The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT`

operations

- VUID-vkCmdFillBuffer-renderpass

This command **must** only be called outside of a render pass instance

- VUID-vkCmdFillBuffer-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdFillBuffer-videocoding

This command **must** only be called outside of a video coding scope

- VUID-vkCmdFillBuffer-commonparent

Both of **commandBuffer**, and **dstBuffer** **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

vkCmdFillBuffer is not affected by **conditional rendering**

## 23.7. Updating Buffers

To update buffer data inline in a command buffer, call:

```
// Provided by VK_VERSION_1_0
void vkCmdUpdateBuffer(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 dstBuffer,
    VkDeviceSize             dstOffset,
    VkDeviceSize             dataSize,
    const void*              pData);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **dstBuffer** is a handle to the buffer to be updated.
- **dstOffset** is the byte offset into the buffer to start updating, and **must** be a multiple of 4.
- **dataSize** is the number of bytes to update, and **must** be a multiple of 4.
- **pData** is a pointer to the source data for the buffer update, and **must** be at least **dataSize** bytes in size.

**dataSize** **must** be less than or equal to 65536 bytes. For larger updates, applications **can** use buffer to buffer **copies**.

#### NOTE

Buffer updates performed with **vkCmdUpdateBuffer** first copy the data into command buffer memory when the command is recorded (which requires additional storage and may incur an additional allocation), and then copy the data from the command buffer into **dstBuffer** when the command is executed on a device.

The additional cost of this functionality compared to **buffer to buffer copies** means it should only be used for very small amounts of data, and is why it is limited to at most 65536 bytes. Applications **can** work around this restriction by issuing multiple **vkCmdUpdateBuffer** commands to different ranges of the same buffer, but doing so is not recommended.

The source data is copied from **pData** to the command buffer when the command is called.

**vkCmdUpdateBuffer** is only allowed outside of a render pass. This command is treated as a “transfer” operation for the purposes of synchronization barriers. The **VK\_BUFFER\_USAGE\_TRANSFER\_DST\_BIT** **must** be specified in **usage** of **VkBufferCreateInfo** in order for the buffer to be compatible with **vkCmdUpdateBuffer**.

### Valid Usage

- VUID-vkCmdUpdateBuffer-dstOffset-00032  
**dstOffset** **must** be less than the size of **dstBuffer**
- VUID-vkCmdUpdateBuffer-dataSize-00033  
**dataSize** **must** be less than or equal to the size of **dstBuffer** minus **dstOffset**
- VUID-vkCmdUpdateBuffer-dstBuffer-00034  
**dstBuffer** **must** have been created with the **VK\_BUFFER\_USAGE\_TRANSFER\_DST\_BIT** usage flag set

- VUID-vkCmdUpdateBuffer-dstBuffer-00035  
If **dstBuffer** is non-sparse then it **must** be bound completely and contiguously to a single **VkDeviceMemory** object
- VUID-vkCmdUpdateBuffer-dstOffset-00036  
**dstOffset** **must** be a multiple of 4
- VUID-vkCmdUpdateBuffer-dataSize-00037  
**dataSize** **must** be less than or equal to 65536
- VUID-vkCmdUpdateBuffer-dataSize-00038  
**dataSize** **must** be a multiple of 4
- VUID-vkCmdUpdateBuffer-commandBuffer-01813  
If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported, **dstBuffer** **must** not be a protected buffer
- VUID-vkCmdUpdateBuffer-commandBuffer-01814  
If **commandBuffer** is a protected command buffer and **protectedNoFault** is not supported, **dstBuffer** **must** not be an unprotected buffer

### Valid Usage (Implicit)

- VUID-vkCmdUpdateBuffer-commandBuffer-parameter  
**commandBuffer** **must** be a valid **VkCommandBuffer** handle
- VUID-vkCmdUpdateBuffer-dstBuffer-parameter  
**dstBuffer** **must** be a valid **VkBuffer** handle
- VUID-vkCmdUpdateBuffer-pData-parameter  
**pData** **must** be a valid pointer to an array of **dataSize** bytes
- VUID-vkCmdUpdateBuffer-commandBuffer-recording  
**commandBuffer** **must** be in the **recording state**
- VUID-vkCmdUpdateBuffer-commandBuffer-cmdpool  
The **VkCommandPool** that **commandBuffer** was allocated from **must** support **VK\_QUEUE\_COMPUTE\_BIT**, **VK\_QUEUE\_GRAPHICS\_BIT**, or **VK\_QUEUE\_TRANSFER\_BIT** operations
- VUID-vkCmdUpdateBuffer-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdUpdateBuffer-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdUpdateBuffer-encoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdUpdateBuffer-dataSize-arraylength  
**dataSize** **must** be greater than 0
- VUID-vkCmdUpdateBuffer-commonparent  
Both of **commandBuffer**, and **dstBuffer** **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdUpdateBuffer` is not affected by [conditional rendering](#)

### NOTE

The `pData` parameter was of type `uint32_t*` instead of `void*` prior to version 1.0.19 of the Specification and [VK\\_HEADER\\_VERSION 19](#) of the [Vulkan Header Files](#). This was a historical anomaly, as the source data may be of other types.

# Chapter 24. Copy Commands

An application **can** copy buffer and image data using several methods described in this chapter, depending on the type of data transfer.

All copy commands are treated as “transfer” operations for the purposes of synchronization barriers.

All copy commands that have a source format with an X component in its format description read undefined values from those bits.

All copy commands that have a destination format with an X component in its format description write undefined values to those bits.

## 24.1. Copying Data Between Memory Ranges

To copy data between memory ranges, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdCopyMemoryKHR(
    VkCommandBuffer                      commandBuffer,
    const VkCopyDeviceMemoryInfoKHR*    pCopyMemoryInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pCopyMemoryInfo` a pointer to a [VkCopyDeviceMemoryInfoKHR](#) structure describing the copies to perform.

### Valid Usage

- VUID-vkCmdCopyMemoryKHR-commandBuffer-13012  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, the `srcCopyFlags` member of all elements of `pCopyMemoryInfo->pRegions` **must** not include [VK\\_ADDRESS\\_COMMAND\\_PROTECTED\\_BIT\\_KHR](#)
- VUID-vkCmdCopyMemoryKHR-commandBuffer-13013  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, the `dstCopyFlags` member of all elements of `pCopyMemoryInfo->pRegions` **must** not include [VK\\_ADDRESS\\_COMMAND\\_PROTECTED\\_BIT\\_KHR](#)
- VUID-vkCmdCopyMemoryKHR-commandBuffer-13014  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, the `dstCopyFlags` member of all elements of `pCopyMemoryInfo->pRegions` **must** include [VK\\_ADDRESS\\_COMMAND\\_PROTECTED\\_BIT\\_KHR](#)

## Valid Usage (Implicit)

- VUID-vkCmdCopyMemoryKHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyMemoryKHR-pCopyMemoryInfo-parameter  
If `pCopyMemoryInfo` is not `NULL`, `pCopyMemoryInfo` **must** be a valid pointer to a valid `VkCopyDeviceMemoryInfoKHR` structure
- VUID-vkCmdCopyMemoryKHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdCopyMemoryKHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_TRANSFER_BIT` operations
- VUID-vkCmdCopyMemoryKHR-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyMemoryKHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyMemoryKHR-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyMemoryKHR` is not affected by [conditional rendering](#)

The `VkCopyDeviceMemoryInfoKHR` structure is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkCopyDeviceMemoryInfoKHR {
    VkStructureType      sType;
    const void*          pNext;
    uint32_t             regionCount;
    const VkDeviceMemoryCopyKHR* pRegions;
} VkCopyDeviceMemoryInfoKHR;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **regionCount** is the number of copies to be performed.
- **pRegions** is a pointer to an array of [VkDeviceMemoryCopyKHR](#) structures describing individual copy operations between two memory ranges.

### Valid Usage

- VUID-VkCopyDeviceMemoryInfoKHR-srcRange-13015  
The range of memory backing the address range defined by the **srcRange** member of any element of **pRegions** **must** not overlap the memory backing the address range defined by the **srcRange** or **dstRange** of any element of **pRegions**

### Valid Usage (Implicit)

- VUID-VkCopyDeviceMemoryInfoKHR-sType-sType  
**sType** **must** be [VK\\_STRUCTURE\\_TYPE\\_COPY\\_DEVICE\\_MEMORY\\_INFO\\_KHR](#)
- VUID-VkCopyDeviceMemoryInfoKHR-pNext-pNext  
**pNext** **must** be **NULL**
- VUID-VkCopyDeviceMemoryInfoKHR-pRegions-parameter  
**pRegions** **must** be a valid pointer to an array of **regionCount** valid [VkDeviceMemoryCopyKHR](#) structures
- VUID-VkCopyDeviceMemoryInfoKHR-regionCount-arraylength  
**regionCount** **must** be greater than 0

The [VkDeviceMemoryCopyKHR](#) structure is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkDeviceMemoryCopyKHR {
    VkStructureType      sType;
    const void*          pNext;
    VkDeviceAddressRangeKHR srcRange;
    VkAddressCommandFlagsKHR srcFlags;
    VkDeviceAddressRangeKHR dstRange;
    VkAddressCommandFlagsKHR dstFlags;
} VkDeviceMemoryCopyKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcRange` is a `VkDeviceAddressRangeKHR` structure defining the source memory to copy from.
- `srcFlags` is a `VkAddressCommandFlagsKHR` value defining the copy flags for the source address range.
- `dstRange` is a `VkDeviceAddressRangeKHR` structure defining the destination memory to copy to.
- `dstFlags` is a `VkAddressCommandFlagsKHR` value defining the copy flags for the destination address range.

This structure defines a copy operation where `srcRange.size` bytes will be copied from `srcRange.address` to `dstRange.address`.

## Valid Usage

- VUID-VkDeviceMemoryCopyKHR-srcRange-13097  
If the range specified by `srcRange` is not bound completely to memory when accessed, `srcFlags` **must** not include `VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR`
- VUID-VkDeviceMemoryCopyKHR-srcRange-13098  
If the buffer from which the range specified by `srcRange` was created with `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `srcFlags` **must** include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkDeviceMemoryCopyKHR-srcRange-13099  
If the buffer from which the range specified by `srcRange` was created without `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `srcFlags` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkDeviceMemoryCopyKHR-srcFlags-13100  

|                                                                      |             |     |         |      |
|----------------------------------------------------------------------|-------------|-----|---------|------|
| <code>srcFlags</code>                                                | <b>must</b> | not | include | both |
| <code>VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR</code>         |             |     |         | and  |
| <code>VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR</code> |             |     |         |      |
- VUID-VkDeviceMemoryCopyKHR-srcRange-13122  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `srcRange`, was created with `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `srcFlags` **must** include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` or

## VK\_ADDRESS\_COMMAND\_UNKNOWN\_STORAGE\_BUFFER\_USAGE\_BIT\_KHR

- VUID-VkDeviceMemoryCopyKHR-srcRange-13123

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `srcRange`, was created without `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `srcFlags` **must** not include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-srcFlags-13101

`srcFlags` **must** not include both `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-srcRange-13124

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `srcRange`, was created with `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `srcFlags` **must** include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-srcRange-13125

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `srcRange`, was created without `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `srcFlags` **must** not include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13097

If the range specified by `dstRange` is not bound completely to memory when accessed, `dstFlags` **must** not include `VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13098

If the buffer from which the range specified by `dstRange` was created with `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `dstFlags` **must** include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13099

If the buffer from which the range specified by `dstRange` was created without `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `dstFlags` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstFlags-13100

`dstFlags` **must** not include both `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13122

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `dstRange`, was created with `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `dstFlags` **must** include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13123

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `dstRange`, was created without `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `dstFlags` **must** not include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstFlags-13101

`dstFlags` **must** not include both `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13124

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `dstRange`, was created with `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `dstFlags` **must** include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13125

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `dstRange`, was created without `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `dstFlags` **must** not include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDeviceMemoryCopyKHR-size-13016

The `size` member of `dstRange` **must** be greater than or equal to the `size` member of `srcRange`

- VUID-VkDeviceMemoryCopyKHR-srcRange-13017

The buffer from which `srcRange` was queried **must** have been created with `VK_BUFFER_USAGE_TRANSFER_SRC_BIT`

- VUID-VkDeviceMemoryCopyKHR-dstRange-13018

The buffer from which `dstRange` was queried **must** have been created with `VK_BUFFER_USAGE_TRANSFER_DST_BIT`

## Valid Usage (Implicit)

- VUID-VkDeviceMemoryCopyKHR-sType-sType

`sType` **must** be `VK_STRUCTURE_TYPE_DEVICE_MEMORY_COPY_KHR`

- VUID-VkDeviceMemoryCopyKHR-pNext-pNext

`pNext` **must** be `NULL`

- VUID-VkDeviceMemoryCopyKHR-srcFlags-parameter

If `srcFlags` is not `0`, `srcFlags` **must** be a valid combination of `VkAddressCommandFlagBitsKHR` values

- VUID-VkDeviceMemoryCopyKHR-dstFlags-parameter

If `dstFlags` is not `0`, `dstFlags` **must** be a valid combination of `VkAddressCommandFlagBitsKHR` values

## 24.2. Copying Data Between Buffers

To copy data between buffer objects, call:

```
// Provided by VK_VERSION_1_0
void vkCmdCopyBuffer(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 srcBuffer,
    VkBuffer                 dstBuffer,
    uint32_t                regionCount,
    const VkBufferCopy*      pRegions);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `srcBuffer` is the source buffer.
- `dstBuffer` is the destination buffer.
- `regionCount` is the number of regions to copy.
- `pRegions` is a pointer to an array of `VkBufferCopy` structures specifying the regions to copy.

Each source region specified by `pRegions` is copied from the source buffer to the destination region of the destination buffer.

### Valid Usage

- VUID-vkCmdCopyBuffer-commandBuffer-01822  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcBuffer` **must** not be a protected buffer
- VUID-vkCmdCopyBuffer-commandBuffer-01823  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstBuffer` **must** not be a protected buffer
- VUID-vkCmdCopyBuffer-commandBuffer-01824  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstBuffer` **must** not be an unprotected buffer
- VUID-vkCmdCopyBuffer-srcOffset-00113  
The `srcOffset` member of each element of `pRegions` **must** be less than the size of `srcBuffer`
- VUID-vkCmdCopyBuffer-dstOffset-00114  
The `dstOffset` member of each element of `pRegions` **must** be less than the size of `dstBuffer`
- VUID-vkCmdCopyBuffer-size-00115  
The `size` member of each element of `pRegions` **must** be less than or equal to the size of `srcBuffer` minus `srcOffset`
- VUID-vkCmdCopyBuffer-size-00116  
The `size` member of each element of `pRegions` **must** be less than or equal to the size of `dstBuffer` minus `dstOffset`

- VUID-vkCmdCopyBuffer-pRegions-00117  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region
- VUID-vkCmdCopyBuffer-pRegions-12482  
Each memory location accessed by this command **must** not be accessed by more than one destination region
- VUID-vkCmdCopyBuffer-srcBuffer-00118  
`srcBuffer` **must** have been created with the `VK_BUFFER_USAGE_TRANSFER_SRC_BIT` usage flag set
- VUID-vkCmdCopyBuffer-srcBuffer-00119  
If `srcBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdCopyBuffer-dstBuffer-00120  
`dstBuffer` **must** have been created with the `VK_BUFFER_USAGE_TRANSFER_DST_BIT` usage flag set
- VUID-vkCmdCopyBuffer-dstBuffer-00121  
If `dstBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object

### Valid Usage (Implicit)

- VUID-vkCmdCopyBuffer-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyBuffer-srcBuffer-parameter  
`srcBuffer` **must** be a valid `VkBuffer` handle
- VUID-vkCmdCopyBuffer-dstBuffer-parameter  
`dstBuffer` **must** be a valid `VkBuffer` handle
- VUID-vkCmdCopyBuffer-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkBufferCopy` structures
- VUID-vkCmdCopyBuffer-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdCopyBuffer-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations
- VUID-vkCmdCopyBuffer-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyBuffer-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyBuffer-vidcoding  
This command **must** only be called outside of a video coding scope

- VUID-vkCmdCopyBuffer-regionCount-arraylength  
`regionCount` **must** be greater than 0
- VUID-vkCmdCopyBuffer-commonparent  
Each of `commandBuffer`, `dstBuffer`, and `srcBuffer` **must** have been created, allocated, or retrieved from the same `VkDevice`

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyBuffer` is not affected by [conditional rendering](#)

The `VkBufferCopy` structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkBufferCopy {
    VkDeviceSize    srcOffset;
    VkDeviceSize    dstOffset;
    VkDeviceSize    size;
} VkBufferCopy;
```

- `srcOffset` is the starting offset in bytes from the start of `srcBuffer`.
- `dstOffset` is the starting offset in bytes from the start of `dstBuffer`.
- `size` is the number of bytes to copy.

## Valid Usage

- VUID-VkBufferCopy-size-01988  
The **size** must be greater than 0

A more extensible version of the copy buffer command is defined below.

To copy data between buffer objects, call:

```
// Provided by VK_VERSION_1_3
void vkCmdCopyBuffer2(
    VkCommandBuffer                      commandBuffer,
    const VkCopyBufferInfo2*            pCopyBufferInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdCopyBuffer2
void vkCmdCopyBuffer2KHR(
    VkCommandBuffer                      commandBuffer,
    const VkCopyBufferInfo2*            pCopyBufferInfo);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **pCopyBufferInfo** is a pointer to a [VkCopyBufferInfo2](#) structure describing the copy parameters.

Each source region specified by **pCopyBufferInfo->pRegions** is copied from the source buffer to the destination region of the destination buffer.

## Valid Usage

- VUID-vkCmdCopyBuffer2-commandBuffer-01822  
If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported, **srcBuffer** must not be a protected buffer
- VUID-vkCmdCopyBuffer2-commandBuffer-01823  
If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported, **dstBuffer** must not be a protected buffer
- VUID-vkCmdCopyBuffer2-commandBuffer-01824  
If **commandBuffer** is a protected command buffer and **protectedNoFault** is not supported, **dstBuffer** must not be an unprotected buffer

## Valid Usage (Implicit)

- VUID-vkCmdCopyBuffer2-commandBuffer-parameter  
**commandBuffer** must be a valid [VkCommandBuffer](#) handle
- VUID-vkCmdCopyBuffer2-pCopyBufferInfo-parameter

`pCopyBufferInfo` **must** be a valid pointer to a valid `VkCopyBufferInfo2` structure

- VUID-vkCmdCopyBuffer2-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdCopyBuffer2-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations
- VUID-vkCmdCopyBuffer2-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyBuffer2-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyBuffer2-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyBuffer2` is not affected by `conditional rendering`

The `VkCopyBufferInfo2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkCopyBufferInfo2 {
    VkStructureType    sType;
    const void*        pNext;
    VkBuffer            srcBuffer;
    VkBuffer            dstBuffer;
    uint32_t           regionCount;
    const VkBufferCopy2* pRegions;
} VkCopyBufferInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkCopyBufferInfo2
typedef VkCopyBufferInfo2 VkCopyBufferInfo2KHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcBuffer` is the source buffer.
- `dstBuffer` is the destination buffer.
- `regionCount` is the number of regions to copy.
- `pRegions` is a pointer to an array of `VkBufferCopy2` structures specifying the regions to copy.

## Valid Usage

- VUID-VkCopyBufferInfo2-srcOffset-00113  
The `srcOffset` member of each element of `pRegions` **must** be less than the size of `srcBuffer`
- VUID-VkCopyBufferInfo2-dstOffset-00114  
The `dstOffset` member of each element of `pRegions` **must** be less than the size of `dstBuffer`
- VUID-VkCopyBufferInfo2-size-00115  
The `size` member of each element of `pRegions` **must** be less than or equal to the size of `srcBuffer` minus `srcOffset`
- VUID-VkCopyBufferInfo2-size-00116  
The `size` member of each element of `pRegions` **must** be less than or equal to the size of `dstBuffer` minus `dstOffset`
- VUID-VkCopyBufferInfo2-pRegions-00117  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region
- VUID-VkCopyBufferInfo2-pRegions-12482  
Each memory location accessed by this command **must** not be accessed by more than one destination region
- VUID-VkCopyBufferInfo2-srcBuffer-00118  
`srcBuffer` **must** have been created with the `VK_BUFFER_USAGE_TRANSFER_SRC_BIT` usage flag set

- VUID-VkCopyBufferInfo2-srcBuffer-00119  
If `srcBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkCopyBufferInfo2-dstBuffer-00120  
`dstBuffer` **must** have been created with the `VK_BUFFER_USAGE_TRANSFER_DST_BIT` usage flag set
- VUID-VkCopyBufferInfo2-dstBuffer-00121  
If `dstBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object

### Valid Usage (Implicit)

- VUID-VkCopyBufferInfo2-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_COPY_BUFFER_INFO_2`
- VUID-VkCopyBufferInfo2-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkCopyBufferInfo2-srcBuffer-parameter  
`srcBuffer` **must** be a valid `VkBuffer` handle
- VUID-VkCopyBufferInfo2-dstBuffer-parameter  
`dstBuffer` **must** be a valid `VkBuffer` handle
- VUID-VkCopyBufferInfo2-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkBufferCopy2` structures
- VUID-VkCopyBufferInfo2-regionCount-arraylength  
`regionCount` **must** be greater than 0
- VUID-VkCopyBufferInfo2-commonparent  
Both of `dstBuffer`, and `srcBuffer` **must** have been created, allocated, or retrieved from the same `VkDevice`

The `VkBufferCopy2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkBufferCopy2 {
    VkStructureType    sType;
    const void*        pNext;
    VkDeviceSize        srcOffset;
    VkDeviceSize        dstOffset;
    VkDeviceSize        size;
} VkBufferCopy2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkBufferCopy2
typedef VkBufferCopy2 VkBufferCopy2KHR;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **srcOffset** is the starting offset in bytes from the start of **srcBuffer**.
- **dstOffset** is the starting offset in bytes from the start of **dstBuffer**.
- **size** is the number of bytes to copy.

### Valid Usage

- VUID-VkBufferCopy2-size-01988  
The **size** **must** be greater than **0**

### Valid Usage (Implicit)

- VUID-VkBufferCopy2-sType-sType  
**sType** **must** be [VK\\_STRUCTURE\\_TYPE\\_BUFFER\\_COPY\\_2](#)
- VUID-VkBufferCopy2-pNext-pNext  
**pNext** **must** be **NULL**

## 24.3. Copying Data Between Images

To copy data between image objects, call:

```
// Provided by VK_VERSION_1_0
void vkCmdCopyImage(
    VkCommandBuffer          commandBuffer,
    VkImage                  srcImage,
    VkImageLayout            srcImageLayout,
    VkImage                  dstImage,
    VkImageLayout            dstImageLayout,
    uint32_t                 regionCount,
    const VkImageCopy*       pRegions);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **srcImage** is the source image.
- **srcImageLayout** is the current layout of the source image subresource.
- **dstImage** is the destination image.

- `dstImageLayout` is the current layout of the destination image subresource.
- `regionCount` is the number of regions to copy.
- `pRegions` is a pointer to an array of `VkImageCopy` structures specifying the regions to copy.

Each source region specified by `pRegions` is copied from the source image to the destination region of the destination image.

If any region accesses a depth aspect in `dstImage` and the `VK_EXT_depth_range_unrestricted` extension is not enabled, values copied from `srcImage` outside of the range [0,1] will be written as undefined values to the destination image.

Copy regions for each image **must** be aligned to a multiple of the texel block extent in each dimension, except at the edges of the image, where region extents **must** match the edge of the image.

The texels in the images are accessed as follows.

Texels at each coordinate (x,y,z,layer) in a image subresource are accessed, where:

x is in the range [offset.x, offset.x + extent.width),

y is in the range [offset.y, offset.y + extent.height),

z is in the range [offset.z, offset.z + extent.depth),

layer is in the range [subresource.baseArrayLayer, subresource.baseArrayLayer + subresource.layerCount)

where for `srcImage`, `offset`, `extent`, and `subresource` are `srcOffset`, `extent`, and `srcSubresource` for each region, respectively.

For `dstImage`, `offset`, `extent`, and `subresource` are `dstOffset`, `extent`, and `dstSubresource` for each region, respectively, where `dstOffset` and `extent` are first `size-adjusted` if the format of the destination image has a different `block extent` than the format of the source image (e.g. one is a compressed format).

**Multi-planar images** **can** only be copied on a per-plane basis, and the subresources used in each region when copying to or from such images **must** specify only one plane, though different regions **can** specify different planes. When copying planes of multi-planar images, the format considered is the `compatible format for that plane`, rather than the format of the multi-planar image.

Image data **can** be copied between images with different image types. If one image is `VK_IMAGE_TYPE_3D` and the other image is `VK_IMAGE_TYPE_2D` with multiple layers, then each slice is copied to or from a different layer; `depth` slices in the 3D image correspond to `layerCount` layers in the 2D image, with an effective `depth` of 1 used for the 2D image. If the `maintenance5` feature

is enabled, all other combinations are allowed and function as if 1D images are 2D images with a height of 1. Otherwise, other combinations of image types are disallowed.

The memory locations accessed by the source and destination images overlap if they [alias each other](#), both [srcSubresource](#) and [dstSubresource](#) overlap the aliased range, and any of the following are true:

- Their contents are not able to be interpreted in consistent ways
- If the aliased regions are *host-accessible*, their accessed regions defined above overlap, where the memory locations accessed by the texels of a [linear image](#) is according to its [VkSubresourceLayout](#)
- Otherwise, their accessed texel ranges share any of the same texel coordinates

The memory locations of an image overlap if those two ranges share any of the same texel coordinates in the same image aspects.

### Valid Usage

- VUID-vkCmdCopyImage-commandBuffer-01825  
If [commandBuffer](#) is an unprotected command buffer and [protectedNoFault](#) is not supported, [srcImage](#) **must** not be a protected image
- VUID-vkCmdCopyImage-commandBuffer-01826  
If [commandBuffer](#) is an unprotected command buffer and [protectedNoFault](#) is not supported, [dstImage](#) **must** not be a protected image
- VUID-vkCmdCopyImage-commandBuffer-01827  
If [commandBuffer](#) is a protected command buffer and [protectedNoFault](#) is not supported, [dstImage](#) **must** not be an unprotected image
- VUID-vkCmdCopyImage-commandBuffer-10217  
If the queue family used to create the [VkCommandPool](#) which [commandBuffer](#) was allocated from does not support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#), and the [maintenance10](#) feature is not enabled, for each element of [pRegions](#), where the [aspectMask](#) member of [srcSubresource](#) is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), the [aspectMask](#) of [dstSubresource](#) **must** not be [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)
- VUID-vkCmdCopyImage-commandBuffer-11782  
If the queue family used to create the [VkCommandPool](#) which [commandBuffer](#) was allocated from does not support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) but does support [VK\\_QUEUE\\_COMPUTE\\_BIT](#), and in any element of [pRegions](#) the [aspectMask](#) member of [srcSubresource](#) is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) and the [aspectMask](#) of [dstSubresource](#) is [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#), then the [format features](#) of [dstImage](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_DEPTH\\_COPY\\_ON\\_COMPUTE\\_QUEUE\\_BIT\\_KHR](#)
- VUID-vkCmdCopyImage-commandBuffer-11783  
If the queue family used to create the [VkCommandPool](#) which [commandBuffer](#) was allocated from does not support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) and [VK\\_QUEUE\\_COMPUTE\\_BIT](#), but does support [VK\\_QUEUE\\_TRANSFER\\_BIT](#), and in any element of [pRegions](#) the [aspectMask](#) member of [srcSubresource](#) is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) and the [aspectMask](#) of

`dstSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the format features of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage-commandBuffer-11784

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pRegions` the `aspectMask` member of `srcSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `dstSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage-commandBuffer-11785

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pRegions` the `aspectMask` member of `srcSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `dstSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage-commandBuffer-12449

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `srcSubresource.aspectMask` or `dstSubresource.aspectMask` of any element of `pRegions` contain `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`, then both `srcImage` and `dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`

- VUID-vkCmdCopyImage-commandBuffer-10218

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, and the `maintenance10` feature is not enabled, for each element of `pRegions`, where the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` then the `aspectMask` of `srcSubresource` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`

- VUID-vkCmdCopyImage-commandBuffer-11786

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage-commandBuffer-11787

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage-commandBuffer-11788

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support

VK\_QUEUE\_COMPUTE\_BIT, and in any element of `pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage-commandBuffer-11789

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage-pRegions-00124

Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified by `pRegions` and accessed according to [Copy Image Addressing](#)

- VUID-vkCmdCopyImage-pRegions-12484

Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by `pRegions` and accessed according to [Copy Image Addressing](#)

- VUID-vkCmdCopyImage-srcImage-01995

The format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_SRC_BIT`

- VUID-vkCmdCopyImage-srcImageLayout-00128

`srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`

- VUID-vkCmdCopyImage-srcImageLayout-01917

`srcImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL`, or `VK_IMAGE_LAYOUT_GENERAL`

- VUID-vkCmdCopyImage-srcImage-09460

If `srcImage` and `dstImage` are the same, and any elements of `pRegions` contains the `srcSubresource` and `dstSubresource` with matching `mipLevel` and overlapping array layers, then the `srcImageLayout` and `dstImageLayout` **must** be `VK_IMAGE_LAYOUT_GENERAL` or `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`

- VUID-vkCmdCopyImage-dstImage-01996

The format features of `dstImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_DST_BIT`

- VUID-vkCmdCopyImage-dstImageLayout-00133

`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`

- VUID-vkCmdCopyImage-dstImageLayout-01395

`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL`, or `VK_IMAGE_LAYOUT_GENERAL`

- VUID-vkCmdCopyImage-srcImage-01548

If the `VkFormat` of each of `srcImage` and `dstImage` is not a [multi-planar format](#), the `VkFormat` of each of `srcImage` and `dstImage` **must** be [size-compatible](#)

- VUID-vkCmdCopyImage-None-01549  
In a copy to or from a plane of a [multi-planar image](#), the [VkFormat](#) of the image and plane **must** be compatible according to [the description of compatible planes](#) for the plane being copied
- VUID-vkCmdCopyImage-srcImage-09247  
If the [VkFormat](#) of each of [srcImage](#) and [dstImage](#) is a [compressed image format](#), the formats **must** have the same texel block extent
- VUID-vkCmdCopyImage-srcImage-00136  
The sample count of [srcImage](#) and [dstImage](#) **must** match
- VUID-vkCmdCopyImage-srcOffset-01783  
The [srcOffset](#) and [extent](#) members of each element of [pRegions](#) **must** respect the image transfer granularity requirements of [commandBuffer](#)'s command pool's queue family, as described in [VkQueueFamilyProperties](#)
- VUID-vkCmdCopyImage-dstOffset-01784  
The [dstOffset](#) and [extent](#) members of each element of [pRegions](#) **must** respect the image transfer granularity requirements of [commandBuffer](#)'s command pool's queue family, as described in [VkQueueFamilyProperties](#)
- VUID-vkCmdCopyImage-srcImage-01551  
If neither [srcImage](#) nor [dstImage](#) has a [multi-planar format](#) and the [maintenance8](#) feature is not enabled then for each element of [pRegions](#), [srcSubresource.aspectMask](#) and [dstSubresource.aspectMask](#) **must** match
- VUID-vkCmdCopyImage-pRegions-12201  
For each element of [pRegions](#) where [srcSubresource.aspectMask](#) and [dstSubresource.aspectMask](#) each contain at least one of [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#), [srcSubresource.aspectMask](#) and [dstSubresource.aspectMask](#) **must** match
- VUID-vkCmdCopyImage-srcSubresource-10214  
If [srcSubresource.aspectMask](#) is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), then [dstSubresource.aspectMask](#) **must** not contain both [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) and [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)
- VUID-vkCmdCopyImage-dstSubresource-10215  
If [dstSubresource.aspectMask](#) is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), then [srcSubresource.aspectMask](#) **must** not contain both [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) and [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)
- VUID-vkCmdCopyImage-srcImage-08713  
If [srcImage](#) has a [multi-planar format](#), then for each element of [pRegions](#), [srcSubresource.aspectMask](#) **must** be a single valid [multi-planar aspect mask](#) bit
- VUID-vkCmdCopyImage-dstImage-08714  
If [dstImage](#) has a [multi-planar format](#), then for each element of [pRegions](#), [dstSubresource.aspectMask](#) **must** be a single valid [multi-planar aspect mask](#) bit
- VUID-vkCmdCopyImage-srcImage-01556  
If [srcImage](#) has a [multi-planar format](#) and the [dstImage](#) does not have a multi-planar image format, then for each element of [pRegions](#), [dstSubresource.aspectMask](#) **must** be

## VK\_IMAGE\_ASPECT\_COLOR\_BIT

- VUID-vkCmdCopyImage-dstImage-01557

If `dstImage` has a [multi-planar format](#) and the `srcImage` does not have a multi-planar image format, then for each element of `pRegions`, `srcSubresource.aspectMask` **must** be [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#)

- VUID-vkCmdCopyImage-srcSubresource-10211

If `srcSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) and `dstSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#), then the `VkFormat` values of `srcImage` and `dstImage` **must** be compatible according to [the list of compatible depth-stencil and color formats](#)

- VUID-vkCmdCopyImage-srcSubresource-10212

If `srcSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) and `dstSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), then the `VkFormat` values of `srcImage` and `dstImage` **must** be compatible according to [the list of compatible depth-stencil and color formats](#)

- VUID-vkCmdCopyImage-apiVersion-07932

If the [VK\\_KHR\\_maintenance1](#) extension is not enabled, or `VkPhysicalDeviceProperties::apiVersion` is less than Vulkan 1.1, and either `srcImage` or `dstImage` is of type [VK\\_IMAGE\\_TYPE\\_3D](#), then for each element of `pRegions`, `srcSubresource.baseArrayLayer` and `dstSubresource.baseArrayLayer` **must** both be 0, and `srcSubresource.layerCount` and `dstSubresource.layerCount` **must** both be 1

- VUID-vkCmdCopyImage-srcImage-04443

If `srcImage` is of type [VK\\_IMAGE\\_TYPE\\_3D](#), then for each element of `pRegions`, `srcSubresource.baseArrayLayer` **must** be 0 and `srcSubresource.layerCount` **must** be 1

- VUID-vkCmdCopyImage-dstImage-04444

If `dstImage` is of type [VK\\_IMAGE\\_TYPE\\_3D](#), then for each element of `pRegions`, `dstSubresource.baseArrayLayer` **must** be 0 and `dstSubresource.layerCount` **must** be 1

- VUID-vkCmdCopyImage-aspectMask-00142

For each element of `pRegions`, `srcSubresource.aspectMask` **must** specify aspects present in `srcImage`

- VUID-vkCmdCopyImage-aspectMask-00143

For each element of `pRegions`, `dstSubresource.aspectMask` **must** specify aspects present in `dstImage`

- VUID-vkCmdCopyImage-srcOffset-00144

For each element of `pRegions`, `srcOffset.x` and `(extent.width + srcOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `srcSubresource` of `srcImage`

- VUID-vkCmdCopyImage-srcOffset-00145

For each element of `pRegions`, `srcOffset.y` and `(extent.height + srcOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `srcSubresource` of `srcImage`

- VUID-vkCmdCopyImage-srcImage-00146

If `srcImage` is of type [VK\\_IMAGE\\_TYPE\\_1D](#), then for each element of `pRegions`, `srcOffset.y`

**must** be 0 and **extent.height** **must** be 1

- VUID-vkCmdCopyImage-srcOffset-00147

If **srcImage** is of type **VK\_IMAGE\_TYPE\_3D**, then for each element of **pRegions**, **srcOffset.z** and **(extent.depth + srcOffset.z)** **must** both be greater than or equal to 0 and less than or equal to the depth of the specified **srcSubresource** of **srcImage**

- VUID-vkCmdCopyImage-srcImage-01785

If **srcImage** is of type **VK\_IMAGE\_TYPE\_1D**, then for each element of **pRegions**, **srcOffset.z** **must** be 0 and **extent.depth** **must** be 1

- VUID-vkCmdCopyImage-dstImage-01786

If **dstImage** is of type **VK\_IMAGE\_TYPE\_1D**, then for each element of **pRegions**, **dstOffset.z** **must** be 0

- VUID-vkCmdCopyImage-srcImage-10907

If either the **VkFormat** of each of **srcImage** and **dstImage** is not a **compressed image format**, and **dstImage** is of type **VK\_IMAGE\_TYPE\_1D**, then for each element of **pRegions**, **extent.depth** **must** be 1

- VUID-vkCmdCopyImage-srcImage-01787

If **srcImage** is of type **VK\_IMAGE\_TYPE\_2D**, then for each element of **pRegions**, **srcOffset.z** **must** be 0

- VUID-vkCmdCopyImage-dstImage-01788

If **dstImage** is of type **VK\_IMAGE\_TYPE\_2D**, then for each element of **pRegions**, **dstOffset.z** **must** be 0

- VUID-vkCmdCopyImage-apiVersion-07933

If the **VK\_KHR\_maintenance1** extension is not enabled, and **VkPhysicalDeviceProperties::apiVersion** is less than Vulkan 1.1, **srcImage** and **dstImage** **must** have the same **VkImageType**

- VUID-vkCmdCopyImage-apiVersion-08969

If the **VK\_KHR\_maintenance1** extension is not enabled, and **VkPhysicalDeviceProperties::apiVersion** is less than Vulkan 1.1, **srcImage** or **dstImage** is of type **VK\_IMAGE\_TYPE\_2D**, then for each element of **pRegions**, **extent.depth** **must** be 1

- VUID-vkCmdCopyImage-srcImage-07743

If **srcImage** and **dstImage** have a different **VkImageType**, and the **maintenance5** feature is not enabled, one **must** be **VK\_IMAGE\_TYPE\_3D** and the other **must** be **VK\_IMAGE\_TYPE\_2D**

- VUID-vkCmdCopyImage-srcImage-08793

If **srcImage** and **dstImage** have the same **VkImageType**, for each element of **pRegions**, if neither of the **layerCount** members of **srcSubresource** or **dstSubresource** are **VK\_REMAINING\_ARRAY\_LAYERS**, the **layerCount** members of **srcSubresource** or **dstSubresource** **must** match

- VUID-vkCmdCopyImage-srcImage-08794

If **srcImage** and **dstImage** have the same **VkImageType**, and one of the **layerCount** members of **srcSubresource** or **dstSubresource** is **VK\_REMAINING\_ARRAY\_LAYERS**, the other member **must** be either **VK\_REMAINING\_ARRAY\_LAYERS** or equal to the **arrayLayers** member of the **VkImageCreateInfo** used to create the image minus **baseArrayLayer**

- VUID-vkCmdCopyImage-srcImage-01790

If `srcImage` and `dstImage` are both of type `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `extent.depth` **must** be 1

- VUID-vkCmdCopyImage-srcImage-01791

If `srcImage` is of type `VK_IMAGE_TYPE_2D`, and `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `extent.depth` **must** equal `srcSubresource.layerCount`

- VUID-vkCmdCopyImage-dstImage-01792

If `dstImage` is of type `VK_IMAGE_TYPE_2D`, and `srcImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `extent.depth` **must** equal `dstSubresource.layerCount`

- VUID-vkCmdCopyImage-dstOffset-00150

For each element of `pRegions`, `dstOffset.x` and `(extent.width + dstOffset.x)`, where `extent` is **adjusted for size-compatibility**, **must** both be greater than or equal to 0 and less than or equal to the width of the specified `dstSubresource` of `dstImage`

- VUID-vkCmdCopyImage-dstOffset-00151

For each element of `pRegions`, `dstOffset.y` and `(extent.height + dstOffset.y)`, where `extent` is **adjusted for size-compatibility**, **must** both be greater than or equal to 0 and less than or equal to the height of the specified `dstSubresource` of `dstImage`

- VUID-vkCmdCopyImage-dstImage-00152

If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `dstOffset.y` **must** be 0

- VUID-vkCmdCopyImage-srcImage-10908

If either the `VkFormat` of each of `srcImage` and `dstImage` is not a **compressed image format**, and `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `extent.height` **must** be 1, where `extent` is **adjusted for size-compatibility**

- VUID-vkCmdCopyImage-dstOffset-00153

If `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `dstOffset.z` and `(extent.depth + dstOffset.z)`, where `extent` is **adjusted for size-compatibility**, **must** both be greater than or equal to 0 and less than or equal to the depth of the specified `dstSubresource` of `dstImage`

- VUID-vkCmdCopyImage-pRegions-07278

For each element of `pRegions`, `srcOffset.x` **must** be a multiple of the **texel block extent width** of the `VkFormat` of `srcImage`

- VUID-vkCmdCopyImage-pRegions-07279

For each element of `pRegions`, `srcOffset.y` **must** be a multiple of the **texel block extent height** of the `VkFormat` of `srcImage`

- VUID-vkCmdCopyImage-pRegions-07280

For each element of `pRegions`, `srcOffset.z` **must** be a multiple of the **texel block extent depth** of the `VkFormat` of `srcImage`

- VUID-vkCmdCopyImage-pRegions-07281

For each element of `pRegions`, `dstOffset.x` **must** be a multiple of the **texel block extent width** of the `VkFormat` of `dstImage`

- VUID-vkCmdCopyImage-pRegions-07282

For each element of `pRegions`, `dstOffset.y` **must** be a multiple of the **texel block extent height** of the `VkFormat` of `dstImage`

- VUID-vkCmdCopyImage-pRegions-07283  
For each element of `pRegions`, `dstOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`
- VUID-vkCmdCopyImage-srcImage-01728  
For each element of `pRegions`, if the sum of `srcOffset.x` and `extent.width` does not equal the width of the subresource specified by `srcSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImage-srcImage-01729  
For each element of `pRegions`, if the sum of `srcOffset.y` and `extent.height` does not equal the height of the subresource specified by `srcSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImage-srcImage-01730  
For each element of `pRegions`, if the sum of `srcOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImage-aspect-06662  
If the `aspect` member of any element of `pRegions` includes any flag other than `VK_IMAGE_ASPECT_STENCIL_BIT` or `srcImage` was not created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set
- VUID-vkCmdCopyImage-aspect-06663  
If the `aspect` member of any element of `pRegions` includes any flag other than `VK_IMAGE_ASPECT_STENCIL_BIT` or `dstImage` was not created with `separate stencil usage`, `dstImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set
- VUID-vkCmdCopyImage-aspect-06664  
If the `aspect` member of any element of `pRegions` includes `VK_IMAGE_ASPECT_STENCIL_BIT`, and `srcImage` was created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set
- VUID-vkCmdCopyImage-aspect-06665  
If the `aspect` member of any element of `pRegions` includes `VK_IMAGE_ASPECT_STENCIL_BIT`, and `dstImage` was created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set
- VUID-vkCmdCopyImage-srcImage-07966  
If `srcImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdCopyImage-srcSubresource-07967  
The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-vkCmdCopyImage-srcSubresource-07968  
If `srcSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`,

`srcSubresource.baseArrayLayer + srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `srcImage` was created

- VUID-vkCmdCopyImage-srcImage-07969  
`srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`
- VUID-vkCmdCopyImage-dstImage-07966  
If `dstImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdCopyImage-dstSubresource-07967  
The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-vkCmdCopyImage-dstSubresource-07968  
If `dstSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `dstSubresource.baseArrayLayer + dstSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-vkCmdCopyImage-dstImage-07969  
`dstImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

### Valid Usage (Implicit)

- VUID-vkCmdCopyImage-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyImage-srcImage-parameter  
`srcImage` **must** be a valid `VkImage` handle
- VUID-vkCmdCopyImage-srcImageLayout-parameter  
`srcImageLayout` **must** be a valid `VkImageLayout` value
- VUID-vkCmdCopyImage-dstImage-parameter  
`dstImage` **must** be a valid `VkImage` handle
- VUID-vkCmdCopyImage-dstImageLayout-parameter  
`dstImageLayout` **must** be a valid `VkImageLayout` value
- VUID-vkCmdCopyImage-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkImageCopy` structures
- VUID-vkCmdCopyImage-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdCopyImage-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations

- VUID-vkCmdCopyImage-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyImage-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyImage-videocoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdCopyImage-regionCount-arraylength  
**regionCount** **must** be greater than 0
- VUID-vkCmdCopyImage-commonparent  
Each of **commandBuffer**, **dstImage**, and **srcImage** **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

vkCmdCopyImage is not affected by **conditional rendering**

The **VkImageCopy** structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkImageCopy {
    VkImageSubresourceLayers srcSubresource;
    VkOffset3D srcOffset;
    VkImageSubresourceLayers dstSubresource;
    VkOffset3D dstOffset;
    VkExtent3D extent;
} VkImageCopy;
```

- `srcSubresource` and `dstSubresource` are `VkImageSubresourceLayers` structures specifying the image subresources of the images used for the source and destination image data, respectively.
- `srcOffset` and `dstOffset` select the initial `x`, `y`, and `z` offsets in texels of the sub-regions of the source and destination image data.
- `extent` is the size in texels of the image to copy in `width`, `height` and `depth`.

### Valid Usage

- VUID-VkImageCopy-apiVersion-07940  
If the `VK_KHR_sampler_ycbcr_conversion` extension is not enabled, and `VkPhysicalDeviceProperties::apiVersion` is less than Vulkan 1.1, the `aspectMask` member of `srcSubresource` and `dstSubresource` **must** match
- VUID-VkImageCopy-apiVersion-07941  
If the `VK_KHR_maintenance1` extension is not enabled, and `VkPhysicalDeviceProperties::apiVersion` is less than Vulkan 1.1, the `layerCount` member of `srcSubresource` and `dstSubresource` **must** match
- VUID-VkImageCopy-extent-06668  
`extent.width` **must** not be 0
- VUID-VkImageCopy-extent-06669  
`extent.height` **must** not be 0
- VUID-VkImageCopy-extent-06670  
`extent.depth` **must** not be 0

### Valid Usage (Implicit)

- VUID-VkImageCopy-srcSubresource-parameter  
`srcSubresource` **must** be a valid `VkImageSubresourceLayers` structure
- VUID-VkImageCopy-dstSubresource-parameter  
`dstSubresource` **must** be a valid `VkImageSubresourceLayers` structure

The `VkImageSubresourceLayers` structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkImageSubresourceLayers {
    VkImageAspectFlags    aspectMask;
    uint32_t              mipLevel;
    uint32_t              baseArrayLayer;
    uint32_t              layerCount;
} VkImageSubresourceLayers;
```

- **aspectMask** is a combination of [VkImageAspectFlagBits](#), selecting the color, depth and/or stencil aspects to be copied.
- **mipLevel** is the mipmap level to copy
- **baseArrayLayer** and **layerCount** are the starting layer and number of layers to copy.

### Valid Usage

- VUID-VkImageSubresourceLayers-aspectMask-00167  
If **aspectMask** contains [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), it **must** not contain either of [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)
- VUID-VkImageSubresourceLayers-aspectMask-00168  
**aspectMask** **must** not contain [VK\\_IMAGE\\_ASPECT\\_METADATA\\_BIT](#)
- VUID-VkImageSubresourceLayers-aspectMask-02247  
**aspectMask** **must** not include [VK\\_IMAGE\\_ASPECT\\_MEMORY\\_PLANE\\_i\\_BIT\\_EXT](#) for any index *i*
- VUID-VkImageSubresourceLayers-layerCount-09243  
If the [maintenance5](#) feature is not enabled, **layerCount** **must** not be [VK\\_REMAINING\\_ARRAY\\_LAYERS](#)
- VUID-VkImageSubresourceLayers-layerCount-01700  
If **layerCount** is not [VK\\_REMAINING\\_ARRAY\\_LAYERS](#), it **must** be greater than 0

### Valid Usage (Implicit)

- VUID-VkImageSubresourceLayers-aspectMask-parameter  
**aspectMask** **must** be a valid combination of [VkImageAspectFlagBits](#) values

A more extensible version of the copy image command is defined below.

To copy data between image objects, call:

```
// Provided by VK_VERSION_1_3
void vkCmdCopyImage2(
    VkCommandBuffer          commandBuffer,
    const VkCopyImageInfo2* pCopyImageInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdCopyImage2
void vkCmdCopyImage2KHR(
    VkCommandBuffer                      commandBuffer,
    const VkCopyImageInfo2*             pCopyImageInfo);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **pCopyImageInfo** is a pointer to a [VkCopyImageInfo2](#) structure describing the copy parameters.

This command is functionally identical to [vkCmdCopyImage](#), but includes extensible sub-structures that include **sType** and **pNext** parameters, allowing them to be more easily extended.

## Valid Usage

- VUID-vkCmdCopyImage2-commandBuffer-01825  
If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported, **srcImage** **must** not be a protected image
- VUID-vkCmdCopyImage2-commandBuffer-01826  
If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported, **dstImage** **must** not be a protected image
- VUID-vkCmdCopyImage2-commandBuffer-01827  
If **commandBuffer** is a protected command buffer and **protectedNoFault** is not supported, **dstImage** **must** not be an unprotected image
- VUID-vkCmdCopyImage2-commandBuffer-10217  
If the queue family used to create the [VkCommandPool](#) which **commandBuffer** was allocated from does not support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#), and the **maintenance10** feature is not enabled, for each element of **pCopyImageInfo->pRegions**, where the **aspectMask** member of **srcSubresource** is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), the **aspectMask** of **dstSubresource** **must** not be [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)
- VUID-vkCmdCopyImage2-commandBuffer-11782  
If the queue family used to create the [VkCommandPool](#) which **commandBuffer** was allocated from does not support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) but does support [VK\\_QUEUE\\_COMPUTE\\_BIT](#), and in any element of **pCopyImageInfo->pRegions** the **aspectMask** member of **srcSubresource** is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) and the **aspectMask** of **dstSubresource** is [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#), then the **format features** of **dstImage** **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_DEPTH\\_COPY\\_ON\\_COMPUTE\\_QUEUE\\_BIT\\_KHR](#)
- VUID-vkCmdCopyImage2-commandBuffer-11783  
If the queue family used to create the [VkCommandPool](#) which **commandBuffer** was allocated from does not support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) and [VK\\_QUEUE\\_COMPUTE\\_BIT](#), but does support [VK\\_QUEUE\\_TRANSFER\\_BIT](#), and in any element of **pCopyImageInfo->pRegions** the **aspectMask** member of **srcSubresource** is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) and the **aspectMask** of **dstSubresource** is [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#), then the **format features** of **dstImage** **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_DEPTH\\_COPY\\_ON\\_TRANSFER\\_QUEUE\\_BIT\\_KHR](#)

- VUID-vkCmdCopyImage2-commandBuffer-11784

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pCopyImageInfo->pRegions` the `aspectMask` member of `srcSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `dstSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage2-commandBuffer-11785

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pCopyImageInfo->pRegions` the `aspectMask` member of `srcSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `dstSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage2-commandBuffer-12449

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `srcSubresource.aspectMask` or `dstSubresource.aspectMask` of any element of `pCopyImageInfo->pRegions` contain `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`, then both `srcImage` and `dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`

- VUID-vkCmdCopyImage2-commandBuffer-10218

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, and the `maintenance10` feature is not enabled, for each element of `pCopyImageInfo->pRegions`, where the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` then the `aspectMask` of `srcSubresource` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`

- VUID-vkCmdCopyImage2-commandBuffer-11786

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pCopyImageInfo->pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage2-commandBuffer-11787

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pCopyImageInfo->pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage2-commandBuffer-11788

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support

`VK_QUEUE_COMPUTE_BIT`, and in any element of `pCopyImageInfo->pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImage2-commandBuffer-11789

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pCopyImageInfo->pRegions` the `aspectMask` member of `dstSubresource` is `VK_IMAGE_ASPECT_COLOR_BIT` and the `aspectMask` of `srcSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

## Valid Usage (Implicit)

- VUID-vkCmdCopyImage2-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyImage2-pCopyImageInfo-parameter  
`pCopyImageInfo` **must** be a valid pointer to a valid `VkCopyImageInfo2` structure
- VUID-vkCmdCopyImage2-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdCopyImage2-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations
- VUID-vkCmdCopyImage2-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyImage2-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyImage2-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

vkCmdCopyImage2 is not affected by [conditional rendering](#)

The `VkCopyImageInfo2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkCopyImageInfo2 {
    VkStructureType    sType;
    const void*        pNext;
    VkImage             srcImage;
    VkImageLayout       srcImageLayout;
    VkImage             dstImage;
    VkImageLayout       dstImageLayout;
    uint32_t            regionCount;
    const VkImageCopy2* pRegions;
} VkCopyImageInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkCopyImageInfo2
typedef VkCopyImageInfo2 VkCopyImageInfo2KHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcImage` is the source image.
- `srcImageLayout` is the current layout of the source image subresource.
- `dstImage` is the destination image.
- `dstImageLayout` is the current layout of the destination image subresource.
- `regionCount` is the number of regions to copy.
- `pRegions` is a pointer to an array of `VkImageCopy2` structures specifying the regions to copy.

## Valid Usage

- VUID-VkCopyImageInfo2-pRegions-00124  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified by `pRegions` and accessed according to [Copy Image Addressing](#)
- VUID-VkCopyImageInfo2-pRegions-12484  
Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by `pRegions` and accessed according to [Copy Image Addressing](#)
- VUID-VkCopyImageInfo2-srcImage-01995  
The [format features](#) of `srcImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_SRC_BIT`
- VUID-VkCopyImageInfo2-srcImageLayout-00128  
`srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-VkCopyImageInfo2-srcImageLayout-01917  
`srcImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL`, or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-VkCopyImageInfo2-srcImage-09460  
If `srcImage` and `dstImage` are the same, and any elements of `pRegions` contains the `srcSubresource` and `dstSubresource` with matching `mipLevel` and overlapping array layers, then the `srcImageLayout` and `dstImageLayout` **must** be `VK_IMAGE_LAYOUT_GENERAL` or `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`
- VUID-VkCopyImageInfo2-dstImage-01996  
The [format features](#) of `dstImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_DST_BIT`
- VUID-VkCopyImageInfo2-dstImageLayout-00133  
`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-VkCopyImageInfo2-dstImageLayout-01395  
`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL`, or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-VkCopyImageInfo2-srcImage-01548  
If the `VkFormat` of each of `srcImage` and `dstImage` is not a [multi-planar format](#), the `VkFormat` of each of `srcImage` and `dstImage` **must** be [size-compatible](#)
- VUID-VkCopyImageInfo2-None-01549  
In a copy to or from a plane of a [multi-planar image](#), the `VkFormat` of the image and plane **must** be compatible according to [the description of compatible planes](#) for the plane being copied
- VUID-VkCopyImageInfo2-srcImage-09247  
If the `VkFormat` of each of `srcImage` and `dstImage` is a [compressed image format](#), the formats **must** have the same texel block extent
- VUID-VkCopyImageInfo2-srcImage-00136

The sample count of `srcImage` and `dstImage` **must** match

- VUID-VkCopyImageInfo2-srcOffset-01783

The `srcOffset` and `extent` members of each element of `pRegions` **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in [VkQueueFamilyProperties](#)

- VUID-VkCopyImageInfo2-dstOffset-01784

The `dstOffset` and `extent` members of each element of `pRegions` **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in [VkQueueFamilyProperties](#)

- VUID-VkCopyImageInfo2-srcImage-01551

If neither `srcImage` nor `dstImage` has a [multi-planar format](#) and the `maintenance8` feature is not enabled then for each element of `pRegions`, `srcSubresource.aspectMask` and `dstSubresource.aspectMask` **must** match

- VUID-VkCopyImageInfo2-pRegions-12201

For each element of `pRegions` where `srcSubresource.aspectMask` and `dstSubresource.aspectMask` each contain at least one of [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#), `srcSubresource.aspectMask` and `dstSubresource.aspectMask` **must** match

- VUID-VkCopyImageInfo2-srcSubresource-10214

If `srcSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), then `dstSubresource.aspectMask` **must** not contain both [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) and [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)

- VUID-VkCopyImageInfo2-dstSubresource-10215

If `dstSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#), then `srcSubresource.aspectMask` **must** not contain both [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) and [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)

- VUID-VkCopyImageInfo2-srcImage-08713

If `srcImage` has a [multi-planar format](#), then for each element of `pRegions`, `srcSubresource.aspectMask` **must** be a single valid [multi-planar aspect mask](#) bit

- VUID-VkCopyImageInfo2-dstImage-08714

If `dstImage` has a [multi-planar format](#), then for each element of `pRegions`, `dstSubresource.aspectMask` **must** be a single valid [multi-planar aspect mask](#) bit

- VUID-VkCopyImageInfo2-srcImage-01556

If `srcImage` has a [multi-planar format](#) and the `dstImage` does not have a multi-planar image format, then for each element of `pRegions`, `dstSubresource.aspectMask` **must** be [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#)

- VUID-VkCopyImageInfo2-dstImage-01557

If `dstImage` has a [multi-planar format](#) and the `srcImage` does not have a multi-planar image format, then for each element of `pRegions`, `srcSubresource.aspectMask` **must** be [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#)

- VUID-VkCopyImageInfo2-srcSubresource-10211

If `srcSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) and `dstSubresource.aspectMask` is [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or

VK\_IMAGE\_ASPECT\_STENCIL\_BIT, then the VkFormat values of srcImage and dstImage **must** be compatible according to the list of compatible depth-stencil and color formats

- VUID-VkCopyImageInfo2-srcSubresource-10212

If srcSubresource.aspectMask is VK\_IMAGE\_ASPECT\_DEPTH\_BIT or VK\_IMAGE\_ASPECT\_STENCIL\_BIT and dstSubresource.aspectMask is VK\_IMAGE\_ASPECT\_COLOR\_BIT, then the VkFormat values of srcImage and dstImage **must** be compatible according to the list of compatible depth-stencil and color formats

- VUID-VkCopyImageInfo2-apiVersion-07932

If the VK\_KHR\_maintenance1 extension is not enabled, or VkPhysicalDeviceProperties::apiVersion is less than Vulkan 1.1, and either srcImage or dstImage is of type VK\_IMAGE\_TYPE\_3D, then for each element of pRegions, srcSubresource.baseArrayLayer and dstSubresource.baseArrayLayer **must** both be 0, and srcSubresource.layerCount and dstSubresource.layerCount **must** both be 1

- VUID-VkCopyImageInfo2-srcImage-04443

If srcImage is of type VK\_IMAGE\_TYPE\_3D, then for each element of pRegions, srcSubresource.baseArrayLayer **must** be 0 and srcSubresource.layerCount **must** be 1

- VUID-VkCopyImageInfo2-dstImage-04444

If dstImage is of type VK\_IMAGE\_TYPE\_3D, then for each element of pRegions, dstSubresource.baseArrayLayer **must** be 0 and dstSubresource.layerCount **must** be 1

- VUID-VkCopyImageInfo2-aspectMask-00142

For each element of pRegions, srcSubresource.aspectMask **must** specify aspects present in srcImage

- VUID-VkCopyImageInfo2-aspectMask-00143

For each element of pRegions, dstSubresource.aspectMask **must** specify aspects present in dstImage

- VUID-VkCopyImageInfo2-srcOffset-00144

For each element of pRegions, srcOffset.x and (extent.width + srcOffset.x) **must** both be greater than or equal to 0 and less than or equal to the width of the specified srcSubresource of srcImage

- VUID-VkCopyImageInfo2-srcOffset-00145

For each element of pRegions, srcOffset.y and (extent.height + srcOffset.y) **must** both be greater than or equal to 0 and less than or equal to the height of the specified srcSubresource of srcImage

- VUID-VkCopyImageInfo2-srcImage-00146

If srcImage is of type VK\_IMAGE\_TYPE\_1D, then for each element of pRegions, srcOffset.y **must** be 0 and extent.height **must** be 1

- VUID-VkCopyImageInfo2-srcOffset-00147

If srcImage is of type VK\_IMAGE\_TYPE\_3D, then for each element of pRegions, srcOffset.z and (extent.depth + srcOffset.z) **must** both be greater than or equal to 0 and less than or equal to the depth of the specified srcSubresource of srcImage

- VUID-VkCopyImageInfo2-srcImage-01785

If srcImage is of type VK\_IMAGE\_TYPE\_1D, then for each element of pRegions, srcOffset.z **must** be 0 and extent.depth **must** be 1

- VUID-VkCopyImageInfo2-dstImage-01786  
If **dstImage** is of type **VK\_IMAGE\_TYPE\_1D**, then for each element of **pRegions**, **dstOffset.z** **must** be **0**
- VUID-VkCopyImageInfo2-srcImage-10907  
If either the **VkFormat** of each of **srcImage** and **dstImage** is not a **compressed image format**, and **dstImage** is of type **VK\_IMAGE\_TYPE\_1D**, then for each element of **pRegions**, **extent.depth** **must** be **1**
- VUID-VkCopyImageInfo2-srcImage-01787  
If **srcImage** is of type **VK\_IMAGE\_TYPE\_2D**, then for each element of **pRegions**, **srcOffset.z** **must** be **0**
- VUID-VkCopyImageInfo2-dstImage-01788  
If **dstImage** is of type **VK\_IMAGE\_TYPE\_2D**, then for each element of **pRegions**, **dstOffset.z** **must** be **0**
- VUID-VkCopyImageInfo2-apiVersion-07933  
If the **VK\_KHR\_maintenance1** extension is not enabled, and **VkPhysicalDeviceProperties::apiVersion** is less than Vulkan 1.1, **srcImage** and **dstImage** **must** have the same **VkImageType**
- VUID-VkCopyImageInfo2-apiVersion-08969  
If the **VK\_KHR\_maintenance1** extension is not enabled, and **VkPhysicalDeviceProperties::apiVersion** is less than Vulkan 1.1, **srcImage** or **dstImage** is of type **VK\_IMAGE\_TYPE\_2D**, then for each element of **pRegions**, **extent.depth** **must** be **1**
- VUID-VkCopyImageInfo2-srcImage-07743  
If **srcImage** and **dstImage** have a different **VkImageType**, and the **maintenance5** feature is not enabled, one **must** be **VK\_IMAGE\_TYPE\_3D** and the other **must** be **VK\_IMAGE\_TYPE\_2D**
- VUID-VkCopyImageInfo2-srcImage-08793  
If **srcImage** and **dstImage** have the same **VkImageType**, for each element of **pRegions**, if neither of the **layerCount** members of **srcSubresource** or **dstSubresource** are **VK\_REMAINING\_ARRAY\_LAYERS**, the **layerCount** members of **srcSubresource** or **dstSubresource** **must** match
- VUID-VkCopyImageInfo2-srcImage-08794  
If **srcImage** and **dstImage** have the same **VkImageType**, and one of the **layerCount** members of **srcSubresource** or **dstSubresource** is **VK\_REMAINING\_ARRAY\_LAYERS**, the other member **must** be either **VK\_REMAINING\_ARRAY\_LAYERS** or equal to the **arrayLayers** member of the **VkImageCreateInfo** used to create the image minus **baseArrayLayer**
- VUID-VkCopyImageInfo2-srcImage-01790  
If **srcImage** and **dstImage** are both of type **VK\_IMAGE\_TYPE\_2D**, then for each element of **pRegions**, **extent.depth** **must** be **1**
- VUID-VkCopyImageInfo2-srcImage-01791  
If **srcImage** is of type **VK\_IMAGE\_TYPE\_2D**, and **dstImage** is of type **VK\_IMAGE\_TYPE\_3D**, then for each element of **pRegions**, **extent.depth** **must** equal **srcSubresource.layerCount**
- VUID-VkCopyImageInfo2-dstImage-01792  
If **dstImage** is of type **VK\_IMAGE\_TYPE\_2D**, and **srcImage** is of type **VK\_IMAGE\_TYPE\_3D**, then for each element of **pRegions**, **extent.depth** **must** equal **dstSubresource.layerCount**

- VUID-VkCopyImageInfo2-dstOffset-00150  
For each element of `pRegions`, `dstOffset.x` and `(extent.width + dstOffset.x)`, where `extent` is [adjusted for size-compatibility](#), **must** both be greater than or equal to `0` and less than or equal to the width of the specified `dstSubresource` of `dstImage`
- VUID-VkCopyImageInfo2-dstOffset-00151  
For each element of `pRegions`, `dstOffset.y` and `(extent.height + dstOffset.y)`, where `extent` is [adjusted for size-compatibility](#), **must** both be greater than or equal to `0` and less than or equal to the height of the specified `dstSubresource` of `dstImage`
- VUID-VkCopyImageInfo2-dstImage-00152  
If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `dstOffset.y` **must** be `0`
- VUID-VkCopyImageInfo2-srcImage-10908  
If either the `VkFormat` of each of `srcImage` and `dstImage` is not a [compressed image format](#), and `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `extent.height` **must** be `1`, where `extent` is [adjusted for size-compatibility](#)
- VUID-VkCopyImageInfo2-dstOffset-00153  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `dstOffset.z` and `(extent.depth + dstOffset.z)`, where `extent` is [adjusted for size-compatibility](#), **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `dstSubresource` of `dstImage`
- VUID-VkCopyImageInfo2-pRegions-07278  
For each element of `pRegions`, `srcOffset.x` **must** be a multiple of the [texel block extent width](#) of the `VkFormat` of `srcImage`
- VUID-VkCopyImageInfo2-pRegions-07279  
For each element of `pRegions`, `srcOffset.y` **must** be a multiple of the [texel block extent height](#) of the `VkFormat` of `srcImage`
- VUID-VkCopyImageInfo2-pRegions-07280  
For each element of `pRegions`, `srcOffset.z` **must** be a multiple of the [texel block extent depth](#) of the `VkFormat` of `srcImage`
- VUID-VkCopyImageInfo2-pRegions-07281  
For each element of `pRegions`, `dstOffset.x` **must** be a multiple of the [texel block extent width](#) of the `VkFormat` of `dstImage`
- VUID-VkCopyImageInfo2-pRegions-07282  
For each element of `pRegions`, `dstOffset.y` **must** be a multiple of the [texel block extent height](#) of the `VkFormat` of `dstImage`
- VUID-VkCopyImageInfo2-pRegions-07283  
For each element of `pRegions`, `dstOffset.z` **must** be a multiple of the [texel block extent depth](#) of the `VkFormat` of `dstImage`
- VUID-VkCopyImageInfo2-srcImage-01728  
For each element of `pRegions`, if the sum of `srcOffset.x` and `extent.width` does not equal the width of the subresource specified by `srcSubresource`, `extent.width` **must** be a multiple of the [texel block extent width](#) of the `VkFormat` of `srcImage`
- VUID-VkCopyImageInfo2-srcImage-01729

For each element of `pRegions`, if the sum of `srcOffset.y` and `extent.height` does not equal the height of the subresource specified by `srcSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageInfo2-srcImage-01730

For each element of `pRegions`, if the sum of `srcOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageInfo2-aspect-06662

If the `aspect` member of any element of `pRegions` includes any flag other than `VK_IMAGE_ASPECT_STENCIL_BIT` or `srcImage` was not created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set

- VUID-VkCopyImageInfo2-aspect-06663

If the `aspect` member of any element of `pRegions` includes any flag other than `VK_IMAGE_ASPECT_STENCIL_BIT` or `dstImage` was not created with `separate stencil usage`, `dstImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set

- VUID-VkCopyImageInfo2-aspect-06664

If the `aspect` member of any element of `pRegions` includes `VK_IMAGE_ASPECT_STENCIL_BIT`, and `srcImage` was created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set

- VUID-VkCopyImageInfo2-aspect-06665

If the `aspect` member of any element of `pRegions` includes `VK_IMAGE_ASPECT_STENCIL_BIT`, and `dstImage` was created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set

- VUID-VkCopyImageInfo2-srcImage-07966

If `srcImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-VkCopyImageInfo2-srcSubresource-07967

The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created

- VUID-VkCopyImageInfo2-srcSubresource-07968

If `srcSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `srcSubresource.baseArrayLayer` + `srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `srcImage` was created

- VUID-VkCopyImageInfo2-srcImage-07969

`srcImage` **must** not have been created with flags containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

- VUID-VkCopyImageInfo2-dstImage-07966

If `dstImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound

completely and contiguously to a single `VkDeviceMemory` object

- VUID-VkCopyImageInfo2-dstSubresource-07967

The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created

- VUID-VkCopyImageInfo2-dstSubresource-07968

If `dstSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `dstSubresource.baseArrayLayer + dstSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created

- VUID-VkCopyImageInfo2-dstImage-07969

`dstImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

### Valid Usage (Implicit)

- VUID-VkCopyImageInfo2-sType-sType

`sType` **must** be `VK_STRUCTURE_TYPE_COPY_IMAGE_INFO_2`

- VUID-VkCopyImageInfo2-pNext-pNext

`pNext` **must** be `NULL`

- VUID-VkCopyImageInfo2-srcImage-parameter

`srcImage` **must** be a valid `VkImage` handle

- VUID-VkCopyImageInfo2-srcImageLayout-parameter

`srcImageLayout` **must** be a valid `VkImageLayout` value

- VUID-VkCopyImageInfo2-dstImage-parameter

`dstImage` **must** be a valid `VkImage` handle

- VUID-VkCopyImageInfo2-dstImageLayout-parameter

`dstImageLayout` **must** be a valid `VkImageLayout` value

- VUID-VkCopyImageInfo2-pRegions-parameter

`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkImageCopy2` structures

- VUID-VkCopyImageInfo2-regionCount-arraylength

`regionCount` **must** be greater than 0

- VUID-VkCopyImageInfo2-commonparent

Both of `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same `VkDevice`

The `VkImageCopy2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkImageCopy2 {
    VkStructureType      sType;
    const void*          pNext;
    VkImageSubresourceLayers srcSubresource;
    VkOffset3D            srcOffset;
    VkImageSubresourceLayers dstSubresource;
    VkOffset3D            dstOffset;
    VkExtent3D            extent;
} VkImageCopy2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkImageCopy2
typedef VkImageCopy2 VkImageCopy2KHR;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **srcSubresource** and **dstSubresource** are [VkImageSubresourceLayers](#) structures specifying the image subresources of the images used for the source and destination image data, respectively.
- **srcOffset** and **dstOffset** select the initial **x**, **y**, and **z** offsets in texels of the sub-regions of the source and destination image data.
- **extent** is the size in texels of the image to copy in **width**, **height** and **depth**.

## Valid Usage

- VUID-VkImageCopy2-apiVersion-07940  
If the [VK\\_KHR\\_sampler\\_ycbcr\\_conversion](#) extension is not enabled, and [VkPhysicalDeviceProperties::apiVersion](#) is less than Vulkan 1.1, the **aspectMask** member of **srcSubresource** and **dstSubresource** **must** match
- VUID-VkImageCopy2-apiVersion-07941  
If the [VK\\_KHR\\_maintenance1](#) extension is not enabled, and [VkPhysicalDeviceProperties::apiVersion](#) is less than Vulkan 1.1, the **layerCount** member of **srcSubresource** and **dstSubresource** **must** match
- VUID-VkImageCopy2-extent-06668  
**extent.width** **must** not be 0
- VUID-VkImageCopy2-extent-06669  
**extent.height** **must** not be 0
- VUID-VkImageCopy2-extent-06670  
**extent.depth** **must** not be 0

### Valid Usage (Implicit)

- VUID-VkImageCopy2-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_IMAGE_COPY_2`
- VUID-VkImageCopy2-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkImageCopy2-srcSubresource-parameter  
`srcSubresource` **must** be a valid `VkImageSubresourceLayers` structure
- VUID-VkImageCopy2-dstSubresource-parameter  
`dstSubresource` **must** be a valid `VkImageSubresourceLayers` structure

## 24.4. Copying Data Between Memory Ranges and Images

To copy data from an image to memory ranges, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdCopyMemoryToImageKHR(
    VkCommandBuffer                      commandBuffer,
    const VkCopyDeviceMemoryImageInfoKHR* pCopyMemoryInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pCopyMemoryInfo` a pointer to a `VkCopyDeviceMemoryImageInfoKHR` structure describing the copies to perform.

### Valid Usage

- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-13102  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, the `addressCopyFlags` member of all elements of `pCopyMemoryInfo->pRegions` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-13103  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `pCopyMemoryInfo->image` **must** not have been created with `VK_IMAGE_CREATE_PROTECTED_BIT`
- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-13104  
If the `maintenance11` feature is not enabled, and the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` or `VK_QUEUE_COMPUTE_BIT`, the `addressRange.pname:address` member of any element of `pCopyMemoryInfo->pRegions` **must** be a multiple of 4
- VUID-vkCmdCopyMemoryToImageKHR-imageOffset-13105  
The `imageOffset` and `imageExtent` members of each element of `pCopyMemoryInfo->pRegions`

**must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in [VkQueueFamilyProperties](#)

- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-13106

If the queue family used to create the [VkCommandPool](#) which `commandBuffer` was allocated from does not support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#), for each element of `pCopyMemoryInfo->pRegions`, the `aspectMask` member of `imageSubresource` **must** not be [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)

- VUID-vkCmdCopyMemoryToImageKHR-imageLayout-13019

The `imageLayout` member of each element of `pCopyMemoryInfo->pRegions` **must** be [VK\\_IMAGE\\_LAYOUT\\_GENERAL](#), [VK\\_IMAGE\\_LAYOUT\\_SHARED\\_PRESENT\\_KHR](#), or [VK\\_IMAGE\\_LAYOUT\\_TRANSFER\\_DST\\_OPTIMAL](#)

- VUID-vkCmdCopyMemoryToImageKHR-pCopyMemoryInfo-13020

`pCopyMemoryInfo->image` **must** have been created with [VK\\_IMAGE\\_USAGE\\_TRANSFER\\_DST\\_BIT](#)

- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-13021

If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `pCopyMemoryInfo->image` **must** have been created with [VK\\_IMAGE\\_CREATE\\_PROTECTED\\_BIT](#)

- VUID-vkCmdCopyMemoryToImageKHR-None-13022

If [VK\\_EXT\\_depth\\_range\\_unrestricted](#) is not enabled, for each element of `pCopyMemoryInfo->pRegions` whose `imageSubresource` contains a depth aspect, each data element in its `addressRange` **must** be in the range [0,1]

- VUID-vkCmdCopyMemoryToImageKHR-addressRange-13128

At least one buffer containing the total address range specified by the `addressRange` member of each element of `pCopyMemoryInfo->pRegions` **must** have been created with [VK\\_BUFFER\\_USAGE\\_TRANSFER\\_SRC\\_BIT](#)

## Valid Usage (Implicit)

- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-parameter

`commandBuffer` **must** be a valid [VkCommandBuffer](#) handle

- VUID-vkCmdCopyMemoryToImageKHR-pCopyMemoryInfo-parameter

If `pCopyMemoryInfo` is not `NULL`, `pCopyMemoryInfo` **must** be a valid pointer to a valid [VkCopyDeviceMemoryImageInfoKHR](#) structure

- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-recording

`commandBuffer` **must** be in the [recording state](#)

- VUID-vkCmdCopyMemoryToImageKHR-commandBuffer-cmdpool

The [VkCommandPool](#) that `commandBuffer` was allocated from **must** support [VK\\_QUEUE\\_TRANSFER\\_BIT](#) operations

- VUID-vkCmdCopyMemoryToImageKHR-renderpass

This command **must** only be called outside of a render pass instance

- VUID-vkCmdCopyMemoryToImageKHR-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdCopyMemoryToImageKHR-videocoding

This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyMemoryToImageKHR` is not affected by [conditional rendering](#)

To copy data from an image to memory ranges, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdCopyImageToMemoryKHR(
    VkCommandBuffer                commandBuffer,
    const VkCopyDeviceMemoryImageInfoKHR* pCopyMemoryInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pCopyMemoryInfo` a pointer to a [VkCopyDeviceMemoryImageInfoKHR](#) structure describing the copies to perform.

