmdDrawMeshTasksIndirectEXT
- vkCmdDrawMultiEXT
- vkCmdDrawMultiIndexedEXT
- vkCmdExecuteGeneratedCommandsEXT

After beginning conditional rendering, it is considered *active* within the command buffer it was called until it is ended with vkCmdEndConditionalRenderingEXT.

Conditional rendering **must** begin and end in the same command buffer. When conditional rendering is active, a primary command buffer **can** execute secondary command buffers if the `inheritedConditionalRendering` feature is enabled. For a secondary command buffer to be executed while conditional rendering is active in the primary command buffer, it **must** set the `conditionalRenderingEnable` flag of VkCommandBufferInheritanceConditionalRenderingInfoEXT, as described in the Command Buffer Recording section.

Conditional rendering **must** also either begin and end inside the same subpass of a render pass instance, or **must** both begin and end outside of a render pass instance (i.e. contain entire render pass instances).

To begin conditional rendering, call:

WARNING	This functionality is superseded by vkCmdBeginConditionalRendering2EXT. See Legacy Functionality for more information.

```
// Provided by VK_EXT_conditional_rendering
void vkCmdBeginConditionalRenderingEXT(
    VkCommandBuffer                                 commandBuffer,
    const VkConditionalRenderingBeginInfoEXT*       pConditionalRenderingBegin);
```

- `commandBuffer` is the command buffer into which this command will be recorded.
- `pConditionalRenderingBegin` is a pointer to a VkConditionalRenderingBeginInfoEXT structure specifying parameters of conditional rendering.

Valid Usage

- VUID-vkCmdBeginConditionalRenderingEXT-None-01980
  Conditional rendering **must** not already be active

Valid Usage (Implicit)

- VUID-vkCmdBeginConditionalRenderingEXT-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdBeginConditionalRenderingEXT-pConditionalRenderingBegin-parameter
  `pConditionalRenderingBegin` **must** be a valid pointer to a valid VkConditionalRenderingBeginInfoEXT structure
- VUID-vkCmdBeginConditionalRenderingEXT-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdBeginConditionalRenderingEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_COMPUTE_BIT, or VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdBeginConditionalRenderingEXT-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdBeginConditionalRenderingEXT-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_COMPUTE_BIT VK_QUEUE_GRAPHICS_BIT	Action State

Conditional Rendering

vkCmdBeginConditionalRenderingEXT is not affected by conditional rendering

The `VkConditionalRenderingBeginInfoEXT` structure is defined as:

WARNING This functionality is superseded by VkConditionalRenderingBeginInfo2EXT. See Legacy Functionality for more information.

```
// Provided by VK_EXT_conditional_rendering
typedef struct VkConditionalRenderingBeginInfoEXT {
    VkStructureType                 sType;
    const void*                     pNext;
    VkBuffer                        buffer;
    VkDeviceSize                    offset;
    VkConditionalRenderingFlagsEXT  flags;
} VkConditionalRenderingBeginInfoEXT;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `buffer` is a buffer containing the predicate for conditional rendering.
- `offset` is the byte offset into `buffer` where the predicate is located.
- `flags` is a bitmask of VkConditionalRenderingFlagsEXT specifying the behavior of conditional rendering.

If the 32-bit value at `offset` in `buffer` memory is zero, then the rendering commands are discarded, otherwise they are executed as normal. If the value of the predicate in buffer memory changes while conditional rendering is active, the rendering commands **may** be discarded in an implementation-dependent way. Some implementations may latch the value of the predicate upon beginning conditional rendering while others may read it before every rendering command.

Valid Usage

- VUID-VkConditionalRenderingBeginInfoEXT-buffer-01981
  If `buffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkConditionalRenderingBeginInfoEXT-buffer-01982
  `buffer` **must** have been created with the VK_BUFFER_USAGE_CONDITIONAL_RENDERING_BIT_EXT usage flag set
- VUID-VkConditionalRenderingBeginInfoEXT-offset-01983
  `offset` **must** be less than the size of `buffer` by at least 32 bits
- VUID-VkConditionalRenderingBeginInfoEXT-offset-01984
  `offset` **must** be a multiple of 4

Valid Usage (Implicit)

- VUID-VkConditionalRenderingBeginInfoEXT-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_CONDITIONAL_RENDERING_BEGIN_INFO_EXT
- VUID-VkConditionalRenderingBeginInfoEXT-pNext-pNext
  `pNext` **must** be `NULL`
- VUID-VkConditionalRenderingBeginInfoEXT-buffer-parameter
  `buffer` **must** be a valid VkBuffer handle
- VUID-VkConditionalRenderingBeginInfoEXT-flags-parameter
  If `flags` is not `0`, `flags` **must** be a valid combination of VkConditionalRenderingFlagBitsEXT values

To begin conditional rendering, call:

```
// Provided by VK_KHR_device_address_commands with VK_EXT_conditional_rendering
void vkCmdBeginConditionalRendering2EXT(
    VkCommandBuffer                             commandBuffer,
    const VkConditionalRenderingBeginInfo2EXT*  pConditionalRenderingBegin);
```

- `commandBuffer` is the command buffer into which this command will be recorded.
- `pConditionalRenderingBegin` is a pointer to a VkConditionalRenderingBeginInfo2EXT structure specifying parameters of conditional rendering.

Valid Usage

- VUID-vkCmdBeginConditionalRendering2EXT-None-13063
  Conditional rendering **must** not already be active

Valid Usage (Implicit)

- VUID-vkCmdBeginConditionalRendering2EXT-commandBuffer-parameter
  `commandBuffer` **must** be a valid VkCommandBuffer handle
- VUID-vkCmdBeginConditionalRendering2EXT-pConditionalRenderingBegin-parameter
  `pConditionalRenderingBegin` **must** be a valid pointer to a valid VkConditionalRenderingBeginInfo2EXT structure
- VUID-vkCmdBeginConditionalRendering2EXT-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdBeginConditionalRendering2EXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_COMPUTE_BIT, or VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdBeginConditionalRendering2EXT-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdBeginConditionalRendering2EXT-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_COMPUTE_BIT VK_QUEUE_GRAPHICS_BIT	Action State

Conditional Rendering

vkCmdBeginConditionalRendering2EXT is not affected by conditional rendering

The `VkConditionalRenderingBeginInfo2EXT` structure is defined as:

```
// Provided by VK_KHR_device_address_commands with VK_EXT_conditional_rendering
typedef struct VkConditionalRenderingBeginInfo2EXT {
    VkStructureType                   sType;
    const void*                       pNext;
    VkDeviceAddressRangeKHR           addressRange;
    VkAddressCommandFlagsKHR          addressFlags;
    VkConditionalRenderingFlagsEXT    flags;
} VkConditionalRenderingBeginInfo2EXT;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `addressRange` is the VkDeviceAddressRangeKHR containing the predicate for conditional rendering.
- `addressFlags` is a VkAddressCommandFlagsKHR value defining the flags for the address range.
- `flags` is a bitmask of VkConditionalRenderingFlagsEXT specifying the behavior of conditional rendering.

If the 32-bit value at `addressRange.address` is zero, then the rendering commands are discarded, otherwise they are executed as normal. If the value of the predicate in memory changes while conditional rendering is active, the rendering commands **may** be discarded in an implementation-dependent way. Some implementations **may** latch the value of the predicate upon beginning conditional rendering while others **may** read it before every rendering command.

Valid Usage

- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13097
  If the range specified by `addressRange` is not bound completely to memory when accessed, `addressFlags` **must** not include VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13098
  If the buffer from which the range specified by `addressRange` was created with VK_BUFFER_CREATE_PROTECTED_BIT, and `protectedNoFault` is not supported, `addressFlags` **must** include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13099
  If the buffer from which the range specified by `addressRange` was created without VK_BUFFER_CREATE_PROTECTED_BIT, and `protectedNoFault` is not supported, `addressFlags` **must** not include VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressFlags-13100
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13122
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR

or VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR

- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13123
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without VK_BUFFER_USAGE_STORAGE_BUFFER_BIT, `addressFlags` **must** not include VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressFlags-13101
  `addressFlags` **must** not include both VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR and VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13124
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created with VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `addressFlags` **must** include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR or VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13125
  If any buffer, which is bound to a range of VkDeviceMemory that overlaps the range backing `addressRange`, was created without VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT, `addressFlags` **must** not include VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13064
  The VkBuffer that `addressRange` was queried from **must** have been created with VK_BUFFER_USAGE_CONDITIONAL_RENDERING_BIT_EXT
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13065
  `addressRange.address` **must** be a multiple of 4
- VUID-VkConditionalRenderingBeginInfo2EXT-addressRange-13066
  `addressRange.size` **must** be greater than or equal to 4