## Valid Usage

- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-13102  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, the `addressCopyFlags` member of all elements of `pCopyMemoryInfo->pRegions` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-13103  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `pCopyMemoryInfo->image` **must** not have been created with

## VK\_IMAGE\_CREATE\_PROTECTED\_BIT

- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-13104  
If the `maintenance11` feature is not enabled, and the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` or `VK_QUEUE_COMPUTE_BIT`, the `addressRange.pname:address` member of any element of `pCopyMemoryInfo->pRegions` **must** be a multiple of 4
- VUID-vkCmdCopyImageToMemoryKHR-imageOffset-13105  
The `imageOffset` and `imageExtent` members of each element of `pCopyMemoryInfo->pRegions` **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in `VkQueueFamilyProperties`
- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-13106  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, for each element of `pCopyMemoryInfo->pRegions`, the `aspectMask` member of `imageSubresource` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`
- VUID-vkCmdCopyImageToMemoryKHR-imageLayout-13023  
The `imageLayout` member of each element of `pCopyMemoryInfo->pRegions` **must** be `VK_IMAGE_LAYOUT_GENERAL`, `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, or `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL`
- VUID-vkCmdCopyImageToMemoryKHR-pCopyMemoryInfo-13024  
`pCopyMemoryInfo->image` **must** have been created with `VK_IMAGE_USAGE_TRANSFER_SRC_BIT`
- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-13025  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, the `addressCopyFlags` member of all elements of `pCopyMemoryInfo->pRegions` **must** include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-vkCmdCopyImageToMemoryKHR-addressRange-13129  
At least one buffer containing the total address range specified by the `addressRange` member of each element of `pCopyMemoryInfo->pRegions` **must** have been created with `VK_BUFFER_USAGE_TRANSFER_DST_BIT`

## Valid Usage (Implicit)

- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyImageToMemoryKHR-pCopyMemoryInfo-parameter  
If `pCopyMemoryInfo` is not `NULL`, `pCopyMemoryInfo` **must** be a valid pointer to a valid `VkCopyDeviceMemoryImageInfoKHR` structure
- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdCopyImageToMemoryKHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support

[VK\\_QUEUE\\_TRANSFER\\_BIT](#) operations

- VUID-vkCmdCopyImageToMemoryKHR-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyImageToMemoryKHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyImageToMemoryKHR-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyImageToMemoryKHR` is not affected by [conditional rendering](#)

The `VkCopyDeviceMemoryImageInfoKHR` structure is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkCopyDeviceMemoryImageInfoKHR {
    VkStructureType          sType;
    const void*              pNext;
    VkImage                  image;
    uint32_t                 regionCount;
    const VkDeviceMemoryImageCopyKHR* pRegions;
} VkCopyDeviceMemoryImageInfoKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `image` is the base image accessed by the copy command.
- `regionCount` is the number of copies to be performed.

- **pRegions** is a pointer to an array of [VkDeviceMemoryImageCopyKHR](#) structures describing individual copy operations between two memory ranges.

## Valid Usage

- VUID-VkCopyDeviceMemoryImageInfoKHR-addressRange-13027  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified in **pRegions** and accessed according to [Buffer and Image Addressing](#)
- VUID-VkCopyDeviceMemoryImageInfoKHR-pRegions-12473  
Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by **pRegions** and accessed according to [Buffer and Image Addressing](#)
- VUID-VkCopyDeviceMemoryImageInfoKHR-imageLayout-13028  
The **imageLayout** member of each element of **pRegions** **must** specify the layout of the image subresource specified for that element of **pRegions** at the time this command is executed on a [VkDevice](#)
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07966  
If **image** is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single [VkDeviceMemory](#) object
- VUID-VkCopyDeviceMemoryImageInfoKHR-imageSubresource-07967  
The **imageSubresource.mipLevel** member of each element of **pRegions** **must** be less than the **mipLevels** specified in [VkImageCreateInfo](#) when **image** was created
- VUID-VkCopyDeviceMemoryImageInfoKHR-imageSubresource-07968  
If **imageSubresource.layerCount** is not [VK\\_REMAINING\\_ARRAY\\_LAYERS](#), **imageSubresource.baseArrayLayer** + **imageSubresource.layerCount** of each element of **pRegions** **must** be less than or equal to the **arrayLayers** specified in [VkImageCreateInfo](#) when **image** was created
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07969  
**image** **must** not have been created with **flags** containing [VK\\_IMAGE\\_CREATE\\_SUBSAMPLED\\_BIT\\_EXT](#)
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07973  
**image** **must** have a sample count equal to [VK\\_SAMPLE\\_COUNT\\_1\\_BIT](#)
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07979  
If **image** is of type [VK\\_IMAGE\\_TYPE\\_1D](#), then for each element of **pRegions**, **imageOffset.y** **must** be 0 and **imageExtent.height** **must** be 1
- VUID-VkCopyDeviceMemoryImageInfoKHR-imageOffset-09104  
For each element of **pRegions**, **imageOffset.z** and **(imageExtent.depth + imageOffset.z)** **must** both be greater than or equal to 0 and less than or equal to the depth of the specified **imageSubresource** of **image**
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07980  
If **image** is of type [VK\\_IMAGE\\_TYPE\\_1D](#) or [VK\\_IMAGE\\_TYPE\\_2D](#), then for each element of

`pRegions`, `imageOffset.z` **must** be 0 and `imageExtent.depth` **must** be 1

- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07274  
For each element of `pRegions`, `imageOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07275  
For each element of `pRegions`, `imageOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07276  
For each element of `pRegions`, `imageOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-00207  
For each element of `pRegions`, if the sum of `imageOffset.x` and `extent.width` does not equal the width of the subresource specified by `imageSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-00208  
For each element of `pRegions`, if the sum of `imageOffset.y` and `extent.height` does not equal the height of the subresource specified by `imageSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-00209  
For each element of `pRegions`, if the sum of `imageOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-imageSubresource-09105  
For each element of `pRegions`, `imageSubresource.aspectMask` **must** specify aspects present in `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07981  
If `image` has a `multi-planar format`, then for each element of `pRegions`, `imageSubresource.aspectMask` **must** be a single valid `multi-planar aspect mask` bit
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-07983  
If `image` is of type `VK_IMAGE_TYPE_3D`, for each element of `pRegions`, `imageSubresource.baseArrayLayer` **must** be 0 and `imageSubresource.layerCount` **must** be 1
- VUID-VkCopyDeviceMemoryImageInfoKHR-addressRowLength-09106  
For each element of `pRegions`, `addressRowLength` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-addressImageHeight-09107  
For each element of `pRegions`, `addressImageHeight` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `image`
- VUID-VkCopyDeviceMemoryImageInfoKHR-addressRowLength-09108  
For each element of `pRegions`, `addressRowLength` divided by the `texel block extent width` and then multiplied by the texel block size of `image` **must** be less than or equal to  $2^{31}-1$
- VUID-VkCopyDeviceMemoryImageInfoKHR-image-13029  
If `image` does not have either a depth/stencil format or a `multi-planar format`, then for

each element of **pRegions**, **addressRange.address** **must** be a multiple of the **texel block size**

- VUID-VkCopyDeviceMemoryImageInfoKHR-image-13030

If **image** has a **multi-planar format**, then for each element of **pRegions**, **addressRange.address** **must** be a multiple of the element size of the compatible format for the format and the **aspectMask** of the **imageSubresource** as defined in **Compatible Formats of Planes of Multi-Planar Formats**

- VUID-VkCopyDeviceMemoryImageInfoKHR-image-13031

If **image** has a depth/stencil format, the **addressRange.address** member of any element of **pRegions** **must** be a multiple of 4

- VUID-VkCopyDeviceMemoryImageInfoKHR-pRegions-13032

The image region specified by each element of **pRegions** **must** be contained within the specified **imageSubresource** of **image**

## Valid Usage (Implicit)

- VUID-VkCopyDeviceMemoryImageInfoKHR-sType-sType

**sType** **must** be **VK\_STRUCTURE\_TYPE\_COPY\_DEVICE\_MEMORY\_IMAGE\_INFO\_KHR**

- VUID-VkCopyDeviceMemoryImageInfoKHR-pNext-pNext

**pNext** **must** be **NULL**

- VUID-VkCopyDeviceMemoryImageInfoKHR-image-parameter

**image** **must** be a valid **VkImage** handle

- VUID-VkCopyDeviceMemoryImageInfoKHR-pRegions-parameter

**pRegions** **must** be a valid pointer to an array of **regionCount** valid **VkDeviceMemoryImageCopyKHR** structures

- VUID-VkCopyDeviceMemoryImageInfoKHR-regionCount-arraylength

**regionCount** **must** be greater than 0

The **VkDeviceMemoryImageCopyKHR** structure is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkDeviceMemoryImageCopyKHR {
    VkStructureType      sType;
    const void*          pNext;
    VkDeviceAddressRangeKHR addressRange;
    VkAddressCommandFlagsKHR addressFlags;
    uint32_t             addressRowLength;
    uint32_t             addressImageHeight;
    VkImageSubresourceLayers imageSubresource;
    VkImageLayout         imageLayout;
    VkOffset3D            imageOffset;
    VkExtent3D            imageExtent;
} VkDeviceMemoryImageCopyKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `addressRange` is a `VkDeviceAddressRangeKHR` structure defining the address range accessed by the copy operation.
- `addressFlags` is a `VkAddressCommandFlagsKHR` value defining the copy flags for the source address range.
- `addressRowLength` specifies the total number of texels in the address range representing a row of texels in the x dimension. Each new row of pixels in the copy will be read at an offset increment by this number of texels.
- `addressImageHeight` specifies the total number of rows of texels in the address range representing a 2D slice of texels in the x and y dimensions. Each new 2D slice of pixels in the copy will be read at an offset increment by this number of rows of texels.
- `imageSubresource` is a `VkImageSubresourceLayers` used to specify the specific image subresources of the image used for the source or destination image data.
- `imageLayout` is the `VkImageLayout` of the image subresource accessed by this copy.
- `imageOffset` selects the initial `x`, `y`, `z` offsets in texels of the sub-region of the source or destination image data.
- `imageExtent` is the size in texels of the image to copy in `width`, `height` and `depth`.

This structure defines a copy operation where `srcRange.size` bytes will be copied from `srcRange.address` to `dstRange.address`.

### Valid Usage

- VUID-VkDeviceMemoryImageCopyKHR-addressRange-13097  
If the range specified by `addressRange` is not bound completely to memory when accessed, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR`
- VUID-VkDeviceMemoryImageCopyKHR-addressRange-13098  
If the buffer from which the range specified by `addressRange` was created with `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `addressFlags` **must** include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkDeviceMemoryImageCopyKHR-addressRange-13099  
If the buffer from which the range specified by `addressRange` was created without `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkDeviceMemoryImageCopyKHR-addressFlags-13100  

|                                                                      |             |     |         |      |
|----------------------------------------------------------------------|-------------|-----|---------|------|
| <code>addressFlags</code>                                            | <b>must</b> | not | include | both |
| <code>VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR</code>         |             |     |         | and  |
| <code>VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR</code> |             |     |         |      |
- VUID-VkDeviceMemoryImageCopyKHR-addressRange-13122  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created with `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `addressFlags` **must** include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR`

or [VK\\_ADDRESS\\_COMMAND\\_UNKNOWN\\_STORAGE\\_BUFFER\\_USAGE\\_BIT\\_KHR](#)

- VUID-VkDeviceMemoryImageCopyKHR-addressRange-13123

If any buffer, which is bound to a range of [VkDeviceMemory](#) that overlaps the range backing [addressRange](#), was created without [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#), [addressFlags](#) **must** not include [VK\\_ADDRESS\\_COMMAND\\_STORAGE\\_BUFFER\\_USAGE\\_BIT\\_KHR](#)

- VUID-VkDeviceMemoryImageCopyKHR-addressFlags-13101

[addressFlags](#) **must** not include both [VK\\_ADDRESS\\_COMMAND\\_TRANSFORM\\_FEEDBACK\\_BUFFER\\_USAGE\\_BIT\\_KHR](#) and [VK\\_ADDRESS\\_COMMAND\\_UNKNOWN\\_TRANSFORM\\_FEEDBACK\\_BUFFER\\_USAGE\\_BIT\\_KHR](#)

- VUID-VkDeviceMemoryImageCopyKHR-addressRange-13124

If any buffer, which is bound to a range of [VkDeviceMemory](#) that overlaps the range backing [addressRange](#), was created with [VK\\_BUFFER\\_USAGE\\_TRANSFORM\\_FEEDBACK\\_BUFFER\\_BIT\\_EXT](#), [addressFlags](#) **must** include [VK\\_ADDRESS\\_COMMAND\\_TRANSFORM\\_FEEDBACK\\_BUFFER\\_USAGE\\_BIT\\_KHR](#) or [VK\\_ADDRESS\\_COMMAND\\_UNKNOWN\\_TRANSFORM\\_FEEDBACK\\_BUFFER\\_USAGE\\_BIT\\_KHR](#)

- VUID-VkDeviceMemoryImageCopyKHR-addressRange-13125

If any buffer, which is bound to a range of [VkDeviceMemory](#) that overlaps the range backing [addressRange](#), was created without [VK\\_BUFFER\\_USAGE\\_TRANSFORM\\_FEEDBACK\\_BUFFER\\_BIT\\_EXT](#), [addressFlags](#) **must** not include [VK\\_ADDRESS\\_COMMAND\\_TRANSFORM\\_FEEDBACK\\_BUFFER\\_USAGE\\_BIT\\_KHR](#)

- VUID-VkDeviceMemoryImageCopyKHR-size-13037

The [size](#) member of [addressRange](#) **must** be large enough to contain all address locations that are accessed by this copy according to [Buffer and Image Addressing](#)

- VUID-VkDeviceMemoryImageCopyKHR-addressRowLength-09101

[addressRowLength](#) **must** be 0, or greater than or equal to the [width](#) member of [imageExtent](#)

- VUID-VkDeviceMemoryImageCopyKHR-addressImageHeight-09102

[addressImageHeight](#) **must** be 0, or greater than or equal to the [height](#) member of [imageExtent](#)

- VUID-VkDeviceMemoryImageCopyKHR-aspectMask-09103

The [aspectMask](#) member of [imageSubresource](#) **must** only have a single bit set

- VUID-VkDeviceMemoryImageCopyKHR-imageExtent-06659

[imageExtent.width](#) **must** not be 0

- VUID-VkDeviceMemoryImageCopyKHR-imageExtent-06660

[imageExtent.height](#) **must** not be 0

- VUID-VkDeviceMemoryImageCopyKHR-imageExtent-06661

[imageExtent.depth](#) **must** not be 0

### Valid Usage (Implicit)

- VUID-VkDeviceMemoryImageCopyKHR-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_DEVICE_MEMORY_IMAGE_COPY_KHR`
- VUID-VkDeviceMemoryImageCopyKHR-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkDeviceMemoryImageCopyKHR-addressFlags-parameter  
If `addressFlags` is not `0`, `addressFlags` **must** be a valid combination of `VkAddressCommandFlagBitsKHR` values
- VUID-VkDeviceMemoryImageCopyKHR-imageSubresource-parameter  
`imageSubresource` **must** be a valid `VkImageSubresourceLayers` structure
- VUID-VkDeviceMemoryImageCopyKHR-imageLayout-parameter  
`imageLayout` **must** be a valid `VkImageLayout` value

## 24.5. Copying Data Between Buffers and Images

Data **can** be copied between buffers and images, enabling applications to load and store data between images and application-defined offsets in buffer memory.

When copying between an address or a buffer and an image, texels in the image and bytes in memory are accessed as follows.

Texels at each coordinate (x,y,z,layer) in a image subresource are accessed, where:

x is in the range [`imageOffset.x`, `imageOffset.x` + `imageExtent.width`),

y is in the range [`imageOffset.y`, `imageOffset.y` + `imageExtent.height`),

z is in the range [`imageOffset.z`, `imageOffset.z` + `imageExtent.depth`),

layer is in the range [`imageSubresource.baseArrayLayer`, `imageSubresource.baseArrayLayer` + `imageSubresource.layerCount`)

For each (x,y,z,layer) coordinate in the image, bytes in memory are accessed at offsets in the range [`texelOffset`, `texelOffset` + `blockSize`), where:

$$\text{texelOffset} = \text{baseAddress} + ((x - \text{imageOffset.x}) / \text{blockWidth} \times \text{blockSize}) + ((y - \text{imageOffset.y}) / \text{blockHeight} \times \text{rowExtent}) + ((z - \text{imageOffset.z}) / \text{blockDepth} \times \text{sliceExtent}) + ((\text{layer} - \text{imageSubresource.baseArrayLayer}) \times \text{layerExtent})$$

$\text{rowExtent} = \lceil \max(\text{bufferRowLength}, \text{imageExtent.width}) / \text{blockWidth} \rceil \times \text{blockSize}$

$\text{sliceExtent} = \lceil \max(\text{bufferImageHeight}, \text{imageExtent.height}) / \text{blockHeight} \rceil \times \text{rowExtent}$

$\text{layerExtent} = \lceil \text{imageExtent.depth} / \text{blockDepth} \rceil \times \text{sliceExtent}$

and where blockSize, blockWidth, blockHeight, and blockDepth are the [texel block size and extents](#) of the image’s format, and baseAddress is either the supplied address for the copy, or the address of the buffer plus any supplied [bufferOffset](#) value.

When copying between a buffer and the depth or stencil aspect of an image, data in the buffer is assumed to be laid out as separate planes rather than interleaved. Addressing calculations are thus performed for a different format than the base image, according to the aspect, as described in the following table:

Table 30. Depth/Stencil Aspect Copy

| Base Format                                   | Depth Aspect Format                           | Stencil Aspect Format             |
|-----------------------------------------------|-----------------------------------------------|-----------------------------------|
| <a href="#">VK_FORMAT_D16_UNORM</a>           | <a href="#">VK_FORMAT_D16_UNORM</a>           | -                                 |
| <a href="#">VK_FORMAT_X8_D24_UNORM_PACK32</a> | <a href="#">VK_FORMAT_X8_D24_UNORM_PACK32</a> | -                                 |
| <a href="#">VK_FORMAT_D32_SFLOAT</a>          | <a href="#">VK_FORMAT_D32_SFLOAT</a>          | -                                 |
| <a href="#">VK_FORMAT_S8_UINT</a>             | -                                             | <a href="#">VK_FORMAT_S8_UINT</a> |
| <a href="#">VK_FORMAT_D16_UNORM_S8_UINT</a>   | <a href="#">VK_FORMAT_D16_UNORM</a>           | <a href="#">VK_FORMAT_S8_UINT</a> |
| <a href="#">VK_FORMAT_D24_UNORM_S8_UINT</a>   | <a href="#">VK_FORMAT_X8_D24_UNORM_PACK32</a> | <a href="#">VK_FORMAT_S8_UINT</a> |
| <a href="#">VK_FORMAT_D32_SFLOAT_S8_UINT</a>  | <a href="#">VK_FORMAT_D32_SFLOAT</a>          | <a href="#">VK_FORMAT_S8_UINT</a> |

When copying between a buffer and any plane of a [multi-planar image](#), addressing calculations are performed using the [compatible format for that plane](#), rather than the format of the multi-planar image.

Each texel block is copied from one resource to the other according to the above addressing equations.

The memory locations accessed by a buffer and image overlap if they [alias each other](#), the [imageSubresource](#) overlaps the aliased range, and either: \* their contents are not interpreted in consistent ways, or \* their accessed regions defined above overlap, where the memory locations accessed by the texels of a [linear image](#) is according to its [VkSubresourceLayout](#)

The memory locations of an image overlap if those two ranges share any of the same texel coordinates in the same image aspects.

To copy data from a buffer object to an image object, call:

```
// Provided by VK_VERSION_1_0
void vkCmdCopyBufferToImage(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 srcBuffer,
    VkImage                  dstImage,
    VkImageLayout            dstImageLayout,
    uint32_t                 regionCount,
    const VkBufferImageCopy* pRegions);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **srcBuffer** is the source buffer.
- **dstImage** is the destination image.
- **dstImageLayout** is the layout of the destination image subresources for the copy.
- **regionCount** is the number of regions to copy.
- **pRegions** is a pointer to an array of **VkBufferImageCopy** structures specifying the regions to copy.

Each source region specified by **pRegions** is copied from the source buffer to the destination region of the destination image according to the **addressing calculations** for each resource. If any region accesses a depth aspect in **dstImage** and the **VK\_EXT\_depth\_range\_unrestricted** extension is not enabled, values copied from **srcBuffer** outside of the range [0,1] will be written as undefined values to the destination image.

Copy regions for the image **must** be aligned to a multiple of the texel block extent in each dimension, except at the edges of the image, where region extents **must** match the edge of the image.

### Valid Usage

- VUID-vkCmdCopyBufferToImage-dstImage-07966  
If **dstImage** is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single **VkDeviceMemory** object
- VUID-vkCmdCopyBufferToImage-imageSubresource-07967  
The **imageSubresource.mipLevel** member of each element of **pRegions** **must** be less than the **mipLevels** specified in **VkImageCreateInfo** when **dstImage** was created
- VUID-vkCmdCopyBufferToImage-imageSubresource-07968  
If **imageSubresource.layerCount** is not **VK\_REMAINING\_ARRAY\_LAYERS**, **imageSubresource.baseArrayLayer** + **imageSubresource.layerCount** of each element of **pRegions** **must** be less than or equal to the **arrayLayers** specified in **VkImageCreateInfo** when **dstImage** was created
- VUID-vkCmdCopyBufferToImage-dstImage-07969  
**dstImage** **must** not have been created with **flags** containing **VK\_IMAGE\_CREATE\_SUBSAMPLED\_BIT\_EXT**

- VUID-vkCmdCopyBufferToImage-imageSubresource-07971  
For each element of `pRegions`, `imageOffset.x` and `(imageExtent.width + imageOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `imageSubresource` of `dstImage`
- VUID-vkCmdCopyBufferToImage-imageSubresource-07972  
For each element of `pRegions`, `imageOffset.y` and `(imageExtent.height + imageOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `imageSubresource` of `dstImage`
- VUID-vkCmdCopyBufferToImage-dstImage-07973  
`dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-vkCmdCopyBufferToImage-commandBuffer-01828  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcBuffer` **must** not be a protected buffer
- VUID-vkCmdCopyBufferToImage-commandBuffer-01829  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdCopyBufferToImage-commandBuffer-01830  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image
- VUID-vkCmdCopyBufferToImage-commandBuffer-07737  
If the `maintenance11` feature is not enabled, and the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` or `VK_QUEUE_COMPUTE_BIT`, the `bufferOffset` member of any element of `pRegions` **must** be a multiple of 4
- VUID-vkCmdCopyBufferToImage-imageOffset-07738  
The `imageOffset` and `imageExtent` members of each element of `pRegions` **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in `VkQueueFamilyProperties`
- VUID-vkCmdCopyBufferToImage-commandBuffer-07739  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, and the `maintenance10` feature is not enabled, for each element of `pRegions`, the `aspectMask` member of `imageSubresource` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`
- VUID-vkCmdCopyBufferToImage-commandBuffer-11778  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the `format` features of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_COMPUTE_QUEUE_BIT_KHR`
- VUID-vkCmdCopyBufferToImage-commandBuffer-11779  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pRegions` the `aspectMask`

member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the `format features` of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyBufferToImage-commandBuffer-11780

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the `format features` of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyBufferToImage-commandBuffer-11781

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the `format features` of `dstImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyBufferToImage-pRegions-00171

`srcBuffer` **must** be large enough to contain all buffer locations that are accessed according to [Buffer and Image Addressing](#), for each element of `pRegions`

- VUID-vkCmdCopyBufferToImage-pRegions-00173

Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified in `pRegions` and accessed according to [Buffer and Image Addressing](#)

- VUID-vkCmdCopyBufferToImage-pRegions-12483

Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by `pRegions` and accessed according to [Buffer and Image Addressing](#)

- VUID-vkCmdCopyBufferToImage-srcBuffer-00174

`srcBuffer` **must** have been created with the `VK_BUFFER_USAGE_TRANSFER_SRC_BIT` usage flag set

- VUID-vkCmdCopyBufferToImage-dstImage-01997

The `format features` of `dstImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_DST_BIT`

- VUID-vkCmdCopyBufferToImage-srcBuffer-00176

If `srcBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-vkCmdCopyBufferToImage-dstImage-00177

`dstImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set

- VUID-vkCmdCopyBufferToImage-dstImageLayout-00180

`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`

- VUID-vkCmdCopyBufferToImage-dstImageLayout-01396

`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`,

VK\_IMAGE\_LAYOUT\_TRANSFER\_DST\_OPTIMAL, or VK\_IMAGE\_LAYOUT\_GENERAL

- VUID-vkCmdCopyBufferToImage-pRegions-07931  
If VK\_EXT\_depth\_range\_unrestricted is not enabled, for each element of pRegions whose imageSubresource contains a depth aspect, the data in srcBuffer **must** be in the range [0,1]
- VUID-vkCmdCopyBufferToImage-dstImage-07979  
If dstImage is of type VK\_IMAGE\_TYPE\_1D, then for each element of pRegions, imageOffset.y **must** be 0 and imageExtent.height **must** be 1
- VUID-vkCmdCopyBufferToImage-imageOffset-09104  
For each element of pRegions, imageOffset.z and (imageExtent.depth + imageOffset.z) **must** both be greater than or equal to 0 and less than or equal to the depth of the specified imageSubresource of dstImage
- VUID-vkCmdCopyBufferToImage-dstImage-07980  
If dstImage is of type VK\_IMAGE\_TYPE\_1D or VK\_IMAGE\_TYPE\_2D, then for each element of pRegions, imageOffset.z **must** be 0 and imageExtent.depth **must** be 1
- VUID-vkCmdCopyBufferToImage-dstImage-07274  
For each element of pRegions, imageOffset.x **must** be a multiple of the texel block extent width of the VkFormat of dstImage
- VUID-vkCmdCopyBufferToImage-dstImage-07275  
For each element of pRegions, imageOffset.y **must** be a multiple of the texel block extent height of the VkFormat of dstImage
- VUID-vkCmdCopyBufferToImage-dstImage-07276  
For each element of pRegions, imageOffset.z **must** be a multiple of the texel block extent depth of the VkFormat of dstImage
- VUID-vkCmdCopyBufferToImage-dstImage-00207  
For each element of pRegions, if the sum of imageOffset.x and extent.width does not equal the width of the subresource specified by imageSubresource, extent.width **must** be a multiple of the texel block extent width of the VkFormat of dstImage
- VUID-vkCmdCopyBufferToImage-dstImage-00208  
For each element of pRegions, if the sum of imageOffset.y and extent.height does not equal the height of the subresource specified by imageSubresource, extent.height **must** be a multiple of the texel block extent height of the VkFormat of dstImage
- VUID-vkCmdCopyBufferToImage-dstImage-00209  
For each element of pRegions, if the sum of imageOffset.z and extent.depth does not equal the depth of the subresource specified by srcSubresource, extent.depth **must** be a multiple of the texel block extent depth of the VkFormat of dstImage
- VUID-vkCmdCopyBufferToImage-imageSubresource-09105  
For each element of pRegions, imageSubresource.aspectMask **must** specify aspects present in dstImage
- VUID-vkCmdCopyBufferToImage-dstImage-07981  
If dstImage has a multi-planar format, then for each element of pRegions, imageSubresource.aspectMask **must** be a single valid multi-planar aspect mask bit
- VUID-vkCmdCopyBufferToImage-dstImage-07983

If `dstImage` is of type `VK_IMAGE_TYPE_3D`, for each element of `pRegions`, `imageSubresource.baseArrayLayer` **must** be 0 and `imageSubresource.layerCount` **must** be 1

- VUID-vkCmdCopyBufferToImage-bufferRowLength-09106  
For each element of `pRegions`, `bufferRowLength` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-vkCmdCopyBufferToImage-bufferImageHeight-09107  
For each element of `pRegions`, `bufferImageHeight` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `dstImage`
- VUID-vkCmdCopyBufferToImage-bufferRowLength-09108  
For each element of `pRegions`, `bufferRowLength` divided by the `texel block extent width` and then multiplied by the texel block size of `dstImage` **must** be less than or equal to  $2^{31}-1$
- VUID-vkCmdCopyBufferToImage-dstImage-07975  
If `dstImage` does not have either a depth/stencil format or a `multi-planar format`, then for each element of `pRegions`, `bufferOffset` **must** be a multiple of the `texel block size`
- VUID-vkCmdCopyBufferToImage-dstImage-07976  
If `dstImage` has a `multi-planar format`, then for each element of `pRegions`, `bufferOffset` **must** be a multiple of the element size of the compatible format for the format and the `aspectMask` of the `imageSubresource` as defined in `Compatible Formats of Planes of Multi-Planar Formats`
- VUID-vkCmdCopyBufferToImage-dstImage-07978  
If `dstImage` has a depth/stencil format, the `bufferOffset` member of any element of `pRegions` **must** be a multiple of 4

## Valid Usage (Implicit)

- VUID-vkCmdCopyBufferToImage-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyBufferToImage-srcBuffer-parameter  
`srcBuffer` **must** be a valid `VkBuffer` handle
- VUID-vkCmdCopyBufferToImage-dstImage-parameter  
`dstImage` **must** be a valid `VkImage` handle
- VUID-vkCmdCopyBufferToImage-dstImageLayout-parameter  
`dstImageLayout` **must** be a valid `VkImageLayout` value
- VUID-vkCmdCopyBufferToImage-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkBufferImageCopy` structures
- VUID-vkCmdCopyBufferToImage-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdCopyBufferToImage-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT`

operations

- VUID-vkCmdCopyBufferToImage-renderpass

This command **must** only be called outside of a render pass instance

- VUID-vkCmdCopyBufferToImage-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdCopyBufferToImage-videocoding

This command **must** only be called outside of a video coding scope

- VUID-vkCmdCopyBufferToImage-regionCount-arraylength

**regionCount** **must** be greater than 0

- VUID-vkCmdCopyBufferToImage-commonparent

Each of **commandBuffer**, **dstImage**, and **srcBuffer** **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

vkCmdCopyBufferToImage is not affected by **conditional rendering**

To copy data from an image object to a buffer object, call:

```
// Provided by VK_VERSION_1_0
void vkCmdCopyImageToBuffer(
    VkCommandBuffer          commandBuffer,
    VkImage                  srcImage,
    VkImageLayout             srcImageLayout,
    VkBuffer                  dstBuffer,
    uint32_t                  regionCount,
    const VkBufferImageCopy* pRegions);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **srcImage** is the source image.
- **srcImageLayout** is the layout of the source image subresources for the copy.
- **dstBuffer** is the destination buffer.
- **regionCount** is the number of regions to copy.
- **pRegions** is a pointer to an array of **VkBufferImageCopy** structures specifying the regions to copy.

Each source region specified by **pRegions** is copied from the source image to the destination region of the destination buffer according to the **addressing calculations** for each resource.

Copy regions for the image **must** be aligned to a multiple of the texel block extent in each dimension, except at the edges of the image, where region extents **must** match the edge of the image.

## Valid Usage

- VUID-vkCmdCopyImageToBuffer-srcImage-07966  
If **srcImage** is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single **VkDeviceMemory** object
- VUID-vkCmdCopyImageToBuffer-imageSubresource-07967  
The **imageSubresource.mipLevel** member of each element of **pRegions** **must** be less than the **mipLevels** specified in **VkImageCreateInfo** when **srcImage** was created
- VUID-vkCmdCopyImageToBuffer-imageSubresource-07968  
If **imageSubresource.layerCount** is not **VK\_REMAINING\_ARRAY\_LAYERS**, **imageSubresource.baseArrayLayer** + **imageSubresource.layerCount** of each element of **pRegions** **must** be less than or equal to the **arrayLayers** specified in **VkImageCreateInfo** when **srcImage** was created
- VUID-vkCmdCopyImageToBuffer-srcImage-07969  
**srcImage** **must** not have been created with **flags** containing **VK\_IMAGE\_CREATE\_SUBSAMPLED\_BIT\_EXT**
- VUID-vkCmdCopyImageToBuffer-imageSubresource-07971  
For each element of **pRegions**, **imageOffset.x** and **(imageExtent.width + imageOffset.x)** **must** both be greater than or equal to **0** and less than or equal to the width of the specified **imageSubresource** of **srcImage**

- VUID-vkCmdCopyImageToBuffer-imageSubresource-07972  
For each element of `pRegions`, `imageOffset.y` and `(imageExtent.height + imageOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `imageSubresource` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-07973  
`srcImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-vkCmdCopyImageToBuffer-commandBuffer-01831  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdCopyImageToBuffer-commandBuffer-01832  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstBuffer` **must** not be a protected buffer
- VUID-vkCmdCopyImageToBuffer-commandBuffer-01833  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstBuffer` **must** not be an unprotected buffer
- VUID-vkCmdCopyImageToBuffer-commandBuffer-07746  
If the `maintenance11` feature is not enabled, and the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` or `VK_QUEUE_COMPUTE_BIT`, the `bufferOffset` member of any element of `pRegions` **must** be a multiple of 4
- VUID-vkCmdCopyImageToBuffer-imageOffset-07747  
The `imageOffset` and `imageExtent` members of each element of `pRegions` **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in `VkQueueFamilyProperties`
- VUID-vkCmdCopyImageToBuffer-commandBuffer-10216  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, and the `maintenance10` feature is not enabled, for each element of `pRegions`, the `aspectMask` member of `imageSubresource` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`
- VUID-vkCmdCopyImageToBuffer-commandBuffer-11790  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_COMPUTE_QUEUE_BIT_KHR`
- VUID-vkCmdCopyImageToBuffer-commandBuffer-11791  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_TRANSFER_QUEUE_BIT_KHR`
- VUID-vkCmdCopyImageToBuffer-commandBuffer-11792

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImageToBuffer-commandBuffer-11793

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImageToBuffer-pRegions-00183

`dstBuffer` **must** be large enough to contain all buffer locations that are accessed according to [Buffer and Image Addressing](#), for each element of `pRegions`

- VUID-vkCmdCopyImageToBuffer-pRegions-00184

Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified in `pRegions` and accessed according to [Buffer and Image Addressing](#)

- VUID-vkCmdCopyImageToBuffer-pRegions-12485

Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by `pRegions` and accessed according to [Buffer and Image Addressing](#)

- VUID-vkCmdCopyImageToBuffer-srcImage-00186

`srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set

- VUID-vkCmdCopyImageToBuffer-srcImage-01998

The `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_SRC_BIT`

- VUID-vkCmdCopyImageToBuffer-dstBuffer-00191

`dstBuffer` **must** have been created with the `VK_BUFFER_USAGE_TRANSFER_DST_BIT` usage flag set

- VUID-vkCmdCopyImageToBuffer-dstBuffer-00192

If `dstBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-vkCmdCopyImageToBuffer-srcImageLayout-00189

`srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`

- VUID-vkCmdCopyImageToBuffer-srcImageLayout-01397

`srcImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL`, or `VK_IMAGE_LAYOUT_GENERAL`

- VUID-vkCmdCopyImageToBuffer-srcImage-07979

If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `imageOffset.y` **must** be 0 and `imageExtent.height` **must** be 1

- VUID-vkCmdCopyImageToBuffer-imageOffset-09104  
For each element of `pRegions`, `imageOffset.z` and `(imageExtent.depth + imageOffset.z)` **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `imageSubresource` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-07980  
If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `imageOffset.z` **must** be `0` and `imageExtent.depth` **must** be `1`
- VUID-vkCmdCopyImageToBuffer-srcImage-07274  
For each element of `pRegions`, `imageOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-07275  
For each element of `pRegions`, `imageOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-07276  
For each element of `pRegions`, `imageOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-00207  
For each element of `pRegions`, if the sum of `imageOffset.x` and `extent.width` does not equal the width of the subresource specified by `imageSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-00208  
For each element of `pRegions`, if the sum of `imageOffset.y` and `extent.height` does not equal the height of the subresource specified by `imageSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-00209  
For each element of `pRegions`, if the sum of `imageOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-imageSubresource-09105  
For each element of `pRegions`, `imageSubresource.aspectMask` **must** specify aspects present in `srcImage`
- VUID-vkCmdCopyImageToBuffer-srcImage-07981  
If `srcImage` has a `multi-planar format`, then for each element of `pRegions`, `imageSubresource.aspectMask` **must** be a single valid `multi-planar aspect mask` bit
- VUID-vkCmdCopyImageToBuffer-srcImage-07983  
If `srcImage` is of type `VK_IMAGE_TYPE_3D`, for each element of `pRegions`, `imageSubresource.baseArrayLayer` **must** be `0` and `imageSubresource.layerCount` **must** be `1`
- VUID-vkCmdCopyImageToBuffer-bufferRowLength-09106  
For each element of `pRegions`, `bufferRowLength` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`
- VUID-vkCmdCopyImageToBuffer-bufferImageHeight-09107  
For each element of `pRegions`, `bufferImageHeight` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`

- VUID-vkCmdCopyImageToBuffer-bufferRowLength-09108  
For each element of `pRegions`, `bufferRowLength` divided by the `texel block extent width` and then multiplied by the texel block size of `srcImage` **must** be less than or equal to  $2^{31}-1$
- VUID-vkCmdCopyImageToBuffer-srcImage-07975  
If `srcImage` does not have either a depth/stencil format or a `multi-planar format`, then for each element of `pRegions`, `bufferOffset` **must** be a multiple of the `texel block size`
- VUID-vkCmdCopyImageToBuffer-srcImage-07976  
If `srcImage` has a `multi-planar format`, then for each element of `pRegions`, `bufferOffset` **must** be a multiple of the element size of the compatible format for the format and the `aspectMask` of the `imageSubresource` as defined in `Compatible Formats of Planes of Multi-Planar Formats`
- VUID-vkCmdCopyImageToBuffer-srcImage-07978  
If `srcImage` has a depth/stencil format, the `bufferOffset` member of any element of `pRegions` **must** be a multiple of 4

### Valid Usage (Implicit)

- VUID-vkCmdCopyImageToBuffer-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyImageToBuffer-srcImage-parameter  
`srcImage` **must** be a valid `VkImage` handle
- VUID-vkCmdCopyImageToBuffer-srcImageLayout-parameter  
`srcImageLayout` **must** be a valid `VkImageLayout` value
- VUID-vkCmdCopyImageToBuffer-dstBuffer-parameter  
`dstBuffer` **must** be a valid `VkBuffer` handle
- VUID-vkCmdCopyImageToBuffer-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkBufferImageCopy` structures
- VUID-vkCmdCopyImageToBuffer-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdCopyImageToBuffer-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations
- VUID-vkCmdCopyImageToBuffer-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyImageToBuffer-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyImageToBuffer-videocoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdCopyImageToBuffer-regionCount-arraylength

`regionCount` **must** be greater than 0

- VUID-vkCmdCopyImageToBuffer-commonparent

Each of `commandBuffer`, `dstBuffer`, and `srcImage` **must** have been created, allocated, or retrieved from the same `VkDevice`

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyImageToBuffer` is not affected by [conditional rendering](#)

For both `vkCmdCopyBufferToImage` and `vkCmdCopyImageToBuffer`, each element of `pRegions` is a structure defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkBufferImageCopy {
    VkDeviceSize    bufferOffset;
    uint32_t        bufferRowLength;
    uint32_t        bufferImageHeight;
    VkImageSubresourceLayers imageSubresource;
    VkOffset3D      imageOffset;
    VkExtent3D      imageExtent;
} VkBufferImageCopy;
```

- `bufferOffset` is the offset in bytes from the start of the buffer object where the image data is copied from or to.
- `bufferRowLength` and `bufferImageHeight` specify in texels a subregion of a larger two- or three-

dimensional image in buffer memory, and control the addressing calculations. If either of these values is zero, that aspect of the buffer memory is considered to be tightly packed according to the `imageExtent`.

- `imageSubresource` is a `VkImageSubresourceLayers` used to specify the specific image subresources of the image used for the source or destination image data.
- `imageOffset` selects the initial `x`, `y`, `z` offsets in texels of the sub-region of the source or destination image data.
- `imageExtent` is the size in texels of the image to copy in `width`, `height` and `depth`.

### Valid Usage

- VUID-VkBufferImageCopy-bufferRowLength-09101  
`bufferRowLength` **must** be 0, or greater than or equal to the `width` member of `imageExtent`
- VUID-VkBufferImageCopy-bufferImageHeight-09102  
`bufferImageHeight` **must** be 0, or greater than or equal to the `height` member of `imageExtent`
- VUID-VkBufferImageCopy-aspectMask-09103  
The `aspectMask` member of `imageSubresource` **must** only have a single bit set
- VUID-VkBufferImageCopy-imageExtent-06659  
`imageExtent.width` **must** not be 0
- VUID-VkBufferImageCopy-imageExtent-06660  
`imageExtent.height` **must** not be 0
- VUID-VkBufferImageCopy-imageExtent-06661  
`imageExtent.depth` **must** not be 0

### Valid Usage (Implicit)

- VUID-VkBufferImageCopy-imageSubresource-parameter  
`imageSubresource` **must** be a valid `VkImageSubresourceLayers` structure

More extensible versions of the commands to copy between buffers and images are defined below.

To copy data from a buffer object to an image object, call:

```
// Provided by VK_VERSION_1_3
void vkCmdCopyBufferToImage2(
    VkCommandBuffer                      commandBuffer,
    const VkCopyBufferToImageInfo2*     pCopyBufferToImageInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdCopyBufferToImage2
void vkCmdCopyBufferToImage2KHR(
    VkCommandBuffer                                commandBuffer,
    const VkCopyBufferToImageInfo2*                pCopyBufferToImageInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pCopyBufferToImageInfo` is a pointer to a `VkCopyBufferToImageInfo2` structure describing the copy parameters.

This command is functionally identical to `vkCmdCopyBufferToImage`, but includes extensible sub-structures that include `sType` and `pNext` parameters, allowing them to be more easily extended.

## Valid Usage

- VUID-vkCmdCopyBufferToImage2-commandBuffer-01828  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcBuffer` **must** not be a protected buffer
- VUID-vkCmdCopyBufferToImage2-commandBuffer-01829  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdCopyBufferToImage2-commandBuffer-01830  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image
- VUID-vkCmdCopyBufferToImage2-commandBuffer-07737  
If the `maintenance11` feature is not enabled, and the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` or `VK_QUEUE_COMPUTE_BIT`, the `bufferOffset` member of any element of `pCopyBufferToImageInfo->pRegions` **must** be a multiple of 4
- VUID-vkCmdCopyBufferToImage2-imageOffset-07738  
The `imageOffset` and `imageExtent` members of each element of `pCopyBufferToImageInfo->pRegions` **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in `VkQueueFamilyProperties`
- VUID-vkCmdCopyBufferToImage2-commandBuffer-07739  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, and the `maintenance10` feature is not enabled, for each element of `pCopyBufferToImageInfo->pRegions`, the `aspectMask` member of `imageSubresource` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`
- VUID-vkCmdCopyBufferToImage2-commandBuffer-11778  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pCopyBufferToImageInfo->pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the

format features of dstImage must contain  
VK\_FORMAT\_FEATURE\_2\_DEPTH\_COPY\_ON\_COMPUTE\_QUEUE\_BIT\_KHR

- VUID-vkCmdCopyBufferToImage2-commandBuffer-11779

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pCopyBufferToImageInfo->pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the format features of `dstImage` must contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

- VUID-vkCmdCopyBufferToImage2-commandBuffer-11780

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pCopyBufferToImageInfo->pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `dstImage` must contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyBufferToImage2-commandBuffer-11781

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pCopyBufferToImageInfo->pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the format features of `dstImage` must contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

## Valid Usage (Implicit)

- VUID-vkCmdCopyBufferToImage2-commandBuffer-parameter

`commandBuffer` must be a valid `VkCommandBuffer` handle

- VUID-vkCmdCopyBufferToImage2-pCopyBufferToImageInfo-parameter

`pCopyBufferToImageInfo` must be a valid pointer to a valid `VkCopyBufferToImageInfo2` structure

- VUID-vkCmdCopyBufferToImage2-commandBuffer-recording

`commandBuffer` must be in the `recording state`

- VUID-vkCmdCopyBufferToImage2-commandBuffer-cmdpool

The `VkCommandPool` that `commandBuffer` was allocated from must support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations

- VUID-vkCmdCopyBufferToImage2-renderpass

This command must only be called outside of a render pass instance

- VUID-vkCmdCopyBufferToImage2-suspended

This command must not be called between suspended render pass instances

- VUID-vkCmdCopyBufferToImage2-videocoding

This command must only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyBufferToImage2` is not affected by [conditional rendering](#)

The `VkCopyBufferToImageInfo2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkCopyBufferToImageInfo2 {
    VkStructureType    sType;
    const void*        pNext;
    VkBuffer            srcBuffer;
    VkImage             dstImage;
    VkImageLayout       dstImageLayout;
    uint32_t            regionCount;
    const VkBufferImageCopy2* pRegions;
} VkCopyBufferToImageInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkCopyBufferToImageInfo2
typedef VkCopyBufferToImageInfo2 VkCopyBufferToImageInfo2KHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcBuffer` is the source buffer.

- **dstImage** is the destination image.
- **dstImageLayout** is the layout of the destination image subresources for the copy.
- **regionCount** is the number of regions to copy.
- **pRegions** is a pointer to an array of [VkBufferImageCopy2](#) structures specifying the regions to copy.

### Valid Usage

- VUID-VkCopyBufferToImageInfo2-pRegions-04565  
The image region specified by each element of **pRegions** **must** be contained within the specified **imageSubresource** of **dstImage**
- VUID-VkCopyBufferToImageInfo2-pRegions-00171  
**srcBuffer** **must** be large enough to contain all buffer locations that are accessed according to [Buffer and Image Addressing](#), for each element of **pRegions**
- VUID-VkCopyBufferToImageInfo2-pRegions-00173  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified in **pRegions** and accessed according to [Buffer and Image Addressing](#)
- VUID-VkCopyBufferToImageInfo2-pRegions-12483  
Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by **pRegions** and accessed according to [Buffer and Image Addressing](#)
- VUID-VkCopyBufferToImageInfo2-srcBuffer-00174  
**srcBuffer** **must** have been created with the [VK\\_BUFFER\\_USAGE\\_TRANSFER\\_SRC\\_BIT](#) usage flag set
- VUID-VkCopyBufferToImageInfo2-dstImage-01997  
The [format features](#) of **dstImage** **must** contain [VK\\_FORMAT\\_FEATURE\\_TRANSFER\\_DST\\_BIT](#)
- VUID-VkCopyBufferToImageInfo2-srcBuffer-00176  
If **srcBuffer** is non-sparse then it **must** be bound completely and contiguously to a single **VkDeviceMemory** object
- VUID-VkCopyBufferToImageInfo2-dstImage-00177  
**dstImage** **must** have been created with the [VK\\_IMAGE\\_USAGE\\_TRANSFER\\_DST\\_BIT](#) usage flag set
- VUID-VkCopyBufferToImageInfo2-dstImageLayout-00180  
**dstImageLayout** **must** specify the layout of the image subresources of **dstImage** specified in **pRegions** at the time this command is executed on a **VkDevice**
- VUID-VkCopyBufferToImageInfo2-dstImageLayout-01396  
**dstImageLayout** **must** be [VK\\_IMAGE\\_LAYOUT\\_SHARED\\_PRESENT\\_KHR](#), [VK\\_IMAGE\\_LAYOUT\\_TRANSFER\\_DST\\_OPTIMAL](#), or [VK\\_IMAGE\\_LAYOUT\\_GENERAL](#)
- VUID-VkCopyBufferToImageInfo2-pRegions-07931  
If [VK\\_EXT\\_depth\\_range\\_unrestricted](#) is not enabled, for each element of **pRegions** whose **imageSubresource** contains a depth aspect, the data in **srcBuffer** **must** be in the range [0,1]

- VUID-VkCopyBufferToImageInfo2-dstImage-07966  
If `dstImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkCopyBufferToImageInfo2-imageSubresource-07967  
The `imageSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-VkCopyBufferToImageInfo2-imageSubresource-07968  
If `imageSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `imageSubresource.baseArrayLayer` + `imageSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-VkCopyBufferToImageInfo2-dstImage-07969  
`dstImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`
- VUID-VkCopyBufferToImageInfo2-dstImage-07973  
`dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-VkCopyBufferToImageInfo2-dstImage-07979  
If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `imageOffset.y` **must** be 0 and `imageExtent.height` **must** be 1
- VUID-VkCopyBufferToImageInfo2-imageOffset-09104  
For each element of `pRegions`, `imageOffset.z` and `(imageExtent.depth + imageOffset.z)` **must** both be greater than or equal to 0 and less than or equal to the depth of the specified `imageSubresource` of `dstImage`
- VUID-VkCopyBufferToImageInfo2-dstImage-07980  
If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `imageOffset.z` **must** be 0 and `imageExtent.depth` **must** be 1
- VUID-VkCopyBufferToImageInfo2-dstImage-07274  
For each element of `pRegions`, `imageOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-VkCopyBufferToImageInfo2-dstImage-07275  
For each element of `pRegions`, `imageOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `dstImage`
- VUID-VkCopyBufferToImageInfo2-dstImage-07276  
For each element of `pRegions`, `imageOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`
- VUID-VkCopyBufferToImageInfo2-dstImage-00207  
For each element of `pRegions`, if the sum of `imageOffset.x` and `extent.width` does not equal the width of the subresource specified by `imageSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-VkCopyBufferToImageInfo2-dstImage-00208  
For each element of `pRegions`, if the sum of `imageOffset.y` and `extent.height` does not equal the height of the subresource specified by `imageSubresource`, `extent.height` **must** be a

multiple of the [texel block extent height](#) of the [VkFormat](#) of [dstImage](#)

- VUID-VkCopyBufferToImageInfo2-dstImage-00209

For each element of [pRegions](#), if the sum of [imageOffset.z](#) and [extent.depth](#) does not equal the depth of the subresource specified by [srcSubresource](#), [extent.depth](#) **must** be a multiple of the [texel block extent depth](#) of the [VkFormat](#) of [dstImage](#)

- VUID-VkCopyBufferToImageInfo2-imageSubresource-09105

For each element of [pRegions](#), [imageSubresource.aspectMask](#) **must** specify aspects present in [dstImage](#)

- VUID-VkCopyBufferToImageInfo2-dstImage-07981

If [dstImage](#) has a [multi-planar format](#), then for each element of [pRegions](#), [imageSubresource.aspectMask](#) **must** be a single valid [multi-planar aspect mask](#) bit

- VUID-VkCopyBufferToImageInfo2-dstImage-07983

If [dstImage](#) is of type [VK\\_IMAGE\\_TYPE\\_3D](#), for each element of [pRegions](#), [imageSubresource.baseArrayLayer](#) **must** be 0 and [imageSubresource.layerCount](#) **must** be 1

- VUID-VkCopyBufferToImageInfo2-bufferRowLength-09106

For each element of [pRegions](#), [bufferRowLength](#) **must** be a multiple of the [texel block extent width](#) of the [VkFormat](#) of [dstImage](#)

- VUID-VkCopyBufferToImageInfo2-bufferImageHeight-09107

For each element of [pRegions](#), [bufferImageHeight](#) **must** be a multiple of the [texel block extent height](#) of the [VkFormat](#) of [dstImage](#)

- VUID-VkCopyBufferToImageInfo2-bufferRowLength-09108

For each element of [pRegions](#), [bufferRowLength](#) divided by the [texel block extent width](#) and then multiplied by the texel block size of [dstImage](#) **must** be less than or equal to  $2^{31}-1$

- VUID-VkCopyBufferToImageInfo2-dstImage-07975

If [dstImage](#) does not have either a depth/stencil format or a [multi-planar format](#), then for each element of [pRegions](#), [bufferOffset](#) **must** be a multiple of the [texel block size](#)

- VUID-VkCopyBufferToImageInfo2-dstImage-07976

If [dstImage](#) has a [multi-planar format](#), then for each element of [pRegions](#), [bufferOffset](#) **must** be a multiple of the element size of the compatible format for the format and the [aspectMask](#) of the [imageSubresource](#) as defined in [Compatible Formats of Planes of Multi-Planar Formats](#)

- VUID-VkCopyBufferToImageInfo2-dstImage-07978

If [dstImage](#) has a depth/stencil format, the [bufferOffset](#) member of any element of [pRegions](#) **must** be a multiple of 4

- VUID-VkCopyBufferToImageInfo2-pRegions-06223

For each element of [pRegions](#) not containing [VkCopyCommandTransformInfoQCOM](#) in its [pNext](#) chain, [imageOffset.x](#) and ([imageExtent.width](#) + [imageOffset.x](#)) **must** both be greater than or equal to 0 and less than or equal to the width of the specified [imageSubresource](#) of [dstImage](#)

- VUID-VkCopyBufferToImageInfo2-pRegions-06224

For each element of [pRegions](#) not containing [VkCopyCommandTransformInfoQCOM](#) in its [pNext](#) chain, [imageOffset.y](#) and ([imageExtent.height](#) + [imageOffset.y](#)) **must** both be greater than or equal to 0 and less than or equal to the height of the specified [imageSubresource](#) of

dstImage

### Valid Usage (Implicit)

- VUID-VkCopyBufferToImageInfo2-sType-sType  
**sType** must be [VK\\_STRUCTURE\\_TYPE\\_COPY\\_BUFFER\\_TO\\_IMAGE\\_INFO\\_2](#)
- VUID-VkCopyBufferToImageInfo2-pNext-pNext  
**pNext** must be `NULL`
- VUID-VkCopyBufferToImageInfo2-srcBuffer-parameter  
**srcBuffer** must be a valid [VkBuffer](#) handle
- VUID-VkCopyBufferToImageInfo2-dstImage-parameter  
**dstImage** must be a valid [VkImage](#) handle
- VUID-VkCopyBufferToImageInfo2-dstImageLayout-parameter  
**dstImageLayout** must be a valid [VkImageLayout](#) value
- VUID-VkCopyBufferToImageInfo2-pRegions-parameter  
**pRegions** must be a valid pointer to an array of **regionCount** valid [VkBufferImageCopy2](#) structures
- VUID-VkCopyBufferToImageInfo2-regionCount-arraylength  
**regionCount** must be greater than 0
- VUID-VkCopyBufferToImageInfo2-commonparent  
Both of **dstImage**, and **srcBuffer** must have been created, allocated, or retrieved from the same [VkDevice](#)

To copy data from an image object to a buffer object, call:

```
// Provided by VK_VERSION_1_3
void vkCmdCopyImageToBuffer2(
    VkCommandBuffer                      commandBuffer,
    const VkCopyImageToBufferInfo2*     pCopyImageToBufferInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdCopyImageToBuffer2
void vkCmdCopyImageToBuffer2KHR(
    VkCommandBuffer                      commandBuffer,
    const VkCopyImageToBufferInfo2*     pCopyImageToBufferInfo);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **pCopyImageToBufferInfo** is a pointer to a [VkCopyImageToBufferInfo2](#) structure describing the copy parameters.

This command is functionally identical to [vkCmdCopyImageToBuffer](#), but includes extensible sub-structures that include **sType** and **pNext** parameters, allowing them to be more easily extended.

## Valid Usage

- VUID-vkCmdCopyImageToBuffer2-commandBuffer-01831  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-01832  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstBuffer` **must** not be a protected buffer
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-01833  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstBuffer` **must** not be an unprotected buffer
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-07746  
If the `maintenance11` feature is not enabled, and the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` or `VK_QUEUE_COMPUTE_BIT`, the `bufferOffset` member of any element of `pCopyImageToBufferInfo->pRegions` **must** be a multiple of 4
- VUID-vkCmdCopyImageToBuffer2-imageOffset-07747  
The `imageOffset` and `imageExtent` members of each element of `pCopyImageToBufferInfo->pRegions` **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in [VkQueueFamilyProperties](#)
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-10216  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, and the `maintenance10` feature is not enabled, for each element of `pCopyImageToBufferInfo->pRegions`, the `aspectMask` member of `imageSubresource` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-11790  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pCopyImageToBufferInfo->pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the `format` features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_COMPUTE_QUEUE_BIT_KHR`
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-11791  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pCopyImageToBufferInfo->pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_DEPTH_BIT`, then the `format` features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_DEPTH_COPY_ON_TRANSFER_QUEUE_BIT_KHR`
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-11792  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` but does support `VK_QUEUE_COMPUTE_BIT`, and in any element of `pCopyImageToBufferInfo->pRegions` the

`aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the `format` features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_COMPUTE_QUEUE_BIT_KHR`

- VUID-vkCmdCopyImageToBuffer2-commandBuffer-11793

If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT` and `VK_QUEUE_COMPUTE_BIT`, but does support `VK_QUEUE_TRANSFER_BIT`, and in any element of `pCopyImageToBufferInfo->pRegions` the `aspectMask` member of `imageSubresource` is `VK_IMAGE_ASPECT_STENCIL_BIT`, then the `format` features of `srcImage` **must** contain `VK_FORMAT_FEATURE_2_STENCIL_COPY_ON_TRANSFER_QUEUE_BIT_KHR`

## Valid Usage (Implicit)

- VUID-vkCmdCopyImageToBuffer2-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyImageToBuffer2-pCopyImageToBufferInfo-parameter  
`pCopyImageToBufferInfo` **must** be a valid pointer to a valid `VkCopyImageToBufferInfo2` structure
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdCopyImageToBuffer2-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations
- VUID-vkCmdCopyImageToBuffer2-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyImageToBuffer2-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyImageToBuffer2-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

vkCmdCopyImageToBuffer2 is not affected by [conditional rendering](#)

The `VkCopyImageToBufferInfo2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkCopyImageToBufferInfo2 {
    VkStructureType    sType;
    const void*        pNext;
    VkImage            srcImage;
    VkImageLayout      srcImageLayout;
    VkBuffer            dstBuffer;
    uint32_t           regionCount;
    const VkBufferImageCopy2* pRegions;
} VkCopyImageToBufferInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkCopyImageToBufferInfo2
typedef VkCopyImageToBufferInfo2 VkCopyImageToBufferInfo2KHR;
```

- `sType` is a [VkStructureType](#) value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcImage` is the source image.
- `srcImageLayout` is the layout of the source image subresources for the copy.
- `dstBuffer` is the destination buffer.
- `regionCount` is the number of regions to copy.
- `pRegions` is a pointer to an array of [VkBufferImageCopy2](#) structures specifying the regions to copy.

## Valid Usage

- VUID-VkCopyImageToBufferInfo2-pRegions-04566  
The image region specified by each element of **pRegions** **must** be contained within the specified **imageSubresource** of **srcImage**
- VUID-VkCopyImageToBufferInfo2-pRegions-00183  
**dstBuffer** **must** be large enough to contain all buffer locations that are accessed according to **Buffer and Image Addressing**, for each element of **pRegions**
- VUID-VkCopyImageToBufferInfo2-pRegions-00184  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified in **pRegions** and accessed according to **Buffer and Image Addressing**
- VUID-VkCopyImageToBufferInfo2-pRegions-12485  
Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by **pRegions** and accessed according to **Buffer and Image Addressing**
- VUID-VkCopyImageToBufferInfo2-srcImage-00186  
**srcImage** **must** have been created with the **VK\_IMAGE\_USAGE\_TRANSFER\_SRC\_BIT** usage flag set
- VUID-VkCopyImageToBufferInfo2-srcImage-01998  
The **format features** of **srcImage** **must** contain **VK\_FORMAT\_FEATURE\_TRANSFER\_SRC\_BIT**
- VUID-VkCopyImageToBufferInfo2-dstBuffer-00191  
**dstBuffer** **must** have been created with the **VK\_BUFFER\_USAGE\_TRANSFER\_DST\_BIT** usage flag set
- VUID-VkCopyImageToBufferInfo2-dstBuffer-00192  
If **dstBuffer** is non-sparse then it **must** be bound completely and contiguously to a single **VkDeviceMemory** object
- VUID-VkCopyImageToBufferInfo2-srcImageLayout-00189  
**srcImageLayout** **must** specify the layout of the image subresources of **srcImage** specified in **pRegions** at the time this command is executed on a **VkDevice**
- VUID-VkCopyImageToBufferInfo2-srcImageLayout-01397  
**srcImageLayout** **must** be **VK\_IMAGE\_LAYOUT\_SHARED\_PRESENT\_KHR**, **VK\_IMAGE\_LAYOUT\_TRANSFER\_SRC\_OPTIMAL**, or **VK\_IMAGE\_LAYOUT\_GENERAL**
- VUID-VkCopyImageToBufferInfo2-srcImage-07966  
If **srcImage** is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single **VkDeviceMemory** object
- VUID-VkCopyImageToBufferInfo2-imageSubresource-07967  
The **imageSubresource.mipLevel** member of each element of **pRegions** **must** be less than the **mipLevels** specified in **VkImageCreateInfo** when **srcImage** was created
- VUID-VkCopyImageToBufferInfo2-imageSubresource-07968  
If **imageSubresource.layerCount** is not **VK\_REMAINING\_ARRAY\_LAYERS**, **imageSubresource.baseArrayLayer** + **imageSubresource.layerCount** of each element of

`pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `srcImage` was created

- VUID-VkCopyImageToBufferInfo2-srcImage-07969  
`srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`
- VUID-VkCopyImageToBufferInfo2-srcImage-07973  
`srcImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-VkCopyImageToBufferInfo2-srcImage-07979  
If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `imageOffset.y` **must** be 0 and `imageExtent.height` **must** be 1
- VUID-VkCopyImageToBufferInfo2-imageOffset-09104  
For each element of `pRegions`, `imageOffset.z` and `(imageExtent.depth + imageOffset.z)` **must** both be greater than or equal to 0 and less than or equal to the depth of the specified `imageSubresource` of `srcImage`
- VUID-VkCopyImageToBufferInfo2-srcImage-07980  
If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `imageOffset.z` **must** be 0 and `imageExtent.depth` **must** be 1
- VUID-VkCopyImageToBufferInfo2-srcImage-07274  
For each element of `pRegions`, `imageOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToBufferInfo2-srcImage-07275  
For each element of `pRegions`, `imageOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToBufferInfo2-srcImage-07276  
For each element of `pRegions`, `imageOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToBufferInfo2-srcImage-00207  
For each element of `pRegions`, if the sum of `imageOffset.x` and `extent.width` does not equal the width of the subresource specified by `imageSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToBufferInfo2-srcImage-00208  
For each element of `pRegions`, if the sum of `imageOffset.y` and `extent.height` does not equal the height of the subresource specified by `imageSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToBufferInfo2-srcImage-00209  
For each element of `pRegions`, if the sum of `imageOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToBufferInfo2-imageSubresource-09105  
For each element of `pRegions`, `imageSubresource.aspectMask` **must** specify aspects present in `srcImage`
- VUID-VkCopyImageToBufferInfo2-srcImage-07981

If `srcImage` has a [multi-planar format](#), then for each element of `pRegions`, `imageSubresource.aspectMask` **must** be a single valid [multi-planar aspect mask](#) bit

- VUID-VkCopyImageToBufferInfo2-srcImage-07983

If `srcImage` is of type `VK_IMAGE_TYPE_3D`, for each element of `pRegions`, `imageSubresource.baseArrayLayer` **must** be 0 and `imageSubresource.layerCount` **must** be 1

- VUID-VkCopyImageToBufferInfo2-bufferRowLength-09106

For each element of `pRegions`, `bufferRowLength` **must** be a multiple of the [texel block extent width](#) of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToBufferInfo2-bufferImageHeight-09107

For each element of `pRegions`, `bufferImageHeight` **must** be a multiple of the [texel block extent height](#) of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToBufferInfo2-bufferRowLength-09108

For each element of `pRegions`, `bufferRowLength` divided by the [texel block extent width](#) and then multiplied by the texel block size of `srcImage` **must** be less than or equal to  $2^{31}-1$

- VUID-VkCopyImageToBufferInfo2-srcImage-07975

If `srcImage` does not have either a depth/stencil format or a [multi-planar format](#), then for each element of `pRegions`, `bufferOffset` **must** be a multiple of the [texel block size](#)

- VUID-VkCopyImageToBufferInfo2-srcImage-07976

If `srcImage` has a [multi-planar format](#), then for each element of `pRegions`, `bufferOffset` **must** be a multiple of the element size of the compatible format for the format and the `aspectMask` of the `imageSubresource` as defined in [Compatible Formats of Planes of Multi-Planar Formats](#)

- VUID-VkCopyImageToBufferInfo2-srcImage-07978

If `srcImage` has a depth/stencil format, the `bufferOffset` member of any element of `pRegions` **must** be a multiple of 4

- VUID-VkCopyImageToBufferInfo2-imageOffset-00197

For each element of `pRegions` not containing `VkCopyCommandTransformInfoQCOM` in its `pNext` chain, `imageOffset.x` and `(imageExtent.width + imageOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `imageSubresource` of `srcImage`

- VUID-VkCopyImageToBufferInfo2-imageOffset-00198

For each element of `pRegions` not containing `VkCopyCommandTransformInfoQCOM` in its `pNext` chain, `imageOffset.y` and `(imageExtent.height + imageOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `imageSubresource` of `srcImage`

## Valid Usage (Implicit)

- VUID-VkCopyImageToBufferInfo2-sType-sType

`sType` **must** be `VK_STRUCTURE_TYPE_COPY_IMAGE_TO_BUFFER_INFO_2`

- VUID-VkCopyImageToBufferInfo2-pNext-pNext

`pNext` **must** be `NULL`

- VUID-VkCopyImageToBufferInfo2-srcImage-parameter

`srcImage` **must** be a valid `VkImage` handle

- VUID-VkCopyImageToBufferInfo2-srcImageLayout-parameter  
`srcImageLayout` **must** be a valid `VkImageLayout` value
- VUID-VkCopyImageToBufferInfo2-dstBuffer-parameter  
`dstBuffer` **must** be a valid `VkBuffer` handle
- VUID-VkCopyImageToBufferInfo2-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkBufferImageCopy2` structures
- VUID-VkCopyImageToBufferInfo2-regionCount-arraylength  
`regionCount` **must** be greater than 0
- VUID-VkCopyImageToBufferInfo2-commonparent  
Both of `dstBuffer`, and `srcImage` **must** have been created, allocated, or retrieved from the same `VkDevice`

For both `vkCmdCopyBufferToImage2` and `vkCmdCopyImageToBuffer2`, each element of `pRegions` is a structure defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkBufferImageCopy2 {
    VkStructureType    sType;
    const void*        pNext;
    VkDeviceSize        bufferOffset;
    uint32_t            bufferRowLength;
    uint32_t            bufferImageHeight;
    VkImageSubresourceLayers imageSubresource;
    VkOffset3D          imageOffset;
    VkExtent3D          imageExtent;
} VkBufferImageCopy2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkBufferImageCopy2
typedef VkBufferImageCopy2 VkBufferImageCopy2KHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `bufferOffset` is the offset in bytes from the start of the buffer object where the image data is copied from or to.
- `bufferRowLength` and `bufferImageHeight` specify in texels a subregion of a larger two- or three-dimensional image in buffer memory, and control the addressing calculations. If either of these values is zero, that aspect of the buffer memory is considered to be tightly packed according to the `imageExtent`.
- `imageSubresource` is a `VkImageSubresourceLayers` used to specify the specific image

subresources of the image used for the source or destination image data.

- `imageOffset` selects the initial `x`, `y`, `z` offsets in texels of the sub-region of the source or destination image data.
- `imageExtent` is the size in texels of the image to copy in `width`, `height` and `depth`.

This structure is functionally identical to `VkBufferImageCopy`, but adds `sType` and `pNext` parameters, allowing it to be more easily extended.

### Valid Usage

- VUID-VkBufferImageCopy2-bufferRowLength-09101  
`bufferRowLength` **must** be 0, or greater than or equal to the `width` member of `imageExtent`
- VUID-VkBufferImageCopy2-bufferImageHeight-09102  
`bufferImageHeight` **must** be 0, or greater than or equal to the `height` member of `imageExtent`
- VUID-VkBufferImageCopy2-aspectMask-09103  
The `aspectMask` member of `imageSubresource` **must** only have a single bit set
- VUID-VkBufferImageCopy2-imageExtent-06659  
`imageExtent.width` **must** not be 0
- VUID-VkBufferImageCopy2-imageExtent-06660  
`imageExtent.height` **must** not be 0
- VUID-VkBufferImageCopy2-imageExtent-06661  
`imageExtent.depth` **must** not be 0

### Valid Usage (Implicit)

- VUID-VkBufferImageCopy2-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_BUFFER_IMAGE_COPY_2`
- VUID-VkBufferImageCopy2-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkBufferImageCopy2-imageSubresource-parameter  
`imageSubresource` **must** be a valid `VkImageSubresourceLayers` structure

The following commands can be used to copy between host memory and images. Bytes in host memory and texels in images are accessed as specified in [Copying Data Between Buffers and Images](#), with buffers replaced with host memory.

To copy data from host memory to an image object, call:

```
// Provided by VK_VERSION_1_4
VkResult vkCopyMemoryToImage(
    VkDevice                                device,
    const VkCopyMemoryToImageInfo*         pCopyMemoryToImageInfo);
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to vkCopyMemoryToImage
VkResult vkCopyMemoryToImageEXT(
    VkDevice device,
    const VkCopyMemoryToImageInfo* pCopyMemoryToImageInfo);
```

- **device** is the device which owns **pCopyMemoryToImageInfo->dstImage**.
- **pCopyMemoryToImageInfo** is a pointer to a **VkCopyMemoryToImageInfo** structure describing the copy parameters.

This command is functionally similar to **vkCmdCopyBufferToImage2**, except it is executed on the host and reads from host memory instead of a buffer. The memory of **pCopyMemoryToImageInfo->dstImage** is accessed by the host as if **coherent**.

#### NOTE

Because queue submissions **automatically make host memory visible to the device**, there would not be a need for a memory barrier before using the results of this copy operation on the device.

### Valid Usage (Implicit)

- VUID-vkCopyMemoryToImage-device-parameter **device** **must** be a valid **VkDevice** handle
- VUID-vkCopyMemoryToImage-pCopyMemoryToImageInfo-parameter **pCopyMemoryToImageInfo** **must** be a valid pointer to a valid **VkCopyMemoryToImageInfo** structure

### Return Codes

#### Success

- **VK\_SUCCESS**

#### Failure

- **VK\_ERROR\_INITIALIZATION\_FAILED**
- **VK\_ERROR\_MEMORY\_MAP\_FAILED**
- **VK\_ERROR\_OUT\_OF\_DEVICE\_MEMORY**
- **VK\_ERROR\_OUT\_OF\_HOST\_MEMORY**
- **VK\_ERROR\_UNKNOWN**
- **VK\_ERROR\_VALIDATION\_FAILED**

The **VkCopyMemoryToImageInfo** structure is defined as:

```
// Provided by VK_VERSION_1_4
typedef struct VkCopyMemoryToImageInfo {
    VkStructureType      sType;
    const void*          pNext;
    VkHostImageCopyFlags flags;
    VkImage              dstImage;
    VkImageLayout        dstImageLayout;
    uint32_t             regionCount;
    const VkMemoryToImageCopy* pRegions;
} VkCopyMemoryToImageInfo;
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to VkCopyMemoryToImageInfo
typedef VkCopyMemoryToImageInfo VkCopyMemoryToImageInfoEXT;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **flags** is a bitmask of [VkHostImageCopyFlagBits](#) values describing additional copy parameters.
- **dstImage** is the destination image.
- **dstImageLayout** is the layout of the destination image subresources for the copy.
- **regionCount** is the number of regions to copy.
- **pRegions** is a pointer to an array of [VkMemoryToImageCopy](#) structures specifying the regions to copy.

**vkCopyMemoryToImage** does not check whether the device memory associated with **dstImage** is currently in use before performing the copy. The application **must** guarantee that any previously submitted command that reads from or writes to the copy regions has completed before the host performs the copy.

Copy regions for the image **must** be aligned to a multiple of the texel block extent in each dimension, except at the edges of the image, where region extents **must** match the edge of the image.

## Valid Usage

- VUID-VkCopyMemoryToImageInfo-dstImage-09109  
If **dstImage** is sparse then all memory ranges accessed by the copy command **must** be bound as described in [Binding Resource Memory](#)
- VUID-VkCopyMemoryToImageInfo-dstImage-09111  
If the stencil aspect of **dstImage** is accessed, and **dstImage** was not created with [separate stencil usage](#), **dstImage** **must** have been created with the [VK\\_IMAGE\\_USAGE\\_HOST\\_TRANSFER\\_BIT](#) usage flag set
- VUID-VkCopyMemoryToImageInfo-dstImage-09112

If the stencil aspect of `dstImage` is accessed, and `dstImage` was created with `separate stencil usage`, `dstImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set

- VUID-VkCopyMemoryToImageInfo-dstImage-09113

If non-stencil aspects of `dstImage` are accessed, `dstImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set

- VUID-VkCopyMemoryToImageInfo-imageOffset-09114

If `flags` contains `VK_HOST_IMAGE_COPY_MEMCPY_BIT`, the `x`, `y`, and `z` members of the `imageOffset` member of each element of `pRegions` **must** be 0

- VUID-VkCopyMemoryToImageInfo-dstImage-09115

If `flags` contains `VK_HOST_IMAGE_COPY_MEMCPY_BIT`, the `imageExtent` member of each element of `pRegions` **must** equal the extents of `dstImage` identified by `imageSubresource`

- VUID-VkCopyMemoryToImageInfo-dstImage-07966

If `dstImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-VkCopyMemoryToImageInfo-imageSubresource-07967

The `imageSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created

- VUID-VkCopyMemoryToImageInfo-imageSubresource-07968

If `imageSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `imageSubresource.baseArrayLayer` + `imageSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created

- VUID-VkCopyMemoryToImageInfo-dstImage-07969

`dstImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

- VUID-VkCopyMemoryToImageInfo-imageSubresource-07971

For each element of `pRegions`, `imageOffset.x` and `(imageExtent.width + imageOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `imageSubresource` of `dstImage`

- VUID-VkCopyMemoryToImageInfo-imageSubresource-07972

For each element of `pRegions`, `imageOffset.y` and `(imageExtent.height + imageOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `imageSubresource` of `dstImage`

- VUID-VkCopyMemoryToImageInfo-dstImage-07973

`dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`

- VUID-VkCopyMemoryToImageInfo-dstImage-07979

If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `imageOffset.y` **must** be 0 and `imageExtent.height` **must** be 1

- VUID-VkCopyMemoryToImageInfo-imageOffset-09104

For each element of `pRegions`, `imageOffset.z` and `(imageExtent.depth + imageOffset.z)` **must**

both be greater than or equal to 0 and less than or equal to the depth of the specified `imageSubresource` of `dstImage`

- VUID-VkCopyMemoryToImageInfo-dstImage-07980  
If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `imageOffset.z` **must** be 0 and `imageExtent.depth` **must** be 1
- VUID-VkCopyMemoryToImageInfo-dstImage-07274  
For each element of `pRegions`, `imageOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-dstImage-07275  
For each element of `pRegions`, `imageOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-dstImage-07276  
For each element of `pRegions`, `imageOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-dstImage-00207  
For each element of `pRegions`, if the sum of `imageOffset.x` and `extent.width` does not equal the width of the subresource specified by `imageSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-dstImage-00208  
For each element of `pRegions`, if the sum of `imageOffset.y` and `extent.height` does not equal the height of the subresource specified by `imageSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-dstImage-00209  
For each element of `pRegions`, if the sum of `imageOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-imageSubresource-09105  
For each element of `pRegions`, `imageSubresource.aspectMask` **must** specify aspects present in `dstImage`
- VUID-VkCopyMemoryToImageInfo-dstImage-07981  
If `dstImage` has a `multi-planar format`, then for each element of `pRegions`, `imageSubresource.aspectMask` **must** be a single valid `multi-planar aspect mask` bit
- VUID-VkCopyMemoryToImageInfo-dstImage-07983  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, for each element of `pRegions`, `imageSubresource.baseArrayLayer` **must** be 0 and `imageSubresource.layerCount` **must** be 1
- VUID-VkCopyMemoryToImageInfo-memoryRowLength-09106  
For each element of `pRegions`, `memoryRowLength` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-memoryImageHeight-09107  
For each element of `pRegions`, `memoryImageHeight` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageInfo-memoryRowLength-09108

For each element of `pRegions`, `memoryRowLength` divided by the `texel block extent width` and then multiplied by the texel block size of `dstImage` **must** be less than or equal to  $2^{31}-1$

- VUID-VkCopyMemoryToImageInfo-pRegions-09062  
Each memory location accessed by this command **must** not be accessed in both a source region and a destination region, as specified in `pRegions` and accessed according to [Buffer and Image Addressing](#)
- VUID-VkCopyMemoryToImageInfo-pRegions-12474  
Each memory location accessed by this command **must** not be accessed in more than one destination region, as specified by `pRegions` and accessed according to [Buffer and Image Addressing](#)
- VUID-VkCopyMemoryToImageInfo-dstImageLayout-09059  
`dstImageLayout` **must** specify the current layout of the image subresources of `dstImage` specified in `pRegions`
- VUID-VkCopyMemoryToImageInfo-dstImageLayout-09060  
`dstImageLayout` **must** be one of the image layouts returned in `VkPhysicalDeviceHostImageCopyProperties::pCopyDstLayouts`
- VUID-VkCopyMemoryToImageInfo-flags-09393  
If `flags` includes `VK_HOST_IMAGE_COPY_MEMCPY_BIT`, for each region in `pRegions`, `memoryRowLength` and `memoryImageHeight` **must** both be 0

### Valid Usage (Implicit)

- VUID-VkCopyMemoryToImageInfo-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_COPY_MEMORY_TO_IMAGE_INFO`
- VUID-VkCopyMemoryToImageInfo-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkCopyMemoryToImageInfo-flags-parameter  
If `flags` is not 0, `flags` **must** be a valid combination of `VkHostImageCopyFlagBits` values
- VUID-VkCopyMemoryToImageInfo-dstImage-parameter  
`dstImage` **must** be a valid `VkImage` handle
- VUID-VkCopyMemoryToImageInfo-dstImageLayout-parameter  
`dstImageLayout` **must** be a valid `VkImageLayout` value
- VUID-VkCopyMemoryToImageInfo-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkMemoryToImageCopy` structures
- VUID-VkCopyMemoryToImageInfo-regionCount-arraylength  
`regionCount` **must** be greater than 0

Each element of `VkCopyMemoryToImageInfo::pRegions` is a structure defined as:

```
// Provided by VK_VERSION_1_4
typedef struct VkMemoryToImageCopy {
    VkStructureType      sType;
    const void*          pNext;
    const void*          pHostPointer;
    uint32_t             memoryRowLength;
    uint32_t             memoryImageHeight;
    VkImageSubresourceLayers imageSubresource;
    VkOffset3D           imageOffset;
    VkExtent3D           imageExtent;
} VkMemoryToImageCopy;
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to VkMemoryToImageCopy
typedef VkMemoryToImageCopy VkMemoryToImageCopyEXT;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **pHostPointer** is the host memory address which is the source of the copy.
- **memoryRowLength** and **memoryImageHeight** specify in texels a subregion of a larger two- or three-dimensional image in host memory, and control the addressing calculations. If either of these values is zero, that aspect of the host memory is considered to be tightly packed according to the **imageExtent**.
- **imageSubresource** is a [VkImageSubresourceLayers](#) used to specify the specific image subresources of the image used for the source or destination image data.
- **imageOffset** selects the initial **x**, **y**, **z** offsets in texels of the sub-region of the destination image data.
- **imageExtent** is the size in texels of the image to copy in **width**, **height** and **depth**.

This structure is functionally similar to [VkBufferImageCopy2](#), except it defines host memory as the source of copy instead of a buffer. In particular, the same data packing rules and restrictions as that structure apply here as well.

## Valid Usage

- VUID-VkMemoryToImageCopy-pHostPointer-09061  
**pHostPointer** **must** point to memory that is large enough to contain all memory locations that are accessed according to [Buffer and Image Addressing](#)
- VUID-VkMemoryToImageCopy-memoryRowLength-09101  
**memoryRowLength** **must** be 0, or greater than or equal to the **width** member of **imageExtent**
- VUID-VkMemoryToImageCopy-memoryImageHeight-09102  
**memoryImageHeight** **must** be 0, or greater than or equal to the **height** member of **imageExtent**

- VUID-VkMemoryToImageCopy-aspectMask-09103  
The `aspectMask` member of `imageSubresource` **must** only have a single bit set
- VUID-VkMemoryToImageCopy-imageExtent-06659  
`imageExtent.width` **must** not be 0
- VUID-VkMemoryToImageCopy-imageExtent-06660  
`imageExtent.height` **must** not be 0
- VUID-VkMemoryToImageCopy-imageExtent-06661  
`imageExtent.depth` **must** not be 0

### Valid Usage (Implicit)

- VUID-VkMemoryToImageCopy-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_MEMORY_TO_IMAGE_COPY`
- VUID-VkMemoryToImageCopy-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkMemoryToImageCopy-pHostPointer-parameter  
`pHostPointer` **must** be a pointer value
- VUID-VkMemoryToImageCopy-imageSubresource-parameter  
`imageSubresource` **must** be a valid `VkImageSubresourceLayers` structure

To copy data from an image object to host memory, call:

```
// Provided by VK_VERSION_1_4
VkResult vkCopyImageToMemory(
    VkDevice                                device,
    const VkCopyImageToMemoryInfo*         pCopyImageToMemoryInfo);
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to vkCopyImageToMemory
VkResult vkCopyImageToMemoryEXT(
    VkDevice                                device,
    const VkCopyImageToMemoryInfo*         pCopyImageToMemoryInfo);
```

- `device` is the device which owns `pCopyImageToMemoryInfo->srcImage`.
- `pCopyImageToMemoryInfo` is a pointer to a `VkCopyImageToMemoryInfo` structure describing the copy parameters.

This command is functionally similar to `vkCmdCopyImageToBuffer2`, except it is executed on the host and writes to host memory instead of a buffer. The memory of `pCopyImageToMemoryInfo->srcImage` is accessed by the host as if `coherent`.

**NOTE** If the device has written to the image memory, it is not automatically made

available to the host. Before this copy command can be called, a memory barrier for this image **must** have been issued on the device with the second [synchronization scope](#) including [VK\\_PIPELINE\\_STAGE\\_HOST\\_BIT](#) and [VK\\_ACCESS\\_HOST\\_READ\\_BIT](#).

### Valid Usage (Implicit)

- VUID-vkCopyImageToMemory-device-parameter  
**device** **must** be a valid [VkDevice](#) handle
- VUID-vkCopyImageToMemory-pCopyImageToMemoryInfo-parameter  
**pCopyImageToMemoryInfo** **must** be a valid pointer to a valid [VkCopyImageToMemoryInfo](#) structure

### Return Codes

#### Success

- [VK\\_SUCCESS](#)

#### Failure

- [VK\\_ERROR\\_INITIALIZATION\\_FAILED](#)
- [VK\\_ERROR\\_MEMORY\\_MAP\\_FAILED](#)
- [VK\\_ERROR\\_OUT\\_OF\\_DEVICE\\_MEMORY](#)
- [VK\\_ERROR\\_OUT\\_OF\\_HOST\\_MEMORY](#)
- [VK\\_ERROR\\_UNKNOWN](#)
- [VK\\_ERROR\\_VALIDATION\\_FAILED](#)

The [VkCopyImageToMemoryInfo](#) structure is defined as:

```
// Provided by VK_VERSION_1_4
typedef struct VkCopyImageToMemoryInfo {
    VkStructureType      sType;
    const void*          pNext;
    VkHostImageCopyFlags flags;
    VkImage              srcImage;
    VkImageLayout        srcImageLayout;
    uint32_t             regionCount;
    const VkImageToMemoryCopy* pRegions;
} VkCopyImageToMemoryInfo;
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to VkCopyImageToMemoryInfo
typedef VkCopyImageToMemoryInfo VkCopyImageToMemoryInfoEXT;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `flags` is a bitmask of `VkHostImageCopyFlagBits` values describing additional copy parameters.
- `srcImage` is the source image.
- `srcImageLayout` is the layout of the source image subresources for the copy.
- `regionCount` is the number of regions to copy.
- `pRegions` is a pointer to an array of `VkImageToMemoryCopy` structures specifying the regions to copy.

`vkCopyImageToMemory` does not check whether the device memory associated with `srcImage` is currently in use before performing the copy. The application **must** guarantee that any previously submitted command that writes to the copy regions has completed before the host performs the copy.

Copy regions for the image **must** be aligned to a multiple of the texel block extent in each dimension, except at the edges of the image, where region extents **must** match the edge of the image.

### Valid Usage

- VUID-VkCopyImageToMemoryInfo-srcImage-09109  
If `srcImage` is sparse then all memory ranges accessed by the copy command **must** be bound as described in [Binding Resource Memory](#)
- VUID-VkCopyImageToMemoryInfo-srcImage-09111  
If the stencil aspect of `srcImage` is accessed, and `srcImage` was not created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set
- VUID-VkCopyImageToMemoryInfo-srcImage-09112  
If the stencil aspect of `srcImage` is accessed, and `srcImage` was created with `separate stencil usage`, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set
- VUID-VkCopyImageToMemoryInfo-srcImage-09113  
If non-stencil aspects of `srcImage` are accessed, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set
- VUID-VkCopyImageToMemoryInfo-imageOffset-09114  
If `flags` contains `VK_HOST_IMAGE_COPY_MEMCPY_BIT`, the `x`, `y`, and `z` members of the `imageOffset` member of each element of `pRegions` **must** be 0
- VUID-VkCopyImageToMemoryInfo-srcImage-09115  
If `flags` contains `VK_HOST_IMAGE_COPY_MEMCPY_BIT`, the `imageExtent` member of each element of `pRegions` **must** equal the extents of `srcImage` identified by `imageSubresource`
- VUID-VkCopyImageToMemoryInfo-srcImage-07966  
If `srcImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-VkCopyImageToMemoryInfo-imageSubresource-07967  
The `imageSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-VkCopyImageToMemoryInfo-imageSubresource-07968  
If `imageSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `imageSubresource.baseArrayLayer + imageSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-VkCopyImageToMemoryInfo-srcImage-07969  
`srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`
- VUID-VkCopyImageToMemoryInfo-imageSubresource-07971  
For each element of `pRegions`, `imageOffset.x` and `(imageExtent.width + imageOffset.x)` **must** both be greater than or equal to `0` and less than or equal to the width of the specified `imageSubresource` of `srcImage`
- VUID-VkCopyImageToMemoryInfo-imageSubresource-07972  
For each element of `pRegions`, `imageOffset.y` and `(imageExtent.height + imageOffset.y)` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `imageSubresource` of `srcImage`
- VUID-VkCopyImageToMemoryInfo-srcImage-07973  
`srcImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-VkCopyImageToMemoryInfo-srcImage-07979  
If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `imageOffset.y` **must** be `0` and `imageExtent.height` **must** be `1`
- VUID-VkCopyImageToMemoryInfo-imageOffset-09104  
For each element of `pRegions`, `imageOffset.z` and `(imageExtent.depth + imageOffset.z)` **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `imageSubresource` of `srcImage`
- VUID-VkCopyImageToMemoryInfo-srcImage-07980  
If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `imageOffset.z` **must** be `0` and `imageExtent.depth` **must** be `1`
- VUID-VkCopyImageToMemoryInfo-srcImage-07274  
For each element of `pRegions`, `imageOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToMemoryInfo-srcImage-07275  
For each element of `pRegions`, `imageOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToMemoryInfo-srcImage-07276  
For each element of `pRegions`, `imageOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`
- VUID-VkCopyImageToMemoryInfo-srcImage-00207  
For each element of `pRegions`, if the sum of `imageOffset.x` and `extent.width` does not equal

the width of the subresource specified by `imageSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToMemoryInfo-srcImage-00208

For each element of `pRegions`, if the sum of `imageOffset.y` and `extent.height` does not equal the height of the subresource specified by `imageSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToMemoryInfo-srcImage-00209

For each element of `pRegions`, if the sum of `imageOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToMemoryInfo-imageSubresource-09105

For each element of `pRegions`, `imageSubresource.aspectMask` **must** specify aspects present in `srcImage`

- VUID-VkCopyImageToMemoryInfo-srcImage-07981

If `srcImage` has a `multi-planar format`, then for each element of `pRegions`, `imageSubresource.aspectMask` **must** be a single valid `multi-planar aspect mask` bit

- VUID-VkCopyImageToMemoryInfo-srcImage-07983

If `srcImage` is of type `VK_IMAGE_TYPE_3D`, for each element of `pRegions`, `imageSubresource.baseArrayLayer` **must** be 0 and `imageSubresource.layerCount` **must** be 1

- VUID-VkCopyImageToMemoryInfo-memoryRowLength-09106

For each element of `pRegions`, `memoryRowLength` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToMemoryInfo-memoryImageHeight-09107

For each element of `pRegions`, `memoryImageHeight` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToMemoryInfo-memoryRowLength-09108

For each element of `pRegions`, `memoryRowLength` divided by the `texel block extent width` and then multiplied by the texel block size of `srcImage` **must** be less than or equal to  $2^{31}-1$

- VUID-VkImageToMemoryCopy-pRegions-09067

Each memory location accessed by this command **must** not be accessed in both a source region and a destination region, as specified in `pRegions` and accessed according to `Buffer and Image Addressing`

- VUID-VkCopyImageToMemoryInfo-pRegions-12475

Each memory location accessed by this command **must** not be accessed in more than one destination region, as specified by `pRegions` and accessed according to `Buffer and Image Addressing`

- VUID-VkCopyImageToMemoryInfo-srcImageLayout-09064

`srcImageLayout` **must** specify the current layout of the image subresources of `srcImage` specified in `pRegions`

- VUID-VkCopyImageToMemoryInfo-srcImageLayout-09065

`srcImageLayout` **must** be one of the image layouts returned in `VkPhysicalDeviceHostImageCopyProperties::pCopySrcLayouts`

- VUID-VkCopyImageToMemoryInfo-flags-09394  
If **flags** includes **VK\_HOST\_IMAGE\_COPY\_MEMCPY\_BIT**, for each region in **pRegions**, **memoryRowLength** and **memoryImageHeight** **must** both be 0

## Valid Usage (Implicit)

- VUID-VkCopyImageToMemoryInfo-sType-sType  
**sType** **must** be **VK\_STRUCTURE\_TYPE\_COPY\_IMAGE\_TO\_MEMORY\_INFO**
- VUID-VkCopyImageToMemoryInfo-pNext-pNext  
**pNext** **must** be **NULL**
- VUID-VkCopyImageToMemoryInfo-flags-parameter  
If **flags** is not 0, **flags** **must** be a valid combination of **VkHostImageCopyFlagBits** values
- VUID-VkCopyImageToMemoryInfo-srcImage-parameter  
**srcImage** **must** be a valid **VkImage** handle
- VUID-VkCopyImageToMemoryInfo-srcImageLayout-parameter  
**srcImageLayout** **must** be a valid **VkImageLayout** value
- VUID-VkCopyImageToMemoryInfo-pRegions-parameter  
**pRegions** **must** be a valid pointer to an array of **regionCount** valid **VkImageToMemoryCopy** structures
- VUID-VkCopyImageToMemoryInfo-regionCount-arraylength  
**regionCount** **must** be greater than 0

Each element of **VkCopyImageToMemoryInfo::pRegions** is a structure defined as:

```
// Provided by VK_VERSION_1_4
typedef struct VkImageToMemoryCopy {
    VkStructureType    sType;
    const void*        pNext;
    void*              pHostPointer;
    uint32_t            memoryRowLength;
    uint32_t            memoryImageHeight;
    VkImageSubresourceLayers imageSubresource;
    VkOffset3D          imageOffset;
    VkExtent3D          imageExtent;
} VkImageToMemoryCopy;
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to VkImageToMemoryCopy
typedef VkImageToMemoryCopy VkImageToMemoryCopyEXT;
```

- **sType** is a **VkStructureType** value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.

- `pHostPointer` is the host memory address which is the destination of the copy.
- `memoryRowLength` and `memoryImageHeight` specify in texels a subregion of a larger two- or three-dimensional image in host memory, and control the addressing calculations. If either of these values is zero, that aspect of the host memory is considered to be tightly packed according to the `imageExtent`.
- `imageSubresource` is a `VkImageSubresourceLayers` used to specify the specific image subresources of the image used for the source or destination image data.
- `imageOffset` selects the initial `x`, `y`, `z` offsets in texels of the sub-region of the source image data.
- `imageExtent` is the size in texels of the image to copy in `width`, `height` and `depth`.

This structure is functionally similar to `VkBufferImageCopy2`, except it defines host memory as the target of copy instead of a buffer. In particular, the same data packing rules and restrictions as that structure apply here as well.

### Valid Usage

- VUID-VkImageToMemoryCopy-pHostPointer-09066  
`pHostPointer` **must** point to memory that is large enough to contain all memory locations that are accessed according to [Buffer and Image Addressing](#)
- VUID-VkImageToMemoryCopy-memoryRowLength-09101  
`memoryRowLength` **must** be 0, or greater than or equal to the `width` member of `imageExtent`
- VUID-VkImageToMemoryCopy-memoryImageHeight-09102  
`memoryImageHeight` **must** be 0, or greater than or equal to the `height` member of `imageExtent`
- VUID-VkImageToMemoryCopy-aspectMask-09103  
The `aspectMask` member of `imageSubresource` **must** only have a single bit set
- VUID-VkImageToMemoryCopy-imageExtent-06659  
`imageExtent.width` **must** not be 0
- VUID-VkImageToMemoryCopy-imageExtent-06660  
`imageExtent.height` **must** not be 0
- VUID-VkImageToMemoryCopy-imageExtent-06661  
`imageExtent.depth` **must** not be 0

### Valid Usage (Implicit)

- VUID-VkImageToMemoryCopy-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_IMAGE_TO_MEMORY_COPY`
- VUID-VkImageToMemoryCopy-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkImageToMemoryCopy-pHostPointer-parameter  
`pHostPointer` **must** be a pointer value
- VUID-VkImageToMemoryCopy-imageSubresource-parameter

`imageSubresource` **must** be a valid `VkImageSubresourceLayers` structure

Bits which **can** be set in `VkCopyMemoryToImageInfo::flags`, `VkCopyImageToMemoryInfo::flags`, and `VkCopyImageToImageInfo::flags`, specifying additional copy parameters are:

```
// Provided by VK_VERSION_1_4
typedef enum VkHostImageCopyFlagBits {
    VK_HOST_IMAGE_COPY_MEMCPY_BIT = 0x00000001,
    // VK_HOST_IMAGE_COPY_MEMCPY is a legacy alias
    VK_HOST_IMAGE_COPY_MEMCPY = VK_HOST_IMAGE_COPY_MEMCPY_BIT,
    // Provided by VK_EXT_host_image_copy
    VK_HOST_IMAGE_COPY_MEMCPY_BIT_EXT = VK_HOST_IMAGE_COPY_MEMCPY_BIT,
    // Provided by VK_EXT_host_image_copy
    // VK_HOST_IMAGE_COPY_MEMCPY_EXT is a legacy alias
    VK_HOST_IMAGE_COPY_MEMCPY_EXT = VK_HOST_IMAGE_COPY_MEMCPY_BIT,
} VkHostImageCopyFlagBits;
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to VkHostImageCopyFlagBits
typedef VkHostImageCopyFlagBits VkHostImageCopyFlagBitsEXT;
```

- `VK_HOST_IMAGE_COPY_MEMCPY_BIT` specifies that no memory layout swizzling is to be applied during data copy. For copies between memory and images, this flag indicates that image data in host memory is swizzled in exactly the same way as the image data on the device. Using this flag indicates that the implementations **may** use a simple memory copy to transfer the data between the host memory and the device memory. The format of the swizzled data in host memory is platform dependent and is not defined in this specification.

```
// Provided by VK_VERSION_1_4
typedef VkFlags VkHostImageCopyFlags;
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to VkHostImageCopyFlags
typedef VkHostImageCopyFlags VkHostImageCopyFlagsEXT;
```

`VkHostImageCopyFlags` is a bitmask type for setting a mask of zero or more `VkHostImageCopyFlagBits`.

To copy data from an image object to another image object using the host, call:

```
// Provided by VK_VERSION_1_4
VkResult vkCopyImageToImage(
    VkDevice                                device,
    const VkCopyImageToImageInfo*          pCopyImageToImageInfo);
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to vkCopyImageToImage
VkResult vkCopyImageToImageEXT(
    VkDevice                                device,
    const VkCopyImageToImageInfo*          pCopyImageToImageInfo);
```

- **device** is the device which owns `pCopyImageToImageInfo->srcImage` and `pCopyImageToImageInfo->dstImage`.
- **pCopyImageToImageInfo** is a pointer to a `VkCopyImageToImageInfo` structure describing the copy parameters.

This command is functionally similar to `vkCmdCopyImage2`, except it is executed on the host. The memory of `pCopyImageToImageInfo->srcImage` and `pCopyImageToImageInfo->dstImage` is accessed by the host as if `coherent`.

#### NOTE

If the device has written to the memory of `pCopyImageToImageInfo->srcImage`, it is not automatically made available to the host. Before this copy command can be called, a memory barrier for this image **must** have been issued on the device with the second `synchronization scope` including `VK_PIPELINE_STAGE_HOST_BIT` and `VK_ACCESS_HOST_READ_BIT`.

Because queue submissions `automatically make host memory visible to the device`, there would not be a need for a memory barrier before using the results of this copy operation in `pCopyMemoryToImageInfo->dstImage` on the device.

### Valid Usage (Implicit)

- VUID-vkCopyImageToImage-device-parameter  
**device** **must** be a valid `VkDevice` handle
- VUID-vkCopyImageToImage-pCopyImageToImageInfo-parameter  
**pCopyImageToImageInfo** **must** be a valid pointer to a valid `VkCopyImageToImageInfo` structure

### Return Codes

#### Success

- `VK_SUCCESS`

## Failure

- [VK\\_ERROR\\_INITIALIZATION\\_FAILED](#)
- [VK\\_ERROR\\_MEMORY\\_MAP\\_FAILED](#)
- [VK\\_ERROR\\_OUT\\_OF\\_DEVICE\\_MEMORY](#)
- [VK\\_ERROR\\_OUT\\_OF\\_HOST\\_MEMORY](#)
- [VK\\_ERROR\\_UNKNOWN](#)
- [VK\\_ERROR\\_VALIDATION\\_FAILED](#)

The [VkCopyImageToImageInfo](#) structure is defined as:

```
// Provided by VK_VERSION_1_4
typedef struct VkCopyImageToImageInfo {
    VkStructureType      sType;
    const void*          pNext;
    VkHostImageCopyFlags flags;
    VkImage               srcImage;
    VkImageLayout         srcImageLayout;
    VkImage               dstImage;
    VkImageLayout         dstImageLayout;
    uint32_t              regionCount;
    const VkImageCopy2*   pRegions;
} VkCopyImageToImageInfo;
```

```
// Provided by VK_EXT_host_image_copy
// Equivalent to VkCopyImageToImageInfo
typedef VkCopyImageToImageInfo VkCopyImageToImageInfoEXT;
```

- [sType](#) is a [VkStructureType](#) value identifying this structure.
- [pNext](#) is `NULL` or a pointer to a structure extending this structure.
- [flags](#) is a bitmask of [VkHostImageCopyFlagBits](#) values describing additional copy parameters.
- [srcImage](#) is the source image.
- [srcImageLayout](#) is the layout of the source image subresources for the copy.
- [dstImage](#) is the destination image.
- [dstImageLayout](#) is the layout of the destination image subresources for the copy.
- [regionCount](#) is the number of regions to copy.
- [pRegions](#) is a pointer to an array of [VkImageCopy2](#) structures specifying the regions to copy.

[vkCopyImageToImage](#) does not check whether the device memory associated with [srcImage](#) or [dstImage](#) is currently in use before performing the copy. The application **must** guarantee that any previously submitted command that writes to the copy regions has completed before the host performs the copy.

## Valid Usage

- VUID-VkCopyImageToImageInfo-srcImage-09069  
`srcImage` and `dstImage` **must** have been created with identical image creation parameters
- VUID-VkCopyImageToImageInfo-pRegions-12476  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, as specified by `pRegions` and accessed according to [Copy Image Addressing](#)
- VUID-VkCopyImageToImageInfo-pRegions-12477  
Each memory location accessed by this command **must** not be accessed by more than one destination region, as specified by `pRegions` and accessed according to [Copy Image Addressing](#)
- VUID-VkCopyImageToImageInfo-srcImage-09109  
If `srcImage` is sparse then all memory ranges accessed by the copy command **must** be bound as described in [Binding Resource Memory](#)
- VUID-VkCopyImageToImageInfo-srcImage-09111  
If the stencil aspect of `srcImage` is accessed, and `srcImage` was not created with [separate stencil usage](#), `srcImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set
- VUID-VkCopyImageToImageInfo-srcImage-09112  
If the stencil aspect of `srcImage` is accessed, and `srcImage` was created with [separate stencil usage](#), `srcImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set
- VUID-VkCopyImageToImageInfo-srcImage-09113  
If non-stencil aspects of `srcImage` are accessed, `srcImage` **must** have been created with the `VK_IMAGE_USAGE_HOST_TRANSFER_BIT` usage flag set
- VUID-VkCopyImageToImageInfo-srcOffset-09114  
If `flags` contains `VK_HOST_IMAGE_COPY_MEMCPY_BIT`, the `x`, `y`, and `z` members of the `srcOffset` member of each element of `pRegions` **must** be 0
- VUID-VkCopyImageToImageInfo-srcImage-09115  
If `flags` contains `VK_HOST_IMAGE_COPY_MEMCPY_BIT`, the `extent` member of each element of `pRegions` **must** equal the extents of `srcImage` identified by `srcSubresource`
- VUID-VkCopyImageToImageInfo-srcImage-07966  
If `srcImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkCopyImageToImageInfo-srcSubresource-07967  
The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-VkCopyImageToImageInfo-srcSubresource-07968  
If `srcSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `srcSubresource.baseArrayLayer` + `srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when

`srcImage` was created

- VUID-VkCopyImageToImageInfo-srcImage-07969

`srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

- VUID-VkCopyImageToImageInfo-srcSubresource-07971

For each element of `pRegions`, `srcOffset.x` and `(extent.width + srcOffset.x)` **must** both be greater than or equal to `0` and less than or equal to the width of the specified `srcSubresource` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcSubresource-07972

For each element of `pRegions`, `srcOffset.y` and `(extent.height + srcOffset.y)` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `srcSubresource` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcImage-07979

If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `srcOffset.y` **must** be `0` and `extent.height` **must** be `1`

- VUID-VkCopyImageToImageInfo-srcOffset-09104

For each element of `pRegions`, `srcOffset.z` and `(extent.depth + srcOffset.z)` **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `srcSubresource` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcImage-07980

If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `srcOffset.z` **must** be `0` and `extent.depth` **must** be `1`

- VUID-VkCopyImageToImageInfo-srcImage-07274

For each element of `pRegions`, `srcOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcImage-07275

For each element of `pRegions`, `srcOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcImage-07276

For each element of `pRegions`, `srcOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcImage-00207

For each element of `pRegions`, if the sum of `srcOffset.x` and `extent.width` does not equal the width of the subresource specified by `srcSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcImage-00208

For each element of `pRegions`, if the sum of `srcOffset.y` and `extent.height` does not equal the height of the subresource specified by `srcSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `srcImage`

- VUID-VkCopyImageToImageInfo-srcImage-00209

For each element of `pRegions`, if the sum of `srcOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple

of the [texel block extent depth](#) of the [VkFormat](#) of [srcImage](#)

- VUID-VkCopyImageToImageInfo-srcSubresource-09105  
For each element of [pRegions](#), [srcSubresource.aspectMask](#) **must** specify aspects present in [srcImage](#)
- VUID-VkCopyImageToImageInfo-srcImage-07981  
If [srcImage](#) has a [multi-planar format](#), then for each element of [pRegions](#), [srcSubresource.aspectMask](#) **must** be a single valid [multi-planar aspect mask](#) bit
- VUID-VkCopyImageToImageInfo-srcImage-07983  
If [srcImage](#) is of type [VK\\_IMAGE\\_TYPE\\_3D](#), for each element of [pRegions](#), [srcSubresource.baseArrayLayer](#) **must** be 0 and [srcSubresource.layerCount](#) **must** be 1
- VUID-VkCopyImageToImageInfo-dstImage-09109  
If [dstImage](#) is sparse then all memory ranges accessed by the copy command **must** be bound as described in [Binding Resource Memory](#)
- VUID-VkCopyImageToImageInfo-dstImage-09111  
If the stencil aspect of [dstImage](#) is accessed, and [dstImage](#) was not created with [separate stencil usage](#), [dstImage](#) **must** have been created with the [VK\\_IMAGE\\_USAGE\\_HOST\\_TRANSFER\\_BIT](#) usage flag set
- VUID-VkCopyImageToImageInfo-dstImage-09112  
If the stencil aspect of [dstImage](#) is accessed, and [dstImage](#) was created with [separate stencil usage](#), [dstImage](#) **must** have been created with the [VK\\_IMAGE\\_USAGE\\_HOST\\_TRANSFER\\_BIT](#) usage flag set
- VUID-VkCopyImageToImageInfo-dstImage-09113  
If non-stencil aspects of [dstImage](#) are accessed, [dstImage](#) **must** have been created with the [VK\\_IMAGE\\_USAGE\\_HOST\\_TRANSFER\\_BIT](#) usage flag set
- VUID-VkCopyImageToImageInfo-dstOffset-09114  
If [flags](#) contains [VK\\_HOST\\_IMAGE\\_COPY\\_MEMCPY\\_BIT](#), the [x](#), [y](#), and [z](#) members of the [dstOffset](#) member of each element of [pRegions](#) **must** be 0
- VUID-VkCopyImageToImageInfo-dstImage-09115  
If [flags](#) contains [VK\\_HOST\\_IMAGE\\_COPY\\_MEMCPY\\_BIT](#), the [extent](#) member of each element of [pRegions](#) **must** equal the extents of [dstImage](#) identified by [dstSubresource](#)
- VUID-VkCopyImageToImageInfo-dstImage-07966  
If [dstImage](#) is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single [VkDeviceMemory](#) object
- VUID-VkCopyImageToImageInfo-dstSubresource-07967  
The [dstSubresource.mipLevel](#) member of each element of [pRegions](#) **must** be less than the [mipLevels](#) specified in [VkImageCreateInfo](#) when [dstImage](#) was created
- VUID-VkCopyImageToImageInfo-dstSubresource-07968  
If [dstSubresource.layerCount](#) is not [VK\\_REMAINING\\_ARRAY\\_LAYERS](#), [dstSubresource.baseArrayLayer](#) + [dstSubresource.layerCount](#) of each element of [pRegions](#) **must** be less than or equal to the [arrayLayers](#) specified in [VkImageCreateInfo](#) when [dstImage](#) was created
- VUID-VkCopyImageToImageInfo-dstImage-07969

`dstImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

- VUID-VkCopyImageToImageInfo-dstSubresource-07971  
For each element of `pRegions`, `dstOffset.x` and `(extent.width + dstOffset.x)` **must** both be greater than or equal to `0` and less than or equal to the width of the specified `dstSubresource` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstSubresource-07972  
For each element of `pRegions`, `dstOffset.y` and `(extent.height + dstOffset.y)` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `dstSubresource` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstImage-07979  
If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `dstOffset.y` **must** be `0` and `extent.height` **must** be `1`
- VUID-VkCopyImageToImageInfo-dstOffset-09104  
For each element of `pRegions`, `dstOffset.z` and `(extent.depth + dstOffset.z)` **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `dstSubresource` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstImage-07980  
If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `dstOffset.z` **must** be `0` and `extent.depth` **must** be `1`
- VUID-VkCopyImageToImageInfo-dstImage-07274  
For each element of `pRegions`, `dstOffset.x` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstImage-07275  
For each element of `pRegions`, `dstOffset.y` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstImage-07276  
For each element of `pRegions`, `dstOffset.z` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstImage-00207  
For each element of `pRegions`, if the sum of `dstOffset.x` and `extent.width` does not equal the width of the subresource specified by `dstSubresource`, `extent.width` **must** be a multiple of the `texel block extent width` of the `VkFormat` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstImage-00208  
For each element of `pRegions`, if the sum of `dstOffset.y` and `extent.height` does not equal the height of the subresource specified by `dstSubresource`, `extent.height` **must** be a multiple of the `texel block extent height` of the `VkFormat` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstImage-00209  
For each element of `pRegions`, if the sum of `dstOffset.z` and `extent.depth` does not equal the depth of the subresource specified by `srcSubresource`, `extent.depth` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`
- VUID-VkCopyImageToImageInfo-dstSubresource-09105

For each element of `pRegions`, `dstSubresource.aspectMask` **must** specify aspects present in `dstImage`

- VUID-VkCopyImageToImageInfo-dstImage-07981  
If `dstImage` has a `multi-planar format`, then for each element of `pRegions`, `dstSubresource.aspectMask` **must** be a single valid `multi-planar aspect mask` bit
- VUID-VkCopyImageToImageInfo-dstImage-07983  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, for each element of `pRegions`, `dstSubresource.baseArrayLayer` **must** be 0 and `dstSubresource.layerCount` **must** be 1
- VUID-VkCopyImageToImageInfo-srcImageLayout-09070  
`srcImageLayout` **must** specify the current layout of the image subresources of `srcImage` specified in `pRegions`
- VUID-VkCopyImageToImageInfo-dstImageLayout-09071  
`dstImageLayout` **must** specify the current layout of the image subresources of `dstImage` specified in `pRegions`
- VUID-VkCopyImageToImageInfo-srcImageLayout-09072  
`srcImageLayout` **must** be one of the image layouts returned in `VkPhysicalDeviceHostImageCopyProperties::pCopySrcLayouts`
- VUID-VkCopyImageToImageInfo-dstImageLayout-09073  
`dstImageLayout` **must** be one of the image layouts returned in `VkPhysicalDeviceHostImageCopyProperties::pCopyDstLayouts`

### Valid Usage (Implicit)

- VUID-VkCopyImageToImageInfo-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_COPY_IMAGE_TO_IMAGE_INFO`
- VUID-VkCopyImageToImageInfo-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkCopyImageToImageInfo-flags-parameter  
If `flags` is not 0, `flags` **must** be a valid combination of `VkHostImageCopyFlagBits` values
- VUID-VkCopyImageToImageInfo-srcImage-parameter  
`srcImage` **must** be a valid `VkImage` handle
- VUID-VkCopyImageToImageInfo-srcImageLayout-parameter  
`srcImageLayout` **must** be a valid `VkImageLayout` value
- VUID-VkCopyImageToImageInfo-dstImage-parameter  
`dstImage` **must** be a valid `VkImage` handle
- VUID-VkCopyImageToImageInfo-dstImageLayout-parameter  
`dstImageLayout` **must** be a valid `VkImageLayout` value
- VUID-VkCopyImageToImageInfo-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkImageCopy2` structures
- VUID-VkCopyImageToImageInfo-regionCount-arraylength

`regionCount` **must** be greater than 0

- VUID-VkCopyImageToImageInfo-commonparent

Both of `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same `VkDevice`

## 24.6. Indirect Copies

An application can use indirect copies when the copy parameters are not known during the command buffer creation time.

To copy data between two memory regions by specifying copy parameters indirectly in memory, call:

```
// Provided by VK_KHR_copy_memory_indirect
void vkCmdCopyMemoryIndirectKHR(
    VkCommandBuffer                      commandBuffer,
    const VkCopyMemoryIndirectInfoKHR*  pCopyMemoryIndirectInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pCopyMemoryIndirectInfo` is a pointer to a `VkCopyMemoryIndirectInfoKHR` structure containing the copy parameters, including the number of copies to execute and a strided array of `VkCopyMemoryIndirectCommandKHR` structures.

Each region specified in the memory referenced by `pCopyMemoryIndirectInfo->copyAddressRange` is copied from the source region to the specified destination region.

### Valid Usage

- VUID-vkCmdCopyMemoryIndirectKHR-indirectMemoryCopy-10935  
The `indirectMemoryCopy` feature **must** be enabled
- VUID-vkCmdCopyMemoryIndirectKHR-commandBuffer-10936  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support at least one of the queue types specified in `VkPhysicalDeviceCopyMemoryIndirectPropertiesKHR::supportedQueues`
- VUID-vkCmdCopyMemoryIndirectKHR-commandBuffer-10937  
`commandBuffer` **must** not be a protected command buffer

### Valid Usage (Implicit)

- VUID-vkCmdCopyMemoryIndirectKHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyMemoryIndirectKHR-pCopyMemoryIndirectInfo-parameter  
`pCopyMemoryIndirectInfo` **must** be a valid pointer to a valid

### VkCopyMemoryIndirectInfoKHR structure

- VUID-vkCmdCopyMemoryIndirectKHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdCopyMemoryIndirectKHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_COMPUTE_BIT`, `VK_QUEUE_GRAPHICS_BIT`, or `VK_QUEUE_TRANSFER_BIT` operations
- VUID-vkCmdCopyMemoryIndirectKHR-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyMemoryIndirectKHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyMemoryIndirectKHR-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

## Conditional Rendering

`vkCmdCopyMemoryIndirectKHR` is not affected by `conditional rendering`

The `VkCopyMemoryIndirectInfoKHR` structure is defined as:

```
// Provided by VK_KHR_copy_memory_indirect
typedef struct VkCopyMemoryIndirectInfoKHR {
    VkStructureType          sType;
    const void*              pNext;
    VkAddressCopyFlagsKHR    srcCopyFlags;
    VkAddressCopyFlagsKHR    dstCopyFlags;
    uint32_t                 copyCount;
    VkStridedDeviceAddressRangeKHR copyAddressRange;
} VkCopyMemoryIndirectInfoKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `srcCopyFlags` is a `VkAddressCopyFlagsKHR` value defining the copy flags for the source address range.
- `dstCopyFlags` is a `VkAddressCopyFlagsKHR` value defining the copy flags for the destination address range.
- `copyCount` is the number of copies to execute, and **can** be zero.
- `copyAddressRange` is a memory region specifying the copy parameters. It is laid out as an array of `VkCopyMemoryIndirectCommandKHR` structures.

## Valid Usage

- VUID-VkCopyMemoryIndirectInfoKHR-srcCopyFlags-10938  
If `srcCopyFlags` contains `VK_ADDRESS_COPY_SPARSE_BIT_KHR`, the source memory regions accessed **must** be `bound to memory`
- VUID-VkCopyMemoryIndirectInfoKHR-dstCopyFlags-10939  
If `dstCopyFlags` contains `VK_ADDRESS_COPY_SPARSE_BIT_KHR`, the destination memory regions accessed **must** be `bound to memory`
- VUID-VkCopyMemoryIndirectInfoKHR-srcCopyFlags-10940  
`srcCopyFlags` **must** not contain `VK_ADDRESS_COPY_PROTECTED_BIT_KHR`
- VUID-VkCopyMemoryIndirectInfoKHR-dstCopyFlags-10941  
`dstCopyFlags` **must** not contain `VK_ADDRESS_COPY_PROTECTED_BIT_KHR`
- VUID-VkCopyMemoryIndirectInfoKHR-copyAddressRange-10942  
`copyAddressRange.address` **must** be 4 byte aligned
- VUID-VkCopyMemoryIndirectInfoKHR-copyAddressRange-10943  
`copyAddressRange.stride` **must** be a multiple of 4 and **must** be greater than or equal to `sizeof(VkCopyMemoryIndirectCommandKHR)`
- VUID-VkCopyMemoryIndirectInfoKHR-copyCount-10944  
`copyCount` **must** be less than or equal to `copyAddressRange.size / copyAddressRange.stride`
- VUID-VkCopyMemoryIndirectInfoKHR-copyAddressRange-10945  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, and **must** not be accessed by more than one destination

region, as specified in `copyAddressRange`

- VUID-VkCopyMemoryIndirectInfoKHR-copyAddressRange-12210  
`copyAddressRange` **must** be a device address range allocated to the application from a buffer created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` usage flag set

### Valid Usage (Implicit)

- VUID-VkCopyMemoryIndirectInfoKHR-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_COPY_MEMORY_INDIRECT_INFO_KHR`
- VUID-VkCopyMemoryIndirectInfoKHR-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkCopyMemoryIndirectInfoKHR-srcCopyFlags-parameter  
If `srcCopyFlags` is not `0`, `srcCopyFlags` **must** be a valid combination of `VkAddressCopyFlagBitsKHR` values
- VUID-VkCopyMemoryIndirectInfoKHR-dstCopyFlags-parameter  
If `dstCopyFlags` is not `0`, `dstCopyFlags` **must** be a valid combination of `VkAddressCopyFlagBitsKHR` values

The structure describing source and destination memory regions, `VkCopyMemoryIndirectCommandKHR` is defined as:

```
// Provided by VK_KHR_copy_memory_indirect
typedef struct VkCopyMemoryIndirectCommandKHR {
    VkDeviceAddress    srcAddress;
    VkDeviceAddress    dstAddress;
    VkDeviceSize       size;
} VkCopyMemoryIndirectCommandKHR;
```

- `srcAddress` is the starting address of the source device memory to copy from.
- `dstAddress` is the starting address of the destination device memory to copy to.
- `size` is the size of the copy in bytes.

### Valid Usage

- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-10958  
The `srcAddress` **must** be 4 byte aligned
- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-10959  
The `dstAddress` **must** be 4 byte aligned
- VUID-VkCopyMemoryIndirectCommandKHR-size-10960  
The `size` **must** be 4 byte aligned
- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-10961  
The memory in range [`srcAddress`, `srcAddress` + `size` - 1] **must** be within the bounds of the

memory allocation backing `srcAddress`

- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-10962

The memory in range [`dstAddress`, `dstAddress + size - 1`] **must** be within the bounds of the memory allocation backing `dstAddress`

- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-12211

The range of memory defined by `srcAddress` and `size` **must** be a device address range allocated to the application from a buffer created with the `VK_BUFFER_USAGE_TRANSFER_SRC_BIT` usage flag set

- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-12212

The range of memory defined by `dstAddress` and `size` **must** be a device address range allocated to the application from a buffer created with the `VK_BUFFER_USAGE_TRANSFER_DST_BIT` usage flag set

### Valid Usage (Implicit)

- VUID-VkCopyMemoryIndirectCommandKHR-srcAddress-parameter `srcAddress` **must** be a valid `VkDeviceAddress` value
- VUID-VkCopyMemoryIndirectCommandKHR-dstAddress-parameter `dstAddress` **must** be a valid `VkDeviceAddress` value

Bits which **can** be set in a `VkAddressCopyFlagsKHR` mask are:

```
// Provided by VK_KHR_copy_memory_indirect
typedef enum VkAddressCopyFlagBitsKHR {
    VK_ADDRESS_COPY_DEVICE_LOCAL_BIT_KHR = 0x00000001,
    VK_ADDRESS_COPY_SPARSE_BIT_KHR = 0x00000002,
    VK_ADDRESS_COPY_PROTECTED_BIT_KHR = 0x00000004,
} VkAddressCopyFlagBitsKHR;
```

- `VK_ADDRESS_COPY_DEVICE_LOCAL_BIT_KHR` specifies that the address range is expected to be resident in device local memory. Specifying this value is optional, but **may** lead to improved performance if set accurately.
- `VK_ADDRESS_COPY_PROTECTED_BIT_KHR` specifies that the address range is allocated from protected memory.
- `VK_ADDRESS_COPY_SPARSE_BIT_KHR` specifies that the address range may not be fully bound to physical memory when accessed.

```
// Provided by VK_KHR_copy_memory_indirect
typedef VkFlags VkAddressCopyFlagsKHR;
```

`VkAddressCopyFlagsKHR` is a bitmask type for setting a mask of zero or more `VkAddressCopyFlagBitsKHR`.

To copy data from a memory region to an image object by specifying copy parameters in memory, call:

```
// Provided by VK_KHR_copy_memory_indirect
void vkCmdCopyMemoryToImageIndirectKHR(
    VkCommandBuffer                      commandBuffer,
    const VkCopyMemoryToImageIndirectInfoKHR* pCopyMemoryToImageIndirectInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pCopyMemoryToImageIndirectInfo` is a pointer to a `VkCopyMemoryToImageIndirectInfoKHR` structure which contains the copy parameters, including the number of copies to execute and a strided array of `VkCopyMemoryToImageIndirectCommandKHR` structures.

Each region specified in the memory referenced by `pCopyMemoryToImageIndirectInfo->copyAddressRange` is copied from the source region to an image region in the destination image. If the destination image is of type `VK_IMAGE_TYPE_3D`, the starting slice and number of slices to copy are specified in `pImageSubresources->baseArrayLayer` and `pImageSubresources->layerCount` respectively as `imageOffset` and `imageExtent` from `VkCopyMemoryToImageIndirectCommandKHR` are only available at device execution time.

### Valid Usage

- VUID-vkCmdCopyMemoryToImageIndirectKHR-indirectMemoryToImageCopy-10947  
The `indirectMemoryToImageCopy` feature **must** be enabled
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-10948  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support at least one of the queue types specified in `VkPhysicalDeviceCopyMemoryIndirectPropertiesKHR::supportedQueues`
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-10949  
`commandBuffer` must not be a protected command buffer

### Valid Usage (Implicit)

- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdCopyMemoryToImageIndirectKHR-pCopyMemoryToImageIndirectInfo-parameter  
`pCopyMemoryToImageIndirectInfo` **must** be a valid pointer to a valid `VkCopyMemoryToImageIndirectInfoKHR` structure
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdCopyMemoryToImageIndirectKHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support

[VK\\_QUEUE\\_COMPUTE\\_BIT](#), [VK\\_QUEUE\\_GRAPHICS\\_BIT](#), or [VK\\_QUEUE\\_TRANSFER\\_BIT](#) operations

- VUID-vkCmdCopyMemoryToImageIndirectKHR-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdCopyMemoryToImageIndirectKHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdCopyMemoryToImageIndirectKHR-videocoding  
This command **must** only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

### Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                                                  | Command Type |
|-----------------------|-------------------|--------------------|------------------------------------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_COMPUTE_BIT<br>VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_TRANSFER_BIT | Action       |

### Conditional Rendering

`vkCmdCopyMemoryToImageIndirectKHR` is not affected by [conditional rendering](#)

The [VkCopyMemoryToImageIndirectInfoKHR](#) structure is defined as:

```
// Provided by VK_KHR_copy_memory_indirect
typedef struct VkCopyMemoryToImageIndirectInfoKHR {
    VkStructureType          sType;
    const void*              pNext;
    VkAddressCopyFlagsKHR    srcCopyFlags;
    uint32_t                 copyCount;
    VkStridedDeviceAddressRangeKHR copyAddressRange;
    VkImage                  dstImage;
    VkImageLayout             dstImageLayout;
    const VkImageSubresourceLayers* pImageSubresources;
} VkCopyMemoryToImageIndirectInfoKHR;
```

- **sType** is a **VkStructureType** value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **srcCopyFlags** is a **VkAddressCopyFlagsKHR** value defining the copy flags for the source address range.
- **copyCount** is the number of copies to execute, and **can** be zero.
- **copyAddressRange** is a memory region specifying the copy parameters. It is laid out as an array of **VkCopyMemoryToImageIndirectCommandKHR** structures.
- **dstImage** is the destination image.
- **dstImageLayout** is the layout of the destination image subresources for the copy.
- **pImageSubresources** is a pointer to an array of **copyCount** **VkImageSubresourceLayers** structures, specifying the image subresources of the destination image data for the copy operation.

## Valid Usage

- VUID-VkCopyMemoryToImageIndirectInfoKHR-srcCopyFlags-10950  
If **srcCopyFlags** contains **VK\_ADDRESS\_COPY\_SPARSE\_BIT\_KHR**, the source memory regions accessed **must** be **bound to memory**
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyCount-10951  
**copyCount** **must** be less than or equal to **copyAddressRange.size / copyAddressRange.stride**
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-10952  
**copyAddressRange.address** **must** be 4 byte aligned
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-10953  
**copyAddressRange.stride** **must** be a multiple of 4 and **must** be greater than or equal to **sizeof(VkCopyMemoryToImageIndirectCommandKHR)**
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-10955  
The format features of **dstImage** **must** contain **VK\_FORMAT\_FEATURE\_2\_COPY\_IMAGE\_INDIRECT\_DST\_BIT\_KHR**
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-12213  
**copyAddressRange** **must** be a device address range allocated to the application from a buffer created with the **VK\_BUFFER\_USAGE\_INDIRECT\_BUFFER\_BIT** usage flag set

- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07661  
`dstImage` **must** not be a protected image
- VUID-VkCopyMemoryToImageIndirectInfoKHR-aspectMask-07662  
The `aspectMask` member for every subresource in `pImageSubresources` **must** only have a single bit set
- VUID-VkCopyMemoryToImageIndirectInfoKHR-aspectMask-12287  
The `aspectMask` member for every subresource in `pImageSubresources` **must** specify an aspect present in `dstImage`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07664  
`dstImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07665  
If `dstImage` is non-sparse then the image or each specified *disjoint* plane **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07973  
`dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImageLayout-07667  
`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` at the time this command is executed on a `VkDevice`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImageLayout-07669  
`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL`, `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-mipLevel-07670  
The specified `mipLevel` of each region in `pImageSubresources` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12288  
If `dstImage` is not of type `VK_IMAGE_TYPE_3D`, and the specified `layerCount` of each region in `pImageSubresources` is not `VK_REMAINING_ARRAY_LAYERS`, the specified `baseArrayLayer` + `layerCount` of each region in `pImageSubresources` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12289  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, and the specified `layerCount` of each region in `pImageSubresources` is not `VK_REMAINING_ARRAY_LAYERS`, for each destination region,  $(\text{imageSubresource.baseArrayLayer} + \text{imageSubresource.layerCount})$  **must** be less than or equal to the depth of the specified subresource
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12290  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, and the specified `layerCount` of each region in `pImageSubresources` is not `VK_REMAINING_ARRAY_LAYERS`, for each destination region, if  $(\text{imageSubresource.baseArrayLayer} + \text{imageSubresource.layerCount})$  does not equal the depth of the specified subresource, `imageSubresource.layerCount` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12291  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, for each destination region,

`imageSubresource.baseArrayLayer` **must** be a multiple of the `texel block extent depth` of the `VkFormat` of `dstImage`

- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-12292  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, for each destination region, `imageSubresource.baseArrayLayer` **must** be less than or equal to the depth of the specified subresource
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-07673  
`dstImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-commandBuffer-07674  
If the queue family used to create the `VkCommandPool` which `commandBuffer` was allocated from does not support `VK_QUEUE_GRAPHICS_BIT`, for each region, the `aspectMask` member of `pImageSubresources` **must** not be `VK_IMAGE_ASPECT_DEPTH_BIT` or `VK_IMAGE_ASPECT_STENCIL_BIT`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-10974  
The format features of `dstImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_DST_BIT`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyAddressRange-10975  
Each memory location accessed by this command **must** not be accessed by both a source region and a destination region, and **must** not be accessed by more than one destination region, as specified in `copyAddressRange` and accessed according to `Buffer and Image Addressing`

### Valid Usage (Implicit)

- VUID-VkCopyMemoryToImageIndirectInfoKHR-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_COPY_MEMORY_TO_IMAGE_INDIRECT_INFO_KHR`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkCopyMemoryToImageIndirectInfoKHR-srcCopyFlags-parameter  
If `srcCopyFlags` is not `0`, `srcCopyFlags` **must** be a valid combination of `VkAddressCopyFlagBitsKHR` values
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImage-parameter  
`dstImage` **must** be a valid `VkImage` handle
- VUID-VkCopyMemoryToImageIndirectInfoKHR-dstImageLayout-parameter  
`dstImageLayout` **must** be a valid `VkImageLayout` value
- VUID-VkCopyMemoryToImageIndirectInfoKHR-pImageSubresources-parameter  
`pImageSubresources` **must** be a valid pointer to an array of `copyCount` valid `VkImageSubresourceLayers` structures
- VUID-VkCopyMemoryToImageIndirectInfoKHR-copyCount-arraylength  
`copyCount` **must** be greater than `0`

The structure describing source and destination memory regions,

VkCopyMemoryToImageIndirectCommandKHR is defined as:

```
// Provided by VK_KHR_copy_memory_indirect
typedef struct VkCopyMemoryToImageIndirectCommandKHR {
    VkDeviceAddress      srcAddress;
    uint32_t             bufferRowLength;
    uint32_t             bufferImageHeight;
    VkImageSubresourceLayers imageSubresource;
    VkOffset3D           imageOffset;
    VkExtent3D           imageExtent;
} VkCopyMemoryToImageIndirectCommandKHR;
```

- **srcAddress** is the starting address of the source device memory to copy from.
- **bufferRowLength** and **bufferImageHeight** specify in texels a subregion of a larger two- or three-dimensional image in buffer memory, and control the addressing calculations. If either of these values is zero, that aspect of the buffer memory is considered to be tightly packed according to the **imageExtent**.
- **imageSubresource** is a **VkImageSubresourceLayers** structure used to specify the specific image subresources of the image used for the destination image data, which **must** match the value specified in corresponding index of the **pCopyMemoryToImageIndirectInfo->pImageSubresources** array of **vkCmdCopyMemoryToImageIndirectKHR** during command recording.
- **imageOffset** selects the initial **x, y, z** offsets in texels of the sub-region of the destination image data.
- **imageExtent** is the size in texels of the destination image in **width, height** and **depth**.

## Valid Usage

- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-10963  
The **srcAddress** **must** be 4 byte aligned
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12282  
If **dstImage** does not have either a depth/stencil format or a **multi-planar format**, **srcAddress** **must** be a multiple of the **texel block size**
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12283  
If **dstImage** has a **multi-planar format**, **srcAddress** **must** be a multiple of the element size of the compatible format for the format and the **aspectMask** of the **imageSubresource** as defined in **Compatible Formats of Planes of Multi-Planar Formats**
- VUID-VkCopyMemoryToImageIndirectCommandKHR-bufferRowLength-10964  
**bufferRowLength** **must** be 0, or greater than or equal to the **width** member of **imageExtent**
- VUID-VkCopyMemoryToImageIndirectCommandKHR-bufferImageHeight-10965  
**bufferImageHeight** **must** be 0, or greater than or equal to the **height** member of **imageExtent**
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10966  
**imageOffset** **must** specify a valid offset in the destination image
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageExtent-10967

`imageExtent` **must** specify a valid region in the destination image and **can** be 0

- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-10968  
The memory allocation backing `srcAddress` **must** be large enough to contain all locations that are accessed according to [Buffer and Image Addressing](#)
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10969  
The `imageOffset` and `imageExtent` region **must** respect the image transfer granularity requirements of `commandBuffer`'s command pool's queue family, as described in [VkQueueFamilyProperties](#)
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10970  
For each destination region, `imageOffset.x` and `(imageExtent.width + imageOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified subresource
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageOffset-10971  
For each destination region, `imageOffset.y` and `(imageExtent.height + imageOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified subresource
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageSubresource-12284  
The members of `imageSubresource` **must** be identical to the members of the [VkImageSubresourceLayers](#) structure specified in the corresponding index of the `pCopyMemoryToImageIndirectInfo->pImageSubresources` array of [vkCmdCopyMemoryToImageIndirectKHR](#) during command recording
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12285  
If `dstImage` is of type `VK_IMAGE_TYPE_1D`, `imageOffset.y` **must** be 0 and `imageExtent.height` **must** be 1
- VUID-VkCopyMemoryToImageIndirectCommandKHR-dstImage-12286  
If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, `imageOffset.z` **must** be 0 and `imageExtent.depth` **must** be 1
- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-12214  
`srcAddress` **must** be a device address allocated to the application from a buffer created with the `VK_BUFFER_USAGE_TRANSFER_SRC_BIT` usage flag set

### Valid Usage (Implicit)

- VUID-VkCopyMemoryToImageIndirectCommandKHR-srcAddress-parameter  
`srcAddress` **must** be a valid [VkDeviceAddress](#) value
- VUID-VkCopyMemoryToImageIndirectCommandKHR-imageSubresource-parameter  
`imageSubresource` **must** be a valid [VkImageSubresourceLayers](#) structure

## 24.7. Image Copies With Scaling

To copy regions of a source image into a destination image, potentially performing format conversion, arbitrary scaling, and filtering, call:

```
// Provided by VK_VERSION_1_0
void vkCmdBlitImage(
    VkCommandBuffer                commandBuffer,
    VkImage                        srcImage,
    VkImageLayout                  srcImageLayout,
    VkImage                        dstImage,
    VkImageLayout                  dstImageLayout,
    uint32_t                       regionCount,
    const VkImageBlit*             pRegions,
    VkFilter                       filter);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `srcImage` is the source image.
- `srcImageLayout` is the layout of the source image subresources for the blit.
- `dstImage` is the destination image.
- `dstImageLayout` is the layout of the destination image subresources for the blit.
- `regionCount` is the number of regions to blit.
- `pRegions` is a pointer to an array of `VkImageBlit` structures specifying the regions to blit.
- `filter` is a `VkFilter` specifying the filter to apply if the blits require scaling.

`vkCmdBlitImage` **must** not be used for multisampled source or destination images. Use `vkCmdResolveImage` for this purpose.

As the sizes of the source and destination extents **can** differ in any dimension, texels in the source extent are scaled and filtered to the destination extent. Scaling occurs via the following operations:

- For each destination texel, the integer coordinate of that texel is converted to an unnormalized texture coordinate, using the effective inverse of the equations described in [unnormalized to integer conversion](#):

$$u_{\text{base}} = i + \frac{1}{2}$$

$$v_{\text{base}} = j + \frac{1}{2}$$

$$w_{\text{base}} = k + \frac{1}{2}$$

- These base coordinates are then offset by the first destination offset:

$$u_{\text{offset}} = u_{\text{base}} - x_{\text{dst0}}$$

$$v_{\text{offset}} = v_{\text{base}} - y_{\text{dst0}}$$

$$W_{\text{offset}} = W_{\text{base}} - Z_{\text{dst0}}$$

$$a_{\text{offset}} = a - \text{baseArrayCount}_{\text{dst}}$$

- The scale is determined from the source and destination regions, and applied to the offset coordinates:

$$\text{scale}_u = (x_{\text{src1}} - x_{\text{src0}}) / (x_{\text{dst1}} - x_{\text{dst0}})$$

$$\text{scale}_v = (y_{\text{src1}} - y_{\text{src0}}) / (y_{\text{dst1}} - y_{\text{dst0}})$$

$$\text{scale}_w = (z_{\text{src1}} - z_{\text{src0}}) / (z_{\text{dst1}} - z_{\text{dst0}})$$

$$u_{\text{scaled}} = u_{\text{offset}} \times \text{scale}_u$$

$$v_{\text{scaled}} = v_{\text{offset}} \times \text{scale}_v$$

$$w_{\text{scaled}} = w_{\text{offset}} \times \text{scale}_w$$

- Finally the source offset is added to the scaled coordinates, to determine the final unnormalized coordinates used to sample from `srcImage`:

$$u = u_{\text{scaled}} + x_{\text{src0}}$$

$$v = v_{\text{scaled}} + y_{\text{src0}}$$

$$w = w_{\text{scaled}} + z_{\text{src0}}$$

$$q = \text{mipLevel}$$

$$a = a_{\text{offset}} + \text{baseArrayCount}_{\text{src}}$$

These coordinates are used to sample from the source image, as described in [Image Operations chapter](#), with the filter mode equal to that of `filter`, a mipmap mode of `VK_SAMPLER_MIPMAP_MODE_NEAREST` and an address mode of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`. Implementations **must** clamp at the edge of the

source image, and **may** additionally clamp to the edge of the source region.

The destination offsets form a box which contains all texels which are written. A component in `dstOffsets[1]` **can** be smaller than the corresponding component in `dstOffsets[0]` and forms the same box as swapped `dstOffsets`. A destination texel exists if the half-texel coordinates  $u_{base}$ ,  $v_{base}$  and  $w_{base}$  are all contained inside the region.

**NOTE**

Due to allowable rounding errors in the generation of the source texture coordinates, it is not always possible to guarantee exactly which source texels will be sampled for a given blit. As rounding errors are implementation-dependent, the exact results of a blitting operation are also implementation-dependent.

While blitting with equal destination coordinates is not permitted, blitting with source coordinates being equal is. However, the resulting coordinate is integer and will approximately land in-between texels when sampled, which may produce unexpected results. Especially for nearest filtering, allowed imprecision in generation of the source coordinate may end up sampling an unexpected texel due to rounding errors if the coordinate is off by one ULP. Implementations are not required to implement the formula above exactly as written. E.g., varying interpolation in a fragment shader may be used.

Blits are done layer by layer starting with the `baseArrayLayer` member of `srcSubresource` for the source and `dstSubresource` for the destination. `layerCount` layers are blitted to the destination image.

When blitting 3D textures, slices in the destination region bounded by `dstOffsets[0].z` and `dstOffsets[1].z` are sampled from slices in the source region bounded by `srcOffsets[0].z` and `srcOffsets[1].z`. If the `filter` parameter is `VK_FILTER_LINEAR` then the value sampled from the source image is taken by doing linear filtering using the interpolated  $z$  coordinate represented by  $w$  in the previous equations. If the `filter` parameter is `VK_FILTER_NEAREST` then the value sampled from the source image is taken from the single nearest slice, with an implementation-dependent arithmetic rounding mode.

The following filtering and conversion rules apply:

- Integer formats **can** only be converted to other integer formats with the same signedness.
- No format conversion is supported between depth/stencil images. The formats **must** match.
- Format conversions on unorm, snorm, scaled and packed float formats of the copied aspect of the image are performed by first converting the pixels to float values.
- For sRGB source formats, nonlinear RGB values are converted to linear representation prior to filtering.
- After filtering, the float values are first clamped and then cast to the destination image format. In case of sRGB destination format, linear RGB values are converted to nonlinear representation before writing the pixel to the image.

Signed and unsigned integers are converted by first clamping to the representable range of the destination format, then casting the value.

## Valid Usage

- VUID-vkCmdBlitImage-commandBuffer-01834  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdBlitImage-commandBuffer-01835  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdBlitImage-commandBuffer-01836  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image
- VUID-vkCmdBlitImage-pRegions-00217  
The union of all destination regions, specified by the elements of `pRegions`, **must** not overlap in memory with any texel that **may** be sampled during the blit operation
- VUID-vkCmdBlitImage-srcImage-01999  
The `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_BLIT_SRC_BIT`
- VUID-vkCmdBlitImage-srcImage-06421  
`srcImage` **must** not use a `format that requires a sampler Y'CBCR conversion`
- VUID-vkCmdBlitImage-srcImage-00219  
`srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set
- VUID-vkCmdBlitImage-srcImage-00220  
If `srcImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdBlitImage-srcImageLayout-00221  
`srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-vkCmdBlitImage-srcImageLayout-01398  
`srcImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-vkCmdBlitImage-srcImage-09459  
If `srcImage` and `dstImage` are the same, and an element of `pRegions` contains the `srcSubresource` and `dstSubresource` with matching `mipLevel` and overlapping array layers, then the `srcImageLayout` and `dstImageLayout` **must** be `VK_IMAGE_LAYOUT_GENERAL` or `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`
- VUID-vkCmdBlitImage-dstImage-02000  
The `format features` of `dstImage` **must** contain `VK_FORMAT_FEATURE_BLIT_DST_BIT`
- VUID-vkCmdBlitImage-dstImage-06422  
`dstImage` **must** not use a `format that requires a sampler Y'CBCR conversion`
- VUID-vkCmdBlitImage-dstImage-00224  
`dstImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set

- VUID-vkCmdBlitImage-dstImage-00225  
If `dstImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdBlitImage-dstImageLayout-00226  
`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-vkCmdBlitImage-dstImageLayout-01399  
`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-vkCmdBlitImage-srcImage-00229  
If either of `srcImage` or `dstImage` was created with a signed integer `VkFormat`, the other **must** also have been created with a signed integer `VkFormat`
- VUID-vkCmdBlitImage-srcImage-00230  
If either of `srcImage` or `dstImage` was created with an unsigned integer color `VkFormat`, the other **must** also have been created with an unsigned integer color `VkFormat`
- VUID-vkCmdBlitImage-srcImage-00231  
If either of `srcImage` or `dstImage` was created with a depth/stencil format, the other **must** have exactly the same format
- VUID-vkCmdBlitImage-srcImage-00232  
If `srcImage` was created with a depth/stencil format, `filter` **must** be `VK_FILTER_NEAREST`
- VUID-vkCmdBlitImage-srcImage-00233  
`srcImage` **must** have been created with a `samples` value of `VK_SAMPLE_COUNT_1_BIT`
- VUID-vkCmdBlitImage-dstImage-00234  
`dstImage` **must** have been created with a `samples` value of `VK_SAMPLE_COUNT_1_BIT`
- VUID-vkCmdBlitImage-filter-02001  
If `filter` is `VK_FILTER_LINEAR`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`
- VUID-vkCmdBlitImage-filter-02002  
If `filter` is `VK_FILTER_CUBIC_EXT`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`
- VUID-vkCmdBlitImage-filter-00237  
If `filter` is `VK_FILTER_CUBIC_EXT`, `srcImage` **must** be of type `VK_IMAGE_TYPE_2D`
- VUID-vkCmdBlitImage-srcSubresource-01705  
The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-vkCmdBlitImage-dstSubresource-01706  
The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-vkCmdBlitImage-srcSubresource-01707  
If `srcSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `srcSubresource.baseArrayLayer` + `srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when

`srcImage` was created

- VUID-vkCmdBlitImage-dstSubresource-01708

If `dstSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `dstSubresource.baseArrayLayer + dstSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created

- VUID-vkCmdBlitImage-dstImage-02545

`dstImage` and `srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

- VUID-vkCmdBlitImage-maintenance8-10207

If the `maintenance8` feature is enabled and `srcImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `srcSubresource.baseArrayLayer` **must** be `0`, and `srcSubresource.layerCount` and `dstSubresource.layerCount` **must** each be `1`

- VUID-vkCmdBlitImage-maintenance8-10208

If the `maintenance8` feature is enabled and `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `dstSubresource.baseArrayLayer` **must** be `0`, and `srcSubresource.layerCount` and `dstSubresource.layerCount` **must** each be `1`

- VUID-vkCmdBlitImage-maintenance8-10579

If the `maintenance8` feature is enabled, `dstImage` is `VK_IMAGE_TYPE_3D`, and `srcImage` is not of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, the absolute difference of the `z` member of each member of `dstOffsets` **must** equal `srcSubresource.layerCount`

- VUID-vkCmdBlitImage-maintenance8-10580

If the `maintenance8` feature is enabled, `srcImage` is `VK_IMAGE_TYPE_3D`, and `dstImage` is not of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, the absolute difference of the `z` member of each member of `srcOffsets` **must** equal `dstSubresource.layerCount`

- VUID-vkCmdBlitImage-srcImage-00240

If the `maintenance8` feature is not enabled and either `srcImage` or `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `srcSubresource.baseArrayLayer` and `dstSubresource.baseArrayLayer` **must** each be `0`, and `srcSubresource.layerCount` and `dstSubresource.layerCount` **must** each be `1`

- VUID-vkCmdBlitImage-aspectMask-00241

For each element of `pRegions`, `srcSubresource.aspectMask` **must** specify aspects present in `srcImage`

- VUID-vkCmdBlitImage-aspectMask-00242

For each element of `pRegions`, `dstSubresource.aspectMask` **must** specify aspects present in `dstImage`

- VUID-vkCmdBlitImage-srcOffset-00243

For each element of `pRegions`, `srcOffsets[0].x` and `srcOffsets[1].x` **must** both be greater than or equal to `0` and less than or equal to the width of the specified `srcSubresource` of `srcImage`

- VUID-vkCmdBlitImage-srcOffset-00244

For each element of `pRegions`, `srcOffsets[0].y` and `srcOffsets[1].y` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `srcSubresource` of

`srcImage`

- VUID-vkCmdBlitImage-srcImage-00245

If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `srcOffsets[0].y` **must** be 0 and `srcOffsets[1].y` **must** be 1

- VUID-vkCmdBlitImage-srcOffset-00246

For each element of `pRegions`, `srcOffsets[0].z` and `srcOffsets[1].z` **must** both be greater than or equal to 0 and less than or equal to the depth of the specified `srcSubresource` of `srcImage`

- VUID-vkCmdBlitImage-srcImage-00247

If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `srcOffsets[0].z` **must** be 0 and `srcOffsets[1].z` **must** be 1

- VUID-vkCmdBlitImage-dstOffset-00248

For each element of `pRegions`, `dstOffsets[0].x` and `dstOffsets[1].x` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `dstSubresource` of `dstImage`

- VUID-vkCmdBlitImage-dstOffset-00249

For each element of `pRegions`, `dstOffsets[0].y` and `dstOffsets[1].y` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `dstSubresource` of `dstImage`

- VUID-vkCmdBlitImage-dstImage-00250

If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `dstOffsets[0].y` **must** be 0 and `dstOffsets[1].y` **must** be 1

- VUID-vkCmdBlitImage-dstOffset-00251

For each element of `pRegions`, `dstOffsets[0].z` and `dstOffsets[1].z` **must** both be greater than or equal to 0 and less than or equal to the depth of the specified `dstSubresource` of `dstImage`

- VUID-vkCmdBlitImage-dstImage-00252

If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `dstOffsets[0].z` **must** be 0 and `dstOffsets[1].z` **must** be 1

- VUID-vkCmdBlitImage-dstOffsets-12518

`dstOffsets[0].x` **must** not be equal to `dstOffsets[1].x`

- VUID-vkCmdBlitImage-dstOffsets-12519

`dstOffsets[0].y` **must** not be equal to `dstOffsets[1].y`

- VUID-vkCmdBlitImage-dstOffsets-12520

`dstOffsets[0].z` **must** not be equal to `dstOffsets[1].z`

## Valid Usage (Implicit)

- VUID-vkCmdBlitImage-commandBuffer-parameter

`commandBuffer` **must** be a valid `VkCommandBuffer` handle

- VUID-vkCmdBlitImage-srcImage-parameter

`srcImage` **must** be a valid `VkImage` handle

- VUID-vkCmdBlitImage-srcImageLayout-parameter  
`srcImageLayout` **must** be a valid `VkImageLayout` value
- VUID-vkCmdBlitImage-dstImage-parameter  
`dstImage` **must** be a valid `VkImage` handle
- VUID-vkCmdBlitImage-dstImageLayout-parameter  
`dstImageLayout` **must** be a valid `VkImageLayout` value
- VUID-vkCmdBlitImage-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkImageBlit` structures
- VUID-vkCmdBlitImage-filter-parameter  
`filter` **must** be a valid `VkFilter` value
- VUID-vkCmdBlitImage-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdBlitImage-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdBlitImage-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdBlitImage-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdBlitImage-videocoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdBlitImage-regionCount-arraylength  
`regionCount` **must** be greater than 0
- VUID-vkCmdBlitImage-commonparent  
Each of `commandBuffer`, `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same `VkDevice`

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                       | Command Type |
|-----------------------|-------------------|--------------------|---------------------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_VIDEO_BIT | Action       |

## Conditional Rendering

vkCmdBlitImage is not affected by [conditional rendering](#)

The `VkImageBlit` structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkImageBlit {
    VkImageSubresourceLayers    srcSubresource;
    VkOffset3D                  srcOffsets[2];
    VkImageSubresourceLayers    dstSubresource;
    VkOffset3D                  dstOffsets[2];
} VkImageBlit;
```

- `srcSubresource` is the subresource to blit from.
- `srcOffsets` is a pointer to an array of two `VkOffset3D` structures specifying the bounds of the source region within `srcSubresource`.
- `dstSubresource` is the subresource to blit into.
- `dstOffsets` is a pointer to an array of two `VkOffset3D` structures specifying the bounds of the destination region within `dstSubresource`.

For each element of the `pRegions` array, a blit operation is performed for the specified source and destination regions.

## Valid Usage

- VUID-VkImageBlit-aspectMask-00238  
The `aspectMask` member of `srcSubresource` and `dstSubresource` **must** match
- VUID-VkImageBlit-layerCount-08800  
If neither of the `layerCount` members of `srcSubresource` or `dstSubresource` are `VK_REMAINING_ARRAY_LAYERS`, the `layerCount` members of `srcSubresource` or `dstSubresource` **must** match
- VUID-VkImageBlit-layerCount-08801  
If one of the `layerCount` members of `srcSubresource` or `dstSubresource` is `VK_REMAINING_ARRAY_LAYERS`, the other member **must** be either `VK_REMAINING_ARRAY_LAYERS` or equal to the `arrayLayers` member of the `VkImageCreateInfo` used to create the image minus `baseArrayLayer`

## Valid Usage (Implicit)

- VUID-VkImageBlit-srcSubresource-parameter  
`srcSubresource` **must** be a valid `VkImageSubresourceLayers` structure
- VUID-VkImageBlit-dstSubresource-parameter

`dstSubresource` **must** be a valid [VkImageSubresourceLayers](#) structure

A more extensible version of the blit image command is defined below.