Valid Usage (Implicit)

- VUID-VkConditionalRenderingBeginInfo2EXT-sType-sType
  `sType` **must** be VK_STRUCTURE_TYPE_CONDITIONAL_RENDERING_BEGIN_INFO_2_EXT
- VUID-VkConditionalRenderingBeginInfo2EXT-pNext-pNext
  `pNext` **must** be `NULL`
- VUID-VkConditionalRenderingBeginInfo2EXT-addressFlags-parameter
  If `addressFlags` is not `0`, `addressFlags` **must** be a valid combination of VkAddressCommandFlagBitsKHR values
- VUID-VkConditionalRenderingBeginInfo2EXT-flags-parameter
  If `flags` is not `0`, `flags` **must** be a valid combination of VkConditionalRenderingFlagBitsEXT values

Bits which **can** be set in vkCmdBeginConditionalRenderingEXT::flags, specifying the behavior of conditional rendering, are:

```
// Provided by VK_EXT_conditional_rendering
typedef enum VkConditionalRenderingFlagBitsEXT {
    VK_CONDITIONAL_RENDERING_INVERTED_BIT_EXT = 0x00000001,
} VkConditionalRenderingFlagBitsEXT;
```

- VK_CONDITIONAL_RENDERING_INVERTED_BIT_EXT specifies the condition used to determine whether to discard rendering commands or not. That is, if the 32-bit predicate read from buffer memory at offset is zero, the rendering commands are not discarded, and if non zero, then they are discarded.

```
// Provided by VK_EXT_conditional_rendering
typedef VkFlags VkConditionalRenderingFlagsEXT;
```

VkConditionalRenderingFlagsEXT is a bitmask type for setting a mask of zero or more VkConditionalRenderingFlagBitsEXT.

To end conditional rendering, call:

```
// Provided by VK_EXT_conditional_rendering
void vkCmdEndConditionalRenderingEXT(
    VkCommandBuffer                             commandBuffer);
```

- commandBuffer is the command buffer into which this command will be recorded.

Once ended, conditional rendering becomes inactive.

Valid Usage

- VUID-vkCmdEndConditionalRenderingEXT-None-01985
  Conditional rendering **must** be active
- VUID-vkCmdEndConditionalRenderingEXT-None-01986
  If conditional rendering was made active outside of a render pass instance, it **must** not be ended inside a render pass instance
- VUID-vkCmdEndConditionalRenderingEXT-None-01987
  If conditional rendering was made active within a subpass it **must** be ended in the same subpass

Valid Usage (Implicit)

- VUID-vkCmdEndConditionalRenderingEXT-commandBuffer-parameter
  commandBuffer **must** be a valid VkCommandBuffer handle

- VUID-vkCmdEndConditionalRenderingEXT-commandBuffer-recording
  `commandBuffer` **must** be in the recording state
- VUID-vkCmdEndConditionalRenderingEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support VK_QUEUE_COMPUTE_BIT, or VK_QUEUE_GRAPHICS_BIT operations
- VUID-vkCmdEndConditionalRenderingEXT-suspended
  This command **must** not be called between suspended render pass instances
- VUID-vkCmdEndConditionalRenderingEXT-videocoding
  This command **must** only be called outside of a video coding scope

Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

Command Properties

Command Buffer Levels	Render Pass Scope	Video Coding Scope	Supported Queue Types	Command Type
Primary Secondary	Both	Outside	VK_QUEUE_COMPUTE_BIT VK_QUEUE_GRAPHICS_BIT	Action State

Conditional Rendering

vkCmdEndConditionalRenderingEXT is not affected by conditional rendering

25.6. Programmable Mesh Shading

In this drawing approach, primitives are assembled by the mesh shader stage. Mesh shading operates similarly to dispatching compute as the shaders make use of workgroups.