To copy regions of a source image into a destination image, potentially performing format conversion, arbitrary scaling, and filtering, call:

```
// Provided by VK_VERSION_1_3
void vkCmdBlitImage2(
    VkCommandBuffer                      commandBuffer,
    const VkBlitImageInfo2*             pBlitImageInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdBlitImage2
void vkCmdBlitImage2KHR(
    VkCommandBuffer                      commandBuffer,
    const VkBlitImageInfo2*             pBlitImageInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pBlitImageInfo` is a pointer to a [VkBlitImageInfo2](#) structure describing the blit parameters.

This command is functionally identical to [vkCmdBlitImage](#), but includes extensible sub-structures that include `sType` and `pNext` parameters, allowing them to be more easily extended.

### Valid Usage

- VUID-vkCmdBlitImage2-commandBuffer-01834  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdBlitImage2-commandBuffer-01835  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdBlitImage2-commandBuffer-01836  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image

### Valid Usage (Implicit)

- VUID-vkCmdBlitImage2-commandBuffer-parameter  
`commandBuffer` **must** be a valid [VkCommandBuffer](#) handle
- VUID-vkCmdBlitImage2-pBlitImageInfo-parameter  
`pBlitImageInfo` **must** be a valid pointer to a valid [VkBlitImageInfo2](#) structure
- VUID-vkCmdBlitImage2-commandBuffer-recording

`commandBuffer` **must** be in the [recording state](#)

- VUID-vkCmdBlitImage2-commandBuffer-cmdpool

The `VkCommandPool` that `commandBuffer` was allocated from **must** support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) operations

- VUID-vkCmdBlitImage2-renderpass

This command **must** only be called outside of a render pass instance

- VUID-vkCmdBlitImage2-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdBlitImage2-videocoding

This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_GRAPHICS_BIT | Action       |

## Conditional Rendering

`vkCmdBlitImage2` is not affected by [conditional rendering](#)

The `VkBlitImageInfo2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkBlitImageInfo2 {
    VkStructureType    sType;
    const void*        pNext;
    VkImage             srcImage;
    VkImageLayout      srcImageLayout;
    VkImage             dstImage;
    VkImageLayout      dstImageLayout;
    uint32_t           regionCount;
    const VkImageBlit2* pRegions;
    VkFilter            filter;
} VkBlitImageInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkBlitImageInfo2
typedef VkBlitImageInfo2 VkBlitImageInfo2KHR;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **srcImage** is the source image.
- **srcImageLayout** is the layout of the source image subresources for the blit.
- **dstImage** is the destination image.
- **dstImageLayout** is the layout of the destination image subresources for the blit.
- **regionCount** is the number of regions to blit.
- **pRegions** is a pointer to an array of [VkImageBlit2](#) structures specifying the regions to blit.
- **filter** is a [VkFilter](#) specifying the filter to apply if the blits require scaling.

## Valid Usage

- VUID-VkBlitImageInfo2-pRegions-00217  
The union of all destination regions, specified by the elements of **pRegions**, **must** not overlap in memory with any texel that **may** be sampled during the blit operation
- VUID-VkBlitImageInfo2-srcImage-01999  
The [format features](#) of **srcImage** **must** contain [VK\\_FORMAT\\_FEATURE\\_BLIT\\_SRC\\_BIT](#)
- VUID-VkBlitImageInfo2-srcImage-06421  
**srcImage** **must** not use a [format that requires a sampler Y'C<sub>B</sub>C<sub>R</sub> conversion](#)
- VUID-VkBlitImageInfo2-srcImage-00219  
**srcImage** **must** have been created with the [VK\\_IMAGE\\_USAGE\\_TRANSFER\\_SRC\\_BIT](#) usage flag set
- VUID-VkBlitImageInfo2-srcImage-00220  
If **srcImage** is non-sparse then it **must** be bound completely and contiguously to a single

VkDeviceMemory object

- VUID-VkBlitImageInfo2-srcImageLayout-00221  
`srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-VkBlitImageInfo2-srcImageLayout-01398  
`srcImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-VkBlitImageInfo2-srcImage-09459  
If `srcImage` and `dstImage` are the same, and an element of `pRegions` contains the `srcSubresource` and `dstSubresource` with matching `mipLevel` and overlapping array layers, then the `srcImageLayout` and `dstImageLayout` **must** be `VK_IMAGE_LAYOUT_GENERAL` or `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`
- VUID-VkBlitImageInfo2-dstImage-02000  
The `format features` of `dstImage` **must** contain `VK_FORMAT_FEATURE_BLIT_DST_BIT`
- VUID-VkBlitImageInfo2-dstImage-06422  
`dstImage` **must** not use a `format that requires a sampler Y'CBCR conversion`
- VUID-VkBlitImageInfo2-dstImage-00224  
`dstImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set
- VUID-VkBlitImageInfo2-dstImage-00225  
If `dstImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkBlitImageInfo2-dstImageLayout-00226  
`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-VkBlitImageInfo2-dstImageLayout-01399  
`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-VkBlitImageInfo2-srcImage-00229  
If either of `srcImage` or `dstImage` was created with a signed integer `VkFormat`, the other **must** also have been created with a signed integer `VkFormat`
- VUID-VkBlitImageInfo2-srcImage-00230  
If either of `srcImage` or `dstImage` was created with an unsigned integer color `VkFormat`, the other **must** also have been created with an unsigned integer color `VkFormat`
- VUID-VkBlitImageInfo2-srcImage-00231  
If either of `srcImage` or `dstImage` was created with a depth/stencil format, the other **must** have exactly the same format
- VUID-VkBlitImageInfo2-srcImage-00232  
If `srcImage` was created with a depth/stencil format, `filter` **must** be `VK_FILTER_NEAREST`
- VUID-VkBlitImageInfo2-srcImage-00233  
`srcImage` **must** have been created with a `samples` value of `VK_SAMPLE_COUNT_1_BIT`
- VUID-VkBlitImageInfo2-dstImage-00234

`dstImage` **must** have been created with a `samples` value of `VK_SAMPLE_COUNT_1_BIT`

- VUID-VkBlitImageInfo2-filter-02001

If `filter` is `VK_FILTER_LINEAR`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-VkBlitImageInfo2-filter-02002

If `filter` is `VK_FILTER_CUBIC_EXT`, then the `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- VUID-VkBlitImageInfo2-filter-00237

If `filter` is `VK_FILTER_CUBIC_EXT`, `srcImage` **must** be of type `VK_IMAGE_TYPE_2D`

- VUID-VkBlitImageInfo2-srcSubresource-01705

The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created

- VUID-VkBlitImageInfo2-dstSubresource-01706

The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created

- VUID-VkBlitImageInfo2-srcSubresource-01707

If `srcSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `srcSubresource.baseArrayLayer + srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `srcImage` was created

- VUID-VkBlitImageInfo2-dstSubresource-01708

If `dstSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `dstSubresource.baseArrayLayer + dstSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created

- VUID-VkBlitImageInfo2-dstImage-02545

`dstImage` and `srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`

- VUID-VkBlitImageInfo2-maintenance8-10207

If the `maintenance8` feature is enabled and `srcImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `srcSubresource.baseArrayLayer` **must** be `0`, and `srcSubresource.layerCount` and `dstSubresource.layerCount` **must** each be `1`

- VUID-VkBlitImageInfo2-maintenance8-10208

If the `maintenance8` feature is enabled and `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `dstSubresource.baseArrayLayer` **must** be `0`, and `srcSubresource.layerCount` and `dstSubresource.layerCount` **must** each be `1`

- VUID-VkBlitImageInfo2-maintenance8-10579

If the `maintenance8` feature is enabled, `dstImage` is `VK_IMAGE_TYPE_3D`, and `srcImage` is not of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, the absolute difference of the `z` member of each member of `dstOffsets` **must** equal `srcSubresource.layerCount`

- VUID-VkBlitImageInfo2-maintenance8-10580

If the `maintenance8` feature is enabled, `srcImage` is `VK_IMAGE_TYPE_3D`, and `dstImage` is not of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, the absolute difference of

the `z` member of each member of `srcOffsets` **must** equal `dstSubresource.layerCount`

- VUID-VkBlitImageInfo2-srcImage-00240

If the `maintenance8` feature is not enabled and either `srcImage` or `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `srcSubresource.baseArrayLayer` and `dstSubresource.baseArrayLayer` **must** each be `0`, and `srcSubresource.layerCount` and `dstSubresource.layerCount` **must** each be `1`

- VUID-VkBlitImageInfo2-aspectMask-00241

For each element of `pRegions`, `srcSubresource.aspectMask` **must** specify aspects present in `srcImage`

- VUID-VkBlitImageInfo2-aspectMask-00242

For each element of `pRegions`, `dstSubresource.aspectMask` **must** specify aspects present in `dstImage`

- VUID-VkBlitImageInfo2-srcOffset-00243

For each element of `pRegions`, `srcOffsets[0].x` and `srcOffsets[1].x` **must** both be greater than or equal to `0` and less than or equal to the width of the specified `srcSubresource` of `srcImage`

- VUID-VkBlitImageInfo2-srcOffset-00244

For each element of `pRegions`, `srcOffsets[0].y` and `srcOffsets[1].y` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `srcSubresource` of `srcImage`

- VUID-VkBlitImageInfo2-srcImage-00245

If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `srcOffsets[0].y` **must** be `0` and `srcOffsets[1].y` **must** be `1`

- VUID-VkBlitImageInfo2-srcOffset-00246

For each element of `pRegions`, `srcOffsets[0].z` and `srcOffsets[1].z` **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `srcSubresource` of `srcImage`

- VUID-VkBlitImageInfo2-srcImage-00247

If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `srcOffsets[0].z` **must** be `0` and `srcOffsets[1].z` **must** be `1`

- VUID-VkBlitImageInfo2-dstOffset-00248

For each element of `pRegions`, `dstOffsets[0].x` and `dstOffsets[1].x` **must** both be greater than or equal to `0` and less than or equal to the width of the specified `dstSubresource` of `dstImage`

- VUID-VkBlitImageInfo2-dstOffset-00249

For each element of `pRegions`, `dstOffsets[0].y` and `dstOffsets[1].y` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `dstSubresource` of `dstImage`

- VUID-VkBlitImageInfo2-dstImage-00250

If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `dstOffsets[0].y` **must** be `0` and `dstOffsets[1].y` **must** be `1`

- VUID-VkBlitImageInfo2-dstOffset-00251

For each element of `pRegions`, `dstOffsets[0].z` and `dstOffsets[1].z` **must** both be greater

than or equal to 0 and less than or equal to the depth of the specified `dstSubresource` of `dstImage`

- VUID-VkBlitImageInfo2-dstImage-00252  
If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `dstOffsets[0].z` **must** be 0 and `dstOffsets[1].z` **must** be 1
- VUID-VkBlitImageInfo2-dstOffsets-12518  
`dstOffsets[0].x` **must** not be equal to `dstOffsets[1].x`
- VUID-VkBlitImageInfo2-dstOffsets-12519  
`dstOffsets[0].y` **must** not be equal to `dstOffsets[1].y`
- VUID-VkBlitImageInfo2-dstOffsets-12520  
`dstOffsets[0].z` **must** not be equal to `dstOffsets[1].z`

### Valid Usage (Implicit)

- VUID-VkBlitImageInfo2-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_BLIT_IMAGE_INFO_2`
- VUID-VkBlitImageInfo2-pNext-pNext  
`pNext` **must** be NULL
- VUID-VkBlitImageInfo2-srcImage-parameter  
`srcImage` **must** be a valid `VkImage` handle
- VUID-VkBlitImageInfo2-srcImageLayout-parameter  
`srcImageLayout` **must** be a valid `VkImageLayout` value
- VUID-VkBlitImageInfo2-dstImage-parameter  
`dstImage` **must** be a valid `VkImage` handle
- VUID-VkBlitImageInfo2-dstImageLayout-parameter  
`dstImageLayout` **must** be a valid `VkImageLayout` value
- VUID-VkBlitImageInfo2-pRegions-parameter  
`pRegions` **must** be a valid pointer to an array of `regionCount` valid `VkImageBlit2` structures
- VUID-VkBlitImageInfo2-filter-parameter  
`filter` **must** be a valid `VkFilter` value
- VUID-VkBlitImageInfo2-regionCount-arraylength  
`regionCount` **must** be greater than 0
- VUID-VkBlitImageInfo2-commonparent  
Both of `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same `VkDevice`

The `VkImageBlit2` structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkImageBlit2 {
    VkStructureType      sType;
    const void*          pNext;
    VkImageSubresourceLayers srcSubresource;
    VkOffset3D            srcOffsets[2];
    VkImageSubresourceLayers dstSubresource;
    VkOffset3D            dstOffsets[2];
} VkImageBlit2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkImageBlit2
typedef VkImageBlit2 VkImageBlit2KHR;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **srcSubresource** is the subresource to blit from.
- **srcOffsets** is a pointer to an array of two [VkOffset3D](#) structures specifying the bounds of the source region within **srcSubresource**.
- **dstSubresource** is the subresource to blit into.
- **dstOffsets** is a pointer to an array of two [VkOffset3D](#) structures specifying the bounds of the destination region within **dstSubresource**.

For each element of the **pRegions** array, a blit operation is performed for the specified source and destination regions.

## Valid Usage

- VUID-VkImageBlit2-aspectMask-00238  
The **aspectMask** member of **srcSubresource** and **dstSubresource** **must** match
- VUID-VkImageBlit2-layerCount-08800  
If neither of the **layerCount** members of **srcSubresource** or **dstSubresource** are [VK\\_REMAINING\\_ARRAY\\_LAYERS](#), the **layerCount** members of **srcSubresource** or **dstSubresource** **must** match
- VUID-VkImageBlit2-layerCount-08801  
If one of the **layerCount** members of **srcSubresource** or **dstSubresource** is [VK\\_REMAINING\\_ARRAY\\_LAYERS](#), the other member **must** be either [VK\\_REMAINING\\_ARRAY\\_LAYERS](#) or equal to the **arrayLayers** member of the [VkImageCreateInfo](#) used to create the image minus **baseArrayLayer**

### Valid Usage (Implicit)

- VUID-VkImageBlit2-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_IMAGE_BLIT_2`
- VUID-VkImageBlit2-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkImageBlit2-srcSubresource-parameter  
`srcSubresource` **must** be a valid `VkImageSubresourceLayers` structure
- VUID-VkImageBlit2-dstSubresource-parameter  
`dstSubresource` **must** be a valid `VkImageSubresourceLayers` structure

## 24.8. Resolving Multisample Images

To resolve a multisample color image to a non-multisample color image, call:

```
// Provided by VK_VERSION_1_0
void vkCmdResolveImage(
    VkCommandBuffer          commandBuffer,
    VkImage                  srcImage,
    VkImageLayout            srcImageLayout,
    VkImage                  dstImage,
    VkImageLayout            dstImageLayout,
    uint32_t                 regionCount,
    const VkImageResolve*    pRegions);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `srcImage` is the source image.
- `srcImageLayout` is the layout of the source image subresources for the resolve.
- `dstImage` is the destination image.
- `dstImageLayout` is the layout of the destination image subresources for the resolve.
- `regionCount` is the number of regions to resolve.
- `pRegions` is a pointer to an array of `VkImageResolve` structures specifying the regions to resolve.

During the resolve the samples corresponding to each pixel location in the source are converted to a single sample before being written to the destination.

If the source format is a floating-point or normalized type, the resolve mode is chosen as implementation-dependent behavior. If the resolve mode requires to calculate the result from multiple samples, such as by computing an average or weighted average of the samples, the values for each pixel are resolved with implementation-defined numerical precision.

If the `numeric format` of `srcImage` uses sRGB encoding and the resolve mode requires the implementation to convert the samples to floating-point to perform the calculations, the

implementation **should** convert samples from nonlinear to linear before resolving the samples as described in the “sRGB EOTF” section of the [Khronos Data Format Specification](#). In this case, the implementation **must** convert the linear averaged value to nonlinear before writing the resolved result to `dstImage`. If the `maintenance10` feature is enabled, whether a nonlinear to linear conversion happens for sRGB encoded resolve is controlled by `resolveSrgbFormatAppliesTransferFunction`.

If the source format is an integer type, a single sample’s value is selected for each pixel.

`srcOffset` and `dstOffset` select the initial `x`, `y`, and `z` offsets in texels of the sub-regions of the source and destination image data. `extent` is the size in texels of the source image to resolve in `width`, `height` and `depth`. Each element of `pRegions` **must** be a region that is contained within its corresponding image.

Resolves are done layer by layer starting with `baseArrayLayer` member of `srcSubresource` for the source and `dstSubresource` for the destination. `layerCount` layers are resolved to the destination image.

### Valid Usage

- VUID-vkCmdResolveImage-commandBuffer-01837  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdResolveImage-commandBuffer-01838  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdResolveImage-commandBuffer-01839  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image
- VUID-vkCmdResolveImage-pRegions-00255  
The union of all source regions, and the union of all destination regions, specified by the elements of `pRegions`, **must** not overlap in memory
- VUID-vkCmdResolveImage-srcImage-00256  
If `srcImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdResolveImage-srcImage-00257  
`srcImage` **must** have a sample count equal to any valid sample count value other than `VK_SAMPLE_COUNT_1_BIT`
- VUID-vkCmdResolveImage-dstImage-00258  
If `dstImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdResolveImage-dstImage-00259  
`dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-vkCmdResolveImage-srcImageLayout-00260  
`srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`

- VUID-vkCmdResolveImage-srcImageLayout-01400  
`srcImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-vkCmdResolveImage-dstImageLayout-00262  
`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-vkCmdResolveImage-dstImageLayout-01401  
`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-vkCmdResolveImage-maintenance10-11799  
If the `maintenance10` feature is enabled, the `format` features of `dstImage` **must** contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT` or `VK_FORMAT_FEATURE_DEPTH_STENCIL_ATTACHMENT_BIT`
- VUID-vkCmdResolveImage-dstImage-02003  
The `format` features of `dstImage` **must** contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT` if the `maintenance10` feature is not enabled
- VUID-vkCmdResolveImage-srcImage-01386  
`srcImage` and `dstImage` **must** have been created with the same image format
- VUID-vkCmdResolveImage-srcSubresource-01709  
The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-vkCmdResolveImage-dstSubresource-01710  
The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-vkCmdResolveImage-srcSubresource-01711  
If `srcSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `srcSubresource.baseArrayLayer` + `srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-vkCmdResolveImage-dstSubresource-01712  
If `dstSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `dstSubresource.baseArrayLayer` + `dstSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-vkCmdResolveImage-dstImage-02546  
`dstImage` and `srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`
- VUID-vkCmdResolveImage-srcImage-04446  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `srcSubresource.layerCount` **must** be 1
- VUID-vkCmdResolveImage-srcImage-04447  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`,

`dstSubresource.baseArrayLayer` **must** be 0 and `dstSubresource.layerCount` **must** be 1

- VUID-vkCmdResolveImage-srcOffset-00269  
For each element of `pRegions`, `srcOffset.x` and `(extent.width + srcOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `srcSubresource` of `srcImage`
- VUID-vkCmdResolveImage-srcOffset-00270  
For each element of `pRegions`, `srcOffset.y` and `(extent.height + srcOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `srcSubresource` of `srcImage`
- VUID-vkCmdResolveImage-srcImage-00271  
If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `srcOffset.y` **must** be 0 and `extent.height` **must** be 1
- VUID-vkCmdResolveImage-srcOffset-00272  
For each element of `pRegions`, `srcOffset.z` and `(extent.depth + srcOffset.z)` **must** both be greater than or equal to 0 and less than or equal to the depth of the specified `srcSubresource` of `srcImage`
- VUID-vkCmdResolveImage-srcImage-00273  
If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `srcOffset.z` **must** be 0 and `extent.depth` **must** be 1
- VUID-vkCmdResolveImage-dstOffset-00274  
For each element of `pRegions`, `dstOffset.x` and `(extent.width + dstOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `dstSubresource` of `dstImage`
- VUID-vkCmdResolveImage-dstOffset-00275  
For each element of `pRegions`, `dstOffset.y` and `(extent.height + dstOffset.y)` **must** both be greater than or equal to 0 and less than or equal to the height of the specified `dstSubresource` of `dstImage`
- VUID-vkCmdResolveImage-dstImage-00276  
If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `dstOffset.y` **must** be 0 and `extent.height` **must** be 1
- VUID-vkCmdResolveImage-dstOffset-00277  
For each element of `pRegions`, `dstOffset.z` and `(extent.depth + dstOffset.z)` **must** both be greater than or equal to 0 and less than or equal to the depth of the specified `dstSubresource` of `dstImage`
- VUID-vkCmdResolveImage-dstImage-00278  
If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `dstOffset.z` **must** be 0 and `extent.depth` **must** be 1
- VUID-vkCmdResolveImage-srcImage-06762  
`srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set
- VUID-vkCmdResolveImage-srcImage-06763  
The `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_SRC_BIT`
- VUID-vkCmdResolveImage-dstImage-06764

**dstImage** **must** have been created with the [VK\\_IMAGE\\_USAGE\\_TRANSFER\\_DST\\_BIT](#) usage flag set

- VUID-vkCmdResolveImage-dstImage-06765  
The [format features](#) of **dstImage** **must** contain [VK\\_FORMAT\\_FEATURE\\_TRANSFER\\_DST\\_BIT](#)
- VUID-vkCmdResolveImage-srcSubresource-11800  
**srcSubresource.aspectMask** for each element in **pRegions** **must** not specify an aspect which is not part of the image format of **srcImage**
- VUID-vkCmdResolveImage-dstSubresource-11801  
**dstSubresource.aspectMask** for each element in **pRegions** **must** not specify an aspect which is not part of the image format of **dstImage**
- VUID-vkCmdResolveImage-srcSubresource-11802  
**srcSubresource.aspectMask** **must** equal **dstSubresource.aspectMask** for each element in **pRegions**

### Valid Usage (Implicit)

- VUID-vkCmdResolveImage-commandBuffer-parameter  
**commandBuffer** **must** be a valid [VkCommandBuffer](#) handle
- VUID-vkCmdResolveImage-srcImage-parameter  
**srcImage** **must** be a valid [VkImage](#) handle
- VUID-vkCmdResolveImage-srcImageLayout-parameter  
**srcImageLayout** **must** be a valid [VkImageLayout](#) value
- VUID-vkCmdResolveImage-dstImage-parameter  
**dstImage** **must** be a valid [VkImage](#) handle
- VUID-vkCmdResolveImage-dstImageLayout-parameter  
**dstImageLayout** **must** be a valid [VkImageLayout](#) value
- VUID-vkCmdResolveImage-pRegions-parameter  
**pRegions** **must** be a valid pointer to an array of **regionCount** valid [VkImageResolve](#) structures
- VUID-vkCmdResolveImage-commandBuffer-recording  
**commandBuffer** **must** be in the [recording state](#)
- VUID-vkCmdResolveImage-commandBuffer-cmdpool  
The [VkCommandPool](#) that **commandBuffer** was allocated from **must** support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) operations
- VUID-vkCmdResolveImage-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdResolveImage-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdResolveImage-vidcoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdResolveImage-regionCount-arraylength

`regionCount` **must** be greater than 0

- VUID-vkCmdResolveImage-commonparent

Each of `commandBuffer`, `dstImage`, and `srcImage` **must** have been created, allocated, or retrieved from the same `VkDevice`

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types         | Command Type |
|-----------------------|-------------------|--------------------|-------------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_GRAPHICS<br>HICS_BIT | Action       |

## Conditional Rendering

`vkCmdResolveImage` is not affected by [conditional rendering](#)

The `VkImageResolve` structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkImageResolve {
    VkImageSubresourceLayers    srcSubresource;
    VkOffset3D                  srcOffset;
    VkImageSubresourceLayers    dstSubresource;
    VkOffset3D                  dstOffset;
    VkExtent3D                  extent;
} VkImageResolve;
```

- `srcSubresource` and `dstSubresource` are `VkImageSubresourceLayers` structures specifying the image subresources of the images used for the source and destination image data, respectively. Resolve of depth/stencil images is not supported. `VkImageResolve2` **can** support resolve of depth/stencil images with `maintenance10` instead.
- `srcOffset` and `dstOffset` select the initial `x`, `y`, and `z` offsets in texels of the sub-regions of the source and destination image data.
- `extent` is the size in texels of the source image to resolve in `width`, `height` and `depth`.

## Valid Usage

- VUID-VkImageResolve-aspectMask-10981  
The `aspectMask` member of `srcSubresource` and `dstSubresource` **must** only contain `VK_IMAGE_ASPECT_COLOR_BIT`
- VUID-VkImageResolve-layerCount-08803  
If neither of the `layerCount` members of `srcSubresource` or `dstSubresource` are `VK_REMAINING_ARRAY_LAYERS`, the `layerCount` member of `srcSubresource` and `dstSubresource` **must** match
- VUID-VkImageResolve-layerCount-08804  
If one of the `layerCount` members of `srcSubresource` or `dstSubresource` is `VK_REMAINING_ARRAY_LAYERS`, the other member **must** be either `VK_REMAINING_ARRAY_LAYERS` or equal to the `arrayLayers` member of the `VkImageCreateInfo` used to create the image minus `baseArrayLayer`

## Valid Usage (Implicit)

- VUID-VkImageResolve-srcSubresource-parameter  
`srcSubresource` **must** be a valid `VkImageSubresourceLayers` structure
- VUID-VkImageResolve-dstSubresource-parameter  
`dstSubresource` **must** be a valid `VkImageSubresourceLayers` structure

A more extensible version of the resolve image command is defined below.

To resolve a multisample image to a non-multisample image, call:

```
// Provided by VK_VERSION_1_3
void vkCmdResolveImage2(
    VkCommandBuffer                      commandBuffer,
    const VkResolveImageInfo2*           pResolveImageInfo);
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to vkCmdResolveImage2
void vkCmdResolveImage2KHR(
    VkCommandBuffer                      commandBuffer,
    const VkResolveImageInfo2*           pResolveImageInfo);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `pResolveImageInfo` is a pointer to a `VkResolveImageInfo2` structure describing the resolve parameters.

This command is functionally identical to `vkCmdResolveImage`, but includes extensible sub-

structures that include `sType` and `pNext` parameters, allowing them to be more easily extended.

### Valid Usage

- VUID-vkCmdResolveImage2-commandBuffer-01837  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `srcImage` **must** not be a protected image
- VUID-vkCmdResolveImage2-commandBuffer-01838  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be a protected image
- VUID-vkCmdResolveImage2-commandBuffer-01839  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, `dstImage` **must** not be an unprotected image

### Valid Usage (Implicit)

- VUID-vkCmdResolveImage2-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdResolveImage2-pResolveImageInfo-parameter  
`pResolveImageInfo` **must** be a valid pointer to a valid `VkResolveImageInfo2` structure
- VUID-vkCmdResolveImage2-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdResolveImage2-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdResolveImage2-renderpass  
This command **must** only be called outside of a render pass instance
- VUID-vkCmdResolveImage2-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdResolveImage2-videocoding  
This command **must** only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types     | Command Type |
|-----------------------|-------------------|--------------------|---------------------------|--------------|
| Primary<br>Secondary  | Outside           | Outside            | VK_QUEUE_GRAP<br>HICS_BIT | Action       |

## Conditional Rendering

vkCmdResolveImage2 is not affected by [conditional rendering](#)

The [VkResolveImageInfo2](#) structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkResolveImageInfo2 {
    VkStructureType    sType;
    const void*        pNext;
    VkImage             srcImage;
    VkImageLayout      srcImageLayout;
    VkImage             dstImage;
    VkImageLayout      dstImageLayout;
    uint32_t            regionCount;
    const VkImageResolve2* pRegions;
} VkResolveImageInfo2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkResolveImageInfo2
typedef VkResolveImageInfo2 VkResolveImageInfo2KHR;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is `NULL` or a pointer to a structure extending this structure.
- **srcImage** is the source image.
- **srcImageLayout** is the layout of the source image subresources for the resolve.
- **dstImage** is the destination image.
- **dstImageLayout** is the layout of the destination image subresources for the resolve.
- **regionCount** is the number of regions to resolve.
- **pRegions** is a pointer to an array of [VkImageResolve2](#) structures specifying the regions to resolve.

If the source format is a floating-point or normalized type, the resolve mode is chosen as implementation-dependent behavior, unless [VkResolveImageModeInfoKHR](#) is included in the **pNext**

chain, in which case it is defined by `VkResolveImageModeInfoKHR::resolveMode`. If the resolve mode requires to calculate the result from multiple samples, such as by computing an average or weighted average of the samples, the values for each pixel are resolved with implementation-defined numerical precision.

If the `numeric format` of `srcImage` uses sRGB encoding and the resolve mode requires the implementation to convert the samples to floating-point to perform the calculations, the implementation **should** convert samples from nonlinear to linear before resolving the samples as described in the “sRGB EOTF” section of the [Khronos Data Format Specification](#). In this case, the implementation **must** convert the linear averaged value to nonlinear before writing the resolved result to `dstImage`. If the `maintenance10` feature is enabled, whether a nonlinear to linear conversion happens for sRGB encoded resolve is controlled by `resolveSrgbFormatAppliesTransferFunction`. If `VkResolveImageModeInfoKHR` is included in the `pNext` chain, this default behavior **can** be overridden with `VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR` or `VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR` flags.

If the source format is an integer type, a single sample’s value is selected for each pixel, unless `VkResolveImageModeInfoKHR` is included in the `pNext` chain, in which case it is defined by `VkResolveImageModeInfoKHR::resolveMode` or `VkResolveImageModeInfoKHR::stencilResolveMode` depending on which aspect is being resolved.

### Valid Usage

- VUID-VkResolveImageInfo2-pRegions-00255  
The union of all source regions, and the union of all destination regions, specified by the elements of `pRegions`, **must** not overlap in memory
- VUID-VkResolveImageInfo2-srcImage-00256  
If `srcImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkResolveImageInfo2-srcImage-00257  
`srcImage` **must** have a sample count equal to any valid sample count value other than `VK_SAMPLE_COUNT_1_BIT`
- VUID-VkResolveImageInfo2-dstImage-00258  
If `dstImage` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-VkResolveImageInfo2-dstImage-00259  
`dstImage` **must** have a sample count equal to `VK_SAMPLE_COUNT_1_BIT`
- VUID-VkResolveImageInfo2-srcImageLayout-00260  
`srcImageLayout` **must** specify the layout of the image subresources of `srcImage` specified in `pRegions` at the time this command is executed on a `VkDevice`
- VUID-VkResolveImageInfo2-srcImageLayout-01400  
`srcImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_SRC_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-VkResolveImageInfo2-dstImageLayout-00262  
`dstImageLayout` **must** specify the layout of the image subresources of `dstImage` specified in

`pRegions` at the time this command is executed on a `VkDevice`

- VUID-VkResolveImageInfo2-dstImageLayout-01401  
`dstImageLayout` **must** be `VK_IMAGE_LAYOUT_SHARED_PRESENT_KHR`, `VK_IMAGE_LAYOUT_TRANSFER_DST_OPTIMAL` or `VK_IMAGE_LAYOUT_GENERAL`
- VUID-VkResolveImageInfo2-maintenance10-11799  
If the `maintenance10` feature is enabled, the `format` features of `dstImage` **must** contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT` or `VK_FORMAT_FEATURE_DEPTH_STENCIL_ATTACHMENT_BIT`
- VUID-VkResolveImageInfo2-dstImage-02003  
The `format` features of `dstImage` **must** contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BIT` if the `maintenance10` feature is not enabled
- VUID-VkResolveImageInfo2-srcImage-01386  
`srcImage` and `dstImage` **must** have been created with the same image format
- VUID-VkResolveImageInfo2-srcSubresource-01709  
The `srcSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-VkResolveImageInfo2-dstSubresource-01710  
The `dstSubresource.mipLevel` member of each element of `pRegions` **must** be less than the `mipLevels` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-VkResolveImageInfo2-srcSubresource-01711  
If `srcSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `srcSubresource.baseArrayLayer` + `srcSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `srcImage` was created
- VUID-VkResolveImageInfo2-dstSubresource-01712  
If `dstSubresource.layerCount` is not `VK_REMAINING_ARRAY_LAYERS`, `dstSubresource.baseArrayLayer` + `dstSubresource.layerCount` of each element of `pRegions` **must** be less than or equal to the `arrayLayers` specified in `VkImageCreateInfo` when `dstImage` was created
- VUID-VkResolveImageInfo2-dstImage-02546  
`dstImage` and `srcImage` **must** not have been created with `flags` containing `VK_IMAGE_CREATE_SUBSAMPLED_BIT_EXT`
- VUID-VkResolveImageInfo2-srcImage-04446  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `srcSubresource.layerCount` **must** be 1
- VUID-VkResolveImageInfo2-srcImage-04447  
If `dstImage` is of type `VK_IMAGE_TYPE_3D`, then for each element of `pRegions`, `dstSubresource.baseArrayLayer` **must** be 0 and `dstSubresource.layerCount` **must** be 1
- VUID-VkResolveImageInfo2-srcOffset-00269  
For each element of `pRegions`, `srcOffset.x` and `(extent.width + srcOffset.x)` **must** both be greater than or equal to 0 and less than or equal to the width of the specified `srcSubresource` of `srcImage`

- VUID-VkResolveImageInfo2-srcOffset-00270  
For each element of `pRegions`, `srcOffset.y` and `(extent.height + srcOffset.y)` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `srcSubresource` of `srcImage`
- VUID-VkResolveImageInfo2-srcImage-00271  
If `srcImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `srcOffset.y` **must** be `0` and `extent.height` **must** be `1`
- VUID-VkResolveImageInfo2-srcOffset-00272  
For each element of `pRegions`, `srcOffset.z` and `(extent.depth + srcOffset.z)` **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `srcSubresource` of `srcImage`
- VUID-VkResolveImageInfo2-srcImage-00273  
If `srcImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `srcOffset.z` **must** be `0` and `extent.depth` **must** be `1`
- VUID-VkResolveImageInfo2-dstOffset-00274  
For each element of `pRegions`, `dstOffset.x` and `(extent.width + dstOffset.x)` **must** both be greater than or equal to `0` and less than or equal to the width of the specified `dstSubresource` of `dstImage`
- VUID-VkResolveImageInfo2-dstOffset-00275  
For each element of `pRegions`, `dstOffset.y` and `(extent.height + dstOffset.y)` **must** both be greater than or equal to `0` and less than or equal to the height of the specified `dstSubresource` of `dstImage`
- VUID-VkResolveImageInfo2-dstImage-00276  
If `dstImage` is of type `VK_IMAGE_TYPE_1D`, then for each element of `pRegions`, `dstOffset.y` **must** be `0` and `extent.height` **must** be `1`
- VUID-VkResolveImageInfo2-dstOffset-00277  
For each element of `pRegions`, `dstOffset.z` and `(extent.depth + dstOffset.z)` **must** both be greater than or equal to `0` and less than or equal to the depth of the specified `dstSubresource` of `dstImage`
- VUID-VkResolveImageInfo2-dstImage-00278  
If `dstImage` is of type `VK_IMAGE_TYPE_1D` or `VK_IMAGE_TYPE_2D`, then for each element of `pRegions`, `dstOffset.z` **must** be `0` and `extent.depth` **must** be `1`
- VUID-VkResolveImageInfo2-srcImage-06762  
`srcImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_SRC_BIT` usage flag set
- VUID-VkResolveImageInfo2-srcImage-06763  
The `format features` of `srcImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_SRC_BIT`
- VUID-VkResolveImageInfo2-dstImage-06764  
`dstImage` **must** have been created with the `VK_IMAGE_USAGE_TRANSFER_DST_BIT` usage flag set
- VUID-VkResolveImageInfo2-dstImage-06765  
The `format features` of `dstImage` **must** contain `VK_FORMAT_FEATURE_TRANSFER_DST_BIT`
- VUID-VkResolveImageInfo2-srcSubresource-11800

`srcSubresource.aspectMask` for each element in `pRegions` **must** not specify an aspect which is not part of the image format of `srcImage`

- VUID-VkResolveImageInfo2-dstSubresource-11801

`dstSubresource.aspectMask` for each element in `pRegions` **must** not specify an aspect which is not part of the image format of `dstImage`

- VUID-VkResolveImageInfo2-srcSubresource-11802

`srcSubresource.aspectMask` **must** equal `dstSubresource.aspectMask` for each element in `pRegions`

- VUID-VkResolveImageInfo2-pNext-10982

If `VkResolveImageModeInfoKHR` is included in the `pNext` chain, `flags` includes `VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR` or `VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR`, then the format of `srcImage` and `dstImage` **must** use sRGB encoding

- VUID-VkResolveImageInfo2-srcImage-10983

If `srcImage` has a color format and `VkResolveImageModeInfoKHR` is included in the `pNext` chain, its `resolveMode` **must** not be `VK_RESOLVE_MODE_NONE`

- VUID-VkResolveImageInfo2-srcImage-10984

If `srcImage` has a non-integer color format, and `VkResolveImageModeInfoKHR` is included in the `pNext` chain, its `resolveMode` **must** be `VK_RESOLVE_MODE_AVERAGE_BIT`

- VUID-VkResolveImageInfo2-srcImage-10985

If `srcImage` has an integer color format, and `VkResolveImageModeInfoKHR` is included in the `pNext` chain, its `resolveMode` **must** be `VK_RESOLVE_MODE_SAMPLE_ZERO_BIT`

- VUID-VkResolveImageInfo2-srcImage-10986

If `srcImage` has a depth-stencil format, `VkResolveImageModeInfoKHR` **must** be included in the `pNext` chain

- VUID-VkResolveImageInfo2-srcImage-10987

If `srcImage` has a depth-stencil format, and a depth aspect is referenced by `pRegions`, `VkResolveImageModeInfoKHR::resolveMode` **must** not be `VK_RESOLVE_MODE_NONE`

- VUID-VkResolveImageInfo2-srcImage-10988

If `srcImage` has a depth-stencil format, and a stencil aspect is referenced by `pRegions`, `VkResolveImageModeInfoKHR::stencilResolveMode` **must** not be `VK_RESOLVE_MODE_NONE`

- VUID-VkResolveImageInfo2-srcImage-10989

If `srcImage` has a depth-stencil format, and a depth aspect is referenced by `pRegions`, `VkResolveImageModeInfoKHR::resolveMode` **must** be one of the bits set in `VkPhysicalDeviceDepthStencilResolveProperties::supportedDepthResolveModes`

- VUID-VkResolveImageInfo2-srcImage-10990

If `srcImage` has a depth-stencil format, and a stencil aspect is referenced by `pRegions`, `VkResolveImageModeInfoKHR::stencilResolveMode` **must** be one of the bits set in `VkPhysicalDeviceDepthStencilResolveProperties::supportedStencilResolveModes`

- VUID-VkResolveImageInfo2-srcImage-10991

If `srcImage` has a depth-stencil format, and both a depth aspect and stencil aspect is referenced by `pRegions`, and `VkPhysicalDeviceDepthStencilResolveProperties`

::**independentResolve** is **VK\_FALSE**, **VkResolveImageModeInfoKHR::resolveMode** **must** be equal to **VkResolveImageModeInfoKHR::stencilResolveMode**

- VUID-VkResolveImageInfo2-srcImage-10992

If **srcImage** has a depth-stencil format containing both a depth aspect and stencil aspect, and **VkPhysicalDeviceDepthStencilResolveProperties::independentResolveNone** is **VK\_FALSE**, every element of **pRegions** **must** contain both depth and stencil aspects

## Valid Usage (Implicit)

- VUID-VkResolveImageInfo2-sType-sType  
**sType** **must** be **VK\_STRUCTURE\_TYPE\_RESOLVE\_IMAGE\_INFO\_2**
- VUID-VkResolveImageInfo2-pNext-pNext  
**pNext** **must** be **NULL** or a pointer to a valid instance of **VkResolveImageModeInfoKHR**
- VUID-VkResolveImageInfo2-sType-unique  
The **sType** value of each structure in the **pNext** chain **must** be unique
- VUID-VkResolveImageInfo2-srcImage-parameter  
**srcImage** **must** be a valid **VkImage** handle
- VUID-VkResolveImageInfo2-srcImageLayout-parameter  
**srcImageLayout** **must** be a valid **VkImageLayout** value
- VUID-VkResolveImageInfo2-dstImage-parameter  
**dstImage** **must** be a valid **VkImage** handle
- VUID-VkResolveImageInfo2-dstImageLayout-parameter  
**dstImageLayout** **must** be a valid **VkImageLayout** value
- VUID-VkResolveImageInfo2-pRegions-parameter  
**pRegions** **must** be a valid pointer to an array of **regionCount** valid **VkImageResolve2** structures
- VUID-VkResolveImageInfo2-regionCount-arraylength  
**regionCount** **must** be greater than 0
- VUID-VkResolveImageInfo2-commonparent  
Both of **dstImage**, and **srcImage** **must** have been created, allocated, or retrieved from the same **VkDevice**

The **VkImageResolve2** structure is defined as:

```
// Provided by VK_VERSION_1_3
typedef struct VkImageResolve2 {
    VkStructureType      sType;
    const void*          pNext;
    VkImageSubresourceLayers srcSubresource;
    VkOffset3D            srcOffset;
    VkImageSubresourceLayers dstSubresource;
    VkOffset3D            dstOffset;
    VkExtent3D            extent;
} VkImageResolve2;
```

```
// Provided by VK_KHR_copy_commands2
// Equivalent to VkImageResolve2
typedef VkImageResolve2 VkImageResolve2KHR;
```

- **sType** is a [VkStructureType](#) value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **srcSubresource** and **dstSubresource** are [VkImageSubresourceLayers](#) structures specifying the image subresources of the images used for the source and destination image data, respectively.
- **srcOffset** and **dstOffset** select the initial **x**, **y**, and **z** offsets in texels of the sub-regions of the source and destination image data.
- **extent** is the size in texels of the source image to resolve in **width**, **height** and **depth**.

## Valid Usage

- VUID-VkImageResolve2-aspectMask-10993  
The **aspectMask** member of **srcSubresource** and **dstSubresource** **must** only contain [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#), [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#), or [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#)
- VUID-VkImageResolve2-maintenance10-10994  
If **maintenance10** feature is not enabled, **srcSubresource** and **dstSubresource** **must** not contain [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) or [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#)
- VUID-VkImageResolve2-layerCount-08803  
If neither of the **layerCount** members of **srcSubresource** or **dstSubresource** are [VK\\_REMAINING\\_ARRAY\\_LAYERS](#), the **layerCount** member of **srcSubresource** and **dstSubresource** **must** match
- VUID-VkImageResolve2-layerCount-08804  
If one of the **layerCount** members of **srcSubresource** or **dstSubresource** is [VK\\_REMAINING\\_ARRAY\\_LAYERS](#), the other member **must** be either [VK\\_REMAINING\\_ARRAY\\_LAYERS](#) or equal to the **arrayLayers** member of the [VkImageCreateInfo](#) used to create the image minus **baseArrayLayer**

## Valid Usage (Implicit)

- VUID-VkImageResolve2-sType-sType  
**sType** must be `VK_STRUCTURE_TYPE_IMAGE_RESOLVE_2`
- VUID-VkImageResolve2-pNext-pNext  
**pNext** must be `NULL`
- VUID-VkImageResolve2-srcSubresource-parameter  
**srcSubresource** must be a valid `VkImageSubresourceLayers` structure
- VUID-VkImageResolve2-dstSubresource-parameter  
**dstSubresource** must be a valid `VkImageSubresourceLayers` structure

The `VkResolveImageModeInfoKHR` structure is defined as:

```
// Provided by VK_KHR_maintenance10
typedef struct VkResolveImageModeInfoKHR {
    VkStructureType    sType;
    const void*        pNext;
    VkResolveImageFlagsKHR flags;
    VkResolveModeFlagBits resolveMode;
    VkResolveModeFlagBits stencilResolveMode;
} VkResolveImageModeInfoKHR;
```

- **sType** is a `VkStructureType` value identifying this structure.
- **pNext** is `NULL` or a pointer to a structure extending this structure.
- **flags** is a bitmask of `VkResolveImageFlagBitsKHR`.
- **resolveMode** is a `VkResolveModeFlagBits` value defining how **srcImage** will be resolved into **dstImage** when resolving non-stencil values.
- **stencilResolveMode** is a `VkResolveModeFlagBits` value defining how **srcImage** will be resolved into **dstImage** when resolving stencil values.

## Valid Usage

- VUID-VkResolveImageModeInfoKHR-flags-10995  
If **flags** includes `VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR`, **flags** must not include `VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR`
- VUID-VkResolveImageModeInfoKHR-flags-10996  
If **flags** includes `VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR` or `VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR`, **resolveSrgbFormatSupportsTransferFunctionControl** must be `VK_TRUE`
- VUID-VkResolveImageModeInfoKHR-flags-10997  
If **flags** includes `VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR` or `VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR`, **resolveMode** must be

equal to [VK\\_RESOLVE\\_MODE\\_AVERAGE\\_BIT](#)

## Valid Usage (Implicit)

- VUID-VkResolveImageModeInfoKHR-sType-sType  
[sType](#) **must** be [VK\\_STRUCTURE\\_TYPE\\_RESOLVE\\_IMAGE\\_MODE\\_INFO\\_KHR](#)
- VUID-VkResolveImageModeInfoKHR-flags-parameter  
If [flags](#) is not 0, [flags](#) **must** be a valid combination of [VkResolveImageFlagBitsKHR](#) values
- VUID-VkResolveImageModeInfoKHR-resolveMode-parameter  
If [resolveMode](#) is not 0, [resolveMode](#) **must** be a valid [VkResolveModeFlagBits](#) value
- VUID-VkResolveImageModeInfoKHR-stencilResolveMode-parameter  
If [stencilResolveMode](#) is not 0, [stencilResolveMode](#) **must** be a valid [VkResolveModeFlagBits](#) value

## Structure Chaining

### Extends the structure

- [VkResolveImageInfo2](#)

Bits which **can** be set in [VkResolveImageModeInfoKHR::flags](#), describing additional properties of a resolve operation, are:

```
// Provided by VK_KHR_maintenance10
typedef enum VkResolveImageFlagBitsKHR {
    // Provided by VK_KHR_maintenance10 with VK_VERSION_1_3 or VK_KHR_copy_commands2
    VK_RESOLVE_IMAGE_SKIP_TRANSFER_FUNCTION_BIT_KHR = 0x00000001,
    // Provided by VK_KHR_maintenance10 with VK_VERSION_1_3 or VK_KHR_copy_commands2
    VK_RESOLVE_IMAGE_ENABLE_TRANSFER_FUNCTION_BIT_KHR = 0x00000002,
} VkResolveImageFlagBitsKHR;
```

- [VK\\_RESOLVE\\_IMAGE\\_SKIP\\_TRANSFER\\_FUNCTION\\_BIT\\_KHR](#) specifies that resolve operations happening to an sRGB encoded image **must** not convert samples from nonlinear to linear before averaging.
- [VK\\_RESOLVE\\_IMAGE\\_ENABLE\\_TRANSFER\\_FUNCTION\\_BIT\\_KHR](#) specifies that resolve operations happening to an sRGB encoded image **must** convert samples from nonlinear to linear before averaging.

```
// Provided by VK_KHR_maintenance10
typedef VkFlags VkResolveImageFlagsKHR;
```

[VkResolveImageFlagsKHR](#) is a bitmask type for setting a mask of zero or more [VkResolveImageFlagBitsKHR](#).

# Chapter 25. Drawing Commands

*Drawing commands* (commands with **Draw** in the name) provoke work in a graphics pipeline. Drawing commands are recorded into a command buffer and when executed by a queue, will produce work which executes according to the bound graphics pipeline, or if the **shaderObject** feature is enabled, any **shader objects** bound to graphics stages. A graphics pipeline or a combination of one or more graphics shader objects **must** be bound to a command buffer before any drawing commands are recorded in that command buffer.

Drawing can be achieved in two modes:

- **Programmable Mesh Shading**, the mesh shader assembles primitives, or
- **Programmable Primitive Shading**, the input primitives are assembled as follows.

Each draw is made up of zero or more vertices and zero or more instances, which are processed by the device and result in the assembly of primitives. Primitives are assembled according to the **pInputAssemblyState** member of the **VkGraphicsPipelineCreateInfo** structure, which is of type **VkPipelineInputAssemblyStateCreateInfo**:

```
// Provided by VK_VERSION_1_0
typedef struct VkPipelineInputAssemblyStateCreateInfo {
    VkStructureType          sType;
    const void*              pNext;
    VkPipelineInputAssemblyStateCreateFlags flags;
    VkPrimitiveTopology       topology;
    VkBool32                 primitiveRestartEnable;
} VkPipelineInputAssemblyStateCreateInfo;
```

- **sType** is a **VkStructureType** value identifying this structure.
- **pNext** is **NULL** or a pointer to a structure extending this structure.
- **flags** is reserved for future use.
- **topology** is a **VkPrimitiveTopology** defining the primitive topology, as described below.
- **primitiveRestartEnable** controls whether a special vertex index value is treated as restarting the assembly of primitives. This enable only applies to indexed draws (**vkCmdDrawIndexed**, **vkCmdDrawMultiIndexedEXT**, and **vkCmdDrawIndexedIndirect**), and the special index value is either 0xFFFFFFFF when the **indexType** parameter of Vulkan 1.4 or **vkCmdBindIndexBuffer2** or **vkCmdBindIndexBuffer** is equal to **VK\_INDEX\_TYPE\_UINT32**; 0xFF when **indexType** is equal to **VK\_INDEX\_TYPE\_UINT8**; or 0xFFFF when **indexType** is equal to **VK\_INDEX\_TYPE\_UINT16**. Primitive restart is not allowed for “list” topologies, unless one of the features **primitiveTopologyPatchListRestart** (for **VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST**) or **primitiveTopologyListRestart** (for all other list topologies) is enabled. If the **primitiveRestartIndex** feature is enabled, **vkCmdSetPrimitiveRestartIndexEXT** can be used to set a custom index for primitive restart.

Restarting the assembly of primitives discards the most recent index values if those elements formed an incomplete primitive, and restarts the primitive assembly using the subsequent indices,

but only assembling the immediately following element through the end of the originally specified elements. The primitive restart index value comparison is performed before adding the `vertexOffset` value to the index value.

### Valid Usage

- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-06252  
If the `primitiveTopologyListRestart` feature is not enabled, and `topology` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, `primitiveRestartEnable` **must** be `VK_FALSE`
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-06253  
If the `primitiveTopologyPatchListRestart` feature is not enabled, and `topology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, `primitiveRestartEnable` **must** be `VK_FALSE`
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-00429  
If the `geometryShader` feature is not enabled, `topology` **must** not be any of `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, `VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY` or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY`
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-00430  
If the `tessellationShader` feature is not enabled, `topology` **must** not be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`
- VUID-VkPipelineInputAssemblyStateCreateInfo-triangleFans-04452  
If the `VK_KHR_portability_subset` extension is enabled, and `VkPhysicalDevicePortabilitySubsetFeaturesKHR::triangleFans` is `VK_FALSE`, `topology` **must** not be `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN`

### Valid Usage (Implicit)

- VUID-VkPipelineInputAssemblyStateCreateInfo-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_PIPELINE_INPUT_ASSEMBLY_STATE_CREATE_INFO`
- VUID-VkPipelineInputAssemblyStateCreateInfo-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkPipelineInputAssemblyStateCreateInfo-flags-zerobitmask  
`flags` **must** be `0`
- VUID-VkPipelineInputAssemblyStateCreateInfo-topology-parameter  
`topology` **must** be a valid `VkPrimitiveTopology` value

```
// Provided by VK_VERSION_1_0
typedef VkFlags VkPipelineInputAssemblyStateCreateFlags;
```

`VkPipelineInputAssemblyStateCreateFlags` is a bitmask type for setting a mask, but is currently reserved for future use.

To [dynamically control](#) whether a special vertex index value is treated as restarting the assembly of primitives, call:

```
// Provided by VK_VERSION_1_3
void vkCmdSetPrimitiveRestartEnable(
    VkCommandBuffer          commandBuffer,
    VkBool32                  primitiveRestartEnable);
```

```
// Provided by VK_EXT_extended_dynamic_state2, VK_EXT_shader_object
// Equivalent to vkCmdSetPrimitiveRestartEnable
void vkCmdSetPrimitiveRestartEnableEXT(
    VkCommandBuffer          commandBuffer,
    VkBool32                  primitiveRestartEnable);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `primitiveRestartEnable` controls whether a special vertex index value is treated as restarting the assembly of primitives. It behaves in the same way as `VkPipelineInputAssemblyStateCreateInfo::primitiveRestartEnable`

This command sets the primitive restart enable for subsequent drawing commands when drawing using [shader objects](#), or when the graphics pipeline is created with `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` set in `VkPipelineDynamicStateCreateInfo::pDynamicStates`. Otherwise, this state is specified by the `VkPipelineInputAssemblyStateCreateInfo::primitiveRestartEnable` value used to create the currently active pipeline.

### Valid Usage

- VUID-vkCmdSetPrimitiveRestartEnable-None-08970

At least one of the following **must** be true:

- the `extendedDynamicState2` feature is enabled
- the `shaderObject` feature is enabled
- the value of `VkApplicationInfo::apiVersion` used to create the `VkInstance` parent of `commandBuffer` is greater than or equal to Version 1.3

### Valid Usage (Implicit)

- VUID-vkCmdSetPrimitiveRestartEnable-commandBuffer-parameter

`commandBuffer` **must** be a valid `VkCommandBuffer` handle

- VUID-vkCmdSetPrimitiveRestartEnable-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdSetPrimitiveRestartEnable-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdSetPrimitiveRestartEnable-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Both              | Outside            | VK_QUEUE_GRAPHICS_BIT | State        |

## Conditional Rendering

`vkCmdSetPrimitiveRestartEnable` is not affected by `conditional rendering`

To `dynamically control` which special vertex index value is treated as restarting the assembly of primitives, call:

```
// Provided by VK_EXT_primitive_restart_index
void vkCmdSetPrimitiveRestartIndexEXT(
    VkCommandBuffer          commandBuffer,
    uint32_t                  primitiveRestartIndex);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `primitiveRestartIndex` controls which special vertex index value is treated as restarting the assembly of primitives. This overrides the default restart index value as defined as part of the description of the `VkPipelineInputAssemblyStateCreateInfo::primitiveRestartEnable` state. Default values are applied when binding an index buffer.

This command sets a custom primitive restart index for subsequent drawing commands. Binding

an index buffer invalidates the custom index value.

### Valid Usage

- VUID-vkCmdSetPrimitiveRestartIndexEXT-primitiveRestartIndex-12395  
The `primitiveRestartIndex` feature **must** be enabled

### Valid Usage (Implicit)

- VUID-vkCmdSetPrimitiveRestartIndexEXT-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdSetPrimitiveRestartIndexEXT-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdSetPrimitiveRestartIndexEXT-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdSetPrimitiveRestartIndexEXT-videocoding  
This command **must** only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

### Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Both              | Outside            | VK_QUEUE_GRAPHICS_BIT | State        |

### Conditional Rendering

`vkCmdSetPrimitiveRestartIndexEXT` is not affected by `conditional rendering`

## 25.1. Primitive Topologies

*Primitive topology* determines how consecutive vertices are organized into primitives, and determines the type of primitive that is used at the beginning of the graphics pipeline. The effective

topology for later stages of the pipeline is altered by tessellation or geometry shading (if either is in use) and depends on the execution modes of those shaders. In the case of mesh shading the only effective topology is defined by the execution mode of the mesh shader.

The primitive topologies defined by [VkPrimitiveTopology](#) are:

```
// Provided by VK_VERSION_1_0
typedef enum VkPrimitiveTopology {
    VK_PRIMITIVE_TOPOLOGY_POINT_LIST = 0,
    VK_PRIMITIVE_TOPOLOGY_LINE_LIST = 1,
    VK_PRIMITIVE_TOPOLOGY_LINE_STRIP = 2,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST = 3,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP = 4,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN = 5,
    VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY = 6,
    VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY = 7,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY = 8,
    VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY = 9,
    VK_PRIMITIVE_TOPOLOGY_PATCH_LIST = 10,
} VkPrimitiveTopology;
```

- [VK\\_PRIMITIVE\\_TOPOLOGY\\_POINT\\_LIST](#) specifies a series of [separate point primitives](#).
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_LINE\\_LIST](#) specifies a series of [separate line primitives](#).
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_LINE\\_STRIP](#) specifies a series of [connected line primitives](#) with consecutive lines sharing a vertex.
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_LIST](#) specifies a series of [separate triangle primitives](#).
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_STRIP](#) specifies a series of [connected triangle primitives](#) with consecutive triangles sharing an edge.
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_FAN](#) specifies a series of [connected triangle primitives](#) with all triangles sharing a common vertex. If the [VK\\_KHR\\_portability\\_subset](#) extension is enabled, and [VkPhysicalDevicePortabilitySubsetFeaturesKHR::triangleFans](#) is [VK\\_FALSE](#), then triangle fans are not supported by the implementation, and [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_FAN](#) **must** not be used.
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_LINE\\_LIST\\_WITH\\_ADJACENCY](#) specifies a series of [separate line primitives with adjacency](#).
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_LINE\\_STRIP\\_WITH\\_ADJACENCY](#) specifies a series of [connected line primitives with adjacency](#), with consecutive primitives sharing three vertices.
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_LIST\\_WITH\\_ADJACENCY](#) specifies a series of [separate triangle primitives with adjacency](#).
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_STRIP\\_WITH\\_ADJACENCY](#) specifies [connected triangle primitives with adjacency](#), with consecutive triangles sharing an edge.
- [VK\\_PRIMITIVE\\_TOPOLOGY\\_PATCH\\_LIST](#) specifies [separate patch primitives](#).

Each primitive topology, and its construction from a list of vertices, is described in detail below

with a supporting diagram, according to the following key:

|                                                                                   |                  |                                                                                                                                                                           |
|-----------------------------------------------------------------------------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | Vertex           | A point in 3-dimensional space. Positions chosen within the diagrams are arbitrary and for illustration only.                                                             |
| 5                                                                                 | Vertex Number    | Sequence position of a vertex within the provided vertex data.                                                                                                            |
|  | Provoking Vertex | Provoking vertex within the main primitive. The tail is angled towards the relevant primitive. Used in <a href="#">flat shading</a> .                                     |
|  | Primitive Edge   | An edge connecting the points of a main primitive.                                                                                                                        |
|  | Adjacency Edge   | Points connected by these lines do not contribute to a main primitive, and are only accessible in a <a href="#">geometry shader</a> .                                     |
|  | Winding Order    | The relative order in which vertices are defined within a primitive, used in the <a href="#">facing determination</a> . This ordering has no specific start or end point. |

The diagrams are supported with mathematical definitions where the vertices (v) and primitives (p) are numbered starting from 0;  $v_0$  is the first vertex in the provided data and  $p_0$  is the first primitive in the set of primitives defined by the vertices and topology.

To [dynamically set](#) primitive topology, call:

```
// Provided by VK_VERSION_1_3
void vkCmdSetPrimitiveTopology(
    VkCommandBuffer          commandBuffer,
    VkPrimitiveTopology       primitiveTopology);
```

```
// Provided by VK_EXT_extended_dynamic_state, VK_EXT_shader_object
// Equivalent to vkCmdSetPrimitiveTopology
void vkCmdSetPrimitiveTopologyEXT(
    VkCommandBuffer          commandBuffer,
    VkPrimitiveTopology       primitiveTopology);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `primitiveTopology` specifies the primitive topology to use for drawing.

This command sets the primitive topology for subsequent drawing commands when drawing using [shader objects](#), or when the graphics pipeline is created with [VK\\_DYNAMIC\\_STATE\\_PRIMITIVE\\_TOPOLOGY](#) set in [VkPipelineDynamicStateCreateInfo::pDynamicStates](#). Otherwise, this state is specified by the [VkPipelineInputAssemblyStateCreateInfo::topology](#) value used to create the currently active pipeline.

### Valid Usage

- VUID-vkCmdSetPrimitiveTopology-None-08971  
At least one of the following **must** be true:

- the `extendedDynamicState` feature is enabled
- the `shaderObject` feature is enabled
- the value of `VkApplicationInfo::apiVersion` used to create the `VkInstance` parent of `commandBuffer` is greater than or equal to Version 1.3

### Valid Usage (Implicit)

- VUID-vkCmdSetPrimitiveTopology-commandBuffer-parameter `commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdSetPrimitiveTopology-primitiveTopology-parameter `primitiveTopology` **must** be a valid `VkPrimitiveTopology` value
- VUID-vkCmdSetPrimitiveTopology-commandBuffer-recording `commandBuffer` **must** be in the `recording` state
- VUID-vkCmdSetPrimitiveTopology-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdSetPrimitiveTopology-videocoding  
This command **must** only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

### Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Both              | Outside            | VK_QUEUE_GRAPHICS_BIT | State        |

### Conditional Rendering

`vkCmdSetPrimitiveTopology` is not affected by `conditional rendering`

#### 25.1.1. Topology Class

The primitive topologies are grouped into the following topology classes:

Table 31. Topology Classes

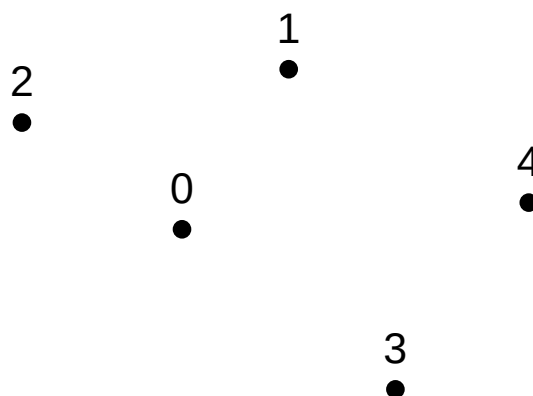

| Topology Class | Primitive Topology                                                                                                                                                                                                                                                                                                     |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Point          | <a href="#">VK_PRIMITIVE_TOPOLOGY_POINT_LIST</a>                                                                                                                                                                                                                                                                       |
| Line           | <a href="#">VK_PRIMITIVE_TOPOLOGY_LINE_LIST</a> ,<br><a href="#">VK_PRIMITIVE_TOPOLOGY_LINE_STRIP</a> ,<br><a href="#">VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY</a> ,<br><a href="#">VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY</a>                                                                         |
| Triangle       | <a href="#">VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST</a> ,<br><a href="#">VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP</a> ,<br><a href="#">VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN</a> ,<br><a href="#">VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY</a> ,<br><a href="#">VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY</a> |
| Patch          | <a href="#">VK_PRIMITIVE_TOPOLOGY_PATCH_LIST</a>                                                                                                                                                                                                                                                                       |

### 25.1.2. Point Lists

When the topology is [VK\\_PRIMITIVE\\_TOPOLOGY\\_POINT\\_LIST](#), each consecutive vertex defines a single point primitive, according to the equation:

$$p_i = \{v_i\}$$

As there is only one vertex, that vertex is the provoking vertex. The number of primitives generated is equal to **vertexCount**.

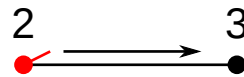

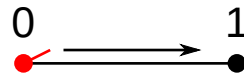

### 25.1.3. Line Lists

When the primitive topology is [VK\\_PRIMITIVE\\_TOPOLOGY\\_LINE\\_LIST](#), each consecutive pair of vertices defines a single line primitive, according to the equation:

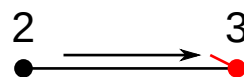

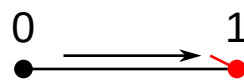

$$p_i = \{v_{2i}, v_{2i+1}\}$$

The number of primitives generated is equal to  $\lceil \text{vertexCount}/2 \rceil$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{2i}$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{2i+1}$ .

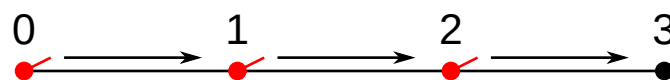

#### 25.1.4. Line Strips

When the primitive topology is `VK_PRIMITIVE_TOPOLOGY_LINE_STRIP`, one line primitive is defined by each vertex and the following vertex, according to the equation:

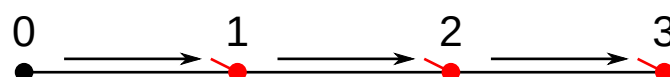

$$p_i = \{v_i, v_{i+1}\}$$

The number of primitives generated is equal to  $\max(0, \text{vertexCount}-1)$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_i$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{i+1}$ .

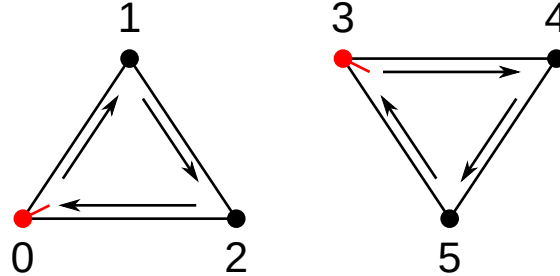

#### 25.1.5. Triangle Lists

When the primitive topology is `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, each consecutive set of three vertices defines a single triangle primitive, according to the equation:

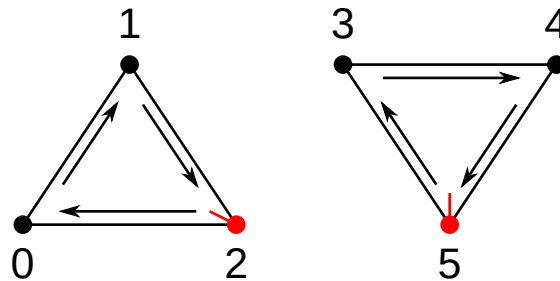

$$p_i = \{v_{3i}, v_{3i+1}, v_{3i+2}\}$$

The number of primitives generated is equal to  $\lceil \text{vertexCount}/3 \rceil$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{3i}$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{3i+2}$ .

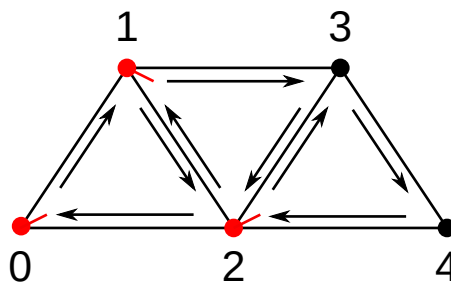

### 25.1.6. Triangle Strips

When the primitive topology is `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP`, one triangle primitive is defined by each vertex and the two vertices that follow it, according to the equation:

$$p_i = \{v_i, v_{i+(1+i\%2)}, v_{i+(2-i\%2)}\}$$

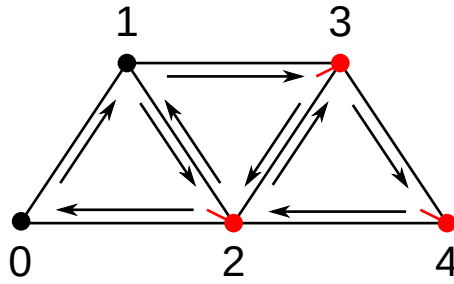

The number of primitives generated is equal to  $\max(0, \text{vertexCount}-2)$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_i$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{i+2}$ .

NOTE

The ordering of the vertices in each successive triangle is reversed, so that the winding order is consistent throughout the strip.

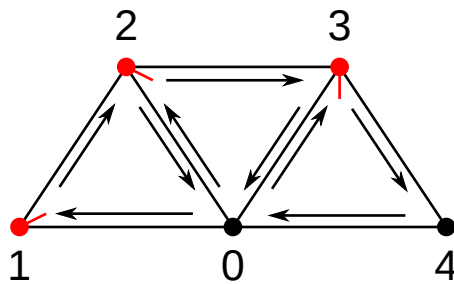

### 25.1.7. Triangle Fans

When the primitive topology is [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_FAN](#), triangle primitives are defined around a shared common vertex, according to the equation:

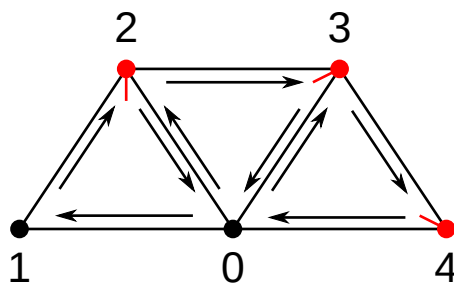

$$p_i = \{v_{i+1}, v_{i+2}, v_0\}$$

The number of primitives generated is equal to  $\max(0, \text{vertexCount}-2)$ .

When the `provokingVertexMode` is [VK\\_PROVOKING\\_VERTEX\\_MODE\\_FIRST\\_VERTEX\\_EXT](#), the provoking vertex for  $p_i$  is  $v_{i+1}$ .

When the `provokingVertexMode` is [VK\\_PROVOKING\\_VERTEX\\_MODE\\_LAST\\_VERTEX\\_EXT](#), the provoking vertex for  $p_i$  is  $v_{i+2}$ .

NOTE

If the [VK\\_KHR\\_portability\\_subset](#) extension is enabled, and `VkPhysicalDevicePortabilitySubsetFeaturesKHR::triangleFans` is [VK\\_FALSE](#), then triangle fans are not supported by the implementation, and [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_FAN](#) **must** not be used.

### 25.1.8. Line Lists With Adjacency

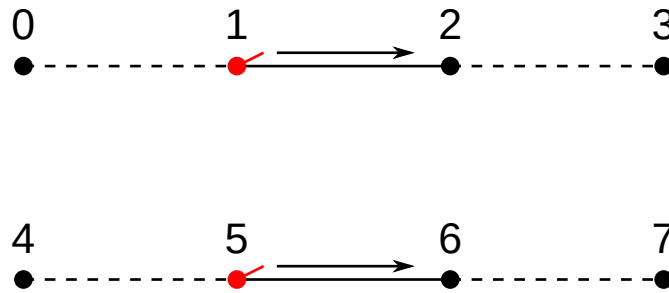

When the primitive topology is [VK\\_PRIMITIVE\\_TOPOLOGY\\_LINE\\_LIST\\_WITH\\_ADJACENCY](#), each consecutive set of four vertices defines a single line primitive with adjacency, according to the equation:

$$p_i = \{v_{4i}, v_{4i+1}, v_{4i+2}, v_{4i+3}\}$$

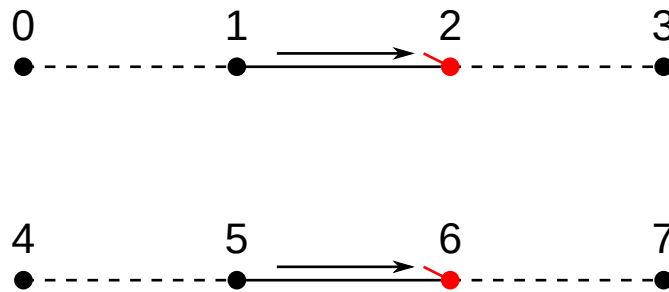

A line primitive is described by the second and third vertices of the total primitive, with the remaining two vertices only accessible in a [geometry shader](#).

The number of primitives generated is equal to  $\lfloor \text{vertexCount}/4 \rfloor$ .

When the `provokingVertexMode` is [VK\\_PROVOKING\\_VERTEX\\_MODE\\_FIRST\\_VERTEX\\_EXT](#), the provoking vertex for  $p_i$  is  $v_{4i+1}$ .

When the `provokingVertexMode` is [VK\\_PROVOKING\\_VERTEX\\_MODE\\_LAST\\_VERTEX\\_EXT](#), the provoking vertex for  $p_i$  is  $v_{4i+2}$ .

### 25.1.9. Line Strips With Adjacency

When the primitive topology is [VK\\_PRIMITIVE\\_TOPOLOGY\\_LINE\\_STRIP\\_WITH\\_ADJACENCY](#), one line primitive with adjacency is defined by each vertex and the following vertex, according to the equation:

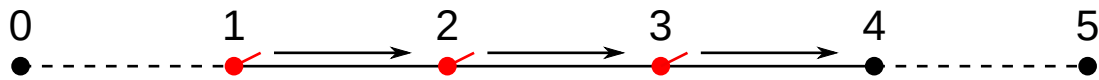

$$p_i = \{v_i, v_{i+1}, v_{i+2}, v_{i+3}\}$$

A line primitive is described by the second and third vertices of the total primitive, with the remaining two vertices only accessible in a [geometry shader](#).

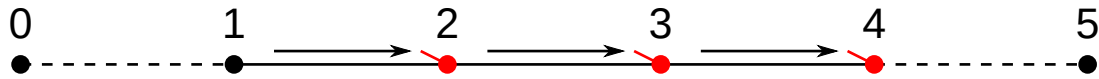

The number of primitives generated is equal to  $\max(0, \text{vertexCount}-3)$ .

When the `provokingVertexMode` is [VK\\_PROVOKING\\_VERTEX\\_MODE\\_FIRST\\_VERTEX\\_EXT](#), the

provoking vertex for  $p_i$  is  $v_{i+1}$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{i+2}$ .

## 25.1.10. Triangle Lists With Adjacency

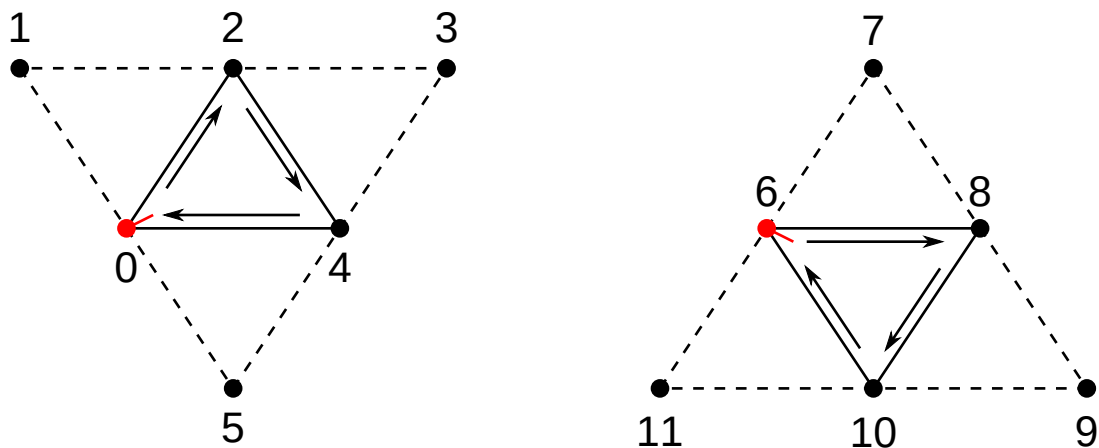

When the primitive topology is `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, each consecutive set of six vertices defines a single triangle primitive with adjacency, according to the equations:

$$p_i = \{v_{6i}, v_{6i+1}, v_{6i+2}, v_{6i+3}, v_{6i+4}, v_{6i+5}\}$$

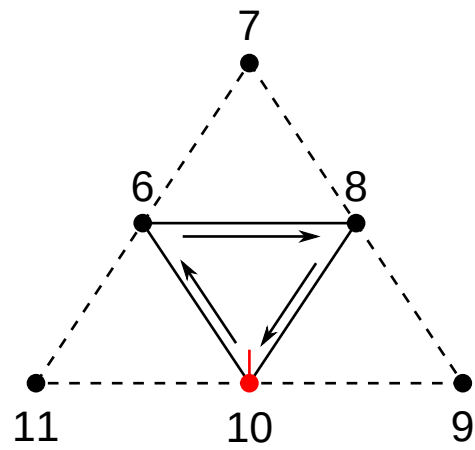

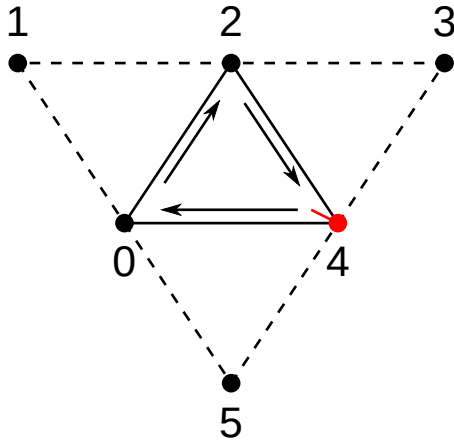

A triangle primitive is described by the first, third, and fifth vertices of the total primitive, with the remaining three vertices only accessible in a [geometry shader](#).

The number of primitives generated is equal to  $\lceil \text{vertexCount}/6 \rceil$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{6i}$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT`, the provoking vertex for  $p_i$  is  $v_{6i+4}$ .

### 25.1.11. Triangle Strips With Adjacency

When the primitive topology is [VK\\_PRIMITIVE\\_TOPOLOGY\\_TRIANGLE\\_STRIP\\_WITH\\_ADJACENCY](#), one triangle primitive with adjacency is defined by each vertex and the following 5 vertices.

The number of primitives generated,  $n$ , is equal to  $\lceil \max(0, \text{vertexCount} - 4) / 2 \rceil$ .

If  $n=1$ , the primitive is defined as:

$$p = \{v_0, v_1, v_2, v_5, v_4, v_3\}$$

If  $n>1$ , the total primitive consists of different vertices according to where it is in the strip:

$$p_i = \{v_{2i}, v_{2i+1}, v_{2i+2}, v_{2i+6}, v_{2i+4}, v_{2i+3}\} \text{ when } i=0$$

$$p_i = \{v_{2i}, v_{2i+3}, v_{2i+4}, v_{2i+6}, v_{2i+2}, v_{2i-2}\} \text{ when } i>0, i<n-1, \text{ and } i\%2=1$$

$$p_i = \{v_{2i}, v_{2i-2}, v_{2i+2}, v_{2i+6}, v_{2i+4}, v_{2i+3}\} \text{ when } i>0, i<n-1, \text{ and } i\%2=0$$

$$p_i = \{v_{2i}, v_{2i+3}, v_{2i+4}, v_{2i+5}, v_{2i+2}, v_{2i-2}\} \text{ when } i=n-1 \text{ and } i\%2=1$$

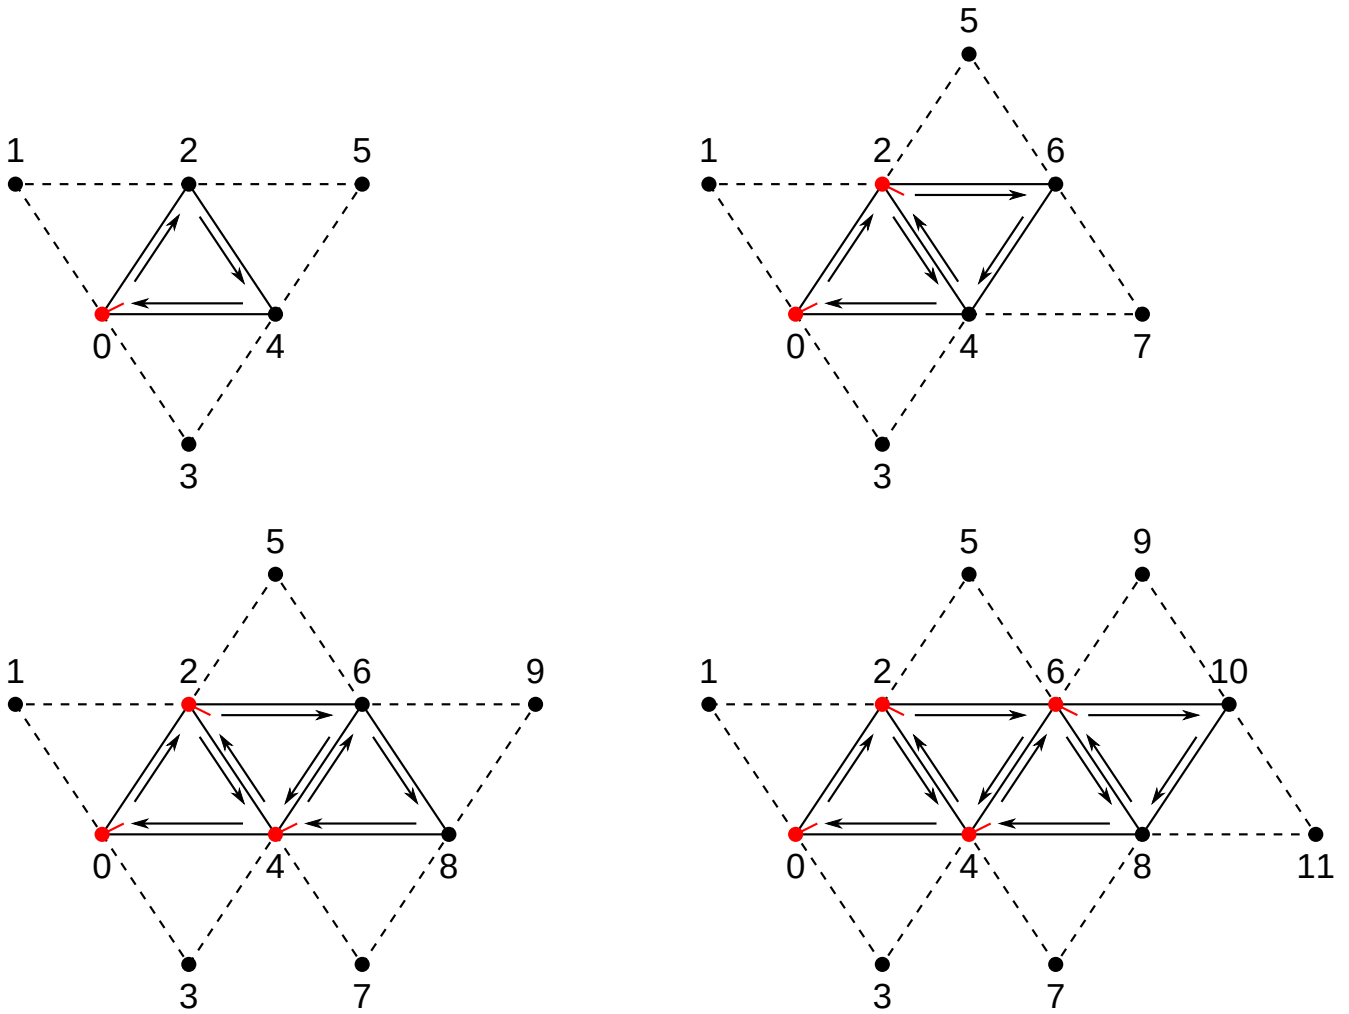

$$p_i = \{v_{2i}, v_{2i-2}, v_{2i+2}, v_{2i+5}, v_{2i+4}, v_{2i+3}\} \text{ when } i=n-1 \text{ and } i\%2=0$$

A triangle primitive is described by the first, third, and fifth vertices of the total primitive in all cases, with the remaining three vertices only accessible in a [geometry shader](#).

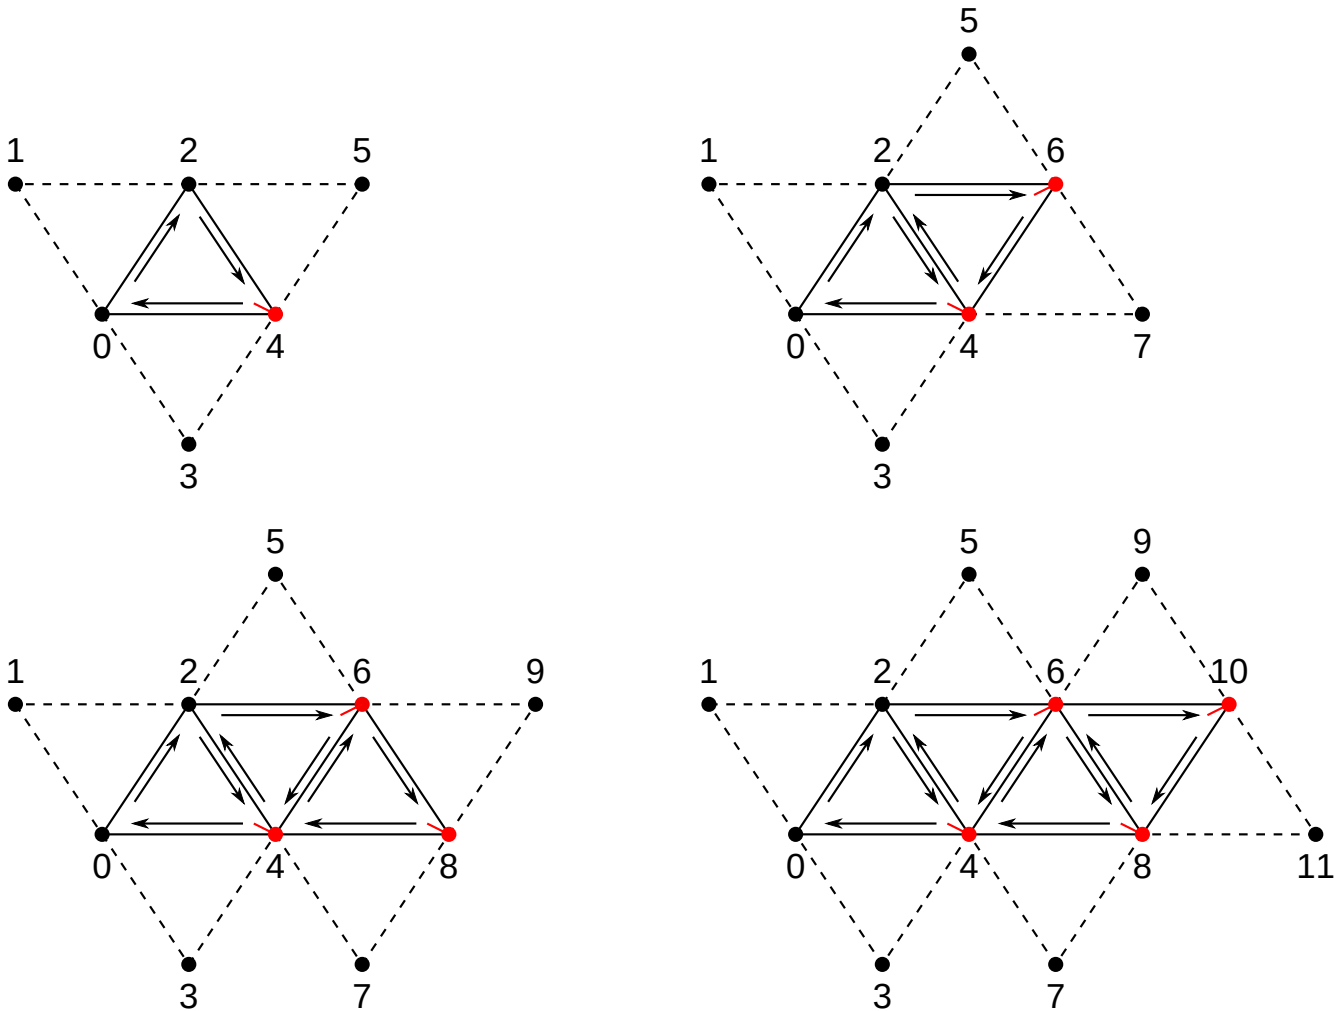

#### NOTE

The ordering of the vertices in each successive triangle is altered so that the winding order is consistent throughout the strip.

When the `provokingVertexMode` is [VK\\_PROVOKING\\_VERTEX\\_MODE\\_FIRST\\_VERTEX\\_EXT](#), the provoking vertex for  $p_i$  is always  $v_{2i}$ .

When the `provokingVertexMode` is `VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT`, the provoking vertex for  $p_i$  is always  $v_{2i+4}$ .

### 25.1.12. Patch Lists

When the primitive topology is [VK\\_PRIMITIVE\\_TOPOLOGY\\_PATCH\\_LIST](#), each consecutive set of  $m$  vertices defines a single patch primitive, according to the equation:

$$p_i = \{v_{mi}, v_{mi+1}, \dots, v_{mi+(m-2)}, v_{mi+(m-1)}\}$$

where  $m$  is equal to [VkPipelineTessellationStateCreateInfo::patchControlPoints](#).

Patch lists are never passed to [vertex post-processing](#), and as such no provoking vertex is defined for patch primitives. The number of primitives generated is equal to  $\lfloor \text{vertexCount}/m \rfloor$ .

The vertices comprising a patch have no implied geometry, and are used as inputs to tessellation shaders and the fixed-function tessellator to generate new point, line, or triangle primitives.

## 25.2. Effective Primitive Topology

The effective primitive topology is the primitive topology that is consumed or produced by a given stage of the graphics pipeline. The interpretation of this topology depends on the active shader stages and other state set in the graphics pipeline.

### 25.2.1. Vertex Input Assembler Topology

This is the topology set when the `VK_SHADER_STAGE_VERTEX_BIT` stage is used and `Programmable Primitive Shading` occurs. It **can** be set with `VkPipelineInputAssemblyStateCreateInfo::topology` or `vkCmdSetPrimitiveTopology`.

### 25.2.2. Clip Space Topology

This is the output of the last pre-rasterization shader stage involved.

- If `VK_SHADER_STAGE_VERTEX_BIT` is the last pre-rasterization stage, the topology is not changed from what was set in the `input assembly`.
- If `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` is the last pre-rasterization stage, the topology depends on the `OpExecutionMode` found in either `tessellation stage`.
  - The `Isolines Execution Mode` is in line `topology class`.
  - The `Triangles` and `Quads Execution Mode` is in triangle `topology class`.
  - The `PointMode Execution Mode` is in point `topology class` and will take precedence over the other tessellation stage `Execution Mode`.
- If `VK_SHADER_STAGE_GEOMETRY_BIT` is the last pre-rasterization stage, the topology depends on the `OpExecutionMode` found in this shader stage.
  - The `OutputPoints Execution Mode` is in point `topology class`.
  - The `OutputLineStrip Execution Mode` is in line `topology class`.
  - The `OutputTriangleStrip Execution Mode` is in triangle `topology class`.
- If `VK_SHADER_STAGE_MESH_BIT_EXT` is the last pre-rasterization stage, the topology depends on the `OpExecutionMode` found in this shader stage.
  - The `OutputPoints Execution Mode` is in point `topology class`.
  - The `OutputLinesEXT Execution Mode` is in line `topology class`.
  - The `OutputTrianglesEXT Execution Mode` is in triangle `topology class`.

### 25.2.3. Rasterization Input Topology

After clipping and viewport transformations, the `Polygon Mode` **can** set a topology as an input for rasterization. This **can** be different from what was used in `Clip Space Topology`.

If `VkPipelineRasterizationStateCreateInfo::rasterizerDiscardEnable` or `vkCmdSetRasterizerDiscardEnable::rasterizerDiscardEnable` is set to `VK_FALSE`, then this Rasterization Input Topology is not observed.

If the `clip space topology` is in triangle `topology class` then `VK_POLYGON_MODE_LINE` will turn it into line topology and `VK_POLYGON_MODE_POINT` will turn it into point topology.

If the `clip space topology` is in line `topology class` then `VK_POLYGON_MODE_POINT` will turn it into point topology.

## 25.3. Primitive Order

Primitives generated by [drawing commands](#) progress through the stages of the [graphics pipeline](#) in *primitive order*. Primitive order is initially determined in the following way:

1. Submission order determines the initial ordering
2. For indirect drawing commands, the order in which accessed instances of the [VkDrawIndirectCommand](#) are stored in [buffer](#), from lower indirect buffer addresses to higher addresses.
3. If a drawing command includes multiple instances, the order in which instances are executed, from lower numbered instances to higher.
4. The order in which primitives are specified by a drawing command:
  - For non-indexed draws, from vertices with a lower numbered [vertexIndex](#) to a higher numbered [vertexIndex](#).
  - For indexed draws, vertices sourced from a lower index buffer addresses to higher addresses.
  - For draws using mesh shaders, the order is provided by [mesh shading](#).

Within this order implementations further sort primitives:

5. If tessellation shading is active, by an implementation-dependent order of new primitives generated by [tessellation](#).
6. If geometry shading is active, by the order new primitives are generated by [geometry shading](#).
7. If the [polygon mode](#) is not [VK\\_POLYGON\\_MODE\\_FILL](#), by an implementation-dependent ordering of the new primitives generated within the original primitive.

Primitive order is later used to define [rasterization order](#), which determines the order in which fragments output results to a framebuffer.

## 25.4. Programmable Primitive Shading

Once primitives are assembled, they proceed to the vertex shading stage of the pipeline. If the draw includes multiple instances, then the set of primitives is sent to the vertex shading stage multiple times, once for each instance.

It is implementation-dependent whether vertex shading occurs on vertices that are discarded as part of incomplete primitives, but if it does occur then it operates as if they were vertices in complete primitives and such invocations **can** have side effects.

Vertex shading receives two per-vertex inputs from the primitive assembly stage - the [vertexIndex](#) and the [instanceIndex](#). How these values are generated is defined below, with each command.

Drawing commands fall roughly into two categories:

- Non-indexed drawing commands present a sequential [vertexIndex](#) to the vertex shader. The sequential index is generated automatically by the device (see [Fixed-Function Vertex Processing](#)

for details on both specifying the vertex attributes indexed by `vertexIndex`, as well as binding vertex buffers containing those attributes to a command buffer). These commands are:

- `vkCmdDraw`
- `vkCmdDrawIndirect`
- `vkCmdDrawIndirectCount`
- `vkCmdDrawIndirectCountKHR`
- `vkCmdDrawMultiEXT`
- Indexed drawing commands read index values from an *index buffer* and use this to compute the `vertexIndex` value for the vertex shader. These commands are:
  - `vkCmdDrawIndexed`
  - `vkCmdDrawIndexedIndirect`
  - `vkCmdDrawIndexedIndirectCount`
  - `vkCmdDrawIndexedIndirectCountKHR`
  - `vkCmdDrawMultiIndexedEXT`

For indexed drawing commands, indices are sourced from a range of memory bound to the command buffer, referred to as the *bound index buffer range*, and specified by one of the following commands.

To bind an address range as an index buffer to a command buffer, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdBindIndexBuffer3KHR(
    VkCommandBuffer          commandBuffer,
    const VkBindIndexBuffer3InfoKHR* pInfo);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `pInfo` is a pointer to a `VkBindIndexBuffer3InfoKHR` structure defining parameters of this command.

The *bound index buffer range* is set to the range of memory indicated by `pInfo->addressRange`.

If the `nullDescriptor` feature is enabled, `pInfo->addressRange.size` and `pInfo->addressRange.address` **can** be 0. When the size and address are 0, every index read from this binding will return a value of zero.

### Valid Usage (Implicit)

- VUID-vkCmdBindIndexBuffer3KHR-commandBuffer-parameter `commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdBindIndexBuffer3KHR-pInfo-parameter `pInfo` **must** be a valid pointer to a valid `VkBindIndexBuffer3InfoKHR` structure

- VUID-vkCmdBindIndexBuffer3KHR-commandBuffer-recording  
`commandBuffer` **must** be in the [recording state](#)
- VUID-vkCmdBindIndexBuffer3KHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) operations
- VUID-vkCmdBindIndexBuffer3KHR-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Both              | Outside            | VK_QUEUE_GRAPHICS_BIT | State        |

## Conditional Rendering

`vkCmdBindIndexBuffer3KHR` is not affected by [conditional rendering](#)

`VkBindIndexBuffer3InfoKHR` is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkBindIndexBuffer3InfoKHR {
    VkStructureType      sType;
    const void*          pNext;
    VkDeviceAddressRangeKHR addressRange;
    VkAddressCommandFlagsKHR addressFlags;
    VkIndexType          indexType;
} VkBindIndexBuffer3InfoKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `addressRange` is the `VkDeviceAddressRangeKHR` of the address range to bind.
- `addressFlags` is a `VkAddressCommandFlagsKHR` value defining the flags for the address range.

- `indexType` is a `VkIndexType` value specifying the size of the indices.

## Valid Usage

- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13097  
If the range specified by `addressRange` is not bound completely to memory when accessed, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13098  
If the buffer from which the range specified by `addressRange` was created with `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `addressFlags` **must** include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13099  
If the buffer from which the range specified by `addressRange` was created without `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressFlags-13100  
`addressFlags` **must** not include both `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13122  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created with `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `addressFlags` **must** include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13123  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created without `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressFlags-13101  
`addressFlags` **must** not include both `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13124  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created with `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `addressFlags` **must** include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13125  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created without

`VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13051  
If `addressRange.address` is not 0, the buffer from which `addressRange` was queried **must** have been created with `VK_BUFFER_USAGE_INDEX_BUFFER_BIT`
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13052  
`addressRange.address` **must** be a multiple of the size of the type indicated by `indexType`
- VUID-VkBindIndexBuffer3InfoKHR-indexType-13053  
`indexType` **must** not be `VK_INDEX_TYPE_NONE_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-indexType-13054  
If `indexType` is `VK_INDEX_TYPE_UINT8_KHR`, the `indexTypeUint8` feature **must** be enabled
- VUID-VkBindIndexBuffer3InfoKHR-None-13055  
If the `nullDescriptor` feature is not enabled, `addressRange.size` **must** be greater than 0
- VUID-VkBindIndexBuffer3InfoKHR-addressRange-13056  
If `addressRange.size` is 0, `addressRange.address` **must** be 0

### Valid Usage (Implicit)

- VUID-VkBindIndexBuffer3InfoKHR-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_BIND_INDEX_BUFFER_3_INFO_KHR`
- VUID-VkBindIndexBuffer3InfoKHR-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkBindIndexBuffer3InfoKHR-addressFlags-parameter  
If `addressFlags` is not 0, `addressFlags` **must** be a valid combination of `VkAddressCommandFlagBitsKHR` values
- VUID-VkBindIndexBuffer3InfoKHR-indexType-parameter  
`indexType` **must** be a valid `VkIndexType` value

To bind an index buffer, along with its size, to a command buffer, call:

```
// Provided by VK_VERSION_1_4
void vkCmdBindIndexBuffer2(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 buffer,
    VkDeviceSize             offset,
    VkDeviceSize             size,
    VkIndexType              indexType);
```

```

// Provided by VK_KHR_maintenance5
// Equivalent to vkCmdBindIndexBuffer2
void vkCmdBindIndexBuffer2KHR(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 buffer,
    VkDeviceSize             offset,
    VkDeviceSize             size,
    VkIndexType              indexType);

```

- **commandBuffer** is the command buffer into which the command is recorded.
- **buffer** is the buffer being bound.
- **offset** is the starting offset in bytes within **buffer** used in index buffer address calculations.
- **size** is the size in bytes of index data bound from **buffer**.
- **indexType** is a [VkIndexType](#) value specifying the size of the indices.

**buffer**, **offset**, and **size** specify the [bound index buffer range](#), with a range of memory bound from [**base** + **offset**, **base** + **offset** + **size**), where **base** is the start of **buffer**. If **size** is [VK\\_WHOLE\\_SIZE](#) then the range is from **offset** to the end of the **buffer**.

If the [maintenance6](#) feature is enabled, **buffer** can be [VK\\_NULL\\_HANDLE](#). If **buffer** is [VK\\_NULL\\_HANDLE](#) and the [nullDescriptor](#) feature is enabled, every index fetched results in a value of zero.

## Valid Usage

- VUID-vkCmdBindIndexBuffer2-offset-08782  
**offset** **must** be less than the size of **buffer**
- VUID-vkCmdBindIndexBuffer2-offset-08783  
The sum of **offset** and the base address of the range of [VkDeviceMemory](#) object that is backing **buffer**, **must** be a multiple of the size of the type indicated by **indexType**
- VUID-vkCmdBindIndexBuffer2-buffer-08784  
**buffer** **must** have been created with the [VK\\_BUFFER\\_USAGE\\_INDEX\\_BUFFER\\_BIT](#) usage flag set
- VUID-vkCmdBindIndexBuffer2-buffer-08785  
If **buffer** is non-sparse then it **must** be bound completely and contiguously to a single [VkDeviceMemory](#) object
- VUID-vkCmdBindIndexBuffer2-indexType-08786  
**indexType** **must** not be [VK\\_INDEX\\_TYPE\\_NONE\\_KHR](#)
- VUID-vkCmdBindIndexBuffer2-indexType-08787  
If **indexType** is [VK\\_INDEX\\_TYPE\\_UINT8](#), the [indexTypeUint8](#) feature **must** be enabled
- VUID-vkCmdBindIndexBuffer2-None-09493  
If the [maintenance6](#) feature is not enabled, **buffer** **must** not be [VK\\_NULL\\_HANDLE](#)
- VUID-vkCmdBindIndexBuffer2-buffer-09494

If **buffer** is **VK\_NULL\_HANDLE**, offset **must** be zero

- VUID-vkCmdBindIndexBuffer2-size-08767

If **size** is not **VK\_WHOLE\_SIZE**, **size must** be a multiple of the size of the type indicated by **indexType**

- VUID-vkCmdBindIndexBuffer2-size-08768

If **size** is not **VK\_WHOLE\_SIZE**, the sum of **offset** and **size must** be less than or equal to the size of **buffer**

## Valid Usage (Implicit)

- VUID-vkCmdBindIndexBuffer2-commandBuffer-parameter

**commandBuffer must** be a valid **VkCommandBuffer** handle

- VUID-vkCmdBindIndexBuffer2-buffer-parameter

If **buffer** is not **VK\_NULL\_HANDLE**, **buffer must** be a valid **VkBuffer** handle

- VUID-vkCmdBindIndexBuffer2-indexType-parameter

**indexType must** be a valid **VkIndexType** value

- VUID-vkCmdBindIndexBuffer2-commandBuffer-recording

**commandBuffer must** be in the **recording state**

- VUID-vkCmdBindIndexBuffer2-commandBuffer-cmdpool

The **VkCommandPool** that **commandBuffer** was allocated from **must** support **VK\_QUEUE\_GRAPHICS\_BIT** operations

- VUID-vkCmdBindIndexBuffer2-videocoding

This command **must** only be called outside of a video coding scope

- VUID-vkCmdBindIndexBuffer2-commonparent

Both of **buffer**, and **commandBuffer** that are valid handles of non-ignored parameters **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to **commandBuffer must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types     | Command Type |
|-----------------------|-------------------|--------------------|---------------------------|--------------|
| Primary<br>Secondary  | Both              | Outside            | VK_QUEUE_GRAP<br>HICS_BIT | State        |

## Conditional Rendering

vkCmdBindIndexBuffer2 is not affected by [conditional rendering](#)

To bind an index buffer to a command buffer, call:

```
// Provided by VK_VERSION_1_0
void vkCmdBindIndexBuffer(
    VkCommandBuffer          commandBuffer,
    VkBuffer                  buffer,
    VkDeviceSize              offset,
    VkIndexType               indexType);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer being bound.
- `offset` is the starting offset in bytes within `buffer` used in index buffer address calculations.
- `indexType` is a [VkIndexType](#) value specifying the size of the indices.

`buffer` and `offset` specify the [bound index buffer range](#), with a range of memory bound from [`base` + `offset`, `base` + `offset` + `size`), where `size` is from `offset` to the end of the `buffer`.

If the `maintenance6` feature is enabled, `buffer` can be [VK\\_NULL\\_HANDLE](#). If `buffer` is [VK\\_NULL\\_HANDLE](#) and the `nullDescriptor` feature is enabled, every index fetched results in a value of zero.

## Valid Usage

- VUID-vkCmdBindIndexBuffer-offset-08782  
`offset` **must** be less than the size of `buffer`
- VUID-vkCmdBindIndexBuffer-offset-08783  
The sum of `offset` and the base address of the range of `VkDeviceMemory` object that is backing `buffer`, **must** be a multiple of the size of the type indicated by `indexType`
- VUID-vkCmdBindIndexBuffer-buffer-08784  
`buffer` **must** have been created with the [VK\\_BUFFER\\_USAGE\\_INDEX\\_BUFFER\\_BIT](#) usage flag set
- VUID-vkCmdBindIndexBuffer-buffer-08785  
If `buffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdBindIndexBuffer-indexType-08786  
`indexType` **must** not be [VK\\_INDEX\\_TYPE\\_NONE\\_KHR](#)
- VUID-vkCmdBindIndexBuffer-indexType-08787  
If `indexType` is [VK\\_INDEX\\_TYPE\\_UINT8](#), the `indexTypeUint8` feature **must** be enabled
- VUID-vkCmdBindIndexBuffer-None-09493

If the **maintenance6** feature is not enabled, **buffer** **must** not be **VK\_NULL\_HANDLE**

- VUID-vkCmdBindIndexBuffer-buffer-09494

If **buffer** is **VK\_NULL\_HANDLE**, offset **must** be zero

## Valid Usage (Implicit)

- VUID-vkCmdBindIndexBuffer-commandBuffer-parameter  
**commandBuffer** **must** be a valid **VkCommandBuffer** handle
- VUID-vkCmdBindIndexBuffer-buffer-parameter  
If **buffer** is not **VK\_NULL\_HANDLE**, **buffer** **must** be a valid **VkBuffer** handle
- VUID-vkCmdBindIndexBuffer-indexType-parameter  
**indexType** **must** be a valid **VkIndexType** value
- VUID-vkCmdBindIndexBuffer-commandBuffer-recording  
**commandBuffer** **must** be in the **recording state**
- VUID-vkCmdBindIndexBuffer-commandBuffer-cmdpool  
The **VkCommandPool** that **commandBuffer** was allocated from **must** support **VK\_QUEUE\_GRAPHICS\_BIT** operations
- VUID-vkCmdBindIndexBuffer-videocoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdBindIndexBuffer-commonparent  
Both of **buffer**, and **commandBuffer** that are valid handles of non-ignored parameters **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types     | Command Type |
|-----------------------|-------------------|--------------------|---------------------------|--------------|
| Primary<br>Secondary  | Both              | Outside            | VK_QUEUE_GRAP<br>HICS_BIT | State        |

## Conditional Rendering

vkCmdBindIndexBuffer is not affected by **conditional rendering**

Possible values of `vkCmdBindIndexBuffer2::indexType` and `vkCmdBindIndexBuffer::indexType`, specifying the size of indices, are:

```
// Provided by VK_VERSION_1_0
typedef enum VkIndexType {
    VK_INDEX_TYPE_UINT16 = 0,
    VK_INDEX_TYPE_UINT32 = 1,
    // Provided by VK_VERSION_1_4
    VK_INDEX_TYPE_UINT8 = 1000265000,
    // Provided by VK_KHR_acceleration_structure
    VK_INDEX_TYPE_NONE_KHR = 1000165000,
    // Provided by VK_KHR_index_type_uint8
    VK_INDEX_TYPE_UINT8_KHR = VK_INDEX_TYPE_UINT8,
} VkIndexType;
```

- `VK_INDEX_TYPE_UINT16` specifies that indices are 16-bit unsigned integer values.
- `VK_INDEX_TYPE_UINT32` specifies that indices are 32-bit unsigned integer values.
- `VK_INDEX_TYPE_NONE_KHR` specifies that no indices are provided.
- `VK_INDEX_TYPE_UINT8` specifies that indices are 8-bit unsigned integer values.

The parameters for each drawing command are specified directly in the command or read from buffer memory, depending on the command. Drawing commands that source their parameters from buffer memory are known as *indirect* drawing commands.

All drawing commands interact with the `robustBufferAccess` feature.

To record a non-indexed draw, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDraw(
    VkCommandBuffer          commandBuffer,
    uint32_t                 vertexCount,
    uint32_t                 instanceCount,
    uint32_t                 firstVertex,
    uint32_t                 firstInstance);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `vertexCount` is the number of vertices to draw.
- `instanceCount` is the number of instances to draw.
- `firstVertex` is the index of the first vertex to draw.
- `firstInstance` is the instance ID of the first instance to draw.

When the command is executed, primitives are assembled using the current primitive topology and `vertexCount` consecutive vertex indices with the first `vertexIndex` value equal to `firstVertex`. The primitives are drawn `instanceCount` times with `instanceIndex` starting with `firstInstance` and

increasing sequentially for each instance. The assembled primitives execute the bound graphics pipeline.

## Valid Usage

- VUID-vkCmdDraw-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDraw-None-08600  
If a `bound shader` was created with a pipeline layout and statically uses a set  $n$ , a descriptor set **must** have been bound to  $n$  at the same pipeline bind point, with layouts compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDraw-commandBuffer-02707  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource
- VUID-vkCmdDraw-None-08114  
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDraw-None-08115  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDraw-None-08116  
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDraw-None-08117  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDraw-None-08119  
If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident
- VUID-vkCmdDraw-magFilter-04553  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this

command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDraw-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDraw-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDraw-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDraw-unnormlizedCoordinates-09635

If a `VkSampler` created with `unnormlizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDraw-None-08609

If a `VkSampler` created with `unnormlizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDraw-None-08610

If a `VkSampler` created with `unnormlizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDraw-None-08611

If a `VkSampler` created with `unnormlizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDraw-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's format features **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDraw-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features **must** contain

## VK\_FORMAT\_FEATURE\_STORAGE\_IMAGE\_ATOMIC\_BIT

- VUID-vkCmdDraw-None-07888

If a [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_TEXEL\\_BUFFER](#) descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's **format features must** contain [VK\\_FORMAT\\_FEATURE\\_STORAGE\\_TEXEL\\_BUFFER\\_ATOMIC\\_BIT](#)

- VUID-vkCmdDraw-None-02692

If a [VkImageView](#) is sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command, then the image view's **format features must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_CUBIC\\_BIT\\_EXT](#)

- VUID-vkCmdDraw-None-02693

If the [VK\\_EXT\\_filter\\_cubic](#) extension is not enabled and any [VkImageView](#) is sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command, it **must** not have a [VkImageViewType](#) of [VK\\_IMAGE\\_VIEW\\_TYPE\\_3D](#), [VK\\_IMAGE\\_VIEW\\_TYPE\\_CUBE](#), or [VK\\_IMAGE\\_VIEW\\_TYPE\\_CUBE\\_ARRAY](#)

- VUID-vkCmdDraw-filterCubic-02694

Any [VkImageView](#) being sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command **must** have a [VkImageViewType](#) and format that supports cubic filtering, as specified by [VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic](#) returned by [vkGetPhysicalDeviceImageFormatProperties2](#)

- VUID-vkCmdDraw-filterCubicMinmax-02695

Any [VkImageView](#) being sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) with a reduction mode of either [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MIN](#) or [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MAX](#) as a result of this command **must** have a [VkImageViewType](#) and format that supports cubic filtering together with minmax filtering, as specified by [VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax](#) returned by [vkGetPhysicalDeviceImageFormatProperties2](#)

- VUID-vkCmdDraw-OpTypeImage-07027

For any [VkImageView](#) being written as a storage image where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's **format features must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_WRITE\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDraw-OpTypeImage-07028

For any [VkImageView](#) being read as a storage image where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's **format features must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDraw-OpTypeImage-07029

For any [VkBufferView](#) being written as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's **buffer features must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_WRITE\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDraw-OpTypeImage-07030

Any [VkBufferView](#) being read as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#) then the view's **buffer features must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDraw-None-08601

If a [bound shader](#) was created with a pipeline layout or specified push constant ranges

and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDraw-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDraw-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDraw-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDraw-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDraw-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDraw-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDraw-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDraw-viewType-07752

If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#) **must** match the [Dim](#) operand of the [OpTypeImage](#) as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDraw-format-07753

If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the [numeric type](#) of the view's [format](#) and the [Sampled Type](#) operand of the [OpTypeImage](#) **must** match

- VUID-vkCmdDraw-OpImageWrite-08795

If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDraw-OpImageWrite-08796

If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have four components

- VUID-vkCmdDraw-OpImageWrite-04469

If a [VkBufferView](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDraw-SampledType-04470

If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64

- VUID-vkCmdDraw-SampledType-04471

If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32

- VUID-vkCmdDraw-SampledType-04472

If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64

- VUID-vkCmdDraw-SampledType-04473

If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32

- VUID-vkCmdDraw-sparseImageInt64Atomics-04474

If the [sparseImageInt64Atomics](#) feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command

- VUID-vkCmdDraw-sparseImageInt64Atomics-04475

If the [sparseImageInt64Atomics](#) feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this

command

- VUID-vkCmdDraw-None-07288

Any shader invocation executed by this command **must** [terminate](#)

- VUID-vkCmdDraw-None-09600

If a descriptor with type equal to any of [VK\\_DESCRIPTOR\\_TYPE\\_SAMPLED\\_IMAGE](#), [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_IMAGE](#), or [VK\\_DESCRIPTOR\\_TYPE\\_INPUT\\_ATTACHMENT](#) is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDraw-micromap-11636

If an acceleration structure is accessed as a result of this command through an [OpRayQueryProceedKHR](#) operation, the [VK\\_EXT\\_opacity\\_micromap](#) extension is not enabled, and the acceleration structure is built using geometry with a [VkAccelerationStructureTrianglesOpacityMicromapKHR](#) structure included in its [pNext](#) chain, the shader **must** have specified a [OpacityMicromapIdKHR](#) execution mode with its specialization constant operand equal to [VK\\_TRUE](#)

- VUID-vkCmdDraw-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDraw-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkPipeline](#) bound to the pipeline bind point used by this command **must** not have been created with [flags](#) that includes [VK\\_PIPELINE\\_CREATE\\_2\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_KHR](#)

- VUID-vkCmdDraw-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkShaderEXT](#) that accessed the descriptor **must** not have been created with [flags](#) that includes [VK\\_SHADER\\_CREATE\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_EXT](#)

- VUID-vkCmdDraw-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDraw-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#),

`VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDraw-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDraw-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDraw-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDraw-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDraw-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress`

- VUID-vkCmdDraw-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDraw-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDraw-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDraw-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDraw-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDraw-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDraw-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDraw-None-11374

If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by `VkDeviceAddressRangeKHR` when the descriptor was written

- VUID-vkCmdDraw-pBindInfo-11375

If any `bound shader` uses an embedded sampler via a `descriptor mapping`, the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDraw-None-11376

If a `bound shader` was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDraw-None-11398

If a `bound shader` was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be `out of bounds`

- VUID-vkCmdDraw-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDraw-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDraw-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`,

VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_RESOURCE\_HEAP\_DATA\_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDraw-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDraw-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDraw-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDraw-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDraw-protectedNoFault-11455

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), the address that the resource is mapped to **must** have been queried from a buffer created without the

[VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDraw-protectedNoFault-11456

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), the address of the indirect memory **must** have been queried from a buffer created without the [VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDraw-renderPass-02684

The current render pass **must** be [compatible](#) with the [renderPass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to [VK\\_PIPELINE\\_BIND\\_POINT\\_GRAPHICS](#)

- VUID-vkCmdDraw-subpass-02685

The subpass index of the current render pass **must** be equal to the [subpass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to [VK\\_PIPELINE\\_BIND\\_POINT\\_GRAPHICS](#)

- VUID-vkCmdDraw-OpTypeImage-07468

If any shader executed by this pipeline accesses an [OpTypeImage](#) variable with a [Dim](#) operand of [SubpassData](#), it **must** be decorated with an [InputAttachmentIndex](#) that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDraw-None-07469

Input attachment views accessed in a subpass **must** be created with the same [VkFormat](#) as the corresponding subpass definition, and be created with a [VkImageView](#) that is compatible with the attachment referenced by the subpass' [pInputAttachments](#) [[InputAttachmentIndex](#)] in the bound [VkFramebuffer](#) as specified by [Fragment Input Attachment Compatibility](#)

- VUID-vkCmdDraw-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a [InputAttachmentIndex](#) referenced by [VkRenderingInputAttachmentIndexInfo](#), or no [InputAttachmentIndex](#) if [VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex](#) or [VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex](#) are [NULL](#), **must** be created with a [VkImageView](#) that is compatible with the corresponding color, depth, or stencil attachment in [VkRenderingInfo](#)

- VUID-vkCmdDraw-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an [InputAttachmentIndex](#) if both [VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex](#) and [VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex](#) are non-[NULL](#)

- VUID-vkCmdDraw-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an [InputAttachmentIndex](#), the [InputAttachmentIndex](#) **must** match an index in [VkRenderingInputAttachmentIndexInfo](#)

- VUID-vkCmdDraw-None-06537

Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDraw-None-10795

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDraw-None-10796

If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDraw-None-10797

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDraw-None-12338

If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command

- VUID-vkCmdDraw-None-12339

If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command

- VUID-vkCmdDraw-None-12340

If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command

- VUID-vkCmdDraw-None-09003

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDraw-None-06886

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled

- VUID-vkCmdDraw-None-06887

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)

- VUID-vkCmdDraw-None-07831

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07832

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `effective rasterization input topology` is in the line topology class, then `vkCmdSetLineWidth` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBiasEnable` is `VK_TRUE`, then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07835

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment `current value` of `blendEnable` is `VK_TRUE` with a blend equations where any `VkBlendFactor` member is `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, then `vkCmdSetBlendConstants` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBoundsTestEnable` is `VK_TRUE`, then `vkCmdSetDepthBounds` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been

called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDraw-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDraw-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_FRONT\\_FACE](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetFrontFace](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_TEST\\_ENABLE](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), [vkCmdSetDepthTestEnable](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_WRITE\\_ENABLE](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and the [current value](#) of [depthTestEnable](#) is [VK\\_TRUE](#), then [vkCmdSetDepthWriteEnable](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_COMPARE\\_OP](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and the [current value](#) of [depthTestEnable](#) is [VK\\_TRUE](#), then [vkCmdSetDepthCompareOp](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07846

If the [depthBounds](#) feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_BOUNDS\\_TEST\\_ENABLE](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetDepthBoundsTestEnable](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_STENCIL\\_TEST\\_ENABLE](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetStencilTestEnable](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_STENCIL\\_OP](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), the [current value](#) of [stencilTestEnable](#) is [VK\\_TRUE](#), then [vkCmdSetStencilOp](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-viewportCount-03417  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-scissorCount-03418  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing
- VUID-vkCmdDraw-viewportCount-03419  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDraw-None-04876  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-None-04877  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-logicOp-04878  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDraw-primitiveFragmentShadingRateWithMultipleViewports-04552  
If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1
- VUID-vkCmdDraw-primitiveFragmentShadingRateWithMultipleViewports-08642  
If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in,

then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDraw-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's **format features** do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDraw-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDraw-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDraw-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDraw-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the

corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDraw-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDraw-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT`

::maxDiscardRectangles

- VUID-vkCmdDraw-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo`

`::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-08918

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-imageView-06183

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- VUID-vkCmdDraw-dynamicRenderingLocalRead-11797

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`

- VUID-vkCmdDraw-imageView-06184

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

- VUID-vkCmdDraw-multisampledRenderToSingleSampled-07285

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDraw-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDraw-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDraw-pNext-07935

If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDraw-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDraw-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-pDepthAttachment-11540

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a

graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDraw-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDraw-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDraw-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDraw-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDraw-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics

pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line or point topology class, then the current value of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDraw-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

`VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDraw-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current` value of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDraw-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDraw-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDraw-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDraw-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the `current` value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing

command **must** have set a value for all active color attachments

- VUID-vkCmdDraw-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDraw-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDraw-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDraw-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDraw-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDraw-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last

call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDraw-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDraw-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDraw-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDraw-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDraw-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by

`vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDraw-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDraw-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDraw-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDraw-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDraw-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDraw-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if

the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDraw-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDraw-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDraw-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries **must** not be active

- VUID-vkCmdDraw-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDraw-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDraw-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDraw-None-08686

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled,

**vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT**

- VUID-vkCmdDraw-None-08687

If there is no bound graphics pipeline, and the **geometryShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_GEOMETRY\_BIT**

- VUID-vkCmdDraw-None-08688

If there is no bound graphics pipeline, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_FRAGMENT\_BIT**

- VUID-vkCmdDraw-None-08689

If there is no bound graphics pipeline, and the **taskShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_TASK\_BIT\_EXT**

- VUID-vkCmdDraw-None-08690

If there is no bound graphics pipeline, and the **meshShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT**

- VUID-vkCmdDraw-None-08693

If there is no bound graphics pipeline, and at least one of the **taskShader** and **meshShader** features is enabled, one of the **VK\_SHADER\_STAGE\_VERTEX\_BIT** or **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT** stages **must** have a valid **VkShaderEXT** bound, and the other **must** have no **VkShaderEXT** bound

- VUID-vkCmdDraw-None-08696

If there is no bound graphics pipeline, and a valid **VkShaderEXT** is bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage, there **must** be no **VkShaderEXT** bound to either the **VK\_SHADER\_STAGE\_TASK\_BIT\_EXT** stage or the **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT** stage

- VUID-vkCmdDraw-None-08698

If any graphics shader is bound which was created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag, then all shaders created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag in the same **vkCreateShadersEXT** call **must** also be bound

- VUID-vkCmdDraw-None-08699

If any graphics shader is bound which was created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag, any stages in between stages whose shaders which did not create a shader with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag as part of the same **vkCreateShadersEXT** call **must** not have any **VkShaderEXT** bound

- VUID-vkCmdDraw-None-08878

All bound graphics shader objects **must** have been created with identical or **identically defined** push constant ranges

- VUID-vkCmdDraw-None-08879

All bound graphics shader objects **must** have either been created with the **VK\_SHADER\_CREATE\_DESCRIPTOR\_HEAP\_BIT\_EXT** flag set, or with identical or **identically**

defined arrays of descriptor set layouts

- VUID-vkCmdDraw-pDynamicStates-08715

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

- VUID-vkCmdDraw-pDynamicStates-08716

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be `0`

- VUID-vkCmdDraw-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them

- VUID-vkCmdDraw-maxFragmentDualSrcAttachments-09239

If `blending` is enabled for any attachment where either the source or destination blend factors for that attachment **use the secondary color input**, the maximum value of `Location` for any output attachment **statically used** in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`

- VUID-vkCmdDraw-None-09548

If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDraw-None-09549

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDraw-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is

statically used in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDraw-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDraw-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDraw-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDraw-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDraw-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if *sample shading* is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDraw-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDraw-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDraw-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDraw-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render

pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDraw-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDraw-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDraw-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo`

`::pDepthAttachment->resolveImageView`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDraw-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDraw-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDraw-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDraw-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`,

`vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDraw-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDraw-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDraw-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDraw-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDraw-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDraw-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDraw-commandBuffer-02712

If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, any resource written to by the `VkPipeline` object bound to the pipeline bind point used by this command **must** not be an unprotected resource

- VUID-vkCmdDraw-commandBuffer-02713

If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, pipeline stages other than the framebuffer-space and compute stages in the `VkPipeline` object bound to the pipeline bind point used by this command **must** not write to any resource

- VUID-vkCmdDraw-commandBuffer-04617

If any of the shader stages of the `VkPipeline` bound to the pipeline bind point used by this command uses the `RayQueryKHR` capability, then `commandBuffer` **must** not be a protected command buffer

- VUID-vkCmdDraw-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound

- VUID-vkCmdDraw-None-04008

If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`

- VUID-vkCmdDraw-None-02721

If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDraw-format-10389

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`

- VUID-vkCmdDraw-format-10390

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`

- VUID-vkCmdDraw-None-07842

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- VUID-vkCmdDraw-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current value` of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDraw-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound

- VUID-vkCmdDraw-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDraw-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDraw-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDraw-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDraw-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDraw-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `LegacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDraw-format-08936

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDraw-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDraw-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDraw-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the `current value` of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDraw-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDraw-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDraw-None-08885

There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages

- VUID-vkCmdDraw-None-07619

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDraw-OpExecutionMode-12239

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDraw-OpExecutionMode-12240

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDraw-OpExecutionMode-12241

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDraw-OpExecutionMode-12242

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain

an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDraw-pNext-09461

If the bound graphics pipeline state was created with `VkPipelineVertexInputDivisorStateCreateInfo` in the `pNext` chain of `VkGraphicsPipelineCreateInfo::pVertexInputState`, any member of `VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors` has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-vkCmdDraw-None-09462

If `shader objects` are used for drawing or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the `vkCmdSetVertexInputEXT` call that sets this dynamic state has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

## Valid Usage (Implicit)

- VUID-vkCmdDraw-commandBuffer-parameter

`commandBuffer` **must** be a valid `VkCommandBuffer` handle

- VUID-vkCmdDraw-commandBuffer-recording

`commandBuffer` **must** be in the `recording state`

- VUID-vkCmdDraw-commandBuffer-cmdpool

The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations

- VUID-vkCmdDraw-renderpass

This command **must** only be called inside of a render pass instance

- VUID-vkCmdDraw-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdDraw-videocoding

This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized

- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types     | Command Type |
|-----------------------|-------------------|--------------------|---------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAP<br>HICS_BIT | Action       |

## Conditional Rendering

vkCmdDraw is affected by [conditional rendering](#)

To record an indexed draw, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDrawIndexed(
    VkCommandBuffer          commandBuffer,
    uint32_t                 indexCount,
    uint32_t                 instanceCount,
    uint32_t                 firstIndex,
    int32_t                  vertexOffset,
    uint32_t                 firstInstance);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `indexCount` is the number of vertices to draw.
- `instanceCount` is the number of instances to draw.
- `firstIndex` is the base index within the index buffer.
- `vertexOffset` is the value added to the vertex index before indexing into the vertex buffer.
- `firstInstance` is the instance ID of the first instance to draw.

When the command is executed, primitives are assembled using the current primitive topology and `indexCount` vertices whose indices are retrieved from the index buffer. The index buffer is treated as an array of tightly packed unsigned integers of size defined by the `vkCmdBindIndexBuffer2::indexType` or the `vkCmdBindIndexBuffer::indexType` parameter with which the buffer was bound.

The first vertex index is read from `indexAddress + (firstIndex × indexSize)`, where `indexAddress` is the effective address specified for the index buffer by `vkCmdBindIndexBuffer3KHR`, `vkCmdBindIndexBuffer2`, or `vkCmdBindIndexBuffer`, and `indexSize` is the byte size of the type specified by `indexType`. Subsequent index values are retrieved from consecutive locations in the index buffer. Indices are first compared to the primitive restart value, then zero extended to 32 bits (if the `indexType` is `VK_INDEX_TYPE_UINT8` or `VK_INDEX_TYPE_UINT16`) and have `vertexOffset` added to them, before being supplied as the `vertexIndex` value.

The primitives are drawn `instanceCount` times with `instanceIndex` starting with `firstInstance` and

increasing sequentially for each instance. The assembled primitives execute the bound graphics pipeline.

## Valid Usage

- VUID-vkCmdDrawIndexed-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexed-None-08600  
If a `bound shader` was created with a pipeline layout and statically uses a set  $n$ , a descriptor set **must** have been bound to  $n$  at the same pipeline bind point, with layouts compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawIndexed-commandBuffer-02707  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource
- VUID-vkCmdDrawIndexed-None-08114  
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexed-None-08115  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexed-None-08116  
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexed-None-08117  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexed-None-08119  
If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexed-magFilter-04553  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this

command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndexed-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndexed-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndexed-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndexed-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndexed-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawIndexed-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawIndexed-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndexed-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's format features **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawIndexed-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features **must** contain

## VK\_FORMAT\_FEATURE\_STORAGE\_IMAGE\_ATOMIC\_BIT

- VUID-vkCmdDrawIndexed-None-07888

If a [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_TEXEL\\_BUFFER](#) descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_STORAGE\\_TEXEL\\_BUFFER\\_ATOMIC\\_BIT](#)

- VUID-vkCmdDrawIndexed-None-02692

If a [VkImageView](#) is sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_CUBIC\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexed-None-02693

If the [VK\\_EXT\\_filter\\_cubic](#) extension is not enabled and any [VkImageView](#) is sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command, it **must** not have a [VkImageViewType](#) of [VK\\_IMAGE\\_VIEW\\_TYPE\\_3D](#), [VK\\_IMAGE\\_VIEW\\_TYPE\\_CUBE](#), or [VK\\_IMAGE\\_VIEW\\_TYPE\\_CUBE\\_ARRAY](#)

- VUID-vkCmdDrawIndexed-filterCubic-02694

Any [VkImageView](#) being sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command **must** have a [VkImageViewType](#) and format that supports cubic filtering, as specified by [VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic](#) returned by [vkGetPhysicalDeviceImageFormatProperties2](#)

- VUID-vkCmdDrawIndexed-filterCubicMinmax-02695

Any [VkImageView](#) being sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) with a reduction mode of either [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MIN](#) or [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MAX](#) as a result of this command **must** have a [VkImageViewType](#) and format that supports cubic filtering together with minmax filtering, as specified by [VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax](#) returned by [vkGetPhysicalDeviceImageFormatProperties2](#)

- VUID-vkCmdDrawIndexed-OpTypeImage-07027

For any [VkImageView](#) being written as a storage image where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_WRITE\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndexed-OpTypeImage-07028

For any [VkImageView](#) being read as a storage image where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndexed-OpTypeImage-07029

For any [VkBufferView](#) being written as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's [buffer features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_WRITE\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndexed-OpTypeImage-07030

Any [VkBufferView](#) being read as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#) then the view's [buffer features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndexed-None-08601

If a [bound shader](#) was created with a pipeline layout or specified push constant ranges

and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDrawIndexed-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndexed-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndexed-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndexed-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexed-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexed-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexed-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexed-viewType-07752

If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#) **must** match the [Dim](#) operand of the [OpTypeImage](#) as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndexed-format-07753

If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the [numeric type](#) of the view's [format](#) and the [Sampled Type](#) operand of the [OpTypeImage](#) **must** match

- VUID-vkCmdDrawIndexed-OpImageWrite-08795

If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDrawIndexed-OpImageWrite-08796

If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have four components

- VUID-vkCmdDrawIndexed-OpImageWrite-04469

If a [VkBufferView](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDrawIndexed-SampledType-04470

If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64

- VUID-vkCmdDrawIndexed-SampledType-04471

If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32

- VUID-vkCmdDrawIndexed-SampledType-04472

If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64

- VUID-vkCmdDrawIndexed-SampledType-04473

If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32

- VUID-vkCmdDrawIndexed-sparseImageInt64Atomics-04474

If the [sparseImageInt64Atomics](#) feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command

- VUID-vkCmdDrawIndexed-sparseImageInt64Atomics-04475

If the [sparseImageInt64Atomics](#) feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this

command

- VUID-vkCmdDrawIndexed-None-07288

Any shader invocation executed by this command **must** [terminate](#)

- VUID-vkCmdDrawIndexed-None-09600

If a descriptor with type equal to any of [VK\\_DESCRIPTOR\\_TYPE\\_SAMPLED\\_IMAGE](#), [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_IMAGE](#), or [VK\\_DESCRIPTOR\\_TYPE\\_INPUT\\_ATTACHMENT](#) is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndexed-micromap-11636

If an acceleration structure is accessed as a result of this command through an [OpRayQueryProceedKHR](#) operation, the [VK\\_EXT\\_opacity\\_micromap](#) extension is not enabled, and the acceleration structure is built using geometry with a [VkAccelerationStructureTrianglesOpacityMicromapKHR](#) structure included in its [pNext](#) chain, the shader **must** have specified a [OpacityMicromapIdKHR](#) execution mode with its specialization constant operand equal to [VK\\_TRUE](#)

- VUID-vkCmdDrawIndexed-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndexed-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkPipeline](#) bound to the pipeline bind point used by this command **must** not have been created with [flags](#) that includes [VK\\_PIPELINE\\_CREATE\\_2\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_KHR](#)

- VUID-vkCmdDrawIndexed-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkShaderEXT](#) that accessed the descriptor **must** not have been created with [flags](#) that includes [VK\\_SHADER\\_CREATE\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexed-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndexed-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#),

[VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a [OpTypeStruct](#) decorated with [Block](#) or [BufferBlock](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [bufferDescriptorAlignment](#)

- VUID-vkCmdDrawIndexed-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeImage](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [imageDescriptorAlignment](#)

- VUID-vkCmdDrawIndexed-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeSampler](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the sampler heap **must** be a multiple of [samplerDescriptorAlignment](#)

- VUID-vkCmdDrawIndexed-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndexed-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexed-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexed-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndexed-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexed-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexed-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndexed-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndexed-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexed-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexed-None-11374

If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by `VkDeviceAddressRangeKHR` when the descriptor was written

- VUID-vkCmdDrawIndexed-pBindInfo-11375

If any `bound shader` uses an embedded sampler via a `descriptor mapping`, the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawIndexed-None-11376

If a `bound shader` was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDrawIndexed-None-11398

If a `bound shader` was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be `out of bounds`

- VUID-vkCmdDrawIndexed-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndexed-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndexed-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`,

VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, or  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_RESOURCE\_HEAP\_DATA\_EXT and a shader accesses  
a uniform buffer using that mapping, the address that the uniform buffer is mapped to  
**must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDrawIndexed-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound  
to a shader stage used by this command, and it was created with a `descriptor mapping`  
using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`,  
`VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or  
`VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a  
storage buffer using that mapping, the address that the storage buffer is mapped to **must**  
have been queried from a buffer created with the  
`VK_BUFFER_USAGE_STORAGE_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndexed-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound  
to a shader stage used by this command, and it was created with a `descriptor mapping`  
using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`,  
`VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or  
`VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a  
storage buffer using that mapping, the address that the storage buffer is mapped to **must**  
be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndexed-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound  
to a shader stage used by this command, and it was created with a `descriptor mapping`  
using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`,  
`VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or  
`VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses an  
acceleration structure using that mapping, the address that the acceleration structure is  
mapped to **must** be an acceleration structure address retrieved from a  
`VkAccelerationStructureKHR` object via `vkGetAccelerationStructureDeviceAddressKHR`

- VUID-vkCmdDrawIndexed-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and  
that sampler descriptor uses a custom border color with an index defined by  
`VkSamplerCustomBorderColorIndexCreateInfoEXT`, the value of  
`VkSamplerCustomBorderColorIndexCreateInfoEXT::index` **must** have been registered  
before this command was recorded, and still be registered during the sampling operation,  
with an identically defined color

- VUID-vkCmdDrawIndexed-protectedNoFault-11455

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by  
this command, or a shader is bound to a shader stage used by this command, and it was  
created with a `descriptor mapping` using  
`VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`,  
`VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or  
`VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, the address that the  
resource is mapped to **must** have been queried from a buffer created without the

[VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDrawIndexed-protectedNoFault-11456

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), the address of the indirect memory **must** have been queried from a buffer created without the [VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDrawIndexed-renderPass-02684

The current render pass **must** be [compatible](#) with the [renderPass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to [VK\\_PIPELINE\\_BIND\\_POINT\\_GRAPHICS](#)

- VUID-vkCmdDrawIndexed-subpass-02685

The subpass index of the current render pass **must** be equal to the [subpass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to [VK\\_PIPELINE\\_BIND\\_POINT\\_GRAPHICS](#)

- VUID-vkCmdDrawIndexed-OpTypeImage-07468

If any shader executed by this pipeline accesses an [OpTypeImage](#) variable with a [Dim](#) operand of [SubpassData](#), it **must** be decorated with an [InputAttachmentIndex](#) that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndexed-None-07469

Input attachment views accessed in a subpass **must** be created with the same [VkFormat](#) as the corresponding subpass definition, and be created with a [VkImageView](#) that is compatible with the attachment referenced by the subpass' [pInputAttachments](#) [[InputAttachmentIndex](#)] in the bound [VkFramebuffer](#) as specified by [Fragment Input Attachment Compatibility](#)

- VUID-vkCmdDrawIndexed-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a [InputAttachmentIndex](#) referenced by [VkRenderingInputAttachmentIndexInfo](#), or no [InputAttachmentIndex](#) if [VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex](#) or [VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex](#) are NULL, **must** be created with a [VkImageView](#) that is compatible with the corresponding color, depth, or stencil attachment in [VkRenderingInfo](#)

- VUID-vkCmdDrawIndexed-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an [InputAttachmentIndex](#) if both [VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex](#) and [VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex](#) are non-NULL

- VUID-vkCmdDrawIndexed-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an [InputAttachmentIndex](#), the [InputAttachmentIndex](#) **must** match an index in [VkRenderingInputAttachmentIndexInfo](#)

- VUID-vkCmdDrawIndexed-None-06537

Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexed-None-10795

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexed-None-10796

If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexed-None-10797

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexed-None-12338

If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexed-None-12339

If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexed-None-12340

If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexed-None-09003

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawIndexed-None-06886

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled

- VUID-vkCmdDrawIndexed-None-06887

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)

- VUID-vkCmdDrawIndexed-None-07831

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07832

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `effective rasterization input topology` is in the line topology class, then `vkCmdSetLineWidth` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBiasEnable` is `VK_TRUE`, then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07835

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment `current value` of `blendEnable` is `VK_TRUE` with a blend equations where any `VkBlendFactor` member is `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, then `vkCmdSetBlendConstants` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBoundsTestEnable` is `VK_TRUE`, then `vkCmdSetDepthBounds` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been

called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexed-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-viewportCount-03417  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-scissorCount-03418  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndexed-viewportCount-03419  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`
- VUID-vkCmdDrawIndexed-None-04876  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-None-04877  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-logicOp-04878  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-primitiveFragmentShadingRateWithMultipleViewports-04552  
If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1
- VUID-vkCmdDrawIndexed-primitiveFragmentShadingRateWithMultipleViewports-08642  
If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in,

then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexed-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's **format features** do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexed-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndexed-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndexed-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndexed-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the

corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawIndexed-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawIndexed-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT`

`::maxDiscardRectangles`

- VUID-vkCmdDrawIndexed-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo`

`::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-08918

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-imageView-06183

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- VUID-vkCmdDrawIndexed-dynamicRenderingLocalRead-11797

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`

- VUID-vkCmdDrawIndexed-imageView-06184

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

- VUID-vkCmdDrawIndexed-multisampledRenderToSingleSampled-07285

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexed-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexed-multisampledRenderToSingleSampled-07287  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawIndexed-pNext-07935  
If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`
- VUID-vkCmdDrawIndexed-renderPass-06198  
If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`
- VUID-vkCmdDrawIndexed-pColorAttachments-08963  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexed-pColorAttachments-11539  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexed-pDepthAttachment-08964  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexed-pDepthAttachment-11540  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a

graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawIndexed-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawIndexed-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndexed-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndexed-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndexed-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics

pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line or point topology class, then the current value of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawIndexed-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

`VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawIndexed-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current` value of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDrawIndexed-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexed-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexed-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndexed-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the `current` value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing

command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexed-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexed-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndexed-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexed-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexed-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexed-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last

call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndexed-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndexed-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by

`vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexed-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexed-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndexed-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if

the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndexed-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndexed-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndexed-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active

- VUID-vkCmdDrawIndexed-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndexed-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndexed-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawIndexed-None-08686

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled,

**vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT**

- VUID-vkCmdDrawIndexed-None-08687

If there is no bound graphics pipeline, and the **geometryShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_GEOMETRY\_BIT**

- VUID-vkCmdDrawIndexed-None-08688

If there is no bound graphics pipeline, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_FRAGMENT\_BIT**

- VUID-vkCmdDrawIndexed-None-08689

If there is no bound graphics pipeline, and the **taskShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_TASK\_BIT\_EXT**

- VUID-vkCmdDrawIndexed-None-08690

If there is no bound graphics pipeline, and the **meshShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT**

- VUID-vkCmdDrawIndexed-None-08693

If there is no bound graphics pipeline, and at least one of the **taskShader** and **meshShader** features is enabled, one of the **VK\_SHADER\_STAGE\_VERTEX\_BIT** or **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT** stages **must** have a valid **VkShaderEXT** bound, and the other **must** have no **VkShaderEXT** bound

- VUID-vkCmdDrawIndexed-None-08696

If there is no bound graphics pipeline, and a valid **VkShaderEXT** is bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage, there **must** be no **VkShaderEXT** bound to either the **VK\_SHADER\_STAGE\_TASK\_BIT\_EXT** stage or the **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT** stage

- VUID-vkCmdDrawIndexed-None-08698

If any graphics shader is bound which was created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag, then all shaders created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag in the same **vkCreateShadersEXT** call **must** also be bound

- VUID-vkCmdDrawIndexed-None-08699

If any graphics shader is bound which was created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag, any stages in between stages whose shaders which did not create a shader with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag as part of the same **vkCreateShadersEXT** call **must** not have any **VkShaderEXT** bound

- VUID-vkCmdDrawIndexed-None-08878

All bound graphics shader objects **must** have been created with identical or **identically defined** push constant ranges

- VUID-vkCmdDrawIndexed-None-08879

All bound graphics shader objects **must** have either been created with the **VK\_SHADER\_CREATE\_DESCRIPTOR\_HEAP\_BIT\_EXT** flag set, or with identical or **identically**

defined arrays of descriptor set layouts

- VUID-vkCmdDrawIndexed-pDynamicStates-08715

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexed-pDynamicStates-08716

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be `0`

- VUID-vkCmdDrawIndexed-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them

- VUID-vkCmdDrawIndexed-maxFragmentDualSrcAttachments-09239

If `blending` is enabled for any attachment where either the source or destination blend factors for that attachment `use the secondary color input`, the maximum value of `Location` for any output attachment `statically used` in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`

- VUID-vkCmdDrawIndexed-None-09548

If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndexed-None-09549

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is `statically used` in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexed-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is

[statically used](#) in the bound pipeline in an [InputAttachmentIndex](#) decoration, the two values **must** match

- VUID-vkCmdDrawIndexed-None-10928

If the current render pass was begun with [vkCmdBeginRendering](#), and there is no shader object bound to any graphics stage, if either the value of [VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex](#) in the bound pipeline or the corresponding value set currently in the current render pass instance is [statically used](#) in the bound pipeline in an [InputAttachmentIndex](#) decoration, the two values **must** match

- VUID-vkCmdDrawIndexed-None-09642

If the current render pass was begun with [vkCmdBeginRendering](#) with the [VK\\_RENDERING\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#) flag, the bound graphics pipeline **must** have been created with [VK\\_PIPELINE\\_CREATE\\_2\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexed-None-09643

If the bound graphics pipeline was created with [VK\\_PIPELINE\\_CREATE\\_2\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#), the current render pass **must** have begun with [vkCmdBeginRendering](#) with the [VK\\_RENDERING\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#) flag

- VUID-vkCmdDrawIndexed-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawIndexed-flags-11521

If current render pass instance was begun with [vkCmdBeginRendering](#) with [VkRenderingInfo::flags](#) which includes [VK\\_RENDERING\\_FRAGMENT\\_REGION\\_BIT\\_EXT](#), and if [sample shading](#) is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndexed-None-11522

If the current render pass instance was begun with [vkCmdBeginRendering](#) and contains a custom resolve, and the [dynamicRenderingUnusedAttachments](#) feature is not enabled, the graphics pipeline bound **must** have been created with a [VkCustomResolveCreateInfoEXT](#)

- VUID-vkCmdDrawIndexed-None-11523

If the current render pass instance was begun with [vkCmdBeginRendering](#) and does not contain a custom resolve, and the [dynamicRenderingUnusedAttachments](#) feature is not enabled, the graphics pipeline bound **must** not have been created with a [VkCustomResolveCreateInfoEXT](#)

- VUID-vkCmdDrawIndexed-customResolve-11524

If the current render pass instance was begun with [vkCmdBeginRendering](#) and [vkCmdBeginCustomResolveEXT](#) has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with [VkCustomResolveCreateInfoEXT::customResolve](#) as [VK\\_TRUE](#)

- VUID-vkCmdDrawIndexed-customResolve-11525

If the current render pass instance was begun with [vkCmdBeginRendering](#) and contains a custom resolve, and [vkCmdBeginCustomResolveEXT](#) has not been recorded in the render

pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexed-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexed-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexed-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo`

`::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexed-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexed-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexed-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexed-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`,

`vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexed-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexed-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexed-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawIndexed-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexed-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexed-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndexed-commandBuffer-02712

If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, any resource written to by the `VkPipeline` object bound to the pipeline bind point used by this command **must** not be an unprotected resource

- VUID-vkCmdDrawIndexed-commandBuffer-02713  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, pipeline stages other than the framebuffer-space and compute stages in the `VkPipeline` object bound to the pipeline bind point used by this command **must** not write to any resource
- VUID-vkCmdDrawIndexed-commandBuffer-04617  
If any of the shader stages of the `VkPipeline` bound to the pipeline bind point used by this command uses the `RayQueryKHR` capability, then `commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawIndexed-None-04007  
All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound
- VUID-vkCmdDrawIndexed-None-04008  
If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`
- VUID-vkCmdDrawIndexed-None-02721  
If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)
- VUID-vkCmdDrawIndexed-format-10389  
For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`
- VUID-vkCmdDrawIndexed-format-10390  
For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`
- VUID-vkCmdDrawIndexed-None-07842  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexed-dynamicPrimitiveTopologyUnrestricted-07500  
If the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- VUID-vkCmdDrawIndexed-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current value` of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDrawIndexed-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound

- VUID-vkCmdDrawIndexed-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawIndexed-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexed-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawIndexed-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexed-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawIndexed-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDrawIndexed-format-08936

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDrawIndexed-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDrawIndexed-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawIndexed-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the `current value` of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexed-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexed-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndexed-None-08885

There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages

- VUID-vkCmdDrawIndexed-None-07619

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexed-OpExecutionMode-12239

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndexed-OpExecutionMode-12240

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndexed-OpExecutionMode-12241

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndexed-OpExecutionMode-12242

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain

an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawIndexed-None-07312

If the `maintenance6` feature is not enabled, a valid index buffer **must** be bound

- VUID-vkCmdDrawIndexed-primitiveRestartIndex-12401

If the primitive restart index for this draw operation was set with `vkCmdSetPrimitiveRestartIndexEXT`, then `primitiveRestartIndex` **must** not be greater than the maximum representable value for the bound `VkIndexType`

- VUID-vkCmdDrawIndexed-pNext-09461

If the bound graphics pipeline state was created with `VkPipelineVertexInputDivisorStateCreateInfo` in the `pNext` chain of `VkGraphicsPipelineCreateInfo::pVertexInputState`, any member of `VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors` has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawIndexed-None-09462

If `shader objects` are used for drawing or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the `vkCmdSetVertexInputEXT` call that sets this dynamic state has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawIndexed-robustBufferAccess2-08798

If the `robustBufferAccess2` feature is not enabled,  $(\text{indexSize} \times (\text{firstIndex} + \text{indexCount}))$  **must** be less than or equal to the size of the bound index buffer range, with `indexSize` being based on the type specified by `indexType`, and the other parameters sourced from this command

## Valid Usage (Implicit)

- VUID-vkCmdDrawIndexed-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle

- VUID-vkCmdDrawIndexed-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`

- VUID-vkCmdDrawIndexed-commandBuffer-cmdpool

The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations

- VUID-vkCmdDrawIndexed-renderpass

This command **must** only be called inside of a render pass instance

- VUID-vkCmdDrawIndexed-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdDrawIndexed-videocoding

This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types             | Command Type |
|-----------------------|-------------------|--------------------|-----------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS_BIT<br>HICS_BIT | Action       |

## Conditional Rendering

`vkCmdDrawIndexed` is affected by [conditional rendering](#)