To record a mesh tasks drawing command, call:

```
// Provided by VK_EXT_mesh_shader
void vkCmdDrawMeshTasksEXT(
    VkCommandBuffer                             commandBuffer,
    uint32_t                                    groupCountX,
    uint32_t                                    groupCountY,
    uint32_t                                    groupCountZ);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `groupCountX` is the number of local workgroups to dispatch in the X dimension.
- `groupCountY` is the number of local workgroups to dispatch in the Y dimension.
- `groupCountZ` is the number of local workgroups to dispatch in the Z dimension.

When the command is executed, a global workgroup consisting of `groupCountX` × `groupCountY` × `groupCountZ` local workgroups is assembled.

Valid Usage

- VUID-vkCmdDrawMeshTasksEXT-magFilter-04553
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawMeshTasksEXT-magFilter-09598
  If a VkSampler created with `magFilter` or `minFilter` equal to VK_FILTER_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawMeshTasksEXT-mipmapMode-04770
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR, `reductionMode` equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE, and `compareEnable` equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
- VUID-vkCmdDrawMeshTasksEXT-mipmapMode-09599
  If a VkSampler created with `mipmapMode` equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and `reductionMode` equal to either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX is used to sample a VkImageView as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT
- VUID-vkCmdDrawMeshTasksEXT-unnormalizedCoordinates-09635
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `levelCount` and

`layerCount` **must** be 1

- VUID-vkCmdDrawMeshTasksEXT-None-08609
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the image view's `viewType` **must** be VK_IMAGE_VIEW_TYPE_1D or VK_IMAGE_VIEW_TYPE_2D
- VUID-vkCmdDrawMeshTasksEXT-None-08610
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawMeshTasksEXT-None-08611
  If a VkSampler created with `unnormalizedCoordinates` equal to VK_TRUE is used to sample a VkImageView as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawMeshTasksEXT-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features **must** contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT
- VUID-vkCmdDrawMeshTasksEXT-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT
- VUID-vkCmdDrawMeshTasksEXT-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT
- VUID-vkCmdDrawMeshTasksEXT-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features **must** contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
- VUID-vkCmdDrawMeshTasksEXT-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY
- VUID-vkCmdDrawMeshTasksEXT-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubic` returned by vkGetPhysicalDeviceImageFormatProperties2
- VUID-vkCmdDrawMeshTasksEXT-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports

cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::`filterCubicMinmax` returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawMeshTasksEXT-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMeshTasksEXT-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMeshTasksEXT-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMeshTasksEXT-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT
- VUID-vkCmdDrawMeshTasksEXT-None-08600
  If a a bound shader was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in Pipeline Layout Compatibility
- VUID-vkCmdDrawMeshTasksEXT-None-08601
  If a a bound shader was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are compatible with the push constant range used to create the shader
- VUID-vkCmdDrawMeshTasksEXT-None-10068
  For each array of resources that is used by a bound shader, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawMeshTasksEXT-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, **must** be valid if they are accessed as described by descriptor validity by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMeshTasksEXT-imageLayout-00344
  If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the image layout matching rules
- VUID-vkCmdDrawMeshTasksEXT-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified

via vkCmdBindDescriptorSets, the bound VkPipeline **must** have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawMeshTasksEXT-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, **must** be valid if they are dynamically accessed
- VUID-vkCmdDrawMeshTasksEXT-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline **must** have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
- VUID-vkCmdDrawMeshTasksEXT-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, or a VkShaderEXT created with a `VkDescriptorSetLayout` that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory **must** be resident
- VUID-vkCmdDrawMeshTasksEXT-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawMeshTasksEXT-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawMeshTasksEXT-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMeshTasksEXT-None-08612
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMeshTasksEXT-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksEXT-None-08613
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawMeshTasksEXT-commandBuffer-02707
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource
- VUID-vkCmdDrawMeshTasksEXT-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types
- VUID-vkCmdDrawMeshTasksEXT-format-07753
  If a VkImageView or VkBufferView is accessed as a result of this command, then the numeric type of the view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match
- VUID-vkCmdDrawMeshTasksEXT-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawMeshTasksEXT-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components
- VUID-vkCmdDrawMeshTasksEXT-OpImageWrite-04469
  If a VkBufferView is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawMeshTasksEXT-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawMeshTasksEXT-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawMeshTasksEXT-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawMeshTasksEXT-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32

- VUID-vkCmdDrawMeshTasksEXT-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawMeshTasksEXT-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag **must** not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command
- VUID-vkCmdDrawMeshTasksEXT-None-07288
  Any shader invocation executed by this command **must** terminate
- VUID-vkCmdDrawMeshTasksEXT-None-09600
  If a descriptor with type equal to any of VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE, VK_DESCRIPTOR_TYPE_STORAGE_IMAGE, or VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawMeshTasksEXT-micromap-11636
  If an acceleration structure is accessed as a result of this command through an OpRayQueryProceedKHR operation , the VK_EXT_opacity_micromap extension is not enabled, and the acceleration structure is built using geometry with a VkAccelerationStructureTrianglesOpacityMicromapKHR structure included in its pNext chain, the shader **must** have specified a OpacityMicromapIdKHR execution mode with its specialization constant operand equal to VK_TRUE
- VUID-vkCmdDrawMeshTasksEXT-micromap-11637
  If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawMeshTasksEXT-micromap-11638
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkPipeline bound to the pipeline bind point used by this command **must** not have been created with flags that includes VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR
- VUID-vkCmdDrawMeshTasksEXT-micromap-11639
  If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an indexBuffer containing both VkOpacityMicromapSpecialIndexKHR values and indices into an associated micromap array, any VkShaderEXT that accessed the descriptor **must** not have been created with

`flags` that includes VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT

- VUID-vkCmdDrawMeshTasksEXT-None-12472
  Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawMeshTasksEXT-None-11297
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`
- VUID-vkCmdDrawMeshTasksEXT-None-11298
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`
- VUID-vkCmdDrawMeshTasksEXT-None-11299
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`
- VUID-vkCmdDrawMeshTasksEXT-None-11300
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4
- VUID-vkCmdDrawMeshTasksEXT-None-11301
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset

specified by each mapping

- VUID-vkCmdDrawMeshTasksEXT-None-11302
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawMeshTasksEXT-None-11304
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8
- VUID-vkCmdDrawMeshTasksEXT-None-11305
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid VkDeviceAddress backed by physical memory at every offset specified by each mapping
- VUID-vkCmdDrawMeshTasksEXT-None-11306
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid VkDeviceAddress
- VUID-vkCmdDrawMeshTasksEXT-None-11308
  For each descriptor heap that is statically used by a bound shader, either directly or via a descriptor mapping, a valid descriptor heap **must** be bound
- VUID-vkCmdDrawMeshTasksEXT-None-11309
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by `vkCmdBind*HeapEXT` commands
- VUID-vkCmdDrawMeshTasksEXT-None-11372
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `uniformBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMeshTasksEXT-None-11373

If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2 for `storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawMeshTasksEXT-None-11374
  If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by VkDeviceAddressRangeKHR when the descriptor was written
- VUID-vkCmdDrawMeshTasksEXT-pBindInfo-11375
  If any bound shader uses an embedded sampler via a descriptor mapping, the value of `pBindInfo->reservedRangeSize` set for vkCmdBindSamplerHeapEXT **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`
- VUID-vkCmdDrawMeshTasksEXT-None-11376
  If a bound shader was created as a VkShaderEXT with the VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT flag or as part of a pipeline with the VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT
- VUID-vkCmdDrawMeshTasksEXT-None-11398
  If a bound shader was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds
- VUID-vkCmdDrawMeshTasksEXT-None-11437
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set
- VUID-vkCmdDrawMeshTasksEXT-None-11438
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT,

VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT usage flag set

- VUID-vkCmdDrawMeshTasksEXT-None-11441
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`
- VUID-vkCmdDrawMeshTasksEXT-None-11439
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the VK_BUFFER_USAGE_STORAGE_BUFFER_BIT usage flag set
- VUID-vkCmdDrawMeshTasksEXT-None-11442
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`
- VUID-vkCmdDrawMeshTasksEXT-None-11485
  If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a VkAccelerationStructureKHR object via vkGetAccelerationStructureDeviceAddressKHR
- VUID-vkCmdDrawMeshTasksEXT-index-11450
  If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by VkSamplerCustomBorderColorIndexCreateInfoEXT, the value of VkSamplerCustomBorderColorIndexCreateInfoEXT::`index` **must** have been registered before this command was recorded, and still be registered during the sampling operation,

with an identically defined color

- VUID-vkCmdDrawMeshTasksEXT-protectedNoFault-11455