To record an ordered sequence of draws which have no state changes between them, call:

```
// Provided by VK_EXT_multi_draw
void vkCmdDrawMultiEXT(
    VkCommandBuffer                commandBuffer,
    uint32_t                       drawCount,
    const VkMultiDrawInfoEXT*      pVertexInfo,
    uint32_t                       instanceCount,
    uint32_t                       firstInstance,
    uint32_t                       stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `drawCount` is the number of draws to execute, and **can** be zero.
- `pVertexInfo` is a pointer to an array of `VkMultiDrawInfoEXT` with vertex information to be drawn.
- `instanceCount` is the number of instances per draw.
- `firstInstance` is the instance ID of the first instance in each draw.
- `stride` is the byte stride between consecutive elements of `pVertexInfo`.

The number of draws recorded is `drawCount`, with each draw reading, sequentially, a `firstVertex` and a `vertexCount` from `pVertexInfo`. For each recorded draw, primitives are assembled as for `vkCmdDraw`, and drawn `instanceCount` times with `instanceIndex` starting with `firstInstance` and sequentially for each instance.

## Valid Usage

- VUID-vkCmdDrawMultiEXT-None-08606

If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command

- VUID-vkCmdDrawMultiEXT-None-08600

If a `bound shader` was created with a pipeline layout and statically uses a set  $n$ , a descriptor set **must** have been bound to  $n$  at the same pipeline bind point, with layouts compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)

- VUID-vkCmdDrawMultiEXT-commandBuffer-02707

If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource

- VUID-vkCmdDrawMultiEXT-None-08114

Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-08115

If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-08116

Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-08117

If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-08119

If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident

- VUID-vkCmdDrawMultiEXT-magFilter-04553

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawMultiEXT-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawMultiEXT-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawMultiEXT-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawMultiEXT-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawMultiEXT-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawMultiEXT-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawMultiEXT-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawMultiEXT-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawMultiEXT-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- VUID-vkCmdDrawMultiEXT-None-07888

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic

operations as a result of this command, then the storage texel buffer's **format features must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- VUID-vkCmdDrawMultiEXT-None-02692

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's **format features must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-02693

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`

- VUID-vkCmdDrawMultiEXT-filterCubic-02694

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawMultiEXT-filterCubicMinmax-02695

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawMultiEXT-OpTypeImage-07027

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's **format features must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiEXT-OpTypeImage-07028

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's **format features must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiEXT-OpTypeImage-07029

For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's **buffer features must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiEXT-OpTypeImage-07030

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's **buffer features must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiEXT-None-08601

If a `bound shader` was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are **compatible** with the push constant range used to create the shader

- VUID-vkCmdDrawMultiEXT-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawMultiEXT-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawMultiEXT-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawMultiEXT-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiEXT-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiEXT-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiEXT-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiEXT-viewType-07752

If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#) **must** match the [Dim](#) operand of the [OpTypeImage](#) as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawMultiEXT-format-07753  
If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the [numeric type](#) of the view's [format](#) and the [Sampled Type](#) operand of the [OpTypeImage](#) **must** match
- VUID-vkCmdDrawMultiEXT-OpImageWrite-08795  
If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawMultiEXT-OpImageWrite-08796  
If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have four components
- VUID-vkCmdDrawMultiEXT-OpImageWrite-04469  
If a [VkBufferView](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawMultiEXT-SampledType-04470  
If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64
- VUID-vkCmdDrawMultiEXT-SampledType-04471  
If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32
- VUID-vkCmdDrawMultiEXT-SampledType-04472  
If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64
- VUID-vkCmdDrawMultiEXT-SampledType-04473  
If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32
- VUID-vkCmdDrawMultiEXT-sparseImageInt64Atomics-04474  
If the [sparseImageInt64Atomics](#) feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command
- VUID-vkCmdDrawMultiEXT-sparseImageInt64Atomics-04475  
If the [sparseImageInt64Atomics](#) feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command
- VUID-vkCmdDrawMultiEXT-None-07288  
Any shader invocation executed by this command **must terminate**

- VUID-vkCmdDrawMultiEXT-None-09600

If a descriptor with type equal to any of [VK\\_DESCRIPTOR\\_TYPE\\_SAMPLED\\_IMAGE](#), [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_IMAGE](#), or [VK\\_DESCRIPTOR\\_TYPE\\_INPUT\\_ATTACHMENT](#) is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawMultiEXT-micromap-11636

If an acceleration structure is accessed as a result of this command through an [OpRayQueryProceedKHR](#) operation, the [VK\\_EXT\\_opacity\\_micromap](#) extension is not enabled, and the acceleration structure is built using geometry with a [VkAccelerationStructureTrianglesOpacityMicromapKHR](#) structure included in its [pNext](#) chain, the shader **must** have specified a [OpacityMicromapIdKHR](#) execution mode with its specialization constant operand equal to [VK\\_TRUE](#)

- VUID-vkCmdDrawMultiEXT-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawMultiEXT-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkPipeline](#) bound to the pipeline bind point used by this command **must** not have been created with [flags](#) that includes [VK\\_PIPELINE\\_CREATE\\_2\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_KHR](#)

- VUID-vkCmdDrawMultiEXT-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkShaderEXT](#) that accessed the descriptor **must** not have been created with [flags](#) that includes [VK\\_SHADER\\_CREATE\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_EXT](#)

- VUID-vkCmdDrawMultiEXT-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawMultiEXT-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a [OpTypeStruct](#) decorated with [Block](#) or [BufferBlock](#) using that mapping, the

calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawMultiEXT-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDrawMultiEXT-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawMultiEXT-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawMultiEXT-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawMultiEXT-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress`

- VUID-vkCmdDrawMultiEXT-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location

in push data **must** be a multiple of 8

- VUID-vkCmdDrawMultiEXT-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawMultiEXT-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawMultiEXT-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawMultiEXT-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawMultiEXT-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawMultiEXT-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawMultiEXT-None-11374

If the [robustBufferAccess2](#) feature is not enabled, the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or

storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawMultiEXT-pBindInfo-11375

If any [bound shader](#) uses an embedded sampler via a [descriptor mapping](#), the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawMultiEXT-None-11376

If a [bound shader](#) was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDrawMultiEXT-None-11398

If a [bound shader](#) was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be [out of bounds](#)

- VUID-vkCmdDrawMultiEXT-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawMultiEXT-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawMultiEXT-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT` and a shader accesses

a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDrawMultiEXT-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawMultiEXT-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawMultiEXT-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a `VkAccelerationStructureKHR` object via `vkGetAccelerationStructureDeviceAddressKHR`

- VUID-vkCmdDrawMultiEXT-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by `VkSamplerCustomBorderColorIndexCreateInfoEXT`, the value of `VkSamplerCustomBorderColorIndexCreateInfoEXT::index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawMultiEXT-protectedNoFault-11455

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, the address that the resource is mapped to **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawMultiEXT-protectedNoFault-11456

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, the address of the indirect memory **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawMultiEXT-renderPass-02684

The current render pass **must** be `compatible` with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawMultiEXT-subpass-02685

The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawMultiEXT-OpTypeImage-07468

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawMultiEXT-None-07469

Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound `VkFramebuffer` as specified by `Fragment Input Attachment Compatibility`

- VUID-vkCmdDrawMultiEXT-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`

- VUID-vkCmdDrawMultiEXT-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`

- VUID-vkCmdDrawMultiEXT-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawMultiEXT-None-06537

Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawMultiEXT-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiEXT-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiEXT-None-10797  
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiEXT-None-12338  
If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiEXT-None-12339  
If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiEXT-None-12340  
If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiEXT-None-09003  
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawMultiEXT-None-06886  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled
- VUID-vkCmdDrawMultiEXT-None-06887  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)
- VUID-vkCmdDrawMultiEXT-None-07831  
If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_VIEWPORT](#) dynamic state enabled then [vkCmdSetViewport](#) **must**

have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07832

If the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_SCISSOR** dynamic state enabled then **vkCmdSetScissor** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_WIDTH** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineWidth** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBiasEnable** is **VK\_TRUE**, then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07835

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_BLEND\_CONSTANTS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and an active color attachment **current value** of **blendEnable** is **VK\_TRUE** with a blend equations where any **VkBlendFactor** member is **VK\_BLEND\_FACTOR\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_ALPHA**, or **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, then **vkCmdSetBlendConstants** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BOUNDS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBoundsTestEnable** is **VK\_TRUE**, then **vkCmdSetDepthBounds** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_COMPARE\_MASK** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **stencilTestEnable** is **VK\_TRUE**, then **vkCmdSetStencilCompareMask** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawMultiEXT-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing

- VUID-vkCmdDrawMultiEXT-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- VUID-vkCmdDrawMultiEXT-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawMultiEXT-primitiveFragmentShadingRateWithMultipleViewports-08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of

`vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawMultiEXT-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's **format features** do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawMultiEXT-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawMultiEXT-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawMultiEXT-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawMultiEXT-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawMultiEXT-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawMultiEXT-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles`

- VUID-vkCmdDrawMultiEXT-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound

graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-08918

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-imageView-06183

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingLocalRead-11797

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`

- VUID-vkCmdDrawMultiEXT-imageView-06184

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-multisampledRenderToSingleSampled-07285

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawMultiEXT-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawMultiEXT-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and

`vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawMultiEXT-pNext-07935

If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDrawMultiEXT-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDrawMultiEXT-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-pDepthAttachment-11540

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the

`VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawMultiEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawMultiEXT-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawMultiEXT-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawMultiEXT-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawMultiEXT-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current

value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line or point topology class, then the current value of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawMultiEXT-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated`

in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawMultiEXT-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

[VK\\_DYNAMIC\\_STATE\\_DEPTH\\_CLIP\\_NEGATIVE\\_ONE\\_TO\\_ONE\\_EXT](#) dynamic state enabled, then [vkCmdSetDepthClipNegativeOneToOneEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-09650

If the [depthClampControl](#) feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_CLAMP\\_RANGE\\_EXT](#) dynamic state enabled, and the [current value](#) of [depthClampEnable](#) is [VK\\_TRUE](#), then [vkCmdSetDepthClampRangeEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-rasterizationSamples-07471

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the [rasterizationSamples](#) in the last call to [vkCmdSetRasterizationSamplesEXT](#) **must** follow the rules for a [zero-attachment subpass](#)

- VUID-vkCmdDrawMultiEXT-samples-07472

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_SAMPLE\\_MASK\\_EXT](#) state enabled and the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) state disabled, then the [samples](#) parameter in the last call to [vkCmdSetSampleMaskEXT](#) **must** be greater or equal to the [VkPipelineMultisampleStateCreateInfo::rasterizationSamples](#) parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawMultiEXT-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_SAMPLE\\_MASK\\_EXT](#) state and [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) states enabled, then the [samples](#) parameter in the last call to [vkCmdSetSampleMaskEXT](#) **must** be greater or equal to the [rasterizationSamples](#) parameter in the last call to [vkCmdSetRasterizationSamplesEXT](#)

- VUID-vkCmdDrawMultiEXT-None-09211

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a [VkMultisampledRenderToSingleSampledInfoEXT](#) structure with [multisampledRenderToSingleSampledEnable](#) equal to [VK\\_TRUE](#), then the [rasterizationSamples](#) in the last call to [vkCmdSetRasterizationSamplesEXT](#) **must** be the same as the [rasterizationSamples](#) member of that structure

- VUID-vkCmdDrawMultiEXT-firstAttachment-07476

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound was created with the [VK\\_DYNAMIC\\_STATE\\_COLOR\\_BLEND\\_ENABLE\\_EXT](#) dynamic states enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then the last call to [vkCmdSetColorBlendEnableEXT](#) in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawMultiEXT-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawMultiEXT-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawMultiEXT-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawMultiEXT-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawMultiEXT-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawMultiEXT-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawMultiEXT-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMultiEXT-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07497  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled
- VUID-vkCmdDrawMultiEXT-stippledLineEnable-07498  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`
- VUID-vkCmdDrawMultiEXT-stage-07073  
If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active
- VUID-vkCmdDrawMultiEXT-None-08877  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiEXT-nextStage-10745  
For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline
- VUID-vkCmdDrawMultiEXT-None-08684  
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`
- VUID-vkCmdDrawMultiEXT-None-08685  
If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`
- VUID-vkCmdDrawMultiEXT-None-08686  
If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`
- VUID-vkCmdDrawMultiEXT-None-08687

If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`

- VUID-vkCmdDrawMultiEXT-None-08688

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- VUID-vkCmdDrawMultiEXT-None-08689

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-08690

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-08693

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound

- VUID-vkCmdDrawMultiEXT-None-08696

If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage

- VUID-vkCmdDrawMultiEXT-None-08698

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound

- VUID-vkCmdDrawMultiEXT-None-08699

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound

- VUID-vkCmdDrawMultiEXT-None-08878

All bound graphics shader objects **must** have been created with identical or `identically defined` push constant ranges

- VUID-vkCmdDrawMultiEXT-None-08879

All bound graphics shader objects **must** have either been created with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag set, or with identical or `identically defined` arrays of descriptor set layouts

- VUID-vkCmdDrawMultiEXT-pDynamicStates-08715

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics

pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawMultiEXT-pDynamicStates-08716

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be 0

- VUID-vkCmdDrawMultiEXT-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them

- VUID-vkCmdDrawMultiEXT-maxFragmentDualSrcAttachments-09239

If `blending` is enabled for any attachment where either the source or destination blend factors for that attachment [use the secondary color input](#), the maximum value of `Location` for any output attachment [statically used](#) in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`

- VUID-vkCmdDrawMultiEXT-None-09548

If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawMultiEXT-None-09549

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is [statically used](#) in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawMultiEXT-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is [statically used](#) in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawMultiEXT-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawMultiEXT-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDrawMultiEXT-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawMultiEXT-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if *sample shading* is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawMultiEXT-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawMultiEXT-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawMultiEXT-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawMultiEXT-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawMultiEXT-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawMultiEXT-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawMultiEXT-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a

custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawMultiEXT-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiEXT-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawMultiEXT-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawMultiEXT-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the

sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawMultiEXT-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawMultiEXT-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawMultiEXT-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawMultiEXT-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawMultiEXT-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawMultiEXT-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawMultiEXT-commandBuffer-02712

If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, any resource written to by the `VkPipeline` object bound to the pipeline bind point used by this command **must** not be an unprotected resource

- VUID-vkCmdDrawMultiEXT-commandBuffer-02713

If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported,

pipeline stages other than the framebuffer-space and compute stages in the `VkPipeline` object bound to the pipeline bind point used by this command **must** not write to any resource

- VUID-vkCmdDrawMultiEXT-commandBuffer-04617

If any of the shader stages of the `VkPipeline` bound to the pipeline bind point used by this command uses the `RayQueryKHR` capability, then `commandBuffer` **must** not be a protected command buffer

- VUID-vkCmdDrawMultiEXT-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound

- VUID-vkCmdDrawMultiEXT-None-04008

If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`

- VUID-vkCmdDrawMultiEXT-None-02721

If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDrawMultiEXT-format-10389

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`

- VUID-vkCmdDrawMultiEXT-format-10390

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`

- VUID-vkCmdDrawMultiEXT-None-07842

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter

of `vkCmdSetPrimitiveTopology` **must** be of the same `topology` class as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- VUID-vkCmdDrawMultiEXT-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the **current value** of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDrawMultiEXT-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound

- VUID-vkCmdDrawMultiEXT-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the **Vertex Execution Model** **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawMultiEXT-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this draw command

- VUID-vkCmdDrawMultiEXT-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently **invalidated** in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawMultiEXT-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this draw command

- VUID-vkCmdDrawMultiEXT-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the **Vertex Execution Model** `OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawMultiEXT-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the

bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `LegacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDrawMultiEXT-format-08936

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDrawMultiEXT-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDrawMultiEXT-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawMultiEXT-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the `current value` of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`,

VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST,  
VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST\_WITH\_ADJACENCY, or  
VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST\_WITH\_ADJACENCY, there is a shader object bound to the VK\_SHADER\_STAGE\_VERTEX\_BIT stage or the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK\_FALSE

- VUID-vkCmdDrawMultiEXT-None-10909

If the primitiveTopologyPatchListRestart feature is not enabled, the input assembly is VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST, there is a shader object bound to the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT stage or the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK\_FALSE

- VUID-vkCmdDrawMultiEXT-stage-06481

The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::stage member of any element of VkGraphicsPipelineCreateInfo::pStages set to VK\_SHADER\_STAGE\_TASK\_BIT\_EXT or VK\_SHADER\_STAGE\_MESH\_BIT\_EXT

- VUID-vkCmdDrawMultiEXT-None-08885

There **must** be no shader object bound to either of the VK\_SHADER\_STAGE\_TASK\_BIT\_EXT or VK\_SHADER\_STAGE\_MESH\_BIT\_EXT stages

- VUID-vkCmdDrawMultiEXT-None-07619

If a shader object is bound to the VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stage or a graphics pipeline is bound which was created with both a VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stage and the VK\_DYNAMIC\_STATE\_TESSELLATION\_DOMAIN\_ORIGIN\_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12239

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12240

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12241

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawMultiEXT-OpExecutionMode-12242

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawMultiEXT-pNext-09461

If the bound graphics pipeline state was created with `VkPipelineVertexInputDivisorStateCreateInfo` in the `pNext` chain of `VkGraphicsPipelineCreateInfo::pVertexInputState`, any member of `VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors` has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawMultiEXT-None-09462

If `shader objects` are used for drawing or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the `vkCmdSetVertexInputEXT` call that sets this dynamic state has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawMultiEXT-None-04933

The `multiDraw` feature **must** be enabled

- VUID-vkCmdDrawMultiEXT-drawCount-04934

`drawCount` **must** be less than `VkPhysicalDeviceMultiDrawPropertiesEXT::maxMultiDrawCount`

- VUID-vkCmdDrawMultiEXT-drawCount-04935

If `drawCount` is greater than zero, `pVertexInfo` **must** be a valid pointer to memory containing one or more valid instances of `VkMultiDrawInfoEXT` structures

- VUID-vkCmdDrawMultiEXT-drawCount-09628

If `drawCount` is greater than `1`, `stride` **must** be a multiple of `4` and **must** be greater than or equal to `sizeof(VkMultiDrawInfoEXT)`

## Valid Usage (Implicit)

- VUID-vkCmdDrawMultiEXT-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle

- VUID-vkCmdDrawMultiEXT-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`

- VUID-vkCmdDrawMultiEXT-commandBuffer-cmdpool

The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations

- VUID-vkCmdDrawMultiEXT-renderpass

This command **must** only be called inside of a render pass instance

- VUID-vkCmdDrawMultiEXT-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdDrawMultiEXT-videocoding

This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types             | Command Type |
|-----------------------|-------------------|--------------------|-----------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS_BIT<br>HICS_BIT | Action       |

## Conditional Rendering

`vkCmdDrawMultiEXT` is affected by [conditional rendering](#)

To record an ordered sequence of indexed draws which have no state changes between them, call:

```
// Provided by VK_EXT_multi_draw
void vkCmdDrawMultiIndexedEXT(
    VkCommandBuffer                commandBuffer,
    uint32_t                       drawCount,
    const VkMultiDrawIndexedInfoEXT* pIndexInfo,
    uint32_t                       instanceCount,
    uint32_t                       firstInstance,
    uint32_t                       stride,
    const int32_t*                  pVertexOffset);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `drawCount` is the number of draws to execute, and **can** be zero.
- `pIndexInfo` is a pointer to an array of `VkMultiDrawIndexedInfoEXT` with index information to be drawn.
- `instanceCount` is the number of instances per draw.
- `firstInstance` is the instance ID of the first instance in each draw.
- `stride` is the byte stride between consecutive elements of `pIndexInfo`.
- `pVertexOffset` is `NULL` or a pointer to the value added to the vertex index before indexing into the vertex buffer. When specified, `VkMultiDrawIndexedInfoEXT::offset` is ignored.

The number of draws recorded is `drawCount`, with each draw reading, sequentially, a `firstIndex` and an `indexCount` from `pIndexInfo`. For each recorded draw, primitives are assembled as for

`vkCmdDrawIndexed`, and drawn `instanceCount` times with `instanceIndex` starting with `firstInstance` and sequentially for each instance. If `pVertexOffset` is `NULL`, a `vertexOffset` is also read from `pIndexInfo`, otherwise the value from dereferencing `pVertexOffset` is used.

## Valid Usage

- VUID-vkCmdDrawMultiIndexedEXT-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-08600  
If a `bound shader` was created with a pipeline layout and statically uses a set `n`, a descriptor set **must** have been bound to `n` at the same pipeline bind point, with layouts compatible for set `n` with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02707  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource
- VUID-vkCmdDrawMultiIndexedEXT-None-08114  
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawMultiIndexedEXT-None-08115  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawMultiIndexedEXT-None-08116  
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawMultiIndexedEXT-None-08117  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawMultiIndexedEXT-None-08119  
If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident
- VUID-vkCmdDrawMultiIndexedEXT-magFilter-04553  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and

`compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawMultiIndexedEXT-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawMultiIndexedEXT-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawMultiIndexedEXT-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawMultiIndexedEXT-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then

the image view's format features **must** contain  
`VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-07888

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-02692

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- VUID-vkCmdDrawMultiIndexedEXT-None-02693

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`

- VUID-vkCmdDrawMultiIndexedEXT-filterCubic-02694

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawMultiIndexedEXT-filterCubicMinmax-02695

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07027

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07028

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07029

For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07030

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08601

If a [a bound shader](#) was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDrawMultiIndexedEXT-None-10068

For each array of resources that is used by a [a bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawMultiIndexedEXT-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawMultiIndexedEXT-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawMultiIndexedEXT-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiIndexedEXT-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiIndexedEXT-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiIndexedEXT-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMultiIndexedEXT-viewType-07752  
If a [VkImageView](#) is accessed as a result of this command, then the image view's **viewType** **must** match the **Dim** operand of the **OpTypeImage** as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)
- VUID-vkCmdDrawMultiIndexedEXT-format-07753  
If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the **numeric type** of the view's **format** and the **Sampled Type** operand of the **OpTypeImage** **must** match
- VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-08795  
If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-08796  
If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have four components
- VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-04469  
If a [VkBufferView](#) is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04470  
If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04471  
If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04472  
If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64
- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04473  
If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32
- VUID-vkCmdDrawMultiIndexedEXT-sparseImageInt64Atomics-04474  
If the **sparseImageInt64Atomics** feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an **OpTypeImage** with a **SampledType** with a **Width** of 64 by this command
- VUID-vkCmdDrawMultiIndexedEXT-sparseImageInt64Atomics-04475  
If the **sparseImageInt64Atomics** feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic

instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command

- VUID-vkCmdDrawMultiIndexedEXT-None-07288  
Any shader invocation executed by this command **must terminate**
- VUID-vkCmdDrawMultiIndexedEXT-None-09600  
If a descriptor with type equal to any of `VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE`, `VK_DESCRIPTOR_TYPE_STORAGE_IMAGE`, or `VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT` is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawMultiIndexedEXT-micromap-11636  
If an acceleration structure is accessed as a result of this command through an `OpRayQueryProceedKHR` operation, the `VK_EXT_opacity_micromap` extension is not enabled, and the acceleration structure is built using geometry with a `VkAccelerationStructureTrianglesOpacityMicromapKHR` structure included in its `pNext` chain, the shader **must** have specified a `OpacityMicromapIdKHR` execution mode with its specialization constant operand equal to `VK_TRUE`
- VUID-vkCmdDrawMultiIndexedEXT-micromap-11637  
If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device
- VUID-vkCmdDrawMultiIndexedEXT-micromap-11638  
If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkPipeline` bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes `VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR`
- VUID-vkCmdDrawMultiIndexedEXT-micromap-11639  
If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkShaderEXT` that accessed the descriptor **must** not have been created with `flags` that includes `VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT`
- VUID-vkCmdDrawMultiIndexedEXT-None-12472  
Descriptors dynamically accessed in bound descriptor heaps **must** be valid
- VUID-vkCmdDrawMultiIndexedEXT-None-11297  
If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`,

VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_SHADER\_RECORD\_INDEX\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_ARRAY\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawMultiIndexedEXT-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDrawMultiIndexedEXT-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawMultiIndexedEXT-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawMultiIndexedEXT-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawMultiIndexedEXT-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress`

- VUID-vkCmdDrawMultiIndexedEXT-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawMultiIndexedEXT-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawMultiIndexedEXT-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawMultiIndexedEXT-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawMultiIndexedEXT-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawMultiIndexedEXT-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawMultiIndexedEXT-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawMultiIndexedEXT-None-11374

If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by `VkDeviceAddressRangeKHR` when the descriptor was written

- VUID-vkCmdDrawMultiIndexedEXT-pBindInfo-11375

If any `bound shader` uses an embedded sampler via a `descriptor mapping`, the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawMultiIndexedEXT-None-11376

If a `bound shader` was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDrawMultiIndexedEXT-None-11398

If a `bound shader` was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be `out of bounds`

- VUID-vkCmdDrawMultiIndexedEXT-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawMultiIndexedEXT-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawMultiIndexedEXT-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping`

using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_RESOURCE\\_HEAP\\_DATA\\_EXT](#) and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to [minUniformBufferOffsetAlignment](#)

- VUID-vkCmdDrawMultiIndexedEXT-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawMultiIndexedEXT-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to [minStorageBufferOffsetAlignment](#)

- VUID-vkCmdDrawMultiIndexedEXT-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDrawMultiIndexedEXT-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawMultiIndexedEXT-protectedNoFault-11455

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), the address that the

resource is mapped to **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawMultiIndexedEXT-protectedNoFault-11456

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, the address of the indirect memory **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawMultiIndexedEXT-renderPass-02684

The current render pass **must** be `compatible` with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawMultiIndexedEXT-subpass-02685

The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07468

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawMultiIndexedEXT-None-07469

Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments[InputAttachmentIndex]` in the bound `VkFramebuffer` as specified by `Fragment Input Attachment Compatibility`

- VUID-vkCmdDrawMultiIndexedEXT-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`

- VUID-vkCmdDrawMultiIndexedEXT-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`

- VUID-vkCmdDrawMultiIndexedEXT-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawMultiIndexedEXT-None-06537  
Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-10797  
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-12338  
If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-12339  
If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-12340  
If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-09003  
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawMultiIndexedEXT-None-06886  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled
- VUID-vkCmdDrawMultiIndexedEXT-None-06887  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)

- VUID-vkCmdDrawMultiIndexedEXT-None-07831

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07832

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `effective rasterization input topology` is in the line topology class, then `vkCmdSetLineWidth` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBiasEnable` is `VK_TRUE`, then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07835

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment `current value` of `blendEnable` is `VK_TRUE` with a blend equations where any `VkBlendFactor` member is `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, then `vkCmdSetBlendConstants` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBoundsTestEnable` is `VK_TRUE`, then `vkCmdSetDepthBounds` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value`

of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawMultiIndexedEXT-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently `invalidated` in the current command buffer prior

to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not

subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic state enabled, then **vkCmdSetViewportWithCount** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_SCISSOR\_WITH\_COUNT** dynamic state enabled, then **vkCmdSetScissorWithCount** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing

- VUID-vkCmdDrawMultiIndexedEXT-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the **VK\_DYNAMIC\_STATE\_SCISSOR\_WITH\_COUNT** and **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic states enabled, then the **viewportCount** parameter of **vkCmdSetViewportWithCount** **must** match the **scissorCount** parameter of **vkCmdSetScissorWithCount**

- VUID-vkCmdDrawMultiIndexedEXT-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_RASTERIZER\_DISCARD\_ENABLE** dynamic state enabled, then **vkCmdSetRasterizerDiscardEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS\_ENABLE** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, then **vkCmdSetDepthBiasEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-logicOp-04878

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LOGIC\_OP\_EXT** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **logicOpEnable** is **VK\_TRUE**, then **vkCmdSetLogicOpEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-primitiveFragmentShadingRateWithMultipleViewports-04552

If the **primitiveFragmentShadingRateWithMultipleViewports** limit is not supported, the bound graphics pipeline was created with the **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the **PrimitiveShadingRateKHR** built-in, then **vkCmdSetViewportWithCount** **must** have been called in the current command buffer prior to this drawing command, and the **viewportCount** parameter of **vkCmdSetViewportWithCount** **must** be 1

- VUID-vkCmdDrawMultiIndexedEXT-

primitiveFragmentShadingRateWithMultipleViewports-08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawMultiIndexedEXT-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's **format features** do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawMultiIndexedEXT-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawMultiIndexedEXT-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawMultiIndexedEXT-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawMultiIndexedEXT-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render

pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawMultiIndexedEXT-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawMultiIndexedEXT-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is

VK\_TRUE, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles`

- VUID-vkCmdDrawMultiIndexedEXT-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08917  
If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08918  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawMultiIndexedEXT-imageView-06183  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`
- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingLocalRead-11797  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`
- VUID-vkCmdDrawMultiIndexedEXT-imageView-06184  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`
- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07285  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline
- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07286  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance,

and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawMultiIndexedEXT-pNext-07935

If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDrawMultiIndexedEXT-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDrawMultiIndexedEXT-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-pDepthAttachment-11540  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawMultiIndexedEXT-pStencilAttachment-08965  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawMultiIndexedEXT-pStencilAttachment-11860  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawMultiIndexedEXT-flags-10582  
If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set
- VUID-vkCmdDrawMultiIndexedEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708  
If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled
- VUID-vkCmdDrawMultiIndexedEXT-primitivesGeneratedQueryWithNonZeroStreams-06709  
If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`
- VUID-vkCmdDrawMultiIndexedEXT-None-07620  
If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawMultiIndexedEXT-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawMultiIndexedEXT-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawMultiIndexedEXT-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled,

and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in

the line or point topology class, then the **current value** of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawMultiIndexedEXT-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **effective rasterization input topology** is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **effective rasterization input topology** is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the **effective rasterization input topology** is in the line topology class, and

the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawMultiIndexedEXT-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current` value of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDrawMultiIndexedEXT-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawMultiIndexedEXT-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiIndexedEXT-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawMultiIndexedEXT-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawMultiIndexedEXT-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawMultiIndexedEXT-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawMultiIndexedEXT-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawMultiIndexedEXT-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the

`VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the

`stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawMultiIndexedEXT-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active

- VUID-vkCmdDrawMultiIndexedEXT-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawMultiIndexedEXT-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08686

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08687

If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08688

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08689

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08690

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08693

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound

- VUID-vkCmdDrawMultiIndexedEXT-None-08696

If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage

- VUID-vkCmdDrawMultiIndexedEXT-None-08698

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound

- VUID-vkCmdDrawMultiIndexedEXT-None-08699

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound

- VUID-vkCmdDrawMultiIndexedEXT-None-08878

All bound graphics shader objects **must** have been created with identical or **identically defined** push constant ranges

- VUID-vkCmdDrawMultiIndexedEXT-None-08879

All bound graphics shader objects **must** have either been created with the **VK\_SHADER\_CREATE\_DESCRIPTOR\_HEAP\_BIT\_EXT** flag set, or with identical or **identically defined** arrays of descriptor set layouts

- VUID-vkCmdDrawMultiIndexedEXT-pDynamicStates-08715

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_WRITE\_ENABLE** dynamic state enabled, and the fragment shader declares the **EarlyFragmentTests** execution mode and uses **OpDepthAttachmentReadEXT**, the **depthWriteEnable** parameter in the last call to **vkCmdSetDepthWriteEnable** **must** be **VK\_FALSE**

- VUID-vkCmdDrawMultiIndexedEXT-pDynamicStates-08716

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_WRITE\_MASK** dynamic state enabled, and the fragment shader declares the **EarlyFragmentTests** execution mode and uses **OpStencilAttachmentReadEXT**, the **writeMask** parameter in the last call to **vkCmdSetStencilWriteMask** **must** be **0**

- VUID-vkCmdDrawMultiIndexedEXT-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with **VK\_DYNAMIC\_STATE\_COLOR\_WRITE\_MASK\_EXT**, and the format of any color attachment is **VK\_FORMAT\_E5B9G9R9\_UFLOAT\_PACK32**, the corresponding element of the **pColorWriteMasks** parameter of **vkCmdSetColorWriteMaskEXT** **must** either include all of **VK\_COLOR\_COMPONENT\_R\_BIT**, **VK\_COLOR\_COMPONENT\_G\_BIT**, **VK\_COLOR\_COMPONENT\_B\_BIT**, and **VK\_COLOR\_COMPONENT\_A\_BIT**, or none of them

- VUID-vkCmdDrawMultiIndexedEXT-maxFragmentDualSrcAttachments-09239

If **blending** is enabled for any attachment where either the source or destination blend factors for that attachment **use the secondary color input**, the maximum value of **Location** for any output attachment **statically used** in the **Fragment Execution Model** executed by this command **must** be less than **maxFragmentDualSrcAttachments**

- VUID-vkCmdDrawMultiIndexedEXT-None-09548

If the current render pass was begun with **vkCmdBeginRendering**, there is no shader object bound to any graphics stage, the value of each element of **VkRenderingAttachmentLocationInfo::pColorAttachmentLocations** in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawMultiIndexedEXT-None-09549

If the current render pass was begun with **vkCmdBeginRendering**, and there is no shader object bound to any graphics stage, for each element of **VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices** in the bound pipeline, if either **pColorAttachmentInputIndices[i]** or the value for the corresponding index set currently in the current render pass instance is **statically used** in the bound pipeline in an **InputAttachmentIndex** decoration, the two values **must** match

- VUID-vkCmdDrawMultiIndexedEXT-None-10927  
If the current render pass was begun with [vkCmdBeginRendering](#), and there is no shader object bound to any graphics stage, if either the value of [VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex](#) in the bound pipeline or the corresponding value set currently in the current render pass instance is [statically used](#) in the bound pipeline in an [InputAttachmentIndex](#) decoration, the two values **must** match
- VUID-vkCmdDrawMultiIndexedEXT-None-10928  
If the current render pass was begun with [vkCmdBeginRendering](#), and there is no shader object bound to any graphics stage, if either the value of [VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex](#) in the bound pipeline or the corresponding value set currently in the current render pass instance is [statically used](#) in the bound pipeline in an [InputAttachmentIndex](#) decoration, the two values **must** match
- VUID-vkCmdDrawMultiIndexedEXT-None-09642  
If the current render pass was begun with [vkCmdBeginRendering](#) with the [VK\\_RENDERING\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#) flag, the bound graphics pipeline **must** have been created with [VK\\_PIPELINE\\_CREATE\\_2\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#)
- VUID-vkCmdDrawMultiIndexedEXT-None-09643  
If the bound graphics pipeline was created with [VK\\_PIPELINE\\_CREATE\\_2\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#), the current render pass **must** have begun with [vkCmdBeginRendering](#) with the [VK\\_RENDERING\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#) flag
- VUID-vkCmdDrawMultiIndexedEXT-None-10772  
If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawMultiIndexedEXT-flags-11521  
If current render pass instance was begun with [vkCmdBeginRendering](#) with [VkRenderingInfo::flags](#) which includes [VK\\_RENDERING\\_FRAGMENT\\_REGION\\_BIT\\_EXT](#), and if [sample shading](#) is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawMultiIndexedEXT-None-11522  
If the current render pass instance was begun with [vkCmdBeginRendering](#) and contains a custom resolve, and the [dynamicRenderingUnusedAttachments](#) feature is not enabled, the graphics pipeline bound **must** have been created with a [VkCustomResolveCreateInfoEXT](#)
- VUID-vkCmdDrawMultiIndexedEXT-None-11523  
If the current render pass instance was begun with [vkCmdBeginRendering](#) and does not contain a custom resolve, and the [dynamicRenderingUnusedAttachments](#) feature is not enabled, the graphics pipeline bound **must** not have been created with a [VkCustomResolveCreateInfoEXT](#)
- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11524  
If the current render pass instance was begun with [vkCmdBeginRendering](#) and [vkCmdBeginCustomResolveEXT](#) has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with [VkCustomResolveCreateInfoEXT](#)

`::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawMultiIndexedEXT-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawMultiIndexedEXT-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawMultiIndexedEXT-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a

custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMultiIndexedEXT-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawMultiIndexedEXT-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the

value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawMultiIndexedEXT-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawMultiIndexedEXT-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawMultiIndexedEXT-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawMultiIndexedEXT-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawMultiIndexedEXT-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawMultiIndexedEXT-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02712  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, any resource written to by the `VkPipeline` object bound to the pipeline bind point used by this command **must** not be an unprotected resource
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02713  
If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported, pipeline stages other than the framebuffer-space and compute stages in the `VkPipeline` object bound to the pipeline bind point used by this command **must** not write to any resource
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-04617  
If any of the shader stages of the `VkPipeline` bound to the pipeline bind point used by this command uses the `RayQueryKHR` capability, then `commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawMultiIndexedEXT-None-04007  
All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound
- VUID-vkCmdDrawMultiIndexedEXT-None-04008  
If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`
- VUID-vkCmdDrawMultiIndexedEXT-None-02721  
If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)
- VUID-vkCmdDrawMultiIndexedEXT-format-10389  
For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`
- VUID-vkCmdDrawMultiIndexedEXT-format-10390  
For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`
- VUID-vkCmdDrawMultiIndexedEXT-None-07842  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then

`vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- VUID-vkCmdDrawMultiIndexedEXT-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current value` of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound

- VUID-vkCmdDrawMultiIndexedEXT-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawMultiIndexedEXT-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawMultiIndexedEXT-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawMultiIndexedEXT-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawMultiIndexedEXT-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created

with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawMultiIndexedEXT-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `LegacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDrawMultiIndexedEXT-format-08936

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDrawMultiIndexedEXT-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDrawMultiIndexedEXT-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawMultiIndexedEXT-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the current value of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawMultiIndexedEXT-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawMultiIndexedEXT-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawMultiIndexedEXT-None-08885

There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages

- VUID-vkCmdDrawMultiIndexedEXT-None-07619

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12239

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12240

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12241

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain

an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawMultiIndexedEXT-OpExecutionMode-12242

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawMultiIndexedEXT-None-07312

If the `maintenance6` feature is not enabled, a valid index buffer **must** be bound

- VUID-vkCmdDrawMultiIndexedEXT-primitiveRestartIndex-12401

If the primitive restart index for this draw operation was set with `vkCmdSetPrimitiveRestartIndexEXT`, then `primitiveRestartIndex` **must** not be greater than the maximum representable value for the bound `VkIndexType`

- VUID-vkCmdDrawMultiIndexedEXT-pNext-09461

If the bound graphics pipeline state was created with `VkPipelineVertexInputDivisorStateCreateInfo` in the `pNext` chain of `VkGraphicsPipelineCreateInfo::pVertexInputState`, any member of `VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors` has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawMultiIndexedEXT-None-09462

If `shader objects` are used for drawing or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the `vkCmdSetVertexInputEXT` call that sets this dynamic state has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-vkCmdDrawMultiIndexedEXT-robustBufferAccess2-08798

If the `robustBufferAccess2` feature is not enabled,  $(\text{indexSize} \times (\text{firstIndex} + \text{indexCount}))$  **must** be less than or equal to the size of the `bound index buffer range`, with `indexSize` being based on the type specified by `indexType`, and the other parameters sourced from this command

- VUID-vkCmdDrawMultiIndexedEXT-None-04937

The `multiDraw` feature **must** be enabled

- VUID-vkCmdDrawMultiIndexedEXT-drawCount-04939

`drawCount` **must** be less than `VkPhysicalDeviceMultiDrawPropertiesEXT::maxMultiDrawCount`

- VUID-vkCmdDrawMultiIndexedEXT-drawCount-04940

If `drawCount` is greater than zero, `pIndexInfo` **must** be a valid pointer to memory containing one or more valid instances of `VkMultiDrawIndexedInfoEXT` structures

- VUID-vkCmdDrawMultiIndexedEXT-drawCount-09629

If `drawCount` is greater than `1`, `stride` **must** be a multiple of `4` and **must** be greater than or equal to `sizeof(VkMultiDrawIndexedInfoEXT)`

## Valid Usage (Implicit)

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdDrawMultiIndexedEXT-pVertexOffset-parameter  
If `pVertexOffset` is not `NULL`, `pVertexOffset` **must** be a valid pointer to a valid `int32_t` value
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdDrawMultiIndexedEXT-renderpass  
This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawMultiIndexedEXT-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawMultiIndexedEXT-videocoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types             | Command Type |
|-----------------------|-------------------|--------------------|-----------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS_BIT<br>HICS_BIT | Action       |

## Conditional Rendering

`vkCmdDrawMultiIndexedEXT` is affected by [conditional rendering](#)

The `VkMultiDrawInfoEXT` structure is defined as:

```
// Provided by VK_EXT_multi_draw
typedef struct VkMultiDrawInfoEXT {
    uint32_t    firstVertex;
    uint32_t    vertexCount;
} VkMultiDrawInfoEXT;
```

- `firstVertex` is the first vertex to draw.
- `vertexCount` is the number of vertices to draw.

The members of `VkMultiDrawInfoEXT` have the same meaning as the `firstVertex` and `vertexCount` parameters in `vkCmdDraw`.

The `VkMultiDrawIndexedInfoEXT` structure is defined as:

```
// Provided by VK_EXT_multi_draw
typedef struct VkMultiDrawIndexedInfoEXT {
    uint32_t    firstIndex;
    uint32_t    indexCount;
    int32_t     vertexOffset;
} VkMultiDrawIndexedInfoEXT;
```

- `firstIndex` is the first index to draw.
- `indexCount` is the number of vertices to draw.
- `vertexOffset` is the value added to the vertex index before indexing into the vertex buffer for indexed multidraws.

The `firstIndex`, `indexCount`, and `vertexOffset` members of `VkMultiDrawIndexedInfoEXT` have the same meaning as the `firstIndex`, `indexCount`, and `vertexOffset` parameters, respectively, of `vkCmdDrawIndexed`.

`VkDrawIndirect2InfoKHR` is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkDrawIndirect2InfoKHR {
    VkStructureType    sType;
    const void*         pNext;
    VkStridedDeviceAddressRangeKHR    addressRange;
    VkAddressCommandFlagsKHR    addressFlags;
    uint32_t            drawCount;
} VkDrawIndirect2InfoKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `addressRange` is the `VkStridedDeviceAddressRangeKHR` containing draw parameters.
- `addressFlags` is a `VkAddressCommandFlagsKHR` value defining the flags for the address range.

- **drawCount** is the number of draws to execute, and **can** be zero.

## Valid Usage

- VUID-VkDrawIndirect2InfoKHR-addressRange-13097  
If the range specified by **addressRange** is not bound completely to memory when accessed, **addressFlags** **must** not include **VK\_ADDRESS\_COMMAND\_FULLY\_BOUND\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressRange-13098  
If the buffer from which the range specified by **addressRange** was created with **VK\_BUFFER\_CREATE\_PROTECTED\_BIT**, and **protectedNoFault** is not supported, **addressFlags** **must** include **VK\_ADDRESS\_COMMAND\_PROTECTED\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressRange-13099  
If the buffer from which the range specified by **addressRange** was created without **VK\_BUFFER\_CREATE\_PROTECTED\_BIT**, and **protectedNoFault** is not supported, **addressFlags** **must** not include **VK\_ADDRESS\_COMMAND\_PROTECTED\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressFlags-13100  
**addressFlags** **must** not include both **VK\_ADDRESS\_COMMAND\_STORAGE\_BUFFER\_USAGE\_BIT\_KHR** and **VK\_ADDRESS\_COMMAND\_UNKNOWN\_STORAGE\_BUFFER\_USAGE\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressRange-13122  
If any buffer, which is bound to a range of **VkDeviceMemory** that overlaps the range backing **addressRange**, was created with **VK\_BUFFER\_USAGE\_STORAGE\_BUFFER\_BIT**, **addressFlags** **must** include **VK\_ADDRESS\_COMMAND\_STORAGE\_BUFFER\_USAGE\_BIT\_KHR** or **VK\_ADDRESS\_COMMAND\_UNKNOWN\_STORAGE\_BUFFER\_USAGE\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressRange-13123  
If any buffer, which is bound to a range of **VkDeviceMemory** that overlaps the range backing **addressRange**, was created without **VK\_BUFFER\_USAGE\_STORAGE\_BUFFER\_BIT**, **addressFlags** **must** not include **VK\_ADDRESS\_COMMAND\_STORAGE\_BUFFER\_USAGE\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressFlags-13101  
**addressFlags** **must** not include both **VK\_ADDRESS\_COMMAND\_TRANSFORM\_FEEDBACK\_BUFFER\_USAGE\_BIT\_KHR** and **VK\_ADDRESS\_COMMAND\_UNKNOWN\_TRANSFORM\_FEEDBACK\_BUFFER\_USAGE\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressRange-13124  
If any buffer, which is bound to a range of **VkDeviceMemory** that overlaps the range backing **addressRange**, was created with **VK\_BUFFER\_USAGE\_TRANSFORM\_FEEDBACK\_BUFFER\_BIT\_EXT**, **addressFlags** **must** include **VK\_ADDRESS\_COMMAND\_TRANSFORM\_FEEDBACK\_BUFFER\_USAGE\_BIT\_KHR** or **VK\_ADDRESS\_COMMAND\_UNKNOWN\_TRANSFORM\_FEEDBACK\_BUFFER\_USAGE\_BIT\_KHR**
- VUID-VkDrawIndirect2InfoKHR-addressRange-13125  
If any buffer, which is bound to a range of **VkDeviceMemory** that overlaps the range backing **addressRange**, was created without

`VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirect2InfoKHR-addressRange-13107  
The buffer from which `addressRange` was queried **must** have been created with `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` usage flag
- VUID-VkDrawIndirect2InfoKHR-protectedNoFault-13108  
If `protectedNoFault` is not supported, the buffer from which `addressRange` was queried **must** not have been created with `VK_BUFFER_CREATE_PROTECTED_BIT`
- VUID-VkDrawIndirect2InfoKHR-addressRange-13109  
`addressRange.address` **must** be a multiple of 4
- VUID-VkDrawIndirect2InfoKHR-drawCount-02718  
If the `multiDrawIndirect` feature is not enabled, `drawCount` **must** be 0 or 1
- VUID-VkDrawIndirect2InfoKHR-drawCount-02719  
`drawCount` **must** be less than or equal to `VkPhysicalDeviceLimits::maxDrawIndirectCount`

### Valid Usage (Implicit)

- VUID-VkDrawIndirect2InfoKHR-sType-sType  
`sType` **must** be `VK_STRUCTURE_TYPE_DRAW_INDIRECT_2_INFO_KHR`
- VUID-VkDrawIndirect2InfoKHR-pNext-pNext  
`pNext` **must** be `NULL`
- VUID-VkDrawIndirect2InfoKHR-addressFlags-parameter  
If `addressFlags` is not 0, `addressFlags` **must** be a valid combination of `VkAddressCommandFlagBitsKHR` values

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdDrawIndirect2KHR(
    VkCommandBuffer          commandBuffer,
    const VkDrawIndirect2InfoKHR* pInfo);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `pInfo` is a pointer to a `VkDrawIndirect2InfoKHR` structure defining parameters of this command.

`vkCmdDrawIndirect2KHR` behaves similarly to `vkCmdDraw` except that the parameters are read by the device from an address range during execution. `pInfo->drawCount` draws are executed by the command, with parameters taken from `pInfo->addressRange` starting at `addressRange.address` and increasing by `addressRange.stride` bytes for each successive draw. The parameters of each draw are encoded in an array of `VkDrawIndirectCommand` structures.

## Valid Usage

- VUID-vkCmdDrawIndirect2KHR-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirect2KHR-None-08600  
If a `bound shader` was created with a pipeline layout and statically uses a set  $n$ , a descriptor set **must** have been bound to  $n$  at the same pipeline bind point, with layouts compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawIndirect2KHR-commandBuffer-02707  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource
- VUID-vkCmdDrawIndirect2KHR-None-08114  
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirect2KHR-None-08115  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirect2KHR-None-08116  
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirect2KHR-None-08117  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirect2KHR-None-08119  
If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirect2KHR-magFilter-04553  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`
- VUID-vkCmdDrawIndirect2KHR-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirect2KHR-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirect2KHR-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirect2KHR-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndirect2KHR-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawIndirect2KHR-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawIndirect2KHR-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndirect2KHR-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-07888

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic

operations as a result of this command, then the storage texel buffer's **format features must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-02692

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's **format features must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- VUID-vkCmdDrawIndirect2KHR-None-02693

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`

- VUID-vkCmdDrawIndirect2KHR-filterCubic-02694

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawIndirect2KHR-filterCubicMinmax-02695

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07027

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's **format features must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07028

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's **format features must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07029

For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's **buffer features must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07030

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's **buffer features must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-08601

If a `bound shader` was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are **compatible** with the push constant range used to create the shader

- VUID-vkCmdDrawIndirect2KHR-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndirect2KHR-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndirect2KHR-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndirect2KHR-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect2KHR-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect2KHR-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect2KHR-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect2KHR-viewType-07752

If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#) **must** match the [Dim](#) operand of the [OpTypeImage](#) as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndirect2KHR-format-07753  
If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the [numeric type](#) of the view's [format](#) and the [Sampled Type](#) operand of the [OpTypeImage](#) **must** match
- VUID-vkCmdDrawIndirect2KHR-OpImageWrite-08795  
If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirect2KHR-OpImageWrite-08796  
If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have four components
- VUID-vkCmdDrawIndirect2KHR-OpImageWrite-04469  
If a [VkBufferView](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndirect2KHR-SampledType-04470  
If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64
- VUID-vkCmdDrawIndirect2KHR-SampledType-04471  
If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32
- VUID-vkCmdDrawIndirect2KHR-SampledType-04472  
If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64
- VUID-vkCmdDrawIndirect2KHR-SampledType-04473  
If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32
- VUID-vkCmdDrawIndirect2KHR-sparseImageInt64Atomics-04474  
If the [sparseImageInt64Atomics](#) feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command
- VUID-vkCmdDrawIndirect2KHR-sparseImageInt64Atomics-04475  
If the [sparseImageInt64Atomics](#) feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command
- VUID-vkCmdDrawIndirect2KHR-None-07288  
Any shader invocation executed by this command **must terminate**

- VUID-vkCmdDrawIndirect2KHR-None-09600

If a descriptor with type equal to any of [VK\\_DESCRIPTOR\\_TYPE\\_SAMPLED\\_IMAGE](#), [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_IMAGE](#), or [VK\\_DESCRIPTOR\\_TYPE\\_INPUT\\_ATTACHMENT](#) is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndirect2KHR-micromap-11636

If an acceleration structure is accessed as a result of this command through an [OpRayQueryProceedKHR](#) operation, the [VK\\_EXT\\_opacity\\_micromap](#) extension is not enabled, and the acceleration structure is built using geometry with a [VkAccelerationStructureTrianglesOpacityMicromapKHR](#) structure included in its [pNext](#) chain, the shader **must** have specified a [OpacityMicromapIdKHR](#) execution mode with its specialization constant operand equal to [VK\\_TRUE](#)

- VUID-vkCmdDrawIndirect2KHR-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndirect2KHR-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkPipeline](#) bound to the pipeline bind point used by this command **must** not have been created with [flags](#) that includes [VK\\_PIPELINE\\_CREATE\\_2\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_KHR](#)

- VUID-vkCmdDrawIndirect2KHR-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkShaderEXT](#) that accessed the descriptor **must** not have been created with [flags](#) that includes [VK\\_SHADER\\_CREATE\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndirect2KHR-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndirect2KHR-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a [OpTypeStruct](#) decorated with [Block](#) or [BufferBlock](#) using that mapping, the

calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawIndirect2KHR-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDrawIndirect2KHR-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndirect2KHR-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndirect2KHR-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirect2KHR-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress`

- VUID-vkCmdDrawIndirect2KHR-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location

in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndirect2KHR-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirect2KHR-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndirect2KHR-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndirect2KHR-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndirect2KHR-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirect2KHR-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirect2KHR-None-11374

If the [robustBufferAccess2](#) feature is not enabled, the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or

storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirect2KHR-pBindInfo-11375

If any [bound shader](#) uses an embedded sampler via a [descriptor mapping](#), the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawIndirect2KHR-None-11376

If a [bound shader](#) was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDrawIndirect2KHR-None-11398

If a [bound shader](#) was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be [out of bounds](#)

- VUID-vkCmdDrawIndirect2KHR-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirect2KHR-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirect2KHR-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT` and a shader accesses

a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDrawIndirect2KHR-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirect2KHR-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndirect2KHR-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a `VkAccelerationStructureKHR` object via `vkGetAccelerationStructureDeviceAddressKHR`

- VUID-vkCmdDrawIndirect2KHR-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by `VkSamplerCustomBorderColorIndexCreateInfoEXT`, the value of `VkSamplerCustomBorderColorIndexCreateInfoEXT::index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndirect2KHR-protectedNoFault-11455

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, the address that the resource is mapped to **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndirect2KHR-protectedNoFault-11456

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, the address of the indirect memory **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndirect2KHR-renderPass-02684

The current render pass **must** be `compatible` with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawIndirect2KHR-subpass-02685

The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawIndirect2KHR-OpTypeImage-07468

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndirect2KHR-None-07469

Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound `VkFramebuffer` as specified by `Fragment Input Attachment Compatibility`

- VUID-vkCmdDrawIndirect2KHR-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`

- VUID-vkCmdDrawIndirect2KHR-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`

- VUID-vkCmdDrawIndirect2KHR-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawIndirect2KHR-None-06537

Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndirect2KHR-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect2KHR-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect2KHR-None-10797  
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect2KHR-None-12338  
If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect2KHR-None-12339  
If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect2KHR-None-12340  
If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect2KHR-None-09003  
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirect2KHR-None-06886  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled
- VUID-vkCmdDrawIndirect2KHR-None-06887  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)
- VUID-vkCmdDrawIndirect2KHR-None-07831  
If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_VIEWPORT](#) dynamic state enabled then [vkCmdSetViewport](#) **must**

have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07832

If the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_SCISSOR** dynamic state enabled then **vkCmdSetScissor** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_WIDTH** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineWidth** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBiasEnable** is **VK\_TRUE**, then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07835

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_BLEND\_CONSTANTS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and an active color attachment **current value** of **blendEnable** is **VK\_TRUE** with a blend equations where any **VkBlendFactor** member is **VK\_BLEND\_FACTOR\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_ALPHA**, or **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, then **vkCmdSetBlendConstants** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BOUNDS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBoundsTestEnable** is **VK\_TRUE**, then **vkCmdSetDepthBounds** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_COMPARE\_MASK** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **stencilTestEnable** is **VK\_TRUE**, then **vkCmdSetStencilCompareMask** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndirect2KHR-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing

- VUID-vkCmdDrawIndirect2KHR-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- VUID-vkCmdDrawIndirect2KHR-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in,

then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndirect2KHR-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's `format` `features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirect2KHR-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirect2KHR-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndirect2KHR-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndirect2KHR-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the

corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08911  
If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect2KHR-None-07749  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-attachmentCount-07750  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirect2KHR-None-07751  
If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`
- VUID-vkCmdDrawIndirect2KHR-rasterizerDiscardEnable-09236  
If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT`

`::maxDiscardRectangles`

- VUID-vkCmdDrawIndirect2KHR-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo`

`::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-08918

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-imageView-06183

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingLocalRead-11797

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`

- VUID-vkCmdDrawIndirect2KHR-imageView-06184

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

- VUID-vkCmdDrawIndirect2KHR-multisampledRenderToSingleSampled-07285

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndirect2KHR-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndirect2KHR-multisampledRenderToSingleSampled-07287  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawIndirect2KHR-pNext-07935  
If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`
- VUID-vkCmdDrawIndirect2KHR-renderPass-06198  
If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`
- VUID-vkCmdDrawIndirect2KHR-pColorAttachments-08963  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect2KHR-pColorAttachments-11539  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect2KHR-pDepthAttachment-08964  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect2KHR-pDepthAttachment-11540  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a

graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawIndirect2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndirect2KHR-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndirect2KHR-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndirect2KHR-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics

pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **effective rasterization input topology** is in the line or point topology class, then the **current value** of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawIndirect2KHR-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

`VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawIndirect2KHR-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current` value of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDrawIndirect2KHR-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirect2KHR-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect2KHR-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndirect2KHR-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the `current` value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing

command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirect2KHR-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirect2KHR-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndirect2KHR-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirect2KHR-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirect2KHR-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last

call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by

`vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect2KHR-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if

the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndirect2KHR-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndirect2KHR-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active

- VUID-vkCmdDrawIndirect2KHR-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndirect2KHR-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-08686

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled,

`vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-08687

If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-08688

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- VUID-vkCmdDrawIndirect2KHR-None-08689

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- VUID-vkCmdDrawIndirect2KHR-None-08690

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirect2KHR-None-08693

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound

- VUID-vkCmdDrawIndirect2KHR-None-08696

If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage

- VUID-vkCmdDrawIndirect2KHR-None-08698

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound

- VUID-vkCmdDrawIndirect2KHR-None-08699

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound

- VUID-vkCmdDrawIndirect2KHR-None-08878

All bound graphics shader objects **must** have been created with identical or `identically defined` push constant ranges

- VUID-vkCmdDrawIndirect2KHR-None-08879

All bound graphics shader objects **must** have either been created with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag set, or with identical or `identically`

defined arrays of descriptor set layouts

- VUID-vkCmdDrawIndirect2KHR-pDynamicStates-08715

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirect2KHR-pDynamicStates-08716

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be `0`

- VUID-vkCmdDrawIndirect2KHR-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them

- VUID-vkCmdDrawIndirect2KHR-maxFragmentDualSrcAttachments-09239

If `blending` is enabled for any attachment where either the source or destination blend factors for that attachment *use the secondary color input*, the maximum value of `Location` for any output attachment *statically used* in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`

- VUID-vkCmdDrawIndirect2KHR-None-09548

If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndirect2KHR-None-09549

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirect2KHR-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is

statically used in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirect2KHR-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is statically used in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirect2KHR-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDrawIndirect2KHR-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDrawIndirect2KHR-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawIndirect2KHR-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if *sample shading* is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndirect2KHR-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndirect2KHR-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndirect2KHR-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndirect2KHR-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render

pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndirect2KHR-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndirect2KHR-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirect2KHR-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo`

`::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect2KHR-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect2KHR-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndirect2KHR-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect2KHR-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`,

`vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect2KHR-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndirect2KHR-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndirect2KHR-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawIndirect2KHR-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndirect2KHR-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndirect2KHR-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirect2KHR-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound

- VUID-vkCmdDrawIndirect2KHR-None-04008  
If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`
- VUID-vkCmdDrawIndirect2KHR-None-02721  
If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)
- VUID-vkCmdDrawIndirect2KHR-format-10389  
For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`
- VUID-vkCmdDrawIndirect2KHR-format-10390  
For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`
- VUID-vkCmdDrawIndirect2KHR-None-07842  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-dynamicPrimitiveTopologyUnrestricted-07500  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state
- VUID-vkCmdDrawIndirect2KHR-primitiveTopology-10286  
If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current value` of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-primitiveTopology-10747  
If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound
- VUID-vkCmdDrawIndirect2KHR-primitiveTopology-10748  
If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to

`VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawIndirect2KHR-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirect2KHR-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawIndirect2KHR-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirect2KHR-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawIndirect2KHR-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDrawIndirect2KHR-format-08936

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar

width associated with all **Input** variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** be 64-bit

- VUID-vkCmdDrawIndirect2KHR-format-08937

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and the scalar width associated with a **Location** decorated **Input** variable in the **Vertex Execution Model OpEntryPoint** is 64-bit, then the corresponding **VkVertexInputAttributeDescription2EXT::format** **must** have a 64-bit component

- VUID-vkCmdDrawIndirect2KHR-None-09203

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and **VkVertexInputAttributeDescription2EXT::format** has a 64-bit component, then all **Input** variables at the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** not use components that are not present in the format

- VUID-vkCmdDrawIndirect2KHR-None-04875

If there is a shader object bound to the **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage or the bound graphics pipeline state was created with both a **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage and the **VK\_DYNAMIC\_STATE\_PATCH\_CONTROL\_POINTS\_EXT** dynamic state enabled, and the current value of **primitiveTopology** is **VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST**, then **vkCmdSetPatchControlPointsEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-04879

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE** dynamic state enabled then **vkCmdSetPrimitiveRestartEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect2KHR-None-09637

If the **primitiveTopologyListRestart** feature is not enabled, the **input assembly** is **VK\_PRIMITIVE\_TOPOLOGY\_POINT\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST\_WITH\_ADJACENCY**, or **VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST\_WITH\_ADJACENCY**, there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE** dynamic state enabled, then **vkCmdSetPrimitiveRestartEnable** **must** be **VK\_FALSE**

- VUID-vkCmdDrawIndirect2KHR-None-10909

If the **primitiveTopologyPatchListRestart** feature is not enabled, the **input assembly** is **VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST**, there is a shader object bound to the **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE** dynamic state enabled then **vkCmdSetPrimitiveRestartEnable** **must** be **VK\_FALSE**

- VUID-vkCmdDrawIndirect2KHR-stage-06481  
The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`
- VUID-vkCmdDrawIndirect2KHR-None-08885  
There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages
- VUID-vkCmdDrawIndirect2KHR-None-07619  
If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12239  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12240  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12241  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-OpExecutionMode-12242  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirect2KHR-pInfo-13110  
If `pInfo->drawCount` is greater than 0, `pInfo->addressRange.size` **must** be greater than or equal to  $(pInfo->drawCount - 1) \times pInfo->addressRange.stride + \text{sizeof}(\text{VkDrawIndirectCommand})$
- VUID-vkCmdDrawIndirect2KHR-pInfo-13111  
If `pInfo->drawCount` is greater than 1, `pInfo->addressRange.stride` **must** not be 0
- VUID-vkCmdDrawIndirect2KHR-pInfo-13112  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be greater than or equal to `sizeof(VkDrawIndirectCommand)`
- VUID-vkCmdDrawIndirect2KHR-pInfo-13113  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be a multiple of 4

- VUID-vkCmdDrawIndirect2KHR-commandBuffer-13057  
`commandBuffer` **must** not be a protected command buffer

### Valid Usage (Implicit)

- VUID-vkCmdDrawIndirect2KHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdDrawIndirect2KHR-pInfo-parameter  
`pInfo` **must** be a valid pointer to a valid `VkDrawIndirect2InfoKHR` structure
- VUID-vkCmdDrawIndirect2KHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdDrawIndirect2KHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdDrawIndirect2KHR-renderpass  
This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirect2KHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirect2KHR-videocoding  
This command **must** only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

### Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                              | Command Type |
|-----------------------|-------------------|--------------------|----------------------------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_VIDEO_CODING_BIT | Action       |

### Conditional Rendering

`vkCmdDrawIndirect2KHR` is affected by `conditional rendering`

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDrawIndirect(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 buffer,
    VkDeviceSize             offset,
    uint32_t                 drawCount,
    uint32_t                 stride);
```

- **commandBuffer** is the command buffer into which the command is recorded.
- **buffer** is the buffer containing draw parameters.
- **offset** is the byte offset into **buffer** where parameters begin.
- **drawCount** is the number of draws to execute, and **can** be zero.
- **stride** is the byte stride between successive sets of draw parameters.

**vkCmdDrawIndirect** behaves similarly to **vkCmdDraw** except that the parameters are read by the device from a buffer during execution. **drawCount** draws are executed by the command, with parameters taken from **buffer** starting at **offset** and increasing by **stride** bytes for each successive draw. The parameters of each draw are encoded in an array of **VkDrawIndirectCommand** structures. If **drawCount** is less than or equal to one, **stride** is ignored.

## Valid Usage

- VUID-vkCmdDrawIndirect-None-08606  
If the **shaderObject** feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirect-None-08600  
If a **bound shader** was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawIndirect-commandBuffer-02707  
If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported, any resource accessed by **bound shaders** **must** not be a protected resource
- VUID-vkCmdDrawIndirect-None-08114  
Descriptors in each bound descriptor set, specified via **vkCmdBindDescriptorSets**, **must** be valid if they are accessed as described by **descriptor validity** by the **VkPipeline** bound to the pipeline bind point used by this command and the bound **VkPipeline** was not created with **VK\_PIPELINE\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT**
- VUID-vkCmdDrawIndirect-None-08115  
If the descriptors used by the **VkPipeline** bound to the pipeline bind point were specified via **vkCmdBindDescriptorSets**, the bound **VkPipeline** **must** have been created without **VK\_PIPELINE\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT**
- VUID-vkCmdDrawIndirect-None-08116

Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndirect-None-08117

If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndirect-None-08119

If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident

- VUID-vkCmdDrawIndirect-magFilter-04553

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirect-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirect-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirect-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirect-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndirect-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be

VK\_IMAGE\_VIEW\_TYPE\_1D or VK\_IMAGE\_VIEW\_TYPE\_2D

- VUID-vkCmdDrawIndirect-None-08610

If a [VkSampler](#) created with [unnormalizedCoordinates](#) equal to [VK\\_TRUE](#) is used to sample a [VkImageView](#) as a result of this command, then the sampler **must** not be used with any of the SPIR-V [OpImageSample\\*](#) or [OpImageSparseSample\\*](#) instructions with [ImplicitLod](#), [Dref](#) or [Proj](#) in their name

- VUID-vkCmdDrawIndirect-None-08611

If a [VkSampler](#) created with [unnormalizedCoordinates](#) equal to [VK\\_TRUE](#) is used to sample a [VkImageView](#) as a result of this command, then the sampler **must** not be used with any of the SPIR-V [OpImageSample\\*](#) or [OpImageSparseSample\\*](#) instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndirect-None-06479

If a [VkImageView](#) is sampled with [depth comparison](#), the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_SAMPLED\\_IMAGE\\_DEPTH\\_COMPARISON\\_BIT](#)

- VUID-vkCmdDrawIndirect-None-02691

If a [VkImageView](#) is accessed using atomic operations as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_STORAGE\\_IMAGE\\_ATOMIC\\_BIT](#)

- VUID-vkCmdDrawIndirect-None-07888

If a [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_TEXEL\\_BUFFER](#) descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_STORAGE\\_TEXEL\\_BUFFER\\_ATOMIC\\_BIT](#)

- VUID-vkCmdDrawIndirect-None-02692

If a [VkImageView](#) is sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_CUBIC\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndirect-None-02693

If the [VK\\_EXT\\_filter\\_cubic](#) extension is not enabled and any [VkImageView](#) is sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command, it **must** not have a [VkImageViewType](#) of [VK\\_IMAGE\\_VIEW\\_TYPE\\_3D](#), [VK\\_IMAGE\\_VIEW\\_TYPE\\_CUBE](#), or [VK\\_IMAGE\\_VIEW\\_TYPE\\_CUBE\\_ARRAY](#)

- VUID-vkCmdDrawIndirect-filterCubic-02694

Any [VkImageView](#) being sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) as a result of this command **must** have a [VkImageViewType](#) and format that supports cubic filtering, as specified by [VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic](#) returned by [vkGetPhysicalDeviceImageFormatProperties2](#)

- VUID-vkCmdDrawIndirect-filterCubicMinmax-02695

Any [VkImageView](#) being sampled with [VK\\_FILTER\\_CUBIC\\_EXT](#) with a reduction mode of either [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MIN](#) or [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MAX](#) as a result of this command **must** have a [VkImageViewType](#) and format that supports cubic filtering together with minmax filtering, as specified by [VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax](#) returned by [vkGetPhysicalDeviceImageFormatProperties2](#)

- VUID-vkCmdDrawIndirect-OpTypeImage-07027

For any [VkImageView](#) being written as a storage image where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_WRITE\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndirect-OpTypeImage-07028

For any [VkImageView](#) being read as a storage image where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndirect-OpTypeImage-07029

For any [VkBufferView](#) being written as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#), the view's [buffer features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_WRITE\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndirect-OpTypeImage-07030

Any [VkBufferView](#) being read as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#) then the view's [buffer features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndirect-None-08601

If a [bound shader](#) was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDrawIndirect-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndirect-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndirect-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndirect-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect-None-08612

If the **robustBufferAccess** feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect-storageBuffers-06936

If any stage of the **VkPipeline** object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either **VK\_PIPELINE\_ROBUSTNESS\_BUFFER\_BEHAVIOR\_ROBUST\_BUFFER\_ACCESS** or **VK\_PIPELINE\_ROBUSTNESS\_BUFFER\_BEHAVIOR\_ROBUST\_BUFFER\_ACCESS\_2** for **storageBuffers**, and the **robustBufferAccess** feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect-None-08613

If the **robustBufferAccess** feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirect-viewType-07752

If a **VkImageView** is accessed as a result of this command, then the image view's **viewType** **must** match the **Dim** operand of the **OpTypeImage** as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndirect-format-07753

If a **VkImageView** or **VkBufferView** is accessed as a result of this command, then the **numeric type** of the view's **format** and the **Sampled Type** operand of the **OpTypeImage** **must** match

- VUID-vkCmdDrawIndirect-OpImageWrite-08795

If a **VkImageView** created with a format other than **VK\_FORMAT\_A8\_UNORM** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDrawIndirect-OpImageWrite-08796

If a **VkImageView** created with the format **VK\_FORMAT\_A8\_UNORM** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have four components

- VUID-vkCmdDrawIndirect-OpImageWrite-04469

If a **VkBufferView** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDrawIndirect-SampledType-04470

If a **VkImageView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64

- VUID-vkCmdDrawIndirect-SampledType-04471

If a **VkImageView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that

instruction **must** have a **Width** of 32

- VUID-vkCmdDrawIndirect-SampledType-04472

If a **VkBufferView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64

- VUID-vkCmdDrawIndirect-SampledType-04473

If a **VkBufferView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32

- VUID-vkCmdDrawIndirect-sparseImageInt64Atomics-04474

If the **sparseImageInt64Atomics** feature is not enabled, **VkImage** objects created with the **VK\_IMAGE\_CREATE\_SPARSE\_RESIDENCY\_BIT** flag **must** not be accessed by atomic instructions through an **OpTypeImage** with a **SampledType** with a **Width** of 64 by this command

- VUID-vkCmdDrawIndirect-sparseImageInt64Atomics-04475

If the **sparseImageInt64Atomics** feature is not enabled, **VkBuffer** objects created with the **VK\_BUFFER\_CREATE\_SPARSE\_RESIDENCY\_BIT** flag **must** not be accessed by atomic instructions through an **OpTypeImage** with a **SampledType** with a **Width** of 64 by this command

- VUID-vkCmdDrawIndirect-None-07288

Any shader invocation executed by this command **must** **terminate**

- VUID-vkCmdDrawIndirect-None-09600

If a descriptor with type equal to any of **VK\_DESCRIPTOR\_TYPE\_SAMPLED\_IMAGE**, **VK\_DESCRIPTOR\_TYPE\_STORAGE\_IMAGE**, or **VK\_DESCRIPTOR\_TYPE\_INPUT\_ATTACHMENT** is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndirect-micromap-11636

If an acceleration structure is accessed as a result of this command through an **OpRayQueryProceedKHR** operation, the **VK\_EXT\_opacity\_micromap** extension is not enabled, and the acceleration structure is built using geometry with a **VkAccelerationStructureTrianglesOpacityMicromapKHR** structure included in its **pNext** chain, the shader **must** have specified a **OpacityMicromapIdKHR** execution mode with its specialization constant operand equal to **VK\_TRUE**

- VUID-vkCmdDrawIndirect-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndirect-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an **indexBuffer** containing both

[VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkPipeline](#) bound to the pipeline bind point used by this command **must** not have been created with [flags](#) that includes [VK\\_PIPELINE\\_CREATE\\_2\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_KHR](#)

- VUID-vkCmdDrawIndirect-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkShaderEXT](#) that accessed the descriptor **must** not have been created with [flags](#) that includes [VK\\_SHADER\\_CREATE\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndirect-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndirect-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a [OpTypeStruct](#) decorated with [Block](#) or [BufferBlock](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [bufferDescriptorAlignment](#)

- VUID-vkCmdDrawIndirect-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeImage](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [imageDescriptorAlignment](#)

- VUID-vkCmdDrawIndirect-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeSampler](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the sampler heap **must** be a multiple of [samplerDescriptorAlignment](#)

- VUID-vkCmdDrawIndirect-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or

[VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndirect-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirect-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndirect-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndirect-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirect-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndirect-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndirect-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndirect-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirect-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirect-None-11374

If the [robustBufferAccess2](#) feature is not enabled, the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirect-pBindInfo-11375

If any [bound shader](#) uses an embedded sampler via a [descriptor mapping](#), the value of [pBindInfo->reservedRangeSize](#) set for [vkCmdBindSamplerHeapEXT](#) **must** be greater than or equal to [minSamplerHeapReservedRangeWithEmbedded](#)

- VUID-vkCmdDrawIndirect-None-11376

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, and that shader statically uses a push constant value, that value **must** have been set by [vkCmdPushDataEXT](#)

- VUID-vkCmdDrawIndirect-None-11398

If a [bound shader](#) was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_DATA\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_DATA\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_RESOURCE\\_HEAP\\_DATA\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the access **must** not be [out of bounds](#)

- VUID-vkCmdDrawIndirect-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#)

using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the [VK\\_BUFFER\\_USAGE\\_UNIFORM\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndirect-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_UNIFORM\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndirect-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to [minUniformBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndirect-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndirect-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to [minStorageBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndirect-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or

[VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDrawIndirect-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndirect-protectedNoFault-11455

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), the address that the resource is mapped to **must** have been queried from a buffer created without the [VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDrawIndirect-protectedNoFault-11456

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), the address of the indirect memory **must** have been queried from a buffer created without the [VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDrawIndirect-renderPass-02684

The current render pass **must** be [compatible](#) with the [renderPass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to [VK\\_PIPELINE\\_BIND\\_POINT\\_GRAPHICS](#)

- VUID-vkCmdDrawIndirect-subpass-02685

The subpass index of the current render pass **must** be equal to the [subpass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to [VK\\_PIPELINE\\_BIND\\_POINT\\_GRAPHICS](#)

- VUID-vkCmdDrawIndirect-OpTypeImage-07468

If any shader executed by this pipeline accesses an [OpTypeImage](#) variable with a [Dim](#) operand of [SubpassData](#), it **must** be decorated with an [InputAttachmentIndex](#) that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndirect-None-07469

Input attachment views accessed in a subpass **must** be created with the same [VkFormat](#) as the corresponding subpass definition, and be created with a [VkImageView](#) that is compatible with the attachment referenced by the subpass' [pInputAttachments](#) [[InputAttachmentIndex](#)] in the bound [VkFramebuffer](#) as specified by [Fragment Input](#)

## Attachment Compatibility

- VUID-vkCmdDrawIndirect-pDepthInputAttachmentIndex-09595  
Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`
- VUID-vkCmdDrawIndirect-pDepthInputAttachmentIndex-09596  
Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawIndirect-InputAttachmentIndex-09597  
If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`
- VUID-vkCmdDrawIndirect-None-06537  
Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect-None-10797  
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_STENCIL_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirect-None-12338  
If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirect-None-12339  
If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, the depth

attachment **must** not be written to by this command

- VUID-vkCmdDrawIndirect-None-12340

If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command

- VUID-vkCmdDrawIndirect-None-09003

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawIndirect-None-06886

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled

- VUID-vkCmdDrawIndirect-None-06887

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)

- VUID-vkCmdDrawIndirect-None-07831

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_VIEWPORT](#) dynamic state enabled then [vkCmdSetViewport](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07832

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_SCISSOR](#) dynamic state enabled then [vkCmdSetScissor](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_LINE\\_WIDTH](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and the [effective rasterization input topology](#) is in the line topology class, then [vkCmdSetLineWidth](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_BIAS](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and the [current value](#) of [depthBiasEnable](#) is [VK\\_TRUE](#), then [vkCmdSetDepthBias](#) or [vkCmdSetDepthBias2EXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07835

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_BLEND\\_CONSTANTS](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and an

active color attachment **current value** of **blendEnable** is **VK\_TRUE** with a blend equations where any **VkBlendFactor** member is **VK\_BLEND\_FACTOR\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, or **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_ALPHA**, then **vkCmdSetBlendConstants** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BOUNDS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBoundsTestEnable** is **VK\_TRUE**, then **vkCmdSetDepthBounds** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_COMPARE\_MASK** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **stencilTestEnable** is **VK\_TRUE**, then **vkCmdSetStencilCompareMask** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_WRITE\_MASK** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **stencilTestEnable** is **VK\_TRUE**, then **vkCmdSetStencilWriteMask** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_REFERENCE** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, the **current value** of **stencilTestEnable** is **VK\_TRUE**, then **vkCmdSetStencilReference** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to **VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex**

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-02689

If the bound graphics pipeline was created with **VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable** set to **VK\_TRUE**, then the active depth attachment **must** have been created with the **VK\_IMAGE\_CREATE\_SAMPLE\_LOCATIONS\_COMPATIBLE\_DEPTH\_BIT\_EXT** bit set

- VUID-vkCmdDrawIndirect-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07846  
If the **depthBounds** feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BOUNDS\_TEST\_ENABLE** dynamic state enabled, and the current value of **rasterizerDiscardEnable** is **VK\_FALSE**, then **vkCmdSetDepthBoundsTestEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07847  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_TEST\_ENABLE** dynamic state enabled, and the current value of **rasterizerDiscardEnable** is **VK\_FALSE**, then **vkCmdSetStencilTestEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-07848  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_OP** dynamic state enabled, the current value of **rasterizerDiscardEnable** is **VK\_FALSE**, the current value of **stencilTestEnable** is **VK\_TRUE**, then **vkCmdSetStencilOp** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-viewportCount-03417  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic state enabled, then **vkCmdSetViewportWithCount** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-scissorCount-03418  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_SCISSOR\_WITH\_COUNT** dynamic state enabled, then **vkCmdSetScissorWithCount** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing
- VUID-vkCmdDrawIndirect-viewportCount-03419  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the **VK\_DYNAMIC\_STATE\_SCISSOR\_WITH\_COUNT** and **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic states enabled, then the **viewportCount** parameter of **vkCmdSetViewportWithCount** **must** match the **scissorCount** parameter of **vkCmdSetScissorWithCount**
- VUID-vkCmdDrawIndirect-None-04876  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_RASTERIZER\_DISCARD\_ENABLE** dynamic state enabled, then **vkCmdSetRasterizerDiscardEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirect-None-04877  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS\_ENABLE** dynamic state enabled, and the current value of **rasterizerDiscardEnable** is **VK\_FALSE**, then **vkCmdSetDepthBiasEnable** **must** have been called and not subsequently **invalidated** in

the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndirect-primitiveFragmentShadingRateWithMultipleViewports-08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndirect-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding `current value` of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirect-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the `current value` of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirect-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndirect-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo`

::viewMask equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndirect-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawIndirect-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawIndirect-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles`

- VUID-vkCmdDrawIndirect-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of

`VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08918

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-imageView-06183

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- VUID-vkCmdDrawIndirect-dynamicRenderingLocalRead-11797

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`

- VUID-vkCmdDrawIndirect-imageView-06184  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`
- VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07285  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline
- VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07286  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`
- VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07287  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawIndirect-pNext-07935  
If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`
- VUID-vkCmdDrawIndirect-renderPass-06198  
If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`
- VUID-vkCmdDrawIndirect-pColorAttachments-08963  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-pColorAttachments-11539  
 If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect-pDepthAttachment-08964  
 If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect-pDepthAttachment-11540  
 If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect-pStencilAttachment-08965  
 If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect-pStencilAttachment-11860  
 If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect-flags-10582  
 If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set
- VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithRasterizerDiscard-06708  
 If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard`

**must** not be enabled

- VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndirect-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndirect-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndirect-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic

state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line or point topology class, then the current value of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawIndirect-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior

to this drawing command

- VUID-vkCmdDrawIndirect-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the `effective rasterization input topology` is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawIndirect-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current value` of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDrawIndirect-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirect-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was

created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndirect-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirect-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirect-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndirect-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirect-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the

current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirect-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndirect-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirect-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the

VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_EXT state enabled and the VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_ENABLE\_EXT state enabled, and if sampleLocationsEnable was VK\_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07486

If a shader object is bound to the VK\_SHADER\_STAGE\_FRAGMENT\_BIT stage, or the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_EXT state enabled and the VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_ENABLE\_EXT state enabled, and if sampleLocationsEnable was VK\_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.maxSampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07487

If a shader object is bound to the VK\_SHADER\_STAGE\_FRAGMENT\_BIT stage, or the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_ENABLE\_EXT state enabled, and if sampleLocationsEnable was VK\_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code **must** not statically use the extended instruction InterpolateAtSample

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_EXT state disabled and the VK\_DYNAMIC\_STATE\_RASTERIZATION\_SAMPLES\_EXT state enabled, and the current value of sampleLocationsEnable is VK\_TRUE, then sampleLocationsInfo.sampleLocationGridSize.width **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_EXT state disabled and the VK\_DYNAMIC\_STATE\_RASTERIZATION\_SAMPLES\_EXT state enabled, and the current value of sampleLocationsEnable is VK\_TRUE, then sampleLocationsInfo.sampleLocationGridSize.height **must** evenly divide VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirect-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndirect-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndirect-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndirect-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndirect-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries **must** not be active

- VUID-vkCmdDrawIndirect-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state

enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndirect-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndirect-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawIndirect-None-08686

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`

- VUID-vkCmdDrawIndirect-None-08687

If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`

- VUID-vkCmdDrawIndirect-None-08688

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- VUID-vkCmdDrawIndirect-None-08689

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- VUID-vkCmdDrawIndirect-None-08690

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirect-None-08693

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound

- VUID-vkCmdDrawIndirect-None-08696

If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the

[VK\\_SHADER\\_STAGE\\_TASK\\_BIT\\_EXT](#) stage or the [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#) stage

- VUID-vkCmdDrawIndirect-None-08698

If any graphics shader is bound which was created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag, then all shaders created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag in the same [vkCreateShadersEXT](#) call **must** also be bound

- VUID-vkCmdDrawIndirect-None-08699

If any graphics shader is bound which was created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag, any stages in between stages whose shaders which did not create a shader with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag as part of the same [vkCreateShadersEXT](#) call **must** not have any [VkShaderEXT](#) bound

- VUID-vkCmdDrawIndirect-None-08878

All bound graphics shader objects **must** have been created with identical or [identically defined](#) push constant ranges

- VUID-vkCmdDrawIndirect-None-08879

All bound graphics shader objects **must** have either been created with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag set, or with identical or [identically defined](#) arrays of descriptor set layouts

- VUID-vkCmdDrawIndirect-pDynamicStates-08715

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_WRITE\\_ENABLE](#) dynamic state enabled, and the fragment shader declares the [EarlyFragmentTests](#) execution mode and uses [OpDepthAttachmentReadEXT](#), the [depthWriteEnable](#) parameter in the last call to [vkCmdSetDepthWriteEnable](#) **must** be [VK\\_FALSE](#)

- VUID-vkCmdDrawIndirect-pDynamicStates-08716

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_STENCIL\\_WRITE\\_MASK](#) dynamic state enabled, and the fragment shader declares the [EarlyFragmentTests](#) execution mode and uses [OpStencilAttachmentReadEXT](#), the [writeMask](#) parameter in the last call to [vkCmdSetStencilWriteMask](#) **must** be 0

- VUID-vkCmdDrawIndirect-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with [VK\\_DYNAMIC\\_STATE\\_COLOR\\_WRITE\\_MASK\\_EXT](#), and the format of any color attachment is [VK\\_FORMAT\\_E5B9G9R9\\_UFLOAT\\_PACK32](#), the corresponding element of the [pColorWriteMasks](#) parameter of [vkCmdSetColorWriteMaskEXT](#) **must** either include all of [VK\\_COLOR\\_COMPONENT\\_R\\_BIT](#), [VK\\_COLOR\\_COMPONENT\\_G\\_BIT](#), [VK\\_COLOR\\_COMPONENT\\_B\\_BIT](#), and [VK\\_COLOR\\_COMPONENT\\_A\\_BIT](#), or none of them

- VUID-vkCmdDrawIndirect-maxFragmentDualSrcAttachments-09239

If [blending](#) is enabled for any attachment where either the source or destination blend factors for that attachment [use the secondary color input](#), the maximum value of [Location](#) for any output attachment [statically used](#) in the [Fragment Execution Model](#) executed by this command **must** be less than [maxFragmentDualSrcAttachments](#)

- VUID-vkCmdDrawIndirect-None-09548  
If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirect-None-09549  
If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match
- VUID-vkCmdDrawIndirect-None-10927  
If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match
- VUID-vkCmdDrawIndirect-None-10928  
If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match
- VUID-vkCmdDrawIndirect-None-09642  
If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`
- VUID-vkCmdDrawIndirect-None-09643  
If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag
- VUID-vkCmdDrawIndirect-None-10772  
If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndirect-flags-11521  
If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if **sample shading** is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndirect-None-11522  
If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`
- VUID-vkCmdDrawIndirect-None-11523  
If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`
- VUID-vkCmdDrawIndirect-customResolve-11524  
If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`
- VUID-vkCmdDrawIndirect-customResolve-11525  
If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`
- VUID-vkCmdDrawIndirect-None-11861  
If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`
- VUID-vkCmdDrawIndirect-None-11862  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than `0`, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirect-None-11863  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than `0`, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-11864  
If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than `0`, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to

`VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo`

`::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirect-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0 and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndirect-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndirect-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndirect-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndirect-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawIndirect-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndirect-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount`

not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndirect-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirect-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound

- VUID-vkCmdDrawIndirect-None-04008

If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndirect-None-02721

If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDrawIndirect-format-10389

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`

- VUID-vkCmdDrawIndirect-format-10390

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`

- VUID-vkCmdDrawIndirect-None-07842

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in

the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- VUID-vkCmdDrawIndirect-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current value` of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDrawIndirect-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound

- VUID-vkCmdDrawIndirect-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawIndirect-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirect-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawIndirect-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirect-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all

variables with the **Input** storage class decorated with **Location** in the **Vertex Execution Model OpEntryPoint** **must** contain a location in **VkVertexInputAttributeDescription2EXT::location**

- VUID-vkCmdDrawIndirect-Input-08734

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and either the **LegacyVertexAttributes** feature is not enabled or the SPIR-V Type associated with a given **Input** variable of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** is 64-bit, then the numeric type associated with all **Input** variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** be the same as **VkVertexInputAttributeDescription2EXT::format**

- VUID-vkCmdDrawIndirect-format-08936

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and **VkVertexInputAttributeDescription2EXT::format** has a 64-bit component, then the scalar width associated with all **Input** variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** be 64-bit

- VUID-vkCmdDrawIndirect-format-08937

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and the scalar width associated with a **Location** decorated **Input** variable in the **Vertex Execution Model OpEntryPoint** is 64-bit, then the corresponding **VkVertexInputAttributeDescription2EXT::format** **must** have a 64-bit component

- VUID-vkCmdDrawIndirect-None-09203

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and **VkVertexInputAttributeDescription2EXT::format** has a 64-bit component, then all **Input** variables at the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** not use components that are not present in the format

- VUID-vkCmdDrawIndirect-None-04875

If there is a shader object bound to the **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage or the bound graphics pipeline state was created with both a **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage and the **VK\_DYNAMIC\_STATE\_PATCH\_CONTROL\_POINTS\_EXT** dynamic state enabled, and the current value of **primitiveTopology** is **VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST**, then **vkCmdSetPatchControlPointsEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-04879

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE** dynamic state enabled then

`vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the **input assembly** is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirect-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the **input assembly** is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirect-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirect-None-08885

There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages

- VUID-vkCmdDrawIndirect-None-07619

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-OpExecutionMode-12239

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndirect-OpExecutionMode-12240

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndirect-OpExecutionMode-12241

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndirect-OpExecutionMode-12242  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndirect-buffer-02708  
If `buffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object
- VUID-vkCmdDrawIndirect-buffer-02709  
`buffer` **must** have been created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` usage flag set
- VUID-vkCmdDrawIndirect-offset-02710  
`offset` **must** be a multiple of 4
- VUID-vkCmdDrawIndirect-commandBuffer-02711  
`commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawIndirect-drawCount-02718  
If the `multiDrawIndirect` feature is not enabled, `drawCount` **must** be 0 or 1
- VUID-vkCmdDrawIndirect-drawCount-02719  
`drawCount` **must** be less than or equal to `VkPhysicalDeviceLimits::maxDrawIndirectCount`
- VUID-vkCmdDrawIndirect-drawCount-00476  
If `drawCount` is greater than 1, `stride` **must** be a multiple of 4 and **must** be greater than or equal to `sizeof(VkDrawIndirectCommand)`
- VUID-vkCmdDrawIndirect-drawCount-00487  
If `drawCount` is equal to 1,  $(offset + sizeof(VkDrawIndirectCommand))$  **must** be less than or equal to the size of `buffer`
- VUID-vkCmdDrawIndirect-drawCount-00488  
If `drawCount` is greater than 1,  $(stride \times (drawCount - 1) + offset + sizeof(VkDrawIndirectCommand))$  **must** be less than or equal to the size of `buffer`

### Valid Usage (Implicit)

- VUID-vkCmdDrawIndirect-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdDrawIndirect-buffer-parameter  
`buffer` **must** be a valid `VkBuffer` handle
- VUID-vkCmdDrawIndirect-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdDrawIndirect-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdDrawIndirect-renderpass  
This command **must** only be called inside of a render pass instance

- VUID-vkCmdDrawIndirect-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirect-vidcoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndirect-commonparent  
Both of **buffer**, and **commandBuffer** **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types     | Command Type |
|-----------------------|-------------------|--------------------|---------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAP<br>HICS_BIT | Action       |

## Conditional Rendering

vkCmdDrawIndirect is affected by [conditional rendering](#)

The **VkDrawIndirectCommand** structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkDrawIndirectCommand {
    uint32_t    vertexCount;
    uint32_t    instanceCount;
    uint32_t    firstVertex;
    uint32_t    firstInstance;
} VkDrawIndirectCommand;
```

- **vertexCount** is the number of vertices to draw.
- **instanceCount** is the number of instances to draw.
- **firstVertex** is the index of the first vertex to draw.
- **firstInstance** is the instance ID of the first instance to draw.