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT, VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT, or VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawMeshTasksEXT-protectedNoFault-11456
  If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT or VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK_BUFFER_CREATE_PROTECTED_BIT create flag set
- VUID-vkCmdDrawMeshTasksEXT-renderPass-02684
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawMeshTasksEXT-subpass-02685
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to VK_PIPELINE_BIND_POINT_GRAPHICS
- VUID-vkCmdDrawMeshTasksEXT-OpTypeImage-07468
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawMeshTasksEXT-None-07469
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound VkFramebuffer as specified by Fragment Input Attachment Compatibility
- VUID-vkCmdDrawMeshTasksEXT-pDepthInputAttachmentIndex-09595
  Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by VkRenderingInputAttachmentIndexInfo, or no `InputAttachmentIndex` if VkRenderingInputAttachmentIndexInfo::`pDepthInputAttachmentIndex` or VkRenderingInputAttachmentIndexInfo::`pStencilInputAttachmentIndex` are `NULL`, **must** be created with a VkImageView that is compatible with the corresponding color, depth, or stencil attachment in VkRenderingInfo
- VUID-vkCmdDrawMeshTasksEXT-pDepthInputAttachmentIndex-09596
  Input attachment views accessed in a dynamic render pass via a shader object **must** have

an InputAttachmentIndex if both VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex and VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex are non-NULL

- VUID-vkCmdDrawMeshTasksEXT-InputAttachmentIndex-09597
  If an input attachment view accessed in a dynamic render pass via a shader object has an InputAttachmentIndex, the InputAttachmentIndex **must** match an index in VkRenderingInputAttachmentIndexInfo
- VUID-vkCmdDrawMeshTasksEXT-None-06537
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawMeshTasksEXT-None-10795
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMeshTasksEXT-None-10796
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMeshTasksEXT-None-10797
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMeshTasksEXT-None-12338
  If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_COLOR_BIT on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawMeshTasksEXT-None-12339
  If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_DEPTH_BIT on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawMeshTasksEXT-None-12340
  If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and feedback loop is not enabled for VK_IMAGE_ASPECT_STENCIL_BIT on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawMeshTasksEXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawMeshTasksEXT-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes **must** be disabled
- VUID-vkCmdDrawMeshTasksEXT-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops **must** be VK_STENCIL_OP_KEEP
- VUID-vkCmdDrawMeshTasksEXT-None-07831
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07832
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-08617
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the effective rasterization input topology is in the line topology class, then vkCmdSetLineWidth **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07834
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthBiasEnable` is VK_TRUE, then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07835
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and an active color attachment current value of `blendEnable` is VK_TRUE with a blend equations where any VkBlendFactor member is VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, then vkCmdSetBlendConstants **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07836
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of

depthBoundsTestEnable is VK_TRUE, then vkCmdSetDepthBounds **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07837
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilCompareMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07838
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilWriteMask **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07839
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled, the current value of and rasterizerDiscardEnable is VK_FALSE, the current value of stencilTestEnable is VK_TRUE, then vkCmdSetStencilReference **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex
- VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE, then the active depth attachment **must** have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set
- VUID-vkCmdDrawMeshTasksEXT-None-07634
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetSampleLocationsEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-06666
  If the VK_EXT_sample_locations extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of sampleLocationsEnable is

VK_TRUE, then vkCmdSetSampleLocationsEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07840
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetCullMode **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07841
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetFrontFace **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07843
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, vkCmdSetDepthTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07844
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthWriteEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07845
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `depthTestEnable` is VK_TRUE, then vkCmdSetDepthCompareOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07846
  If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBoundsTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07847
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then

vkCmdSetStencilTestEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07848