The members of **VkDrawIndirectCommand** have the same meaning as the similarly named parameters

of `vkCmdDraw`.

## Valid Usage

- VUID-VkDrawIndirectCommand-pNext-09461

If the bound graphics pipeline state was created with `VkPipelineVertexInputDivisorStateCreateInfo` in the `pNext` chain of `VkGraphicsPipelineCreateInfo::pVertexInputState`, any member of `VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors` has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-VkDrawIndirectCommand-None-09462

If `shader objects` are used for drawing or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, any member of the `pVertexBindingDescriptions` parameter to the `vkCmdSetVertexInputEXT` call that sets this dynamic state has a value other than `1` in `divisor`, and `VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance` is `VK_FALSE`, then `firstInstance` **must** be `0`

- VUID-VkDrawIndirectCommand-firstInstance-00501

If the `drawIndirectFirstInstance` feature is not enabled, `firstInstance` **must** be `0`

`VkDrawIndirectCount2InfoKHR` is defined as:

```
// Provided by VK_KHR_device_address_commands
typedef struct VkDrawIndirectCount2InfoKHR {
    VkStructureType          sType;
    const void*              pNext;
    VkStridedDeviceAddressRangeKHR addressRange;
    VkAddressCommandFlagsKHR  addressFlags;
    VkDeviceAddressRangeKHR  countAddressRange;
    VkAddressCommandFlagsKHR countAddressFlags;
    uint32_t                 maxDrawCount;
} VkDrawIndirectCount2InfoKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `addressRange` is the `VkStridedDeviceAddressRangeKHR` containing draw parameters.
- `addressFlags` is a `VkAddressCommandFlagsKHR` value defining the flags for the address range.
- `countAddressRange` is the `VkDeviceAddressRangeKHR` containing the draw count.
- `countAddressFlags` is a `VkAddressCommandFlagsKHR` value defining the flags for the count address range.
- `maxDrawCount` specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in `countAddressRange` and

maxDrawCount.

## Valid Usage

- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13097  
If the range specified by `addressRange` is not bound completely to memory when accessed, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13098  
If the buffer from which the range specified by `addressRange` was created with `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `addressFlags` **must** include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13099  
If the buffer from which the range specified by `addressRange` was created without `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressFlags-13100  
`addressFlags` **must** not include both `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13122  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created with `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `addressFlags` **must** include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13123  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created without `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressFlags-13101  
`addressFlags` **must** not include both `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13124  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created with `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `addressFlags` **must** include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`
- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13125  
If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `addressRange`, was created without

`VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `addressFlags` **must** not include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13107

The buffer from which `addressRange` was queried **must** have been created with `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` usage flag

- VUID-VkDrawIndirectCount2InfoKHR-protectedNoFault-13108

If `protectedNoFault` is not supported, the buffer from which `addressRange` was queried **must** not have been created with `VK_BUFFER_CREATE_PROTECTED_BIT`

- VUID-VkDrawIndirectCount2InfoKHR-addressRange-13109

`addressRange.address` **must** be a multiple of 4

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13097

If the range specified by `countAddressRange` is not bound completely to memory when accessed, `countAddressFlags` **must** not include `VK_ADDRESS_COMMAND_FULLY_BOUND_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13098

If the buffer from which the range specified by `countAddressRange` was created with `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `countAddressFlags` **must** include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13099

If the buffer from which the range specified by `countAddressRange` was created without `VK_BUFFER_CREATE_PROTECTED_BIT`, and `protectedNoFault` is not supported, `countAddressFlags` **must** not include `VK_ADDRESS_COMMAND_PROTECTED_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressFlags-13100

`countAddressFlags` **must** not include both `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13122

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `countAddressRange`, was created with `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `countAddressFlags` **must** include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_STORAGE_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13123

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `countAddressRange`, was created without `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT`, `countAddressFlags` **must** not include `VK_ADDRESS_COMMAND_STORAGE_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressFlags-13101

`countAddressFlags` **must** not include both `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` and `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13124

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `countAddressRange`, was created with `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `countAddressFlags` **must** include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR` or `VK_ADDRESS_COMMAND_UNKNOWN_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13125

If any buffer, which is bound to a range of `VkDeviceMemory` that overlaps the range backing `countAddressRange`, was created without `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT`, `countAddressFlags` **must** not include `VK_ADDRESS_COMMAND_TRANSFORM_FEEDBACK_BUFFER_USAGE_BIT_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13114

The buffer from which `countAddressRange` was queried **must** have been created with `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` usage flag

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13115

`countAddressRange.address` **must** be a multiple of 4

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13116

The count stored in `countAddressRange` **must** be less than or equal to `VkPhysicalDeviceLimits::maxDrawIndirectCount`

- VUID-VkDrawIndirectCount2InfoKHR-countAddressRange-13117

`countAddressRange.size` **must** be greater than or equal to 4

## Valid Usage (Implicit)

- VUID-VkDrawIndirectCount2InfoKHR-sType-sType

`sType` **must** be `VK_STRUCTURE_TYPE_DRAW_INDIRECT_COUNT_2_INFO_KHR`

- VUID-VkDrawIndirectCount2InfoKHR-pNext-pNext

`pNext` **must** be `NULL`

- VUID-VkDrawIndirectCount2InfoKHR-addressFlags-parameter

If `addressFlags` is not 0, `addressFlags` **must** be a valid combination of `VkAddressCommandFlagBitsKHR` values

- VUID-VkDrawIndirectCount2InfoKHR-countAddressFlags-parameter

If `countAddressFlags` is not 0, `countAddressFlags` **must** be a valid combination of `VkAddressCommandFlagBitsKHR` values

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands with VK_KHR_draw_indirect_count or
VK_VERSION_1_2
void vkCmdDrawIndirectCount2KHR(
    VkCommandBuffer                commandBuffer,
    const VkDrawIndirectCount2InfoKHR* pInfo);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `pInfo` is a pointer to a `VkDrawIndirectCount2InfoKHR` structure defining parameters of this command.

`vkCmdDrawIndirectCount2KHR` behaves similarly to `vkCmdDrawIndirect2KHR` except that the draw count is read by the device from an address range during execution. The command will read an unsigned 32-bit integer from `pInfo->countAddressRange` and use this as the draw count.

## Valid Usage

- VUID-vkCmdDrawIndirectCount2KHR-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-08600  
If a `bound shader` was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-02707  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource
- VUID-vkCmdDrawIndirectCount2KHR-None-08114  
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectCount2KHR-None-08115  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectCount2KHR-None-08116  
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectCount2KHR-None-08117  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectCount2KHR-None-08119  
If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor

memory **must** be resident

- VUID-vkCmdDrawIndirectCount2KHR-magFilter-04553

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndirectCount2KHR-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawIndirectCount2KHR-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawIndirectCount2KHR-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndirectCount2KHR-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-07888

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-02692

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-02693

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`

- VUID-vkCmdDrawIndirectCount2KHR-filterCubic-02694

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawIndirectCount2KHR-filterCubicMinmax-02695

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07027

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07028

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07029

For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's `buffer features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07030

Any [VkBufferView](#) being read as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#) then the view's [buffer features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-08601

If a [bound shader](#) was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDrawIndirectCount2KHR-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndirectCount2KHR-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndirectCount2KHR-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndirectCount2KHR-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount2KHR-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount2KHR-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount2KHR-None-08613

If the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount2KHR-viewType-07752

If a `VkImageView` is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndirectCount2KHR-format-07753

If a `VkImageView` or `VkBufferView` is accessed as a result of this command, then the `numeric type` of the view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match

- VUID-vkCmdDrawIndirectCount2KHR-OpImageWrite-08795

If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDrawIndirectCount2KHR-OpImageWrite-08796

If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components

- VUID-vkCmdDrawIndirectCount2KHR-OpImageWrite-04469

If a `VkBufferView` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04470

If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64

- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04471

If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32

- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04472

If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64

- VUID-vkCmdDrawIndirectCount2KHR-SampledType-04473

If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32

- VUID-vkCmdDrawIndirectCount2KHR-sparseImageInt64Atomics-04474

If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this

command

- VUID-vkCmdDrawIndirectCount2KHR-sparseImageInt64Atomics-04475

If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command

- VUID-vkCmdDrawIndirectCount2KHR-None-07288

Any shader invocation executed by this command **must** `terminate`

- VUID-vkCmdDrawIndirectCount2KHR-None-09600

If a descriptor with type equal to any of `VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE`, `VK_DESCRIPTOR_TYPE_STORAGE_IMAGE`, or `VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT` is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndirectCount2KHR-micromap-11636

If an acceleration structure is accessed as a result of this command through an `OpRayQueryProceedKHR` operation, the `VK_EXT_opacity_micromap` extension is not enabled, and the acceleration structure is built using geometry with a `VkAccelerationStructureTrianglesOpacityMicromapKHR` structure included in its `pNext` chain, the shader **must** have specified a `OpacityMicromapIdKHR` execution mode with its specialization constant operand equal to `VK_TRUE`

- VUID-vkCmdDrawIndirectCount2KHR-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndirectCount2KHR-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkPipeline` bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes `VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR`

- VUID-vkCmdDrawIndirectCount2KHR-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkShaderEXT` that accessed the descriptor **must** not have been created with `flags` that includes `VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndirectCount2KHR-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a [OpTypeStruct](#) decorated with [Block](#) or [BufferBlock](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [bufferDescriptorAlignment](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeImage](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [imageDescriptorAlignment](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeSampler](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the sampler heap **must** be a multiple of [samplerDescriptorAlignment](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndirectCount2KHR-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirectCount2KHR-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), and a shader accesses a

resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndirectCount2KHR-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirectCount2KHR-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndirectCount2KHR-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndirectCount2KHR-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirectCount2KHR-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for

`storageBuffers`, the `robustBufferAccess2` feature is not enabled, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by `VkDeviceAddressRangeKHR` when the descriptor was written

- VUID-vkCmdDrawIndirectCount2KHR-None-11374

If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by `VkDeviceAddressRangeKHR` when the descriptor was written

- VUID-vkCmdDrawIndirectCount2KHR-pBindInfo-11375

If any `bound shader` uses an embedded sampler via a `descriptor mapping`, the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawIndirectCount2KHR-None-11376

If a `bound shader` was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-11398

If a `bound shader` was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be `out of bounds`

- VUID-vkCmdDrawIndirectCount2KHR-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirectCount2KHR-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirectCount2KHR-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_RESOURCE\\_HEAP\\_DATA\\_EXT](#) and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to [minUniformBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndirectCount2KHR-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to [minStorageBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndirectCount2KHR-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDrawIndirectCount2KHR-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndirectCount2KHR-protectedNoFault-11455

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using

VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT, or  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, the address that the resource is mapped to **must** have been queried from a buffer created without the VK\_BUFFER\_CREATE\_PROTECTED\_BIT create flag set

- VUID-vkCmdDrawIndirectCount2KHR-protectedNoFault-11456

If **protectedNoFault** is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a **descriptor mapping** using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_EXT or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_ARRAY\_EXT, the address of the indirect memory **must** have been queried from a buffer created without the VK\_BUFFER\_CREATE\_PROTECTED\_BIT create flag set

- VUID-vkCmdDrawIndirectCount2KHR-renderPass-02684

The current render pass **must** be **compatible** with the **renderPass** member of the **VkGraphicsPipelineCreateInfo** structure specified when creating the **VkPipeline** bound to VK\_PIPELINE\_BIND\_POINT\_GRAPHICS

- VUID-vkCmdDrawIndirectCount2KHR-subpass-02685

The subpass index of the current render pass **must** be equal to the **subpass** member of the **VkGraphicsPipelineCreateInfo** structure specified when creating the **VkPipeline** bound to VK\_PIPELINE\_BIND\_POINT\_GRAPHICS

- VUID-vkCmdDrawIndirectCount2KHR-OpTypeImage-07468

If any shader executed by this pipeline accesses an **OpTypeImage** variable with a **Dim** operand of **SubpassData**, it **must** be decorated with an **InputAttachmentIndex** that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndirectCount2KHR-None-07469

Input attachment views accessed in a subpass **must** be created with the same **VkFormat** as the corresponding subpass definition, and be created with a **VkImageView** that is compatible with the attachment referenced by the subpass' **pInputAttachments [InputAttachmentIndex]** in the bound **VkFramebuffer** as specified by **Fragment Input Attachment Compatibility**

- VUID-vkCmdDrawIndirectCount2KHR-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a **InputAttachmentIndex** referenced by **VkRenderingInputAttachmentIndexInfo**, or no **InputAttachmentIndex** if **VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex** or **VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex** are **NULL**, **must** be created with a **VkImageView** that is compatible with the corresponding color, depth, or stencil attachment in **VkRenderingInfo**

- VUID-vkCmdDrawIndirectCount2KHR-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an **InputAttachmentIndex** if both **VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex** and **VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex** are non-**NULL**

- VUID-vkCmdDrawIndirectCount2KHR-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an

`InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawIndirectCount2KHR-None-06537  
Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-10797  
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_STENCIL_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-12338  
If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-12339  
If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-12340  
If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_STENCIL_BIT` on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-09003  
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirectCount2KHR-None-06886  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, `depth writes` **must** be disabled
- VUID-vkCmdDrawIndirectCount2KHR-None-06887  
If the current render pass instance uses a depth/stencil attachment with a read-only

layout for the stencil aspect, both front and back **writeMask** are not zero, and stencil test is enabled, **all stencil ops must** be **VK\_STENCIL\_OP\_KEEP**

- VUID-vkCmdDrawIndirectCount2KHR-None-07831

If the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VIEWPORT** dynamic state enabled then **vkCmdSetViewport must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07832

If the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_SCISSOR** dynamic state enabled then **vkCmdSetScissor must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_WIDTH** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineWidth must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBiasEnable** is **VK\_TRUE**, then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07835

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_BLEND\_CONSTANTS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and an active color attachment **current value** of **blendEnable** is **VK\_TRUE** with a blend equations where any **VkBlendFactor** member is **VK\_BLEND\_FACTOR\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, or **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_ALPHA**, then **vkCmdSetBlendConstants must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BOUNDS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBoundsTestEnable** is **VK\_TRUE**, then **vkCmdSetDepthBounds must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndirectCount2KHR-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the

current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the

current value of `rasterizerDiscardEnable` is `VK_FALSE`, the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing

- VUID-vkCmdDrawIndirectCount2KHR-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- VUID-vkCmdDrawIndirectCount2KHR-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of

`vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndirectCount2KHR-

`primitiveFragmentShadingRateWithMultipleViewports-08642`

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndirectCount2KHR-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount2KHR-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirectCount2KHR-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndirectCount2KHR-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndirectCount2KHR-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08912  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08911  
If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount2KHR-None-07749  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount2KHR-attachmentCount-07750  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndirectCount2KHR-None-07751  
If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`
- VUID-vkCmdDrawIndirectCount2KHR-rasterizerDiscardEnable-09236  
If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a

VkPipelineDiscardRectangleStateCreateInfoEXT structure, the current value of rasterizerDiscardEnable is VK\_FALSE, and the current value of discardRectangleEnable is VK\_TRUE, then vkCmdSetDiscardRectangleEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command for each discard rectangle in VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles

- VUID-vkCmdDrawIndirectCount2KHR-None-07880

If the VK\_EXT\_discard\_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK\_DYNAMIC\_STATE\_DISCARD\_RECTANGLE\_ENABLE\_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK\_FALSE, then vkCmdSetDiscardRectangleEnableEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07881

If the VK\_EXT\_discard\_rectangles extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the VK\_DYNAMIC\_STATE\_DISCARD\_RECTANGLE\_MODE\_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK\_FALSE, and the current value of discardRectangleEnable is VK\_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK\_NULL\_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK\_FORMAT\_UNDEFINED

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK\_NULL\_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK\_NULL\_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK\_FORMAT\_UNDEFINED

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK\_NULL\_HANDLE, the value of

`VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08917  
If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-08918  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount2KHR-imageView-06183  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingLocalRead-11797  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`
- VUID-vkCmdDrawIndirectCount2KHR-imageView-06184  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`
- VUID-vkCmdDrawIndirectCount2KHR-multisampledRenderToSingleSampled-07285  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount2KHR-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndirectCount2KHR-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndirectCount2KHR-pNext-07935

If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDrawIndirectCount2KHR-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndirectCount2KHR-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the

`VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-pDepthAttachment-11540

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawIndirectCount2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndirectCount2KHR-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently

[invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_POLYGON\\_MODE\\_EXT](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetPolygonModeEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetRasterizationSamplesEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_SAMPLE\\_MASK\\_EXT](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetSampleMaskEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_ALPHA\\_TO\\_COVERAGE\\_ENABLE\\_EXT](#) dynamic state enabled, and [alphaToCoverageEnable](#) was [VK\\_TRUE](#) in the last call to [vkCmdSetAlphaToCoverageEnableEXT](#), then the [Fragment Output Interface](#) **must** contain a variable for the alpha [Component](#) word in [Location](#) 0 at [Index](#) 0

- VUID-vkCmdDrawIndirectCount2KHR-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to [vkCmdSetAlphaToCoverageEnableEXT](#) in the current command buffer set [alphaToCoverageEnable](#) to [VK\\_TRUE](#), then the [Fragment Output Interface](#) **must** contain a variable for the alpha [Component](#) word in [Location](#) 0 at [Index](#) 0

- VUID-vkCmdDrawIndirectCount2KHR-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_ALPHA\\_TO\\_COVERAGE\\_ENABLE\\_EXT](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetAlphaToCoverageEnableEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07625

If the [alphaToOne](#) feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_ALPHA\\_TO\\_ONE\\_ENABLE\\_EXT](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetAlphaToOneEnableEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07626

If the [logicOp](#) feature is enabled, a shader object is bound to the

`VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any

graphics stage or a graphics pipeline is bound, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line or point topology class, then the **current value** of **conservativeRasterizationMode** **must** be **VK\_CONSERVATIVE\_RASTERIZATION\_MODE\_DISABLED\_EXT**

- VUID-vkCmdDrawIndirectCount2KHR-None-07633

If the **depthClipEnable** feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_CLIP\_ENABLE\_EXT** dynamic state, then **vkCmdSetDepthClipEnableEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07636

If the **VK\_EXT\_provoking\_vertex** extension is enabled, a shader object is bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_PROVOKING\_VERTEX\_MODE\_EXT** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, then **vkCmdSetProvokingVertexModeEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-08666

If any of the **stippledRectangularLines**, **stippledBresenhamLines** or **stippledSmoothLines** features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineRasterizationModeEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-08669

If any of the **stippledRectangularLines**, **stippledBresenhamLines** or **stippledSmoothLines** features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineStippleEnableEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-07849

If any of the **stippledRectangularLines**, **stippledBresenhamLines** or **stippledSmoothLines** features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_LINE\_STIPPLE** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **stippledLineEnable** is **VK\_TRUE**, then **vkCmdSetLineStipple** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the `effective rasterization input topology` is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount2KHR-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current value` of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDrawIndirectCount2KHR-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount2KHR-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the

same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndirectCount2KHR-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirectCount2KHR-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirectCount2KHR-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndirectCount2KHR-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirectCount2KHR-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirectCount2KHR-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this

drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount2KHR-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or

`VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndirectCount2KHR-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndirectCount2KHR-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries **must** not be active

- VUID-vkCmdDrawIndirectCount2KHR-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndirectCount2KHR-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the

current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08686

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08687

If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08688

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08689

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08690

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08693

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound

- VUID-vkCmdDrawIndirectCount2KHR-None-08696

If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage

- VUID-vkCmdDrawIndirectCount2KHR-None-08698

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound

- VUID-vkCmdDrawIndirectCount2KHR-None-08699

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the

`VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound

- VUID-vkCmdDrawIndirectCount2KHR-None-08878  
All bound graphics shader objects **must** have been created with identical or `identically defined` push constant ranges
- VUID-vkCmdDrawIndirectCount2KHR-None-08879  
All bound graphics shader objects **must** have either been created with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag set, or with identical or `identically defined` arrays of descriptor set layouts
- VUID-vkCmdDrawIndirectCount2KHR-pDynamicStates-08715  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`
- VUID-vkCmdDrawIndirectCount2KHR-pDynamicStates-08716  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be `0`
- VUID-vkCmdDrawIndirectCount2KHR-None-09116  
If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them
- VUID-vkCmdDrawIndirectCount2KHR-maxFragmentDualSrcAttachments-09239  
If `blending` is enabled for any attachment where either the source or destination blend factors for that attachment `use the secondary color input`, the maximum value of `Location` for any output attachment `statically used` in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`
- VUID-vkCmdDrawIndirectCount2KHR-None-09548  
If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndirectCount2KHR-None-09549  
If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound

pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirectCount2KHR-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirectCount2KHR-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirectCount2KHR-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDrawIndirectCount2KHR-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawIndirectCount2KHR-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if **sample shading** is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndirectCount2KHR-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11524  
If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`
- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11525  
If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`
- VUID-vkCmdDrawIndirectCount2KHR-None-11861  
If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`
- VUID-vkCmdDrawIndirectCount2KHR-None-11862  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than `0`, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount2KHR-None-11863  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than `0`, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-11864  
If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than `0`, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount2KHR-None-11865  
If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value

of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndirectCount2KHR-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount2KHR-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount2KHR-pDepthAttachment-11872  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`
- VUID-vkCmdDrawIndirectCount2KHR-pStencilAttachment-11873  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`
- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11529  
If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`
- VUID-vkCmdDrawIndirectCount2KHR-customResolve-11530  
If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`
- VUID-vkCmdDrawIndirectCount2KHR-flags-13361  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit
- VUID-vkCmdDrawIndirectCount2KHR-flags-13362  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set
- VUID-vkCmdDrawIndirectCount2KHR-flags-12491  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set
- VUID-vkCmdDrawIndirectCount2KHR-flags-13363  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`,

VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT or  
VK\_SHADER\_STAGE\_GEOMETRY\_BIT, then there **must** be no binding with  
VkDescriptorSetLayoutBinding::stageFlags set with VK\_SHADER\_STAGE\_TASK\_BIT\_EXT or  
VK\_SHADER\_STAGE\_MESH\_BIT\_EXT

- VUID-vkCmdDrawIndirectCount2KHR-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or VK\_NULL\_HANDLE buffers bound

- VUID-vkCmdDrawIndirectCount2KHR-None-04008

If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be VK\_NULL\_HANDLE

- VUID-vkCmdDrawIndirectCount2KHR-None-02721

If the robustBufferAccess feature is not enabled, and that pipeline was created without enabling VK\_PIPELINE\_ROBUSTNESS\_BUFFER\_BEHAVIOR\_ROBUST\_BUFFER\_ACCESS for vertexInputs, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawIndirectCount2KHR-format-10389

For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is a packed format, and the legacyVertexAttributes feature is not enabled, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the size of the format

- VUID-vkCmdDrawIndirectCount2KHR-format-10390

For each vertex attribute accessed by this command, if its VkVertexInputAttributeDescription::format or VkVertexInputAttributeDescription2EXT::format is not a packed format, and either the legacyVertexAttributes feature is not enabled or format has 64-bit components, the value of attribAddress, calculated as described in Vertex Input Calculation, **must** be a multiple of the component size of the format

- VUID-vkCmdDrawIndirectCount2KHR-None-07842

If there is a shader object bound to the VK\_SHADER\_STAGE\_VERTEX\_BIT stage or the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_PRIMITIVE\_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_PRIMITIVE\_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK\_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology **must** be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDrawIndirectCount2KHR-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the **current value** of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound

- VUID-vkCmdDrawIndirectCount2KHR-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the **Vertex Execution Model** **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawIndirectCount2KHR-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirectCount2KHR-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently **invalidated** in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawIndirectCount2KHR-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirectCount2KHR-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the **Vertex Execution Model** `OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawIndirectCount2KHR-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `LegacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given

**Input** variable of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** is 64-bit, then the numeric type associated with all **Input** variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** be the same as **VkVertexInputAttributeDescription2EXT::format**

- VUID-vkCmdDrawIndirectCount2KHR-format-08936

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and **VkVertexInputAttributeDescription2EXT::format** has a 64-bit component, then the scalar width associated with all **Input** variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** be 64-bit

- VUID-vkCmdDrawIndirectCount2KHR-format-08937

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and the scalar width associated with a **Location** decorated **Input** variable in the **Vertex Execution Model OpEntryPoint** is 64-bit, then the corresponding **VkVertexInputAttributeDescription2EXT::format** **must** have a 64-bit component

- VUID-vkCmdDrawIndirectCount2KHR-None-09203

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and **VkVertexInputAttributeDescription2EXT::format** has a 64-bit component, then all **Input** variables at the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** not use components that are not present in the format

- VUID-vkCmdDrawIndirectCount2KHR-None-04875

If there is a shader object bound to the **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage or the bound graphics pipeline state was created with both a **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage and the **VK\_DYNAMIC\_STATE\_PATCH\_CONTROL\_POINTS\_EXT** dynamic state enabled, and the current value of **primitiveTopology** is **VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST**, then **vkCmdSetPatchControlPointsEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-04879

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE** dynamic state enabled then **vkCmdSetPrimitiveRestartEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-None-09637

If the **primitiveTopologyListRestart** feature is not enabled, the **input assembly** is **VK\_PRIMITIVE\_TOPOLOGY\_POINT\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST\_WITH\_ADJACENCY**, or **VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST\_WITH\_ADJACENCY**, there is a shader object

bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount2KHR-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount2KHR-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirectCount2KHR-None-08885

There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages

- VUID-vkCmdDrawIndirectCount2KHR-None-07619

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12239

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12240

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12241

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndirectCount2KHR-OpExecutionMode-12242

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13110

If `pInfo->maxDrawCount` is greater than 0, `pInfo->addressRange.size` **must** be greater than or equal to  $(pInfo->maxDrawCount - 1) \times pInfo->addressRange.stride + sizeof$

### (VkDrawIndirectCommand)

- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13111  
If `pInfo->maxDrawCount` is greater than 1, `pInfo->addressRange.stride` **must** not be 0
- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13112  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be greater than or equal to `sizeof(VkDrawIndirectCommand)`
- VUID-vkCmdDrawIndirectCount2KHR-pInfo-13113  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be a multiple of 4
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-13058  
`commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawIndirectCount2KHR-drawIndirectCount-13119  
If the `drawIndirectCount` feature is not enabled this function **must** not be used

## Valid Usage (Implicit)

- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdDrawIndirectCount2KHR-pInfo-parameter  
`pInfo` **must** be a valid pointer to a valid `VkDrawIndirectCount2InfoKHR` structure
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdDrawIndirectCount2KHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdDrawIndirectCount2KHR-renderpass  
This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndirectCount2KHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndirectCount2KHR-vidcoding  
This command **must** only be called outside of a video coding scope

## Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types                         | Command Type |
|-----------------------|-------------------|--------------------|-----------------------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS_BIT<br>VK_QUEUE_COMPUTE_BIT | Action       |

## Conditional Rendering

vkCmdDrawIndirectCount2KHR is affected by [conditional rendering](#)

To record a non-indexed draw call with a draw call count sourced from a buffer, call:

```
// Provided by VK_VERSION_1_2
void vkCmdDrawIndirectCount(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 buffer,
    VkDeviceSize             offset,
    VkBuffer                 countBuffer,
    VkDeviceSize             countBufferOffset,
    uint32_t                 maxDrawCount,
    uint32_t                 stride);
```

```
// Provided by VK_KHR_draw_indirect_count
// Equivalent to vkCmdDrawIndirectCount
void vkCmdDrawIndirectCountKHR(
    VkCommandBuffer          commandBuffer,
    VkBuffer                 buffer,
    VkDeviceSize             offset,
    VkBuffer                 countBuffer,
    VkDeviceSize             countBufferOffset,
    uint32_t                 maxDrawCount,
    uint32_t                 stride);
```

- **commandBuffer** is the command buffer into which the command is recorded.
- **buffer** is the buffer containing draw parameters.
- **offset** is the byte offset into **buffer** where parameters begin.
- **countBuffer** is the buffer containing the draw count.
- **countBufferOffset** is the byte offset into **countBuffer** where the draw count begins.
- **maxDrawCount** specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in **countBuffer** and **maxDrawCount**.
- **stride** is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndirectCount` behaves similarly to `vkCmdDrawIndirect` except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from `countBuffer` located at `countBufferOffset` and use this as the draw count.

## Valid Usage

- VUID-vkCmdDrawIndirectCount-None-08606

If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command

- VUID-vkCmdDrawIndirectCount-None-08600

If a `bound shader` was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)

- VUID-vkCmdDrawIndirectCount-commandBuffer-02707

If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource

- VUID-vkCmdDrawIndirectCount-None-08114

Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndirectCount-None-08115

If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndirectCount-None-08116

Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndirectCount-None-08117

If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndirectCount-None-08119

If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident

- VUID-vkCmdDrawIndirectCount-magFilter-04553

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and

`compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirectCount-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirectCount-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirectCount-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirectCount-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndirectCount-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawIndirectCount-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawIndirectCount-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndirectCount-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawIndirectCount-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then

the image view's format features **must** contain  
VK\_FORMAT\_FEATURE\_STORAGE\_IMAGE\_ATOMIC\_BIT

- VUID-vkCmdDrawIndirectCount-None-07888

If a VK\_DESCRIPTOR\_TYPE\_STORAGE\_TEXEL\_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain VK\_FORMAT\_FEATURE\_STORAGE\_TEXEL\_BUFFER\_ATOMIC\_BIT

- VUID-vkCmdDrawIndirectCount-None-02692

If a VkImageView is sampled with VK\_FILTER\_CUBIC\_EXT as a result of this command, then the image view's format features **must** contain VK\_FORMAT\_FEATURE\_SAMPLED\_IMAGE\_FILTER\_CUBIC\_BIT\_EXT

- VUID-vkCmdDrawIndirectCount-None-02693

If the VK\_EXT\_filter\_cubic extension is not enabled and any VkImageView is sampled with VK\_FILTER\_CUBIC\_EXT as a result of this command, it **must** not have a VkImageViewType of VK\_IMAGE\_VIEW\_TYPE\_3D, VK\_IMAGE\_VIEW\_TYPE\_CUBE, or VK\_IMAGE\_VIEW\_TYPE\_CUBE\_ARRAY

- VUID-vkCmdDrawIndirectCount-filterCubic-02694

Any VkImageView being sampled with VK\_FILTER\_CUBIC\_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawIndirectCount-filterCubicMinmax-02695

Any VkImageView being sampled with VK\_FILTER\_CUBIC\_EXT with a reduction mode of either VK\_SAMPLER\_REDUCTION\_MODE\_MIN or VK\_SAMPLER\_REDUCTION\_MODE\_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawIndirectCount-OpTypeImage-07027

For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_WRITE\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndirectCount-OpTypeImage-07028

For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_READ\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndirectCount-OpTypeImage-07029

For any VkBufferView being written as a storage texel buffer where the image format field of the OpTypeImage is Unknown, the view's buffer features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_WRITE\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndirectCount-OpTypeImage-07030

Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view's buffer features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_READ\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndirectCount-None-08601

If a [a bound shader](#) was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDrawIndirectCount-None-10068

For each array of resources that is used by a [a bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndirectCount-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndirectCount-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndirectCount-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectCount-viewType-07752  
If a [VkImageView](#) is accessed as a result of this command, then the image view's **viewType** **must** match the **Dim** operand of the **OpTypeImage** as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)
- VUID-vkCmdDrawIndirectCount-format-07753  
If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the **numeric type** of the view's **format** and the **Sampled Type** operand of the **OpTypeImage** **must** match
- VUID-vkCmdDrawIndirectCount-OpImageWrite-08795  
If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndirectCount-OpImageWrite-08796  
If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have four components
- VUID-vkCmdDrawIndirectCount-OpImageWrite-04469  
If a [VkBufferView](#) is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndirectCount-SampledType-04470  
If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64
- VUID-vkCmdDrawIndirectCount-SampledType-04471  
If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32
- VUID-vkCmdDrawIndirectCount-SampledType-04472  
If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64
- VUID-vkCmdDrawIndirectCount-SampledType-04473  
If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32
- VUID-vkCmdDrawIndirectCount-sparseImageInt64Atomics-04474  
If the **sparseImageInt64Atomics** feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an **OpTypeImage** with a **SampledType** with a **Width** of 64 by this command
- VUID-vkCmdDrawIndirectCount-sparseImageInt64Atomics-04475  
If the **sparseImageInt64Atomics** feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic

instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command

- VUID-vkCmdDrawIndirectCount-None-07288

Any shader invocation executed by this command **must** terminate

- VUID-vkCmdDrawIndirectCount-None-09600

If a descriptor with type equal to any of `VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE`, `VK_DESCRIPTOR_TYPE_STORAGE_IMAGE`, or `VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT` is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndirectCount-micromap-11636

If an acceleration structure is accessed as a result of this command through an `OpRayQueryProceedKHR` operation, the `VK_EXT_opacity_micromap` extension is not enabled, and the acceleration structure is built using geometry with a `VkAccelerationStructureTrianglesOpacityMicromapKHR` structure included in its `pNext` chain, the shader **must** have specified a `OpacityMicromapIdKHR` execution mode with its specialization constant operand equal to `VK_TRUE`

- VUID-vkCmdDrawIndirectCount-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndirectCount-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkPipeline` bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes `VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR`

- VUID-vkCmdDrawIndirectCount-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkShaderEXT` that accessed the descriptor **must** not have been created with `flags` that includes `VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT`

- VUID-vkCmdDrawIndirectCount-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndirectCount-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`,

VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_SHADER\_RECORD\_INDEX\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_ARRAY\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_EXT, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawIndirectCount-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDrawIndirectCount-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndirectCount-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndirectCount-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirectCount-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress`

- VUID-vkCmdDrawIndirectCount-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndirectCount-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndirectCount-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndirectCount-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndirectCount-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndirectCount-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirectCount-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndirectCount-None-11374

If the `robustBufferAccess2` feature is not enabled, the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by `VkDeviceAddressRangeKHR` when the descriptor was written

- VUID-vkCmdDrawIndirectCount-pBindInfo-11375

If any `bound shader` uses an embedded sampler via a `descriptor mapping`, the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawIndirectCount-None-11376

If a `bound shader` was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDrawIndirectCount-None-11398

If a `bound shader` was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be `out of bounds`

- VUID-vkCmdDrawIndirectCount-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirectCount-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirectCount-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping`

using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_RESOURCE\\_HEAP\\_DATA\\_EXT](#) and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to [minUniformBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndirectCount-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndirectCount-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to [minStorageBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndirectCount-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDrawIndirectCount-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndirectCount-protectedNoFault-11455

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), the address that the

resource is mapped to **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndirectCount-protectedNoFault-11456

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, the address of the indirect memory **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndirectCount-renderPass-02684

The current render pass **must** be `compatible` with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawIndirectCount-subpass-02685

The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawIndirectCount-OpTypeImage-07468

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndirectCount-None-07469

Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments[InputAttachmentIndex]` in the bound `VkFramebuffer` as specified by `Fragment Input Attachment Compatibility`

- VUID-vkCmdDrawIndirectCount-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`

- VUID-vkCmdDrawIndirectCount-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`

- VUID-vkCmdDrawIndirectCount-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawIndirectCount-None-06537  
Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount-None-10797  
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndirectCount-None-12338  
If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount-None-12339  
If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount-None-12340  
If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndirectCount-None-09003  
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndirectCount-None-06886  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled
- VUID-vkCmdDrawIndirectCount-None-06887  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)

- VUID-vkCmdDrawIndirectCount-None-07831

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07832

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `effective rasterization input topology` is in the line topology class, then `vkCmdSetLineWidth` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBiasEnable` is `VK_TRUE`, then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07835

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment `current value` of `blendEnable` is `VK_TRUE` with a blend equations where any `VkBlendFactor` member is `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, then `vkCmdSetBlendConstants` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBoundsTestEnable` is `VK_TRUE`, then `vkCmdSetDepthBounds` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value`

of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndirectCount-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently `invalidated` in the current command buffer prior

to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not

subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic state enabled, then **vkCmdSetViewportWithCount** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_SCISSOR\_WITH\_COUNT** dynamic state enabled, then **vkCmdSetScissorWithCount** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing

- VUID-vkCmdDrawIndirectCount-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the **VK\_DYNAMIC\_STATE\_SCISSOR\_WITH\_COUNT** and **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic states enabled, then the **viewportCount** parameter of **vkCmdSetViewportWithCount** **must** match the **scissorCount** parameter of **vkCmdSetScissorWithCount**

- VUID-vkCmdDrawIndirectCount-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_RASTERIZER\_DISCARD\_ENABLE** dynamic state enabled, then **vkCmdSetRasterizerDiscardEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS\_ENABLE** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, then **vkCmdSetDepthBiasEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-logicOp-04878

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LOGIC\_OP\_EXT** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **logicOpEnable** is **VK\_TRUE**, then **vkCmdSetLogicOpEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-04552

If the **primitiveFragmentShadingRateWithMultipleViewports** limit is not supported, the bound graphics pipeline was created with the **VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT** dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the **PrimitiveShadingRateKHR** built-in, then **vkCmdSetViewportWithCount** **must** have been called in the current command buffer prior to this drawing command, and the **viewportCount** parameter of **vkCmdSetViewportWithCount** **must** be 1

- VUID-vkCmdDrawIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-

08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndirectCount-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirectCount-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndirectCount-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndirectCount-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render

pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawIndirectCount-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawIndirectCount-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is

VK\_TRUE, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles`

- VUID-vkCmdDrawIndirectCount-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08917  
If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08918  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount-imageView-06183  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`
- VUID-vkCmdDrawIndirectCount-dynamicRenderingLocalRead-11797  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`
- VUID-vkCmdDrawIndirectCount-imageView-06184  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`
- VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07285  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline
- VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07286  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance,

and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndirectCount-pNext-07935

If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDrawIndirectCount-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndirectCount-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-pDepthAttachment-11540  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount-pStencilAttachment-08965  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount-pStencilAttachment-11860  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndirectCount-flags-10582  
If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set
- VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithRasterizerDiscard-06708  
If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled
- VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-06709  
If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`
- VUID-vkCmdDrawIndirectCount-None-07620  
If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndirectCount-None-07621  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled,

and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndirectCount-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndirectCount-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in

the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line or point topology class, then the current value of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawIndirectCount-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be

## VK\_FALSE

- VUID-vkCmdDrawIndirectCount-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current value` of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDrawIndirectCount-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndirectCount-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the

current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirectCount-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndirectCount-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndirectCount-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirectCount-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirectCount-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound

to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndirectCount-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirectCount-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to

`vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07496

If the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndirectCount-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndirectCount-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active

- VUID-vkCmdDrawIndirectCount-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndirectCount-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndirectCount-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawIndirectCount-None-08686  
If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`
- VUID-vkCmdDrawIndirectCount-None-08687  
If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`
- VUID-vkCmdDrawIndirectCount-None-08688  
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`
- VUID-vkCmdDrawIndirectCount-None-08689  
If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`
- VUID-vkCmdDrawIndirectCount-None-08690  
If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`
- VUID-vkCmdDrawIndirectCount-None-08693  
If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound
- VUID-vkCmdDrawIndirectCount-None-08696  
If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage
- VUID-vkCmdDrawIndirectCount-None-08698  
If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound
- VUID-vkCmdDrawIndirectCount-None-08699  
If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound
- VUID-vkCmdDrawIndirectCount-None-08878  
All bound graphics shader objects **must** have been created with identical or `identically defined` push constant ranges
- VUID-vkCmdDrawIndirectCount-None-08879

All bound graphics shader objects **must** have either been created with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag set, or with identical or **identically defined** arrays of descriptor set layouts

- VUID-vkCmdDrawIndirectCount-pDynamicStates-08715

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount-pDynamicStates-08716

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be 0

- VUID-vkCmdDrawIndirectCount-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them

- VUID-vkCmdDrawIndirectCount-maxFragmentDualSrcAttachments-09239

If **blending** is enabled for any attachment where either the source or destination blend factors for that attachment **use the secondary color input**, the maximum value of `Location` for any output attachment **statically used** in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`

- VUID-vkCmdDrawIndirectCount-None-09548

If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndirectCount-None-09549

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirectCount-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of

`VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirectCount-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndirectCount-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDrawIndirectCount-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDrawIndirectCount-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawIndirectCount-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if *sample shading* is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndirectCount-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndirectCount-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndirectCount-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndirectCount-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndirectCount-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndirectCount-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the

value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndirectCount-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndirectCount-pStencilAttachment-11873  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`
- VUID-vkCmdDrawIndirectCount-customResolve-11529  
If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`
- VUID-vkCmdDrawIndirectCount-customResolve-11530  
If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`
- VUID-vkCmdDrawIndirectCount-flags-13361  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit
- VUID-vkCmdDrawIndirectCount-flags-13362  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set
- VUID-vkCmdDrawIndirectCount-flags-12491  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set
- VUID-vkCmdDrawIndirectCount-flags-13363  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`
- VUID-vkCmdDrawIndirectCount-None-04007  
All vertex input bindings accessed via vertex input variables declared in the vertex

shader entry point's interface **must** have either valid or [VK\\_NULL\\_HANDLE](#) buffers bound

- VUID-vkCmdDrawIndirectCount-None-04008

If the [nullDescriptor](#) feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be [VK\\_NULL\\_HANDLE](#)

- VUID-vkCmdDrawIndirectCount-None-02721

If the [robustBufferAccess](#) feature is not enabled, and that pipeline was created without enabling [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) for [vertexInputs](#), then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDrawIndirectCount-format-10389

For each vertex attribute accessed by this command, if its [VkVertexInputAttributeDescription::format](#) or [VkVertexInputAttributeDescription2EXT::format](#) is a [packed format](#), and the [legacyVertexAttributes](#) feature is not enabled, the value of [attribAddress](#), calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the [size of the format](#)

- VUID-vkCmdDrawIndirectCount-format-10390

For each vertex attribute accessed by this command, if its [VkVertexInputAttributeDescription::format](#) or [VkVertexInputAttributeDescription2EXT::format](#) is not a [packed format](#), and either the [legacyVertexAttributes](#) feature is not enabled or [format](#) has 64-bit components, the value of [attribAddress](#), calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the [component size of the format](#)

- VUID-vkCmdDrawIndirectCount-None-07842

If there is a shader object bound to the [VK\\_SHADER\\_STAGE\\_VERTEX\\_BIT](#) stage or the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_PRIMITIVE\\_TOPOLOGY](#) dynamic state enabled then [vkCmdSetPrimitiveTopology](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_PRIMITIVE\\_TOPOLOGY](#) dynamic state enabled and the [dynamicPrimitiveTopologyUnrestricted](#) is [VK\\_FALSE](#), then the [primitiveTopology](#) parameter of [vkCmdSetPrimitiveTopology](#) **must** be of the same [topology class](#) as the pipeline [VkPipelineInputAssemblyStateCreateInfo::topology](#) state

- VUID-vkCmdDrawIndirectCount-primitiveTopology-10286

If a [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) stage is bound, then the [current value](#) of [primitiveTopology](#) **must** be [VK\\_PRIMITIVE\\_TOPOLOGY\\_PATCH\\_LIST](#) prior to this drawing command

- VUID-vkCmdDrawIndirectCount-primitiveTopology-10747

If [vkCmdSetPrimitiveTopology](#) set [primitiveTopology](#) to [VK\\_PRIMITIVE\\_TOPOLOGY\\_PATCH\\_LIST](#) prior to this drawing command, then a [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) stage **must** be bound

- VUID-vkCmdDrawIndirectCount-primitiveTopology-10748  
If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to
- VUID-vkCmdDrawIndirectCount-pStrides-04913  
If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectCount-None-13118  
If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`
- VUID-vkCmdDrawIndirectCount-None-04914  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndirectCount-Input-07939  
If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`
- VUID-vkCmdDrawIndirectCount-Input-08734  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`
- VUID-vkCmdDrawIndirectCount-format-08936  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDrawIndirectCount-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDrawIndirectCount-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawIndirectCount-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the current value of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline

state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndirectCount-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndirectCount-None-08885

There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages

- VUID-vkCmdDrawIndirectCount-None-07619

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12239

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12240

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12241

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndirectCount-OpExecutionMode-12242

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawIndirectCount-buffer-02708

If `buffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-vkCmdDrawIndirectCount-buffer-02709

`buffer` **must** have been created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirectCount-offset-02710

`offset` **must** be a multiple of 4

- VUID-vkCmdDrawIndirectCount-commandBuffer-02711

`commandBuffer` **must** not be a protected command buffer

- VUID-vkCmdDrawIndirectCount-countBuffer-02714

If `countBuffer` is non-sparse then it **must** be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-vkCmdDrawIndirectCount-countBuffer-02715

`countBuffer` **must** have been created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndirectCount-countBufferOffset-02716

`countBufferOffset` **must** be a multiple of 4

- VUID-vkCmdDrawIndirectCount-countBuffer-02717

The count stored in `countBuffer` **must** be less than or equal to `VkPhysicalDeviceLimits::maxDrawIndirectCount`

- VUID-vkCmdDrawIndirectCount-countBufferOffset-04129

$(\text{countBufferOffset} + \text{sizeof}(\text{uint32\_t}))$  **must** be less than or equal to the size of `countBuffer`

- VUID-vkCmdDrawIndirectCount-None-04445

If the `drawIndirectCount` feature is not enabled this function **must** not be used

- VUID-vkCmdDrawIndirectCount-stride-03110

`stride` **must** be a multiple of 4 and **must** be greater than or equal to `sizeof(VkDrawIndirectCommand)`

- VUID-vkCmdDrawIndirectCount-maxDrawCount-03111

If `maxDrawCount` is greater than or equal to 1,  $(\text{stride} \times (\text{maxDrawCount} - 1) + \text{offset} + \text{sizeof}(\text{VkDrawIndirectCommand}))$  **must** be less than or equal to the size of `buffer`

## Valid Usage (Implicit)

- VUID-vkCmdDrawIndirectCount-commandBuffer-parameter

`commandBuffer` **must** be a valid `VkCommandBuffer` handle

- VUID-vkCmdDrawIndirectCount-buffer-parameter

`buffer` **must** be a valid `VkBuffer` handle

- VUID-vkCmdDrawIndirectCount-countBuffer-parameter

`countBuffer` **must** be a valid `VkBuffer` handle

- VUID-vkCmdDrawIndirectCount-commandBuffer-recording

`commandBuffer` **must** be in the `recording` state

- VUID-vkCmdDrawIndirectCount-commandBuffer-cmdpool

The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations

- VUID-vkCmdDrawIndirectCount-renderpass

This command **must** only be called inside of a render pass instance

- VUID-vkCmdDrawIndirectCount-suspended

This command **must** not be called between suspended render pass instances

- VUID-vkCmdDrawIndirectCount-videocoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndirectCount-commonparent  
Each of **buffer**, **commandBuffer**, and **countBuffer** **must** have been created, allocated, or retrieved from the same **VkDevice**

## Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types     | Command Type |
|-----------------------|-------------------|--------------------|---------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAP<br>HICS_BIT | Action       |

## Conditional Rendering

vkCmdDrawIndirectCount is affected by [conditional rendering](#)

To record an indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands
void vkCmdDrawIndexedIndirect2KHR(
    VkCommandBuffer                commandBuffer,
    const VkDrawIndirect2InfoKHR*  pInfo);
```

- **commandBuffer** is the command buffer into which the command is recorded.
- **pInfo** is a pointer to a **VkDrawIndirect2InfoKHR** structure defining parameters of this command.

**vkCmdDrawIndexedIndirect2KHR** behaves similarly to **vkCmdDrawIndexed** except that the parameters are read by the device from an address range during execution. **pInfo->drawCount** draws are executed by the command, with parameters taken from **pInfo->addressRange** starting at **addressRange.address** and increasing by **addressRange.stride** bytes for each successive draw. The parameters of each draw are encoded in an array of **VkDrawIndexedIndirectCommand** structures.

## Valid Usage

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08600  
If a `bound shader` was created with a pipeline layout and statically uses a set  $n$ , a descriptor set **must** have been bound to  $n$  at the same pipeline bind point, with layouts compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-02707  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08114  
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08115  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08116  
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08117  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08119  
If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirect2KHR-magFilter-04553  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`
- VUID-vkCmdDrawIndexedIndirect2KHR-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndexedIndirect2KHR-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07888

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic

operations as a result of this command, then the storage texel buffer's **format features must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-02692

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's **format features must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-02693

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`

- VUID-vkCmdDrawIndexedIndirect2KHR-filterCubic-02694

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawIndexedIndirect2KHR-filterCubicMinmax-02695

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07027

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's **format features must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07028

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's **format features must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07029

For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's **buffer features must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07030

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's **buffer features must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08601

If a **bound shader** was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are **compatible** with the push constant range used to create the shader

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10068  
For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-imageLayout-00344  
If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08608  
If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndexedIndirect2KHR-uniformBuffers-06935  
If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08612  
If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect2KHR-storageBuffers-06936  
If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08613  
If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirect2KHR-viewType-07752  
If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#) **must** match the [Dim](#) operand of the [OpTypeImage](#) as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-format-07753  
If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the [numeric type](#) of the view's [format](#) and the [Sampled Type](#) operand of the [OpTypeImage](#) **must** match
- VUID-vkCmdDrawIndexedIndirect2KHR-OpImageWrite-08795  
If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndexedIndirect2KHR-OpImageWrite-08796  
If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexedIndirect2KHR-OpImageWrite-04469  
If a [VkBufferView](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04470  
If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64
- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04471  
If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32
- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04472  
If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64
- VUID-vkCmdDrawIndexedIndirect2KHR-SampledType-04473  
If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32
- VUID-vkCmdDrawIndexedIndirect2KHR-sparseImageInt64Atomics-04474  
If the [sparseImageInt64Atomics](#) feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-sparseImageInt64Atomics-04475  
If the [sparseImageInt64Atomics](#) feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07288  
Any shader invocation executed by this command **must** [terminate](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09600

If a descriptor with type equal to any of [VK\\_DESCRIPTOR\\_TYPE\\_SAMPLED\\_IMAGE](#), [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_IMAGE](#), or [VK\\_DESCRIPTOR\\_TYPE\\_INPUT\\_ATTACHMENT](#) is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11636

If an acceleration structure is accessed as a result of this command through an [OpRayQueryProceedKHR](#) operation, the [VK\\_EXT\\_opacity\\_micromap](#) extension is not enabled, and the acceleration structure is built using geometry with a [VkAccelerationStructureTrianglesOpacityMicromapKHR](#) structure included in its [pNext](#) chain, the shader **must** have specified a [OpacityMicromapIdKHR](#) execution mode with its specialization constant operand equal to [VK\\_TRUE](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkPipeline](#) bound to the pipeline bind point used by this command **must** not have been created with [flags](#) that includes [VK\\_PIPELINE\\_CREATE\\_2\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_KHR](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an [indexBuffer](#) containing both [VkOpacityMicromapSpecialIndexKHR](#) values and indices into an associated micromap array, any [VkShaderEXT](#) that accessed the descriptor **must** not have been created with [flags](#) that includes [VK\\_SHADER\\_CREATE\\_OPACITY\\_MICROMAP\\_DISALLOW\\_MIXED\\_SPECIAL\\_INDEX\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a [OpTypeStruct](#) decorated with [Block](#) or [BufferBlock](#) using that mapping, the

calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location

in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11374

If the [robustBufferAccess2](#) feature is not enabled, the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or

storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect2KHR-pBindInfo-11375

If any [bound shader](#) uses an embedded sampler via a [descriptor mapping](#), the value of `pBindInfo->reservedRangeSize` set for `vkCmdBindSamplerHeapEXT` **must** be greater than or equal to `minSamplerHeapReservedRangeWithEmbedded`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11376

If a [bound shader](#) was created as a `VkShaderEXT` with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag or as part of a pipeline with the `VK_PIPELINE_CREATE_2_DESCRIPTOR_HEAP_BIT_EXT` flag, and that shader statically uses a push constant value, that value **must** have been set by `vkCmdPushDataEXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11398

If a [bound shader](#) was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_DATA_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the access **must** not be [out of bounds](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_UNIFORM_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_RESOURCE_HEAP_DATA_EXT` and a shader accesses

a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to `minUniformBufferOffsetAlignment`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a `VkAccelerationStructureKHR` object via `vkGetAccelerationStructureDeviceAddressKHR`

- VUID-vkCmdDrawIndexedIndirect2KHR-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by `VkSamplerCustomBorderColorIndexCreateInfoEXT`, the value of `VkSamplerCustomBorderColorIndexCreateInfoEXT::index` **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndexedIndirect2KHR-protectedNoFault-11455

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_SHADER_RECORD_ADDRESS_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, the address that the resource is mapped to **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndexedIndirect2KHR-protectedNoFault-11456

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, the address of the indirect memory **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndexedIndirect2KHR-renderPass-02684

The current render pass **must** be `compatible` with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawIndexedIndirect2KHR-subpass-02685

The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawIndexedIndirect2KHR-OpTypeImage-07468

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07469

Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound `VkFramebuffer` as specified by `Fragment Input Attachment Compatibility`

- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`

- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`

- VUID-vkCmdDrawIndexedIndirect2KHR-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-06537

Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-10797  
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-12338  
If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-12339  
If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-12340  
If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09003  
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-06886  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled
- VUID-vkCmdDrawIndexedIndirect2KHR-None-06887  
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07831  
If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_VIEWPORT](#) dynamic state enabled then [vkCmdSetViewport](#) **must**

have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07832

If the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_SCISSOR** dynamic state enabled then **vkCmdSetScissor** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_WIDTH** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineWidth** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBiasEnable** is **VK\_TRUE**, then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07835

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_BLEND\_CONSTANTS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and an active color attachment **current value** of **blendEnable** is **VK\_TRUE** with a blend equations where any **VkBlendFactor** member is **VK\_BLEND\_FACTOR\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_ALPHA**, or **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, then **vkCmdSetBlendConstants** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BOUNDS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBoundsTestEnable** is **VK\_TRUE**, then **vkCmdSetDepthBounds** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_STENCIL\_COMPARE\_MASK** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **stencilTestEnable** is **VK\_TRUE**, then **vkCmdSetStencilCompareMask** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing

- VUID-vkCmdDrawIndexedIndirect2KHR-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveFragmentShadingRateWithMultipleViewports-08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in,

then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirect2KHR-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's **format features** do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndexedIndirect2KHR-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndexedIndirect2KHR-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the

corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08911  
If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07749  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-attachmentCount-07750  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07751  
If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`
- VUID-vkCmdDrawIndexedIndirect2KHR-rasterizerDiscardEnable-09236  
If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT`

`::maxDiscardRectangles`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo`

`::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-08918  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-imageView-06183  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingLocalRead-11797  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`
- VUID-vkCmdDrawIndexedIndirect2KHR-imageView-06184  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-multisampledRenderToSingleSampled-07285  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-multisampledRenderToSingleSampled-07286  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirect2KHR-multisampledRenderToSingleSampled-07287  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawIndexedIndirect2KHR-pNext-07935  
If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`
- VUID-vkCmdDrawIndexedIndirect2KHR-renderPass-06198  
If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`
- VUID-vkCmdDrawIndexedIndirect2KHR-pColorAttachments-08963  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-pColorAttachments-11539  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthAttachment-08964  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthAttachment-11540  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a

graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawIndexedIndirect2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawIndexedIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then

`vkCmdSetPolygonModeEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the **Fragment Output Interface** **must** contain a variable for the alpha **Component** word in **Location** 0 at **Index** 0

- VUID-vkCmdDrawIndexedIndirect2KHR-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the **Fragment Output Interface** **must** contain a variable for the alpha **Component** word in **Location** 0 at **Index** 0

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07627

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with [VK\\_DYNAMIC\\_STATE\\_COLOR\\_BLEND\\_ENABLE\\_EXT](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and there are color attachments bound, then [vkCmdSetColorBlendEnableEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07629

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with [VK\\_DYNAMIC\\_STATE\\_COLOR\\_WRITE\\_MASK\\_EXT](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and there are color attachments bound, then [vkCmdSetColorWriteMaskEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07630

If the [geometryStreams](#) feature is enabled, and a shader object is bound to the [VK\\_SHADER\\_STAGE\\_GEOMETRY\\_BIT](#) stage or a graphics pipeline is bound which was created with both a [VK\\_SHADER\\_STAGE\\_GEOMETRY\\_BIT](#) stage and the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_STREAM\\_EXT](#) dynamic state enabled, then [vkCmdSetRasterizationStreamEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07631

If the [VK\\_EXT\\_conservative\\_rasterization](#) extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_CONSERVATIVE\\_RASTERIZATION\\_MODE\\_EXT](#) dynamic state enabled, and the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), then [vkCmdSetConservativeRasterizationModeEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07632

If the [VK\\_EXT\\_conservative\\_rasterization](#) extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_EXTRA\\_PRIMITIVE\\_OVERESTIMATION\\_SIZE\\_EXT](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and the [current value](#) of [conservativeRasterizationMode](#) is [VK\\_CONSERVATIVE\\_RASTERIZATION\\_MODE\\_OVERESTIMATE\\_EXT](#), then [vkCmdSetExtraPrimitiveOverestimationSizeEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-conservativePointAndLineRasterization-07499

If the [VK\\_EXT\\_conservative\\_rasterization](#) extension is enabled, [conservativePointAndLineRasterization](#) is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and the [effective rasterization input topology](#) is in the line or point topology class, then the [current value](#) of [conservativeRasterizationMode](#) **must** be [VK\\_CONSERVATIVE\\_RASTERIZATION\\_MODE\\_DISABLED\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07639  
If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09650  
If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current value` of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-rasterizationSamples-07471  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`
- VUID-vkCmdDrawIndexedIndirect2KHR-samples-07472  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-samples-07473  
If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-09211  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure
- VUID-vkCmdDrawIndexedIndirect2KHR-firstAttachment-07476  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to

`vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirect2KHR-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirect2KHR-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect2KHR-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound

to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to

`vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07496

If the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirect2KHR-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect2KHR-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-08686  
If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08687  
If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08688  
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08689  
If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08690  
If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08693  
If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08696  
If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08698  
If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08699  
If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08878  
All bound graphics shader objects **must** have been created with identical or `identically defined` push constant ranges
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08879

All bound graphics shader objects **must** have either been created with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag set, or with identical or **identically defined** arrays of descriptor set layouts

- VUID-vkCmdDrawIndexedIndirect2KHR-pDynamicStates-08715

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect2KHR-pDynamicStates-08716

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be 0

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them

- VUID-vkCmdDrawIndexedIndirect2KHR-maxFragmentDualSrcAttachments-09239

If **blending** is enabled for any attachment where either the source or destination blend factors for that attachment **use the secondary color input**, the maximum value of `Location` for any output attachment **statically used** in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09548

If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09549

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of

`VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawIndexedIndirect2KHR-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if *sample shading* is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the

value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-11867  
If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11868  
If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-11869  
If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`
- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicRenderingUnusedAttachments-11870  
If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirect2KHR-colorAttachmentCount-11871  
If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirect2KHR-pDepthAttachment-11872  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirect2KHR-pStencilAttachment-11873  
If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`
- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11529  
If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`
- VUID-vkCmdDrawIndexedIndirect2KHR-customResolve-11530  
If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-13361  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-13362  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-12491  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set
- VUID-vkCmdDrawIndexedIndirect2KHR-flags-13363  
If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-04007  
All vertex input bindings accessed via vertex input variables declared in the vertex

shader entry point's interface **must** have either valid or [VK\\_NULL\\_HANDLE](#) buffers bound

- VUID-vkCmdDrawIndexedIndirect2KHR-None-04008

If the [nullDescriptor](#) feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be [VK\\_NULL\\_HANDLE](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-None-02721

If the [robustBufferAccess](#) feature is not enabled, and that pipeline was created without enabling [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) for [vertexInputs](#), then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-format-10389

For each vertex attribute accessed by this command, if its [VkVertexInputAttributeDescription::format](#) or [VkVertexInputAttributeDescription2EXT::format](#) is a [packed format](#), and the [legacyVertexAttributes](#) feature is not enabled, the value of [attribAddress](#), calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the [size of the format](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-format-10390

For each vertex attribute accessed by this command, if its [VkVertexInputAttributeDescription::format](#) or [VkVertexInputAttributeDescription2EXT::format](#) is not a [packed format](#), and either the [legacyVertexAttributes](#) feature is not enabled or [format](#) has 64-bit components, the value of [attribAddress](#), calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the [component size of the format](#)

- VUID-vkCmdDrawIndexedIndirect2KHR-None-07842

If there is a shader object bound to the [VK\\_SHADER\\_STAGE\\_VERTEX\\_BIT](#) stage or the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_PRIMITIVE\\_TOPOLOGY](#) dynamic state enabled then [vkCmdSetPrimitiveTopology](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_PRIMITIVE\\_TOPOLOGY](#) dynamic state enabled and the [dynamicPrimitiveTopologyUnrestricted](#) is [VK\\_FALSE](#), then the [primitiveTopology](#) parameter of [vkCmdSetPrimitiveTopology](#) **must** be of the same [topology class](#) as the pipeline [VkPipelineInputAssemblyStateCreateInfo::topology](#) state

- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveTopology-10286

If a [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) stage is bound, then the [current value](#) of [primitiveTopology](#) **must** be [VK\\_PRIMITIVE\\_TOPOLOGY\\_PATCH\\_LIST](#) prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveTopology-10747

If [vkCmdSetPrimitiveTopology](#) set [primitiveTopology](#) to [VK\\_PRIMITIVE\\_TOPOLOGY\\_PATCH\\_LIST](#) prior to this drawing command, then a [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) stage **must** be bound

- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveTopology-10748  
If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to
- VUID-vkCmdDrawIndexedIndirect2KHR-pStrides-04913  
If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirect2KHR-None-13118  
If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-04914  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirect2KHR-Input-07939  
If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`
- VUID-vkCmdDrawIndexedIndirect2KHR-Input-08734  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`
- VUID-vkCmdDrawIndexedIndirect2KHR-format-08936  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDrawIndexedIndirect2KHR-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawIndexedIndirect2KHR-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the current value of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect2KHR-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect2KHR-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline

state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect2KHR-stage-06481  
The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirect2KHR-None-08885  
There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07619  
If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12239  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12240  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12241  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect2KHR-OpExecutionMode-12242  
If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same
- VUID-vkCmdDrawIndexedIndirect2KHR-None-07312  
If the `maintenance6` feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirect2KHR-primitiveRestartIndex-12401  
If the primitive restart index for this draw operation was set with `vkCmdSetPrimitiveRestartIndexEXT`, then `primitiveRestartIndex` **must** not be greater than the maximum representable value for the bound `VkIndexType`
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13110  
If `pInfo->drawCount` is greater than 0, `pInfo->addressRange.size` **must** be greater than or equal to  $(pInfo->drawCount - 1) \times pInfo->addressRange.stride + sizeof$

#### (VkDrawIndexedIndirectCommand)

- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13111  
If `pInfo->drawCount` is greater than 1, `pInfo->addressRange.stride` **must** not be 0
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13112  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be greater than or equal to `sizeof(VkDrawIndexedIndirectCommand)`
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-13113  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-13059  
`commandBuffer` **must** not be a protected command buffer

### Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdDrawIndexedIndirect2KHR-pInfo-parameter  
`pInfo` **must** be a valid pointer to a valid `VkDrawIndirect2InfoKHR` structure
- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording` state
- VUID-vkCmdDrawIndexedIndirect2KHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdDrawIndexedIndirect2KHR-renderpass  
This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexedIndirect2KHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirect2KHR-vidcoding  
This command **must** only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types             | Command Type |
|-----------------------|-------------------|--------------------|-----------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS_BIT<br>HICS_BIT | Action       |

## Conditional Rendering

`vkCmdDrawIndexedIndirect2KHR` is affected by [conditional rendering](#)