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, the current value of `stencilTestEnable` is VK_TRUE, then vkCmdSetStencilOp **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-viewportCount-03417
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-scissorCount-03418
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing
- VUID-vkCmdDrawMeshTasksEXT-viewportCount-03419
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawMeshTasksEXT-None-04876
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-04877
  If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled, and the current value of `rasterizerDiscardEnable` is VK_FALSE, then vkCmdSetDepthBiasEnable **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-logicOp-04878
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, the current value of `rasterizerDiscardEnable` is VK_FALSE, and the current value of `logicOpEnable` is VK_TRUE, then vkCmdSetLogicOpEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the

bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount **must** be 1

- VUID-vkCmdDrawMeshTasksEXT-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, and any shader object bound to a graphics stage writes to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount **must** have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount **must** be 1
- VUID-vkCmdDrawMeshTasksEXT-blendEnable-04727
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then for each color attachment, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding current value of blendEnable **must** be VK_FALSE
- VUID-vkCmdDrawMeshTasksEXT-None-08644
  If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of rasterizerDiscardEnable is VK_FALSE, and none of the following is enabled:
  - the multisampledRenderToSingleSampled feature

  then the current value of rasterizationSamples **must** be the same as the current color and/or depth/stencil attachments
- VUID-vkCmdDrawMeshTasksEXT-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with vkCmdBeginRendering
- VUID-vkCmdDrawMeshTasksEXT-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::viewMask equal to VkRenderingInfo::viewMask
- VUID-vkCmdDrawMeshTasksEXT-colorAttachmentCount-06179
  If the dynamicRenderingUnusedAttachments feature is not enabled and the current render pass instance was begun with vkCmdBeginRendering, the bound graphics pipeline **must** have been created with a VkPipelineRenderingCreateInfo::colorAttachmentCount equal to VkRenderingInfo::colorAttachmentCount
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08910
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo

::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline

- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08912
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView equal to VK_NULL_HANDLE **must** have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound pipeline equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08911
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with an imageView not equal to VK_NULL_HANDLE **must** have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo ::pColorAttachmentFormats, if it exists, **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMeshTasksEXT-None-07749
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetColorWriteEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-attachmentCount-07750
  If the colorWriteEnable feature is enabled, a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled, and the current value of rasterizerDiscardEnable is VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawMeshTasksEXT-None-07751
  If the VK_EXT_discard_rectangles extension is enabled, a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo included a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT ::discardRectangleCount

- VUID-vkCmdDrawMeshTasksEXT-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled and the pNext chain of VkGraphicsPipelineCreateInfo did not include a VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT ::maxDiscardRectangles
- VUID-vkCmdDrawMeshTasksEXT-None-07880
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK_FALSE, and the current value of discardRectangleEnable is VK_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format **must** be VK_FORMAT_UNDEFINED
- VUID-vkCmdDrawMeshTasksEXT-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR
- VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingLocalRead-11797
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingLocalRead feature is enabled, the VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR flag is specified, and an attachment is being used as a feedback loop as specified by VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR, VkRenderingAttachmentFlagsInfoKHR::flags for that attachment **must** include VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR
- VUID-vkCmdDrawMeshTasksEXT-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the bound graphics pipeline **must** have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT
- VUID-vkCmdDrawMeshTasksEXT-multisampledRenderToSingleSampled-07285
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of

the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE **must** have been created with a sample count equal to the value of rasterizationSamples for the bound graphics pipeline

- VUID-vkCmdDrawMeshTasksEXT-multisampledRenderToSingleSampled-07286
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
- VUID-vkCmdDrawMeshTasksEXT-multisampledRenderToSingleSampled-07287
  If the multisampledRenderToSingleSampled feature is not enabled, and vkCmdBeginCustomResolveEXT has not yet been recorded in the render pass instance, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the bound graphics pipeline **must** be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView
- VUID-vkCmdDrawMeshTasksEXT-pNext-07935