To record an indexed indirect drawing command, call:

```
// Provided by VK_VERSION_1_0
void vkCmdDrawIndexedIndirect(
    VkCommandBuffer          commandBuffer,
    VkBuffer                  buffer,
    VkDeviceSize              offset,
    uint32_t                  drawCount,
    uint32_t                  stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `drawCount` is the number of draws to execute, and **can** be zero.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndexedIndirect` behaves similarly to `vkCmdDrawIndexed` except that the parameters are read by the device from a buffer during execution. `drawCount` draws are executed by the command, with parameters taken from `buffer` starting at `offset` and increasing by `stride` bytes for each successive draw. The parameters of each draw are encoded in an array of `VkDrawIndexedIndirectCommand` structures. If `drawCount` is less than or equal to one, `stride` is ignored.

## Valid Usage

- VUID-vkCmdDrawIndexedIndirect-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexedIndirect-None-08600  
If a [bound shader](#) was created with a pipeline layout and statically uses a set `n`, a descriptor set **must** have been bound to `n` at the same pipeline bind point, with layouts

compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-02707

If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by [bound shaders](#) **must** not be a protected resource

- VUID-vkCmdDrawIndexedIndirect-None-08114

Descriptors in each bound descriptor set, specified via [vkCmdBindDescriptorSets](#), **must** be valid if they are accessed as described by [descriptor validity](#) by the [VkPipeline](#) bound to the pipeline bind point used by this command and the bound [VkPipeline](#) was not created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08115

If the descriptors used by the [VkPipeline](#) bound to the pipeline bind point were specified via [vkCmdBindDescriptorSets](#), the bound [VkPipeline](#) **must** have been created without [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08116

Descriptors in bound descriptor buffers, specified via [vkCmdSetDescriptorBufferOffsetsEXT](#), **must** be valid if they are dynamically used by the [VkPipeline](#) bound to the pipeline bind point used by this command and the bound [VkPipeline](#) was created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08117

If the descriptors used by the [VkPipeline](#) bound to the pipeline bind point were specified via [vkCmdSetDescriptorBufferOffsetsEXT](#), the bound [VkPipeline](#) **must** have been created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08119

If a descriptor is dynamically used with a [VkPipeline](#) created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndexedIndirect-magFilter-04553

If a [VkSampler](#) created with `magFilter` or `minFilter` equal to [VK\\_FILTER\\_LINEAR](#), `reductionMode` equal to [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_WEIGHTED\\_AVERAGE](#), and `compareEnable` equal to [VK\\_FALSE](#) is used to sample a [VkImageView](#) as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_LINEAR\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirect-magFilter-09598

If a [VkSampler](#) created with `magFilter` or `minFilter` equal to [VK\\_FILTER\\_LINEAR](#) and `reductionMode` equal to either [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MIN](#) or [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MAX](#) is used to sample a [VkImageView](#) as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_MINMAX\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirect-mipmapMode-04770

If a [VkSampler](#) created with `mipmapMode` equal to [VK\\_SAMPLER\\_MIPMAP\\_MODE\\_LINEAR](#), `reductionMode` equal to [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_WEIGHTED\\_AVERAGE](#), and

`compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndexedIndirect-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndexedIndirect-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirect-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawIndexedIndirect-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawIndexedIndirect-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndexedIndirect-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawIndexedIndirect-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- VUID-vkCmdDrawIndexedIndirect-None-07888

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- VUID-vkCmdDrawIndexedIndirect-None-02692

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirect-None-02693

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with

VK\_FILTER\_CUBIC\_EXT as a result of this command, it **must** not have a VkImageViewType of VK\_IMAGE\_VIEW\_TYPE\_3D, VK\_IMAGE\_VIEW\_TYPE\_CUBE, or VK\_IMAGE\_VIEW\_TYPE\_CUBE\_ARRAY

- VUID-vkCmdDrawIndexedIndirect-filterCubic-02694

Any VkImageView being sampled with VK\_FILTER\_CUBIC\_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawIndexedIndirect-filterCubicMinmax-02695

Any VkImageView being sampled with VK\_FILTER\_CUBIC\_EXT with a reduction mode of either VK\_SAMPLER\_REDUCTION\_MODE\_MIN or VK\_SAMPLER\_REDUCTION\_MODE\_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07027

For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_WRITE\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07028

For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_READ\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07029

For any VkBufferView being written as a storage texel buffer where the image format field of the OpTypeImage is Unknown, the view's buffer features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_WRITE\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07030

Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view's buffer features **must** contain VK\_FORMAT\_FEATURE\_2\_STORAGE\_READ\_WITHOUT\_FORMAT\_BIT

- VUID-vkCmdDrawIndexedIndirect-None-08601

If a [bound shader](#) was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDrawIndexedIndirect-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndexedIndirect-imageLayout-00344

If an image descriptor is accessed by a shader, the VkImageLayout **must** match the subresource accessible from the VkImageView as defined by the [image layout matching rules](#) or a VkShaderEXT created with a VkDescriptorSetLayout that was created with

[VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndexedIndirect-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndexedIndirect-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirect-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirect-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirect-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirect-viewType-07752

If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#) **must** match the [Dim](#) operand of the [OpTypeImage](#) as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndexedIndirect-format-07753

If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the [numeric type](#) of the view's [format](#) and the [Sampled Type](#) operand of the [OpTypeImage](#) **must** match

- VUID-vkCmdDrawIndexedIndirect-OpImageWrite-08795

If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDrawIndexedIndirect-OpImageWrite-08796  
If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexedIndirect-OpImageWrite-04469  
If a `VkBufferView` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexedIndirect-SampledType-04470  
If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawIndexedIndirect-SampledType-04471  
If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawIndexedIndirect-SampledType-04472  
If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64
- VUID-vkCmdDrawIndexedIndirect-SampledType-04473  
If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32
- VUID-vkCmdDrawIndexedIndirect-sparseImageInt64Atomics-04474  
If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command
- VUID-vkCmdDrawIndexedIndirect-sparseImageInt64Atomics-04475  
If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command
- VUID-vkCmdDrawIndexedIndirect-None-07288  
Any shader invocation executed by this command **must** `terminate`
- VUID-vkCmdDrawIndexedIndirect-None-09600  
If a descriptor with type equal to any of `VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE`, `VK_DESCRIPTOR_TYPE_STORAGE_IMAGE`, or `VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT` is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written
- VUID-vkCmdDrawIndexedIndirect-micromap-11636  
If an acceleration structure is accessed as a result of this command through an

`OpRayQueryProceedKHR` operation, the `VK_EXT_opacity_micromap` extension is not enabled, and the acceleration structure is built using geometry with a `VkAccelerationStructureTrianglesOpacityMicromapKHR` structure included in its `pNext` chain, the shader **must** have specified a `OpacityMicromapIdKHR` execution mode with its specialization constant operand equal to `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndexedIndirect-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkPipeline` bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes `VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR`

- VUID-vkCmdDrawIndexedIndirect-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkShaderEXT` that accessed the descriptor **must** not have been created with `flags` that includes `VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirect-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndexedIndirect-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirect-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader

accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirect-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeSampler` or `OpTypeSampledImage` using that mapping, the calculated offset for the sampler heap **must** be a multiple of `samplerDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirect-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndexedIndirect-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT` or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirect-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_PUSH_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress`

- VUID-vkCmdDrawIndexedIndirect-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndexedIndirect-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using `VK_DESCRIPTOR_MAPPING_SOURCE_INDIRECT_ADDRESS_EXT`, and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid `VkDeviceAddress` backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirect-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexedIndirect-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndexedIndirect-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndexedIndirect-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect-None-11374

If the [robustBufferAccess2](#) feature is not enabled, the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirect-pBindInfo-11375

If any [bound shader](#) uses an embedded sampler via a [descriptor mapping](#), the value of [pBindInfo->reservedRangeSize](#) set for [vkCmdBindSamplerHeapEXT](#) **must** be greater than or equal to [minSamplerHeapReservedRangeWithEmbedded](#)

- VUID-vkCmdDrawIndexedIndirect-None-11376

If a [bound shader](#) was created as a [VkShaderEXT](#) with the

VK\_SHADER\_CREATE\_DESCRIPTOR\_HEAP\_BIT\_EXT flag or as part of a pipeline with the VK\_PIPELINE\_CREATE\_2\_DESCRIPTOR\_HEAP\_BIT\_EXT flag, and that shader statically uses a push constant value, that value **must** have been set by vkCmdPushDataEXT

- VUID-vkCmdDrawIndexedIndirect-None-11398

If a bound shader was created with a descriptor mapping using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_DATA\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_DATA\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_RESOURCE\_HEAP\_DATA\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndexedIndirect-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_ARRAY\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the VK\_BUFFER\_USAGE\_UNIFORM\_BUFFER\_BIT usage flag set

- VUID-vkCmdDrawIndexedIndirect-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the VK\_BUFFER\_USAGE\_UNIFORM\_BUFFER\_BIT usage flag set

- VUID-vkCmdDrawIndexedIndirect-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_RESOURCE\_HEAP\_DATA\_EXT and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to minUniformBufferOffsetAlignment

- VUID-vkCmdDrawIndexedIndirect-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a descriptor mapping using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT, VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT, or VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must**

have been queried from a buffer created with the `VK_BUFFER_USAGE_STORAGE_BUFFER_BIT` usage flag set

- VUID-vkCmdDrawIndexedIndirect-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to `minStorageBufferOffsetAlignment`

- VUID-vkCmdDrawIndexedIndirect-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDrawIndexedIndirect-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndexedIndirect-protectedNoFault-11455

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), the address that the resource is mapped to **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndexedIndirect-protectedNoFault-11456

If `protectedNoFault` is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), the address of the indirect memory **must** have been queried from a buffer created without the `VK_BUFFER_CREATE_PROTECTED_BIT` create flag set

- VUID-vkCmdDrawIndexedIndirect-renderPass-02684

The current render pass **must** be [compatible](#) with the `renderPass` member of the

`VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- VUID-vkCmdDrawIndexedIndirect-subpass-02685  
The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`
- VUID-vkCmdDrawIndexedIndirect-OpTypeImage-07468  
If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass
- VUID-vkCmdDrawIndexedIndirect-None-07469  
Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound `VkFramebuffer` as specified by [Fragment Input Attachment Compatibility](#)
- VUID-vkCmdDrawIndexedIndirect-pDepthInputAttachmentIndex-09595  
Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`
- VUID-vkCmdDrawIndexedIndirect-pDepthInputAttachmentIndex-09596  
Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`
- VUID-vkCmdDrawIndexedIndirect-InputAttachmentIndex-09597  
If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`
- VUID-vkCmdDrawIndexedIndirect-None-06537  
Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect-None-10795  
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command
- VUID-vkCmdDrawIndexedIndirect-None-10796  
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, it **must** not be accessed in any way

other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirect-None-10797

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirect-None-12338

If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirect-None-12339

If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirect-None-12340

If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirect-None-09003

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawIndexedIndirect-None-06886

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled

- VUID-vkCmdDrawIndexedIndirect-None-06887

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)

- VUID-vkCmdDrawIndexedIndirect-None-07831

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_VIEWPORT](#) dynamic state enabled then [vkCmdSetViewport](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07832

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_SCISSOR](#) dynamic state enabled then [vkCmdSetScissor](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_LINE\\_WIDTH](#) dynamic state enabled, the

current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineWidth` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthBiasEnable` is `VK_TRUE`, then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07835

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE` with a blend equations where any `VkBlendFactor` member is `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, then `vkCmdSetBlendConstants` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `depthBoundsTestEnable` is `VK_TRUE`, then `vkCmdSetDepthBounds` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which

was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexedIndirect-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer

prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing

- VUID-vkCmdDrawIndexedIndirect-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- VUID-vkCmdDrawIndexedIndirect-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirect-primitiveFragmentShadingRateWithMultipleViewports-08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirect-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's `format features` do not contain

VK\_FORMAT\_FEATURE\_COLOR\_ATTACHMENT\_BLEND\_BIT, then the corresponding current value of `blendEnable` must be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the current value of `rasterizationSamples` must be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndexedIndirect-None-08876

If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndexedIndirect-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndexedIndirect-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound

graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawIndexedIndirect-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawIndexedIndirect-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles`

- VUID-vkCmdDrawIndexedIndirect-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08918

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of

`VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-imageView-06183

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingLocalRead-11797

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`

- VUID-vkCmdDrawIndexedIndirect-imageView-06184

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07285

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirect-pNext-07935

If this command is called inside a render pass instance started with

`vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirect-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndexedIndirect-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-pDepthAttachment-11540

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo`

`::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawIndexedIndirect-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawIndexedIndirect-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndexedIndirect-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndexedIndirect-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndexedIndirect-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line or point topology class, then the current value of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawIndexedIndirect-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created

with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-None-07639

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-09650

If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the current value of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-rasterizationSamples-07471

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`

- VUID-vkCmdDrawIndexedIndirect-samples-07472

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect-None-09211

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to

this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirect-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment **current value** of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndexedIndirect-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` **current value** of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` **current value** of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` **current value** of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current**

value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current** value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07497

If the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active

- VUID-vkCmdDrawIndexedIndirect-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndexedIndirect-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndexedIndirect-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- VUID-vkCmdDrawIndexedIndirect-None-08686

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`

- VUID-vkCmdDrawIndexedIndirect-None-08687

If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages`

with an element of [VK\\_SHADER\\_STAGE\\_GEOMETRY\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08688

If there is no bound graphics pipeline, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08689

If there is no bound graphics pipeline, and the [taskShader](#) feature is enabled, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_TASK\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08690

If there is no bound graphics pipeline, and the [meshShader](#) feature is enabled, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirect-None-08693

If there is no bound graphics pipeline, and at least one of the [taskShader](#) and [meshShader](#) features is enabled, one of the [VK\\_SHADER\\_STAGE\\_VERTEX\\_BIT](#) or [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#) stages **must** have a valid [VkShaderEXT](#) bound, and the other **must** have no [VkShaderEXT](#) bound

- VUID-vkCmdDrawIndexedIndirect-None-08696

If there is no bound graphics pipeline, and a valid [VkShaderEXT](#) is bound to the [VK\\_SHADER\\_STAGE\\_VERTEX\\_BIT](#) stage, there **must** be no [VkShaderEXT](#) bound to either the [VK\\_SHADER\\_STAGE\\_TASK\\_BIT\\_EXT](#) stage or the [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#) stage

- VUID-vkCmdDrawIndexedIndirect-None-08698

If any graphics shader is bound which was created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag, then all shaders created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag in the same [vkCreateShadersEXT](#) call **must** also be bound

- VUID-vkCmdDrawIndexedIndirect-None-08699

If any graphics shader is bound which was created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag, any stages in between stages whose shaders which did not create a shader with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag as part of the same [vkCreateShadersEXT](#) call **must** not have any [VkShaderEXT](#) bound

- VUID-vkCmdDrawIndexedIndirect-None-08878

All bound graphics shader objects **must** have been created with identical or [identically defined](#) push constant ranges

- VUID-vkCmdDrawIndexedIndirect-None-08879

All bound graphics shader objects **must** have either been created with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag set, or with identical or [identically defined](#) arrays of descriptor set layouts

- VUID-vkCmdDrawIndexedIndirect-pDynamicStates-08715

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_WRITE\\_ENABLE](#) dynamic state enabled, and the fragment

shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-pDynamicStates-08716

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be `0`

- VUID-vkCmdDrawIndexedIndirect-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them

- VUID-vkCmdDrawIndexedIndirect-maxFragmentDualSrcAttachments-09239

If `blending` is enabled for any attachment where either the source or destination blend factors for that attachment *use the secondary color input*, the maximum value of `Location` for any output attachment *statically used* in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`

- VUID-vkCmdDrawIndexedIndirect-None-09548

If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndexedIndirect-None-09549

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect-None-10927

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is *statically used* in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of

`VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirect-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirect-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDrawIndexedIndirect-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawIndexedIndirect-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if **sample shading** is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndexedIndirect-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndexedIndirect-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndexedIndirect-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the

bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexedIndirect-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and

the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirect-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirect-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirect-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirect-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirect-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawIndexedIndirect-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexedIndirect-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexedIndirect-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirect-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound

- VUID-vkCmdDrawIndexedIndirect-None-04008

If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndexedIndirect-None-02721

If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDrawIndexedIndirect-format-10389

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`

- VUID-vkCmdDrawIndexedIndirect-format-10390

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`

- VUID-vkCmdDrawIndexedIndirect-None-07842

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- VUID-vkCmdDrawIndexedIndirect-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current value` of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound

- VUID-vkCmdDrawIndexedIndirect-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawIndexedIndirect-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexedIndirect-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexedIndirect-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawIndexedIndirect-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDrawIndexedIndirect-format-08936

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDrawIndexedIndirect-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the

bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDrawIndexedIndirect-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawIndexedIndirect-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the current value of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY`, there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirect-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or

## VK\_SHADER\_STAGE\_MESH\_BIT\_EXT

- VUID-vkCmdDrawIndexedIndirect-None-08885

There **must** be no shader object bound to either of the [VK\\_SHADER\\_STAGE\\_TASK\\_BIT\\_EXT](#) or [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#) stages

- VUID-vkCmdDrawIndexedIndirect-None-07619

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_EVALUATION\\_BIT](#) stage or a graphics pipeline is bound which was created with both a [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_EVALUATION\\_BIT](#) stage and the [VK\\_DYNAMIC\\_STATE\\_TESSELLATION\\_DOMAIN\\_ORIGIN\\_EXT](#) dynamic state enabled, then [vkCmdSetTessellationDomainOriginEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12239

If a shader is bound to both the [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) and [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_EVALUATION\\_BIT](#) stages, and if both stages contain an [OpExecutionMode](#) instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12240

If a shader is bound to both the [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) and [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_EVALUATION\\_BIT](#) stages, and if both stages contain an [OpExecutionMode](#) instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12241

If a shader is bound to both the [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) and [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_EVALUATION\\_BIT](#) stages, and if both stages contain an [OpExecutionMode](#) instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndexedIndirect-OpExecutionMode-12242

If a shader is bound to both the [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#) and [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_EVALUATION\\_BIT](#) stages, and if both stages contain an [OpExecutionMode](#) instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawIndexedIndirect-buffer-02708

If [buffer](#) is non-sparse then it **must** be bound completely and contiguously to a single [VkDeviceMemory](#) object

- VUID-vkCmdDrawIndexedIndirect-buffer-02709

[buffer](#) **must** have been created with the [VK\\_BUFFER\\_USAGE\\_INDIRECT\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndexedIndirect-offset-02710

[offset](#) **must** be a multiple of 4

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-02711

[commandBuffer](#) **must** not be a protected command buffer

- VUID-vkCmdDrawIndexedIndirect-drawCount-02718

If the [multiDrawIndirect](#) feature is not enabled, [drawCount](#) **must** be 0 or 1

- VUID-vkCmdDrawIndexedIndirect-drawCount-02719

[drawCount](#) **must** be less than or equal to [VkPhysicalDeviceLimits::maxDrawIndirectCount](#)

- VUID-vkCmdDrawIndexedIndirect-None-07312  
If the **maintenance6** feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirect-primitiveRestartIndex-12401  
If the primitive restart index for this draw operation was set with **vkCmdSetPrimitiveRestartIndexEXT**, then **primitiveRestartIndex** **must** not be greater than the maximum representable value for the bound **VkIndexType**
- VUID-vkCmdDrawIndexedIndirect-drawCount-00528  
If **drawCount** is greater than 1, **stride** **must** be a multiple of 4 and **must** be greater than or equal to **sizeof(VkDrawIndexedIndirectCommand)**
- VUID-vkCmdDrawIndexedIndirect-drawCount-00539  
If **drawCount** is equal to 1, (**offset** + **sizeof(VkDrawIndexedIndirectCommand)**) **must** be less than or equal to the size of **buffer**
- VUID-vkCmdDrawIndexedIndirect-drawCount-00540  
If **drawCount** is greater than 1, (**stride** × (**drawCount** - 1) + **offset** + **sizeof(VkDrawIndexedIndirectCommand)**) **must** be less than or equal to the size of **buffer**

### Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-parameter  
**commandBuffer** **must** be a valid **VkCommandBuffer** handle
- VUID-vkCmdDrawIndexedIndirect-buffer-parameter  
**buffer** **must** be a valid **VkBuffer** handle
- VUID-vkCmdDrawIndexedIndirect-commandBuffer-recording  
**commandBuffer** **must** be in the **recording state**
- VUID-vkCmdDrawIndexedIndirect-commandBuffer-cmdpool  
The **VkCommandPool** that **commandBuffer** was allocated from **must** support **VK\_QUEUE\_GRAPHICS\_BIT** operations
- VUID-vkCmdDrawIndexedIndirect-renderpass  
This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexedIndirect-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirect-videocoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndexedIndirect-commonparent  
Both of **buffer**, and **commandBuffer** **must** have been created, allocated, or retrieved from the same **VkDevice**

### Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the **VkCommandPool** that **commandBuffer** was allocated from **must** be externally

synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types         | Command Type |
|-----------------------|-------------------|--------------------|-------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS<br>HICS_BIT | Action       |

## Conditional Rendering

vkCmdDrawIndexedIndirect is affected by [conditional rendering](#)

The `VkDrawIndexedIndirectCommand` structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkDrawIndexedIndirectCommand {
    uint32_t    indexCount;
    uint32_t    instanceCount;
    uint32_t    firstIndex;
    int32_t     vertexOffset;
    uint32_t    firstInstance;
} VkDrawIndexedIndirectCommand;
```

- `indexCount` is the number of vertices to draw.
- `instanceCount` is the number of instances to draw.
- `firstIndex` is the base index within the index buffer.
- `vertexOffset` is the value added to the vertex index before indexing into the vertex buffer.
- `firstInstance` is the instance ID of the first instance to draw.

The members of `VkDrawIndexedIndirectCommand` have the same meaning as the similarly named parameters of [vkCmdDrawIndexed](#).

## Valid Usage

- VUID-VkDrawIndexedIndirectCommand-pNext-09461

If the bound graphics pipeline state was created with [VkPipelineVertexInputDivisorStateCreateInfo](#) in the `pNext` chain of [VkGraphicsPipelineCreateInfo::pVertexInputState](#), any member of [VkPipelineVertexInputDivisorStateCreateInfo::pVertexBindingDivisors](#) has a value other than 1 in `divisor`, and [VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance](#) is `VK_FALSE`, then `firstInstance` must be 0

- VUID-VkDrawIndexedIndirectCommand-None-09462

If [shader objects](#) are used for drawing or the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_VERTEX\\_INPUT\\_EXT](#) dynamic state enabled, any member of the [pVertexBindingDescriptions](#) parameter to the [vkCmdSetVertexInputEXT](#) call that sets this dynamic state has a value other than 1 in [divisor](#), and [VkPhysicalDeviceVertexAttributeDivisorProperties::supportsNonZeroFirstInstance](#) is [VK\\_FALSE](#), then [firstInstance](#) **must** be 0

- VUID-VkDrawIndexedIndirectCommand-robustBufferAccess2-08798

If the [robustBufferAccess2](#) feature is not enabled,  $(\text{indexSize} \times (\text{firstIndex} + \text{indexCount}))$  **must** be less than or equal to the size of the [bound index buffer range](#), with [indexSize](#) being based on the type specified by [indexType](#), and the other parameters sourced from this command

- VUID-VkDrawIndexedIndirectCommand-firstInstance-00554

If the [drawIndirectFirstInstance](#) feature is not enabled, [firstInstance](#) **must** be 0

To record a non-indexed indirect drawing command, call:

```
// Provided by VK_KHR_device_address_commands with VK_KHR_draw_indirect_count or
VK_VERSION_1_2
void vkCmdDrawIndexedIndirectCount2KHR(
    VkCommandBuffer                commandBuffer,
    const VkDrawIndirectCount2InfoKHR* pInfo);
```

- [commandBuffer](#) is the command buffer into which the command is recorded.
- [pInfo](#) is a pointer to a [VkDrawIndirectCount2InfoKHR](#) structure defining parameters of this command.

[vkCmdDrawIndexedIndirectCount2KHR](#) behaves similarly to [vkCmdDrawIndexedIndirect2KHR](#) except that the draw count is read by the device from an address range during execution. The command will read an unsigned 32-bit integer from [pInfo->countAddressRange](#) and use this as the draw count.

## Valid Usage

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08606

If the [shaderObject](#) feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08600

If a [bound shader](#) was created with a pipeline layout and statically uses a set  $n$ , a descriptor set **must** have been bound to  $n$  at the same pipeline bind point, with layouts compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-02707

If [commandBuffer](#) is an unprotected command buffer and [protectedNoFault](#) is not supported, any resource accessed by [bound shaders](#) **must** not be a protected resource

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08114  
Descriptors in each bound descriptor set, specified via [vkCmdBindDescriptorSets](#), **must** be valid if they are accessed as described by [descriptor validity](#) by the [VkPipeline](#) bound to the pipeline bind point used by this command and the bound [VkPipeline](#) was not created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08115  
If the descriptors used by the [VkPipeline](#) bound to the pipeline bind point were specified via [vkCmdBindDescriptorSets](#), the bound [VkPipeline](#) **must** have been created without [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08116  
Descriptors in bound descriptor buffers, specified via [vkCmdSetDescriptorBufferOffsetsEXT](#), **must** be valid if they are dynamically used by the [VkPipeline](#) bound to the pipeline bind point used by this command and the bound [VkPipeline](#) was created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08117  
If the descriptors used by the [VkPipeline](#) bound to the pipeline bind point were specified via [vkCmdSetDescriptorBufferOffsetsEXT](#), the bound [VkPipeline](#) **must** have been created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08119  
If a descriptor is dynamically used with a [VkPipeline](#) created with [VK\\_PIPELINE\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirectCount2KHR-magFilter-04553  
If a [VkSampler](#) created with [magFilter](#) or [minFilter](#) equal to [VK\\_FILTER\\_LINEAR](#), [reductionMode](#) equal to [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_WEIGHTED\\_AVERAGE](#), and [compareEnable](#) equal to [VK\\_FALSE](#) is used to sample a [VkImageView](#) as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_LINEAR\\_BIT](#)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-magFilter-09598  
If a [VkSampler](#) created with [magFilter](#) or [minFilter](#) equal to [VK\\_FILTER\\_LINEAR](#) and [reductionMode](#) equal to either [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MIN](#) or [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MAX](#) is used to sample a [VkImageView](#) as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_MINMAX\\_BIT](#)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-mipmapMode-04770  
If a [VkSampler](#) created with [mipmapMode](#) equal to [VK\\_SAMPLER\\_MIPMAP\\_MODE\\_LINEAR](#), [reductionMode](#) equal to [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_WEIGHTED\\_AVERAGE](#), and [compareEnable](#) equal to [VK\\_FALSE](#) is used to sample a [VkImageView](#) as a result of this command, then the image view's [format features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_SAMPLED\\_IMAGE\\_FILTER\\_LINEAR\\_BIT](#)
- VUID-vkCmdDrawIndexedIndirectCount2KHR-mipmapMode-09599  
If a [VkSampler](#) created with [mipmapMode](#) equal to [VK\\_SAMPLER\\_MIPMAP\\_MODE\\_LINEAR](#) and [reductionMode](#) equal to either [VK\\_SAMPLER\\_REDUCTION\\_MODE\\_MIN](#) or

`VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-unnormalizedCoordinates-09635  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08609  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08610  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08611  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06479  
If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02691  
If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07888  
If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02692  
If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02693  
If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-filterCubic-02694  
Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as

specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-filterCubicMinmax-02695  
Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07027  
For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07028  
For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07029  
For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's `buffer features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07030  
Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's `buffer features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08601  
If a `bound shader` was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are `compatible` with the push constant range used to create the shader
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10068  
For each array of resources that is used by a `bound shader`, the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-imageLayout-00344  
If an image descriptor is accessed by a shader, the `VkImageLayout` **must** match the subresource accessible from the `VkImageView` as defined by the `image layout matching rules` or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08608  
If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the `VkPipeline` object bound to the pipeline bind point used by this command, since that

pipeline was bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirectCount2KHR-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewType-07752

If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#) **must** match the [Dim](#) operand of the [OpTypeImage](#) as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-07753

If a [VkImageView](#) or [VkBufferView](#) is accessed as a result of this command, then the [numeric type](#) of the view's [format](#) and the [Sampled Type](#) operand of the [OpTypeImage](#) **must** match

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpImageWrite-08795

If a [VkImageView](#) created with a format other than [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpImageWrite-08796

If a [VkImageView](#) created with the format [VK\\_FORMAT\\_A8\\_UNORM](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have four components

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpImageWrite-04469

If a [VkBufferView](#) is accessed using [OpImageWrite](#) as a result of this command, then the [Type](#) of the [Texel](#) operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04470

If a [VkImageView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64

- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04471

If a [VkImageView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32

- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04472

If a [VkBufferView](#) with a [VkFormat](#) that has a 64-bit component width is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 64

- VUID-vkCmdDrawIndexedIndirectCount2KHR-SampledType-04473

If a [VkBufferView](#) with a [VkFormat](#) that has a component width less than 64-bit is accessed as a result of this command, the [SampledType](#) of the [OpTypeImage](#) operand of that instruction **must** have a [Width](#) of 32

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sparseImageInt64Atomics-04474

If the [sparseImageInt64Atomics](#) feature is not enabled, [VkImage](#) objects created with the [VK\\_IMAGE\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sparseImageInt64Atomics-04475

If the [sparseImageInt64Atomics](#) feature is not enabled, [VkBuffer](#) objects created with the [VK\\_BUFFER\\_CREATE\\_SPARSE\\_RESIDENCY\\_BIT](#) flag **must** not be accessed by atomic instructions through an [OpTypeImage](#) with a [SampledType](#) with a [Width](#) of 64 by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07288

Any shader invocation executed by this command **must** [terminate](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09600

If a descriptor with type equal to any of [VK\\_DESCRIPTOR\\_TYPE\\_SAMPLED\\_IMAGE](#), [VK\\_DESCRIPTOR\\_TYPE\\_STORAGE\\_IMAGE](#), or [VK\\_DESCRIPTOR\\_TYPE\\_INPUT\\_ATTACHMENT](#) is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11636

If an acceleration structure is accessed as a result of this command through an [OpRayQueryProceedKHR](#) operation, the [VK\\_EXT\\_opacity\\_micromap](#) extension is not enabled, and the acceleration structure is built using geometry with a [VkAccelerationStructureTrianglesOpacityMicromapKHR](#) structure included in its [pNext](#) chain, the shader **must** have specified a [OpacityMicromapIdKHR](#) execution mode with its specialization constant operand equal to [VK\\_TRUE](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkPipeline` bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes `VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkShaderEXT` that accessed the descriptor **must** not have been created with `flags` that includes `VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses a `OpTypeStruct` decorated with `Block` or `BufferBlock` using that mapping, the calculated offset for the resource heap **must** be a multiple of `bufferDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping` using `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_PUSH_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_SHADER_RECORD_INDEX_EXT`, `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_ARRAY_EXT`, or `VK_DESCRIPTOR_MAPPING_SOURCE_HEAP_WITH_INDIRECT_INDEX_EXT`, and a shader accesses an `OpTypeImage` or `OpTypeSampledImage` using that mapping, the calculated offset for the resource heap **must** be a multiple of `imageDescriptorAlignment`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a `descriptor mapping`

using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeSampler](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the sampler heap **must** be a multiple of [samplerDescriptorAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address

in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11374

If the [robustBufferAccess2](#) feature is not enabled, the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or storage texel buffer, that shader **must** not access values outside of the range of the buffer as specified by [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pBindInfo-11375

If any [bound shader](#) uses an embedded sampler via a [descriptor mapping](#), the value of [pBindInfo->reservedRangeSize](#) set for [vkCmdBindSamplerHeapEXT](#) **must** be greater than or equal to [minSamplerHeapReservedRangeWithEmbedded](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11376

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, and that shader statically uses a push constant value, that value **must** have been set by [vkCmdPushDataEXT](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11398

If a [bound shader](#) was created with a [descriptor mapping](#) using

VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_DATA\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_DATA\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_RESOURCE\_HEAP\_DATA\_EXT, or  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the buffer from which the address in push data was queried **must** have been created with the [VK\\_BUFFER\\_USAGE\\_UNIFORM\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_UNIFORM\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_RESOURCE\\_HEAP\\_DATA\\_EXT](#) and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to [minUniformBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#)

using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to [minStorageBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndexedIndirectCount2KHR-protectedNoFault-11455

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), the address that the resource is mapped to **must** have been queried from a buffer created without the [VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-protectedNoFault-11456

If [protectedNoFault](#) is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), the address of the indirect memory **must** have been queried from a buffer created without the [VK\\_BUFFER\\_CREATE\\_PROTECTED\\_BIT](#) create flag set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-renderPass-02684

The current render pass **must** be [compatible](#) with the [renderPass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to [VK\\_PIPELINE\\_BIND\\_POINT\\_GRAPHICS](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-subpass-02685

The subpass index of the current render pass **must** be equal to the [subpass](#) member of the [VkGraphicsPipelineCreateInfo](#) structure specified when creating the [VkPipeline](#) bound to

## VK\_PIPELINE\_BIND\_POINT\_GRAPHICS

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpTypeImage-07468

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07469

Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments` [`InputAttachmentIndex`] in the bound `VkFramebuffer` as specified by [Fragment Input Attachment Compatibility](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a `InputAttachmentIndex` referenced by `VkRenderingInputAttachmentIndexInfo`, or no `InputAttachmentIndex` if `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` or `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are `NULL`, **must** be created with a `VkImageView` that is compatible with the corresponding color, depth, or stencil attachment in `VkRenderingInfo`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an `InputAttachmentIndex` if both `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` and `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` are non-`NULL`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06537

Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10795

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10796

If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10797

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_STENCIL_BIT` on that attachment, it **must** not be accessed in any way

other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12338

If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_COLOR\\_BIT](#) on that attachment, the color attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12339

If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_DEPTH\\_BIT](#) on that attachment, the depth attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-12340

If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and [feedback loop](#) is not enabled for [VK\\_IMAGE\\_ASPECT\\_STENCIL\\_BIT](#) on that attachment, the stencil attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09003

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06886

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, [depth writes](#) **must** be disabled

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06887

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back [writeMask](#) are not zero, and stencil test is enabled, [all stencil ops](#) **must** be [VK\\_STENCIL\\_OP\\_KEEP](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07831

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_VIEWPORT](#) dynamic state enabled then [vkCmdSetViewport](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07832

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_SCISSOR](#) dynamic state enabled then [vkCmdSetScissor](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_LINE\\_WIDTH](#) dynamic state enabled, the [current value](#) of [rasterizerDiscardEnable](#) is [VK\\_FALSE](#), and the [effective rasterization input topology](#) is in the line topology class, then [vkCmdSetLineWidth](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBiasEnable` is `VK_TRUE`, then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07835

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment `current value` of `blendEnable` is `VK_TRUE` with a blend equations where any `VkBlendFactor` member is `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, then `vkCmdSetBlendConstants` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `depthBoundsTestEnable` is `VK_TRUE`, then `vkCmdSetDepthBounds` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-maxMultiviewInstanceIndex-02688  
If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-02689  
If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07634  
If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-06666  
If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07840  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07841  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07843  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07844  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current

value of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, the **current value** of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing

- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveFragmentShadingRateWithMultipleViewports-08642

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirectCount2KHR-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding `current value` of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is

enabled:

- the `multisampledRenderToSingleSampled` feature

then the `current value` of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08912

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08911

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07749

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-attachmentCount-07750

If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07751

If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the

VK\_DYNAMIC\_STATE\_DISCARD\_RECTANGLE\_MODE\_EXT dynamic state enabled, the current value of rasterizerDiscardEnable is VK\_FALSE, and the current value of discardRectangleEnable is VK\_TRUE, then vkCmdSetDiscardRectangleModeEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK\_NULL\_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK\_FORMAT\_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK\_NULL\_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK\_NULL\_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format **must** be VK\_FORMAT\_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08916

If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK\_NULL\_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to VK\_FORMAT\_UNDEFINED

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08917

If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK\_NULL\_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the bound graphics pipeline **must** be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-08918

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-imageView-06183

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingLocalRead-11797

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-imageView-06184

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-multisampledRenderToSingleSampled-07285

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount2KHR-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and

`vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pNext-07935

If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthAttachment-11540

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the

`VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07622  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07623  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-alphaToCoverageEnable-08919  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-alphaToCoverageEnable-08920  
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07624  
If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07625  
If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07626  
If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07627  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics

pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-conservativePointAndLineRasterization-07499

If the `VK_EXT_conservative_rasterization` extension is enabled, `conservativePointAndLineRasterization` is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line or point topology class, then the current value of `conservativeRasterizationMode` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07633

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics

stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state, then `vkCmdSetDepthClipEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07636

If the `VK_EXT_provoking_vertex` extension is enabled, a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetProvokingVertexModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08666

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08669

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the effective rasterization input topology is in the line topology class, then `vkCmdSetLineStippleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07849

If any of the `stippledRectangularLines`, `stippledBresenhamLines` or `stippledSmoothLines` features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stippledLineEnable` is `VK_TRUE`, then `vkCmdSetLineStipple` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, the effective rasterization input topology is in the line topology class, and the current `lineRasterizationMode` is `VK_LINE_RASTERIZATION_MODE_BRESENHAM` or `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the current `alphaToCoverageEnable`, `alphaToOneEnable` and `sampleShadingEnable` states **must** all be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07639  
If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled, then `vkCmdSetDepthClipNegativeOneToOneEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09650  
If the `depthClampControl` feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_RANGE_EXT` dynamic state enabled, and the `current value` of `depthClampEnable` is `VK_TRUE`, then `vkCmdSetDepthClampRangeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount2KHR-rasterizationSamples-07471  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** follow the rules for a `zero-attachment subpass`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-samples-07472  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount2KHR-samples-07473  
If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` **must** be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09211  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure
- VUID-vkCmdDrawIndexedIndirectCount2KHR-firstAttachment-07476  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to

`vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirectCount2KHR-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirectCount2KHR-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitivesGeneratedQueryWithNonZeroStreams-07481

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the

`VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the **current value** of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then

`sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07495

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07496

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07497

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled

- VUID-vkCmdDrawIndexedIndirectCount2KHR-stippledLineEnable-07498

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-stage-07073

If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08877

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-nextStage-10745

For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage in the logical pipeline

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08684

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08685

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages`

with an element of [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_CONTROL\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08686

If there is no bound graphics pipeline, and the [tessellationShader](#) feature is enabled, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_TESSELLATION\\_EVALUATION\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08687

If there is no bound graphics pipeline, and the [geometryShader](#) feature is enabled, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_GEOMETRY\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08688

If there is no bound graphics pipeline, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08689

If there is no bound graphics pipeline, and the [taskShader](#) feature is enabled, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_TASK\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08690

If there is no bound graphics pipeline, and the [meshShader](#) feature is enabled, [vkCmdBindShadersEXT](#) **must** have been called in the current command buffer with [pStages](#) with an element of [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08693

If there is no bound graphics pipeline, and at least one of the [taskShader](#) and [meshShader](#) features is enabled, one of the [VK\\_SHADER\\_STAGE\\_VERTEX\\_BIT](#) or [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#) stages **must** have a valid [VkShaderEXT](#) bound, and the other **must** have no [VkShaderEXT](#) bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08696

If there is no bound graphics pipeline, and a valid [VkShaderEXT](#) is bound to the [VK\\_SHADER\\_STAGE\\_VERTEX\\_BIT](#) stage, there **must** be no [VkShaderEXT](#) bound to either the [VK\\_SHADER\\_STAGE\\_TASK\\_BIT\\_EXT](#) stage or the [VK\\_SHADER\\_STAGE\\_MESH\\_BIT\\_EXT](#) stage

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08698

If any graphics shader is bound which was created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag, then all shaders created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag in the same [vkCreateShadersEXT](#) call **must** also be bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08699

If any graphics shader is bound which was created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag, any stages in between stages whose shaders which did not create a shader with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag as part of the same [vkCreateShadersEXT](#) call **must** not have any [VkShaderEXT](#) bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08878

All bound graphics shader objects **must** have been created with identical or [identically defined](#) push constant ranges

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08879  
All bound graphics shader objects **must** have either been created with the `VK_SHADER_CREATE_DESCRIPTOR_HEAP_BIT_EXT` flag set, or with identical or **identically defined** arrays of descriptor set layouts
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDynamicStates-08715  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDynamicStates-08716  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be `0`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09116  
If a shader object is bound to any graphics stage or the bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, `VK_COLOR_COMPONENT_B_BIT`, and `VK_COLOR_COMPONENT_A_BIT`, or none of them
- VUID-vkCmdDrawIndexedIndirectCount2KHR-maxFragmentDualSrcAttachments-09239  
If **blending** is enabled for any attachment where either the source or destination blend factors for that attachment **use the secondary color input**, the maximum value of `Location` for any output attachment **statically used** in the `Fragment Execution Model` executed by this command **must** be less than `maxFragmentDualSrcAttachments`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09548  
If the current render pass was begun with `vkCmdBeginRendering`, there is no shader object bound to any graphics stage, the value of each element of `VkRenderingAttachmentLocationInfo::pColorAttachmentLocations` in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09549  
If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, for each element of `VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices` in the bound pipeline, if either `pColorAttachmentInputIndices[i]` or the value for the corresponding index set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10927  
If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader

object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10928

If the current render pass was begun with `vkCmdBeginRendering`, and there is no shader object bound to any graphics stage, if either the value of `VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex` in the bound pipeline or the corresponding value set currently in the current render pass instance is **statically used** in the bound pipeline in an `InputAttachmentIndex` decoration, the two values **must** match

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09642

If the current render pass was begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09643

If the bound graphics pipeline was created with `VK_PIPELINE_CREATE_2_ENABLE_LEGACY_DITHERING_BIT_EXT`, the current render pass **must** have begun with `vkCmdBeginRendering` with the `VK_RENDERING_ENABLE_LEGACY_DITHERING_BIT_EXT` flag

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10772

If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass

- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-11521

If current render pass instance was begun with `vkCmdBeginRendering` with `VkRenderingInfo::flags` which includes `VK_RENDERING_FRAGMENT_REGION_BIT_EXT`, and if **sample shading** is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11522

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11523

If the current render pass instance was begun with `vkCmdBeginRendering` and does not contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11525  
If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11861  
If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11862  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11863  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-11864  
If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11865  
If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11866  
If current render pass instance was begun with `vkCmdBeginRendering`, it contains a

custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`,

`vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexedIndirectCount2KHR-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with

`VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04008

If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-02721

If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-10389

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-10390

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07842

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveTopology-10286

If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current`

value of `primitiveTopology` must be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveTopology-10747

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage must be bound

- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveTopology-10748

If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` must have a `PointSize` decorated variable that is statically written to

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pStrides-04913

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` must have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-13118

If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04914

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` must have been called and not subsequently `invalidated` in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-Input-07939

If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` must contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-Input-08734

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is

64-bit, then the numeric type associated with all **Input** variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** be the same as **VkVertexInputAttributeDescription2EXT::format**

- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-08936

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and **VkVertexInputAttributeDescription2EXT::format** has a 64-bit component, then the scalar width associated with all **Input** variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** be 64-bit

- VUID-vkCmdDrawIndexedIndirectCount2KHR-format-08937

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and the scalar width associated with a **Location** decorated **Input** variable in the **Vertex Execution Model OpEntryPoint** is 64-bit, then the corresponding **VkVertexInputAttributeDescription2EXT::format** **must** have a 64-bit component

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09203

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VERTEX\_INPUT\_EXT** dynamic state enabled and **VkVertexInputAttributeDescription2EXT::format** has a 64-bit component, then all **Input** variables at the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** **must** not use components that are not present in the format

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04875

If there is a shader object bound to the **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage or the bound graphics pipeline state was created with both a **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT** stage and the **VK\_DYNAMIC\_STATE\_PATCH\_CONTROL\_POINTS\_EXT** dynamic state enabled, and the current value of **primitiveTopology** is **VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST**, then **vkCmdSetPatchControlPointsEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-04879

If there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE** dynamic state enabled then **vkCmdSetPrimitiveRestartEnable** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-09637

If the **primitiveTopologyListRestart** feature is not enabled, the **input assembly** is **VK\_PRIMITIVE\_TOPOLOGY\_POINT\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST**, **VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST\_WITH\_ADJACENCY**, or **VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST\_WITH\_ADJACENCY**, there is a shader object bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or the bound graphics pipeline state

was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled, then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-10909

If the `primitiveTopologyPatchListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-stage-06481

The bound graphics pipeline **must** not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of any element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-08885

There **must** be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages

- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07619

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage and the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled, then `vkCmdSetTessellationDomainOriginEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12239

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12240

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12241

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount2KHR-OpExecutionMode-12242

If a shader is bound to both the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` and `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stages, and if both stages contain an `OpExecutionMode` instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13110

If `pInfo->maxDrawCount` is greater than 0, `pInfo->addressRange.size` **must** be greater than or equal to  $(pInfo->maxDrawCount - 1) \times pInfo->addressRange.stride + \text{sizeof}(\text{VkDrawIndexedIndirectCommand})$

- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13111  
If `pInfo->maxDrawCount` is greater than 1, `pInfo->addressRange.stride` **must** not be 0
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13112  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be greater than or equal to `sizeof(VkDrawIndexedIndirectCommand)`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-13113  
If `pInfo->addressRange.stride` is not 0, `pInfo->addressRange.stride` **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirectCount2KHR-None-07312  
If the `maintenance6` feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount2KHR-primitiveRestartIndex-12401  
If the primitive restart index for this draw operation was set with `vkCmdSetPrimitiveRestartIndexEXT`, then `primitiveRestartIndex` **must** not be greater than the maximum representable value for the bound `VkIndexType`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-13060  
`commandBuffer` **must** not be a protected command buffer
- VUID-vkCmdDrawIndexedIndirectCount2KHR-drawIndirectCount-13120  
If the `drawIndirectCount` feature is not enabled this function **must** not be used

### Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-parameter  
`commandBuffer` **must** be a valid `VkCommandBuffer` handle
- VUID-vkCmdDrawIndexedIndirectCount2KHR-pInfo-parameter  
`pInfo` **must** be a valid pointer to a valid `VkDrawIndirectCount2InfoKHR` structure
- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-recording  
`commandBuffer` **must** be in the `recording state`
- VUID-vkCmdDrawIndexedIndirectCount2KHR-commandBuffer-cmdpool  
The `VkCommandPool` that `commandBuffer` was allocated from **must** support `VK_QUEUE_GRAPHICS_BIT` operations
- VUID-vkCmdDrawIndexedIndirectCount2KHR-renderpass  
This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexedIndirectCount2KHR-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirectCount2KHR-videocoding  
This command **must** only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally

synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types         | Command Type |
|-----------------------|-------------------|--------------------|-------------------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS<br>HICS_BIT | Action       |

## Conditional Rendering

vkCmdDrawIndexedIndirectCount2KHR is affected by [conditional rendering](#)

To record an indexed draw call with a draw call count sourced from a buffer, call:

```
// Provided by VK_VERSION_1_2
void vkCmdDrawIndexedIndirectCount(
    VkCommandBuffer          commandBuffer,
    VkBuffer                  buffer,
    VkDeviceSize              offset,
    VkBuffer                  countBuffer,
    VkDeviceSize              countBufferOffset,
    uint32_t                  maxDrawCount,
    uint32_t                  stride);
```

```
// Provided by VK_KHR_draw_indirect_count
// Equivalent to vkCmdDrawIndexedIndirectCount
void vkCmdDrawIndexedIndirectCountKHR(
    VkCommandBuffer          commandBuffer,
    VkBuffer                  buffer,
    VkDeviceSize              offset,
    VkBuffer                  countBuffer,
    VkDeviceSize              countBufferOffset,
    uint32_t                  maxDrawCount,
    uint32_t                  stride);
```

- **commandBuffer** is the command buffer into which the command is recorded.
- **buffer** is the buffer containing draw parameters.
- **offset** is the byte offset into **buffer** where parameters begin.
- **countBuffer** is the buffer containing the draw count.
- **countBufferOffset** is the byte offset into **countBuffer** where the draw count begins.

- **maxDrawCount** specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in **countBuffer** and **maxDrawCount**.
- **stride** is the byte stride between successive sets of draw parameters.

**vkCmdDrawIndexedIndirectCount** behaves similarly to **vkCmdDrawIndexedIndirect** except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from **countBuffer** located at **countBufferOffset** and use this as the draw count.

### Valid Usage

- VUID-vkCmdDrawIndexedIndirectCount-None-08606  
If the **shaderObject** feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndexedIndirectCount-None-08600  
If a **bound shader** was created with a pipeline layout and statically uses a set *n*, a descriptor set **must** have been bound to *n* at the same pipeline bind point, with layouts compatible for set *n* with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-02707  
If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported, any resource accessed by **bound shaders** **must** not be a protected resource
- VUID-vkCmdDrawIndexedIndirectCount-None-08114  
Descriptors in each bound descriptor set, specified via **vkCmdBindDescriptorSets**, **must** be valid if they are accessed as described by **descriptor validity** by the **VkPipeline** bound to the pipeline bind point used by this command and the bound **VkPipeline** was not created with **VK\_PIPELINE\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT**
- VUID-vkCmdDrawIndexedIndirectCount-None-08115  
If the descriptors used by the **VkPipeline** bound to the pipeline bind point were specified via **vkCmdBindDescriptorSets**, the bound **VkPipeline** **must** have been created without **VK\_PIPELINE\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT**
- VUID-vkCmdDrawIndexedIndirectCount-None-08116  
Descriptors in bound descriptor buffers, specified via **vkCmdSetDescriptorBufferOffsetsEXT**, **must** be valid if they are dynamically used by the **VkPipeline** bound to the pipeline bind point used by this command and the bound **VkPipeline** was created with **VK\_PIPELINE\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT**
- VUID-vkCmdDrawIndexedIndirectCount-None-08117  
If the descriptors used by the **VkPipeline** bound to the pipeline bind point were specified via **vkCmdSetDescriptorBufferOffsetsEXT**, the bound **VkPipeline** **must** have been created with **VK\_PIPELINE\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT**
- VUID-vkCmdDrawIndexedIndirectCount-None-08119  
If a descriptor is dynamically used with a **VkPipeline** created with **VK\_PIPELINE\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT**, or a **VkShaderEXT** created with a **VkDescriptorSetLayout** that was created with

VK\_DESCRIPTOR\_SET\_LAYOUT\_CREATE\_DESCRIPTOR\_BUFFER\_BIT\_EXT, the descriptor memory **must** be resident

- VUID-vkCmdDrawIndexedIndirectCount-magFilter-04553  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-magFilter-09598  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-mipmapMode-04770  
If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-mipmapMode-09599  
If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-unnormalizedCoordinates-09635  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1
- VUID-vkCmdDrawIndexedIndirectCount-None-08609  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`
- VUID-vkCmdDrawIndexedIndirectCount-None-08610  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name
- VUID-vkCmdDrawIndexedIndirectCount-None-08611  
If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndexedIndirectCount-None-06479  
If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-None-02691  
If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-None-07888  
If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-None-02692  
If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirectCount-None-02693  
If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`
- VUID-vkCmdDrawIndexedIndirectCount-filterCubic-02694  
Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`
- VUID-vkCmdDrawIndexedIndirectCount-filterCubicMinmax-02695  
Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`
- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07027  
For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07028  
For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07029  
For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's `buffer features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07030  
Any [VkBufferView](#) being read as a storage texel buffer where the image format field of the [OpTypeImage](#) is [Unknown](#) then the view's [buffer features](#) **must** contain [VK\\_FORMAT\\_FEATURE\\_2\\_STORAGE\\_READ\\_WITHOUT\\_FORMAT\\_BIT](#)
- VUID-vkCmdDrawIndexedIndirectCount-None-08601  
If a [bound shader](#) was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader
- VUID-vkCmdDrawIndexedIndirectCount-None-10068  
For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command
- VUID-vkCmdDrawIndexedIndirectCount-imageLayout-00344  
If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident
- VUID-vkCmdDrawIndexedIndirectCount-None-08608  
If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound
- VUID-vkCmdDrawIndexedIndirectCount-uniformBuffers-06935  
If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount-None-08612  
If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount-storageBuffers-06936  
If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndexedIndirectCount-None-08613  
If the **robustBufferAccess** feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point
- VUID-vkCmdDrawIndexedIndirectCount-viewType-07752  
If a **VkImageView** is accessed as a result of this command, then the image view's **viewType** **must** match the **Dim** operand of the **OpTypeImage** as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)
- VUID-vkCmdDrawIndexedIndirectCount-format-07753  
If a **VkImageView** or **VkBufferView** is accessed as a result of this command, then the **numeric type** of the view's **format** and the **Sampled Type** operand of the **OpTypeImage** **must** match
- VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-08795  
If a **VkImageView** created with a format other than **VK\_FORMAT\_A8\_UNORM** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the image view's format
- VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-08796  
If a **VkImageView** created with the format **VK\_FORMAT\_A8\_UNORM** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have four components
- VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-04469  
If a **VkBufferView** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the buffer view's format
- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04470  
If a **VkImageView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64
- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04471  
If a **VkImageView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32
- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04472  
If a **VkBufferView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64
- VUID-vkCmdDrawIndexedIndirectCount-SampledType-04473  
If a **VkBufferView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32
- VUID-vkCmdDrawIndexedIndirectCount-sparseImageInt64Atomics-04474  
If the **sparseImageInt64Atomics** feature is not enabled, **VkImage** objects created with the **VK\_IMAGE\_CREATE\_SPARSE\_RESIDENCY\_BIT** flag **must** not be accessed by atomic

instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command

- VUID-vkCmdDrawIndexedIndirectCount-sparseImageInt64Atomics-04475

If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-07288

Any shader invocation executed by this command **must** `terminate`

- VUID-vkCmdDrawIndexedIndirectCount-None-09600

If a descriptor with type equal to any of `VK_DESCRIPTOR_TYPE_SAMPLED_IMAGE`, `VK_DESCRIPTOR_TYPE_STORAGE_IMAGE`, or `VK_DESCRIPTOR_TYPE_INPUT_ATTACHMENT` is accessed as a result of this command, all image subresources identified by that descriptor **must** be in the image layout identified when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount-micromap-11636

If an acceleration structure is accessed as a result of this command through an `OpRayQueryProceedKHR` operation, the `VK_EXT_opacity_micromap` extension is not enabled, and the acceleration structure is built using geometry with a `VkAccelerationStructureTrianglesOpacityMicromapKHR` structure included in its `pNext` chain, the shader **must** have specified a `OpacityMicromapIdKHR` execution mode with its specialization constant operand equal to `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount-micromap-11637

If an acceleration structure is accessed as a result of this command and the acceleration structure was constructed through deserialization, all micromap arrays referenced by the acceleration structure that were not replaced by an acceleration structure update command **must** have been deserialized using the serialized data of the corresponding micromaps used to originally build the acceleration structure prior to the execution of this command on the device

- VUID-vkCmdDrawIndexedIndirectCount-micromap-11638

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkPipeline` bound to the pipeline bind point used by this command **must** not have been created with `flags` that includes `VK_PIPELINE_CREATE_2_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_KHR`

- VUID-vkCmdDrawIndexedIndirectCount-micromap-11639

If an acceleration structure is accessed as a result of this command and the acceleration structure is built using geometry with an `indexBuffer` containing both `VkOpacityMicromapSpecialIndexKHR` values and indices into an associated micromap array, any `VkShaderEXT` that accessed the descriptor **must** not have been created with `flags` that includes `VK_SHADER_CREATE_OPACITY_MICROMAP_DISALLOW_MIXED_SPECIAL_INDEX_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount-None-12472

Descriptors dynamically accessed in bound descriptor heaps **must** be valid

- VUID-vkCmdDrawIndexedIndirectCount-None-11297

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a [OpTypeStruct](#) decorated with [Block](#) or [BufferBlock](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [bufferDescriptorAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-11298

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeImage](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the resource heap **must** be a multiple of [imageDescriptorAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-11299

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_PUSH\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_SHADER\\_RECORD\\_INDEX\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses an [OpTypeSampler](#) or [OpTypeSampledImage](#) using that mapping, the calculated offset for the sampler heap **must** be a multiple of [samplerDescriptorAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-11300

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 4

- VUID-vkCmdDrawIndexedIndirectCount-None-11301

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_ARRAY\\_EXT](#) or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_HEAP\\_WITH\\_INDIRECT\\_INDEX\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirectCount-None-11302

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound

to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-11304

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a multiple of 8

- VUID-vkCmdDrawIndexedIndirectCount-None-11305

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address at the expected location in push data **must** be a valid [VkDeviceAddress](#) backed by physical memory at every offset specified by each mapping

- VUID-vkCmdDrawIndexedIndirectCount-None-11306

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a resource using that mapping, the value of the address pointed to by the address in push data **must** be a valid [VkDeviceAddress](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-11308

For each [descriptor heap](#) that is statically used by a [bound shader](#), either directly or via a [descriptor mapping](#), a valid descriptor heap **must** be bound

- VUID-vkCmdDrawIndexedIndirectCount-None-11309

If a [bound shader](#) was created as a [VkShaderEXT](#) with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag or as part of a pipeline with the [VK\\_PIPELINE\\_CREATE\\_2\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag, execution of this command **must** not result in any descriptor read accessing data outside of the user range of the respective heap bound by [vkCmdBind\\*HeapEXT](#) commands

- VUID-vkCmdDrawIndexedIndirectCount-None-11372

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer or uniform texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), the [robustBufferAccess2](#) feature is not enabled, and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the descriptor specified via [VkDeviceAddressRangeKHR](#) when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount-None-11373

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer or storage texel buffer through a descriptor in the bound resource heap, that stage was created without enabling either

VK\_PIPELINE\_ROBUSTNESS\_BUFFER\_BEHAVIOR\_ROBUST\_BUFFER\_ACCESS or  
VK\_PIPELINE\_ROBUSTNESS\_BUFFER\_BEHAVIOR\_ROBUST\_BUFFER\_ACCESS\_2 for  
storageBuffers, the robustBufferAccess2 feature is not enabled, and the robustBufferAccess  
feature is not enabled, that stage **must** not access values outside of the range of the  
descriptor specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount-None-11374

If the robustBufferAccess2 feature is not enabled, the robustBufferAccess feature is not  
enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point  
used by this command accesses a uniform buffer, uniform texel buffer, storage buffer, or  
storage texel buffer, that shader **must** not access values outside of the range of the buffer  
as specified by VkDeviceAddressRangeKHR when the descriptor was written

- VUID-vkCmdDrawIndexedIndirectCount-pBindInfo-11375

If any bound shader uses an embedded sampler via a descriptor mapping, the value of  
pBindInfo->reservedRangeSize set for vkCmdBindSamplerHeapEXT **must** be greater than  
or equal to minSamplerHeapReservedRangeWithEmbedded

- VUID-vkCmdDrawIndexedIndirectCount-None-11376

If a bound shader was created as a VkShaderEXT with the  
VK\_SHADER\_CREATE\_DESCRIPTOR\_HEAP\_BIT\_EXT flag or as part of a pipeline with the  
VK\_PIPELINE\_CREATE\_2\_DESCRIPTOR\_HEAP\_BIT\_EXT flag, and that shader statically uses  
a push constant value, that value **must** have been set by vkCmdPushDataEXT

- VUID-vkCmdDrawIndexedIndirectCount-None-11398

If a bound shader was created with a descriptor mapping using  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_DATA\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_DATA\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_RESOURCE\_HEAP\_DATA\_EXT, or  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a  
resource using that mapping, the access **must** not be out of bounds

- VUID-vkCmdDrawIndexedIndirectCount-None-11437

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound  
to a shader stage used by this command, and it was created with a descriptor mapping  
using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_ARRAY\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_EXT, or  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a  
resource using that mapping, the buffer from which the address in push data was queried  
**must** have been created with the VK\_BUFFER\_USAGE\_UNIFORM\_BUFFER\_BIT usage flag  
set

- VUID-vkCmdDrawIndexedIndirectCount-None-11438

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound  
to a shader stage used by this command, and it was created with a descriptor mapping  
using VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT,  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT, or  
VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT, and a shader accesses a  
uniform buffer using that mapping, the address that the uniform buffer is mapped to

**must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_UNIFORM\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndexedIndirectCount-None-11441

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_RESOURCE\\_HEAP\\_DATA\\_EXT](#) and a shader accesses a uniform buffer using that mapping, the address that the uniform buffer is mapped to **must** be aligned to [minUniformBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-11439

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** have been queried from a buffer created with the [VK\\_BUFFER\\_USAGE\\_STORAGE\\_BUFFER\\_BIT](#) usage flag set

- VUID-vkCmdDrawIndexedIndirectCount-None-11442

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses a storage buffer using that mapping, the address that the storage buffer is mapped to **must** be aligned to [minStorageBufferOffsetAlignment](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-11485

If a pipeline is bound to the pipeline bind point used by this command, or shader is bound to a shader stage used by this command, and it was created with a [descriptor mapping](#) using [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_PUSH\\_ADDRESS\\_EXT](#), [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_SHADER\\_RECORD\\_ADDRESS\\_EXT](#), or [VK\\_DESCRIPTOR\\_MAPPING\\_SOURCE\\_INDIRECT\\_ADDRESS\\_EXT](#), and a shader accesses an acceleration structure using that mapping, the address that the acceleration structure is mapped to **must** be an acceleration structure address retrieved from a [VkAccelerationStructureKHR](#) object via [vkGetAccelerationStructureDeviceAddressKHR](#)

- VUID-vkCmdDrawIndexedIndirectCount-index-11450

If a shader uses a sampler descriptor to sample an image as a result of this command, and that sampler descriptor uses a custom border color with an index defined by [VkSamplerCustomBorderColorIndexCreateInfoEXT](#), the value of [VkSamplerCustomBorderColorIndexCreateInfoEXT::index](#) **must** have been registered before this command was recorded, and still be registered during the sampling operation, with an identically defined color

- VUID-vkCmdDrawIndexedIndirectCount-protectedNoFault-11455

If **protectedNoFault** is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a **descriptor mapping** using **VK\_DESCRIPTOR\_MAPPING\_SOURCE\_PUSH\_ADDRESS\_EXT**, **VK\_DESCRIPTOR\_MAPPING\_SOURCE\_SHADER\_RECORD\_ADDRESS\_EXT**, or **VK\_DESCRIPTOR\_MAPPING\_SOURCE\_INDIRECT\_ADDRESS\_EXT**, the address that the resource is mapped to **must** have been queried from a buffer created without the **VK\_BUFFER\_CREATE\_PROTECTED\_BIT** create flag set

- VUID-vkCmdDrawIndexedIndirectCount-protectedNoFault-11456

If **protectedNoFault** is not supported, a pipeline is bound to the pipeline bind point used by this command, or a shader is bound to a shader stage used by this command, and it was created with a **descriptor mapping** using **VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_EXT** or **VK\_DESCRIPTOR\_MAPPING\_SOURCE\_HEAP\_WITH\_INDIRECT\_INDEX\_ARRAY\_EXT**, the address of the indirect memory **must** have been queried from a buffer created without the **VK\_BUFFER\_CREATE\_PROTECTED\_BIT** create flag set

- VUID-vkCmdDrawIndexedIndirectCount-renderPass-02684

The current render pass **must** be **compatible** with the **renderPass** member of the **VkGraphicsPipelineCreateInfo** structure specified when creating the **VkPipeline** bound to **VK\_PIPELINE\_BIND\_POINT\_GRAPHICS**

- VUID-vkCmdDrawIndexedIndirectCount-subpass-02685

The subpass index of the current render pass **must** be equal to the **subpass** member of the **VkGraphicsPipelineCreateInfo** structure specified when creating the **VkPipeline** bound to **VK\_PIPELINE\_BIND\_POINT\_GRAPHICS**

- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07468

If any shader executed by this pipeline accesses an **OpTypeImage** variable with a **Dim** operand of **SubpassData**, it **must** be decorated with an **InputAttachmentIndex** that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawIndexedIndirectCount-None-07469

Input attachment views accessed in a subpass **must** be created with the same **VkFormat** as the corresponding subpass definition, and be created with a **VkImageView** that is compatible with the attachment referenced by the subpass' **pInputAttachments [InputAttachmentIndex]** in the bound **VkFramebuffer** as specified by **Fragment Input Attachment Compatibility**

- VUID-vkCmdDrawIndexedIndirectCount-pDepthInputAttachmentIndex-09595

Input attachment views accessed in a dynamic render pass with a **InputAttachmentIndex** referenced by **VkRenderingInputAttachmentIndexInfo**, or no **InputAttachmentIndex** if **VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex** or **VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex** are **NULL**, **must** be created with a **VkImageView** that is compatible with the corresponding color, depth, or stencil attachment in **VkRenderingInfo**

- VUID-vkCmdDrawIndexedIndirectCount-pDepthInputAttachmentIndex-09596

Input attachment views accessed in a dynamic render pass via a shader object **must** have an **InputAttachmentIndex** if both **VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex** and **VkRenderingInputAttachmentIndexInfo**

`::pStencilInputAttachmentIndex` are non-NULL

- VUID-vkCmdDrawIndexedIndirectCount-InputAttachmentIndex-09597

If an input attachment view accessed in a dynamic render pass via a shader object has an `InputAttachmentIndex`, the `InputAttachmentIndex` **must** match an index in `VkRenderingInputAttachmentIndexInfo`

- VUID-vkCmdDrawIndexedIndirectCount-None-06537

Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-10795

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-10796

If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-10797

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_STENCIL_BIT` on that attachment, it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-12338

If a color attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_COLOR_BIT` on that attachment, the color attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-12339

If a depth attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_DEPTH_BIT` on that attachment, the depth attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-12340

If a stencil attachment is read in this command in any way other than as an attachment, or has been read by any prior command in this subpass as a non-attachment, and `feedback loop` is not enabled for `VK_IMAGE_ASPECT_STENCIL_BIT` on that attachment, the stencil attachment **must** not be written to by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-09003

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-06886

If the current render pass instance uses a depth/stencil attachment with a read-only

layout for the depth aspect, **depth writes must** be disabled

- VUID-vkCmdDrawIndexedIndirectCount-None-06887

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back **writeMask** are not zero, and stencil test is enabled, **all stencil ops must** be **VK\_STENCIL\_OP\_KEEP**

- VUID-vkCmdDrawIndexedIndirectCount-None-07831

If the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_VIEWPORT** dynamic state enabled then **vkCmdSetViewport must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07832

If the bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_SCISSOR** dynamic state enabled then **vkCmdSetScissor must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08617

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_WIDTH** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineWidth must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07834

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BIAS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBiasEnable** is **VK\_TRUE**, then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07835

If a shader object is bound to the **VK\_SHADER\_STAGE\_FRAGMENT\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_BLEND\_CONSTANTS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and an active color attachment **current value** of **blendEnable** is **VK\_TRUE** with a blend equations where any **VkBlendFactor** member is **VK\_BLEND\_FACTOR\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_COLOR**, **VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA**, or **VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_ALPHA**, then **vkCmdSetBlendConstants must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07836

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_BOUNDS** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **depthBoundsTestEnable** is **VK\_TRUE**, then **vkCmdSetDepthBounds must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing

command

- VUID-vkCmdDrawIndexedIndirectCount-None-07837

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilCompareMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07838

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilWriteMask` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07839

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, the current value of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilReference` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-maxMultiviewInstanceIndex-02688

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-02689

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE`, then the active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexedIndirectCount-None-07634

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-06666

If the `VK_EXT_sample_locations` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then `vkCmdSetSampleLocationsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07840

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07841

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07843

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, `vkCmdSetDepthTestEnable` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07844

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthWriteEnable` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07845

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and the **current value** of `depthTestEnable` is `VK_TRUE`, then `vkCmdSetDepthCompareOp` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07846

If the `depthBounds` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07847

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, and the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetStencilTestEnable` **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07848

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, the `current value` of `stencilTestEnable` is `VK_TRUE`, then `vkCmdSetStencilOp` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-viewportCount-03417

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-scissorCount-03418

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing

- VUID-vkCmdDrawIndexedIndirectCount-viewportCount-03419

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled, then the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- VUID-vkCmdDrawIndexedIndirectCount-None-04876

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled, then `vkCmdSetRasterizerDiscardEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-04877

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, and the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthBiasEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-logicOp-04878

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, the `current value` of `rasterizerDiscardEnable` is `VK_FALSE`, and the `current value` of `logicOpEnable` is `VK_TRUE`, then `vkCmdSetLogicOpEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-04552

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the

shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirectCount-

`primitiveFragmentShadingRateWithMultipleViewports-08642`

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawIndexedIndirectCount-blendEnable-04727

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, then for each color attachment, if the corresponding image view's **format features** do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding **current value** of `blendEnable` **must** be `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount-None-08644

If a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of `rasterizerDiscardEnable` is `VK_FALSE`, and none of the following is enabled:

- the `multisampledRenderToSingleSampled` feature

then the **current value** of `rasterizationSamples` **must** be the same as the current color and/or depth/stencil attachments

- VUID-vkCmdDrawIndexedIndirectCount-None-08876

If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`

- VUID-vkCmdDrawIndexedIndirectCount-viewMask-06178

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawIndexedIndirectCount-colorAttachmentCount-06179

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering`, the bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08910

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have

been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08912  
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08911  
If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirectCount-None-07749  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-attachmentCount-07750  
If the `colorWriteEnable` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer **must** be greater than or equal to the number of active color attachments
- VUID-vkCmdDrawIndexedIndirectCount-None-07751  
If the `VK_EXT_discard_rectangles` extension is enabled, a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` included a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`
- VUID-vkCmdDrawIndexedIndirectCount-rasterizerDiscardEnable-09236

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled and the `pNext` chain of `VkGraphicsPipelineCreateInfo` did not include a `VkPipelineDiscardRectangleStateCreateInfoEXT` structure, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for each discard rectangle in `VkPhysicalDeviceDiscardRectanglePropertiesEXT::maxDiscardRectangles`

- VUID-vkCmdDrawIndexedIndirectCount-None-07880

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07881

If the `VK_EXT_discard_rectangles` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `discardRectangleEnable` is `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08913

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08914

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08915

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08916  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08917  
If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08918  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`
- VUID-vkCmdDrawIndexedIndirectCount-imageView-06183  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`
- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingLocalRead-11797  
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingLocalRead` feature is enabled, the `VK_RENDERING_LOCAL_READ_CONCURRENT_ACCESS_CONTROL_BIT_KHR` flag is specified, and an attachment is being used as a feedback loop as specified by `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`, `VkRenderingAttachmentFlagsInfoKHR::flags` for that attachment **must** include `VK_RENDERING_ATTACHMENT_INPUT_ATTACHMENT_FEEDBACK_BIT_KHR`
- VUID-vkCmdDrawIndexedIndirectCount-imageView-06184  
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`
- VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07285  
If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of

the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07286

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07287

If the `multisampledRenderToSingleSampled` feature is not enabled, and `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- VUID-vkCmdDrawIndexedIndirectCount-pNext-07935

If this command is called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirectCount-renderPass-06198

If the current render pass instance was begun with `vkCmdBeginRendering`, the bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndexedIndirectCount-pColorAttachments-08963

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-pColorAttachments-11539

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->resolveImageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-08964

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-11540

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, depth test is enabled, and the `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-08965

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has not yet been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-11860

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, then the `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-flags-10582

If the current render pass instance was begun with a `vkCmdBeginRendering` call in `commandBuffer`, its `VkRenderingInfo::flags` parameter **must** not have `VK_RENDERING_CONTENTS_SECONDARY_COMMAND_BUFFERS_BIT` set unless `VK_RENDERING_CONTENTS_INLINE_BIT_KHR` is also set

- VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithRasterizerDiscard-06708

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, `rasterization discard` **must** not be enabled

- VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-06709

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- VUID-vkCmdDrawIndexedIndirectCount-None-07620

If the `depthClamp` feature is enabled, a shader object is bound to any graphics stage or a

graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07621

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetPolygonModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07622

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07623

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetSampleMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-alphaToCoverageEnable-08919

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndexedIndirectCount-alphaToCoverageEnable-08920

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the `Fragment Output Interface` **must** contain a variable for the alpha `Component` word in `Location 0` at `Index 0`

- VUID-vkCmdDrawIndexedIndirectCount-None-07624

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07625

If the `alphaToOne` feature is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then

`vkCmdSetAlphaToOneEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07626

If the `logicOp` feature is enabled, a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07627

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorBlendEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07629

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and there are color attachments bound, then `vkCmdSetColorWriteMaskEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07630

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound which was created with both a `VK_SHADER_STAGE_GEOMETRY_BIT` stage and the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled, then `vkCmdSetRasterizationStreamEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07631

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07632

If the `VK_EXT_conservative_rasterization` extension is enabled, a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and the current value of `conservativeRasterizationMode` is `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called and not

subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-conservativePointAndLineRasterization-07499

If the **VK\_EXT\_conservative\_rasterization** extension is enabled, **conservativePointAndLineRasterization** is not supported, a shader object is bound to any graphics stage or a graphics pipeline is bound, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line or point topology class, then the **current value** of **conservativeRasterizationMode** **must** be **VK\_CONSERVATIVE\_RASTERIZATION\_MODE\_DISABLED\_EXT**

- VUID-vkCmdDrawIndexedIndirectCount-None-07633

If the **depthClipEnable** feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_DEPTH\_CLIP\_ENABLE\_EXT** dynamic state, then **vkCmdSetDepthClipEnableEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07636

If the **VK\_EXT\_provoking\_vertex** extension is enabled, a shader object is bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_PROVOKING\_VERTEX\_MODE\_EXT** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, then **vkCmdSetProvokingVertexModeEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08666

If any of the **stippledRectangularLines**, **stippledBresenhamLines** or **stippledSmoothLines** features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineRasterizationModeEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08669

If any of the **stippledRectangularLines**, **stippledBresenhamLines** or **stippledSmoothLines** features are enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the **VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT** dynamic state enabled, and the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **effective rasterization input topology** is in the line topology class, then **vkCmdSetLineStippleEnableEXT** **must** have been called and not subsequently **invalidated** in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07849

If any of the **stippledRectangularLines**, **stippledBresenhamLines** or **stippledSmoothLines** features are enabled and a shader object is bound to any graphics stage, or a bound graphics pipeline state was created with the **VK\_DYNAMIC\_STATE\_LINE\_STIPPLE** dynamic state enabled, the **current value** of **rasterizerDiscardEnable** is **VK\_FALSE**, and the **current value** of **stippledLineEnable** is **VK\_TRUE**, then **vkCmdSetLineStipple** **must** have been

called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-10608

If a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_LINE\\_RASTERIZATION\\_MODE\\_EXT](#) dynamic state enabled, the [effective rasterization input topology](#) is in the line topology class, and the current [lineRasterizationMode](#) is [VK\\_LINE\\_RASTERIZATION\\_MODE\\_BRESENHAM](#) or [VK\\_LINE\\_RASTERIZATION\\_MODE\\_RECTANGULAR\\_SMOOTH](#), then the current [alphaToCoverageEnable](#), [alphaToOneEnable](#) and [sampleShadingEnable](#) states **must** all be [VK\\_FALSE](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-07639

If the [depthClipControl](#) feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_CLIP\\_NEGATIVE\\_ONE\\_TO\\_ONE\\_EXT](#) dynamic state enabled, then [vkCmdSetDepthClipNegativeOneToOneEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-09650

If the [depthClampControl](#) feature is enabled, and a shader object is bound to any graphics stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_CLAMP\\_RANGE\\_EXT](#) dynamic state enabled, and the [current value](#) of [depthClampEnable](#) is [VK\\_TRUE](#), then [vkCmdSetDepthClampRangeEXT](#) **must** have been called and not subsequently [invalidated](#) in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-rasterizationSamples-07471

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the [rasterizationSamples](#) in the last call to [vkCmdSetRasterizationSamplesEXT](#) **must** follow the rules for a [zero-attachment subpass](#)

- VUID-vkCmdDrawIndexedIndirectCount-samples-07472

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_SAMPLE\\_MASK\\_EXT](#) state enabled and the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) state disabled, then the [samples](#) parameter in the last call to [vkCmdSetSampleMaskEXT](#) **must** be greater or equal to the [VkPipelineMultisampleStateCreateInfo::rasterizationSamples](#) parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount-samples-07473

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_SAMPLE\\_MASK\\_EXT](#) state and [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) states enabled, then the [samples](#) parameter in the last call to [vkCmdSetSampleMaskEXT](#) **must** be greater or equal to the [rasterizationSamples](#) parameter in the last call to [vkCmdSetRasterizationSamplesEXT](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-09211

If the bound graphics pipeline state was created with the [VK\\_DYNAMIC\\_STATE\\_RASTERIZATION\\_SAMPLES\\_EXT](#) state enabled, or a shader object is

bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` **must** be the same as the `rasterizationSamples` member of that structure

- VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07476

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorBlendEnableEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07478

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic states enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then the last call to `vkCmdSetColorWriteMaskEXT` in the current command buffer prior to this drawing command **must** have set a value for all active color attachments

- VUID-vkCmdDrawIndexedIndirectCount-advancedBlendMaxColorAttachments-07480

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled, the current value of `rasterizerDiscardEnable` is `VK_FALSE`, and an active color attachment current value of `blendEnable` is `VK_TRUE`, then the number of active color attachments **must** not exceed `advancedBlendMaxColorAttachments`

- VUID-vkCmdDrawIndexedIndirectCount-None-10862

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount-rasterizerDiscardEnable-10863

If a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`, but not the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetColorBlendAdvancedEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount-None-10864

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT`

and `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then either `vkCmdSetColorBlendAdvancedEXT` or `vkCmdSetColorBlendEquationEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command for all active color attachments with the `blendEnable` current value of `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount-

`primitivesGeneratedQueryWithNonZeroStreams-07481`

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage or a graphics pipeline is bound was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsPerPixel-07482

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsPerPixel-07483

If a shader object is bound to any graphics stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current value of `sampleLocationsEnable` is `VK_TRUE`, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07484

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT` then the current active depth attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07485

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by

`vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07486

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.maxSampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07487

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07936

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07937

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::maxSampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07938

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `current` value of `sampleLocationsEnable` is `VK_TRUE`, then `sampleLocationsInfo.sampleLocationsPerPixel` **must** equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07495  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR`, then the `stippledRectangularLines` feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07496  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM`, then the `stippledBresenhamLines` feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07497  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH`, then the `stippledSmoothLines` feature **must** be enabled
- VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07498  
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`
- VUID-vkCmdDrawIndexedIndirectCount-stage-07073  
If the bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` **must** not be active
- VUID-vkCmdDrawIndexedIndirectCount-None-08877  
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage or a graphics pipeline is bound which was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state enabled, and the current value of `rasterizerDiscardEnable` is `VK_FALSE`, then `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-nextStage-10745  
For each shader object bound to a graphics stage, except for shader object bound to the last graphics stage in the logical pipeline, it **must** have been created with a `nextStage` including the corresponding bit to the shader object bound to the following graphics stage

in the logical pipeline

- VUID-vkCmdDrawIndexedIndirectCount-None-08684

If there is no bound graphics pipeline, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_VERTEX\_BIT**

- VUID-vkCmdDrawIndexedIndirectCount-None-08685

If there is no bound graphics pipeline, and the **tessellationShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT**

- VUID-vkCmdDrawIndexedIndirectCount-None-08686

If there is no bound graphics pipeline, and the **tessellationShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT**

- VUID-vkCmdDrawIndexedIndirectCount-None-08687

If there is no bound graphics pipeline, and the **geometryShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_GEOMETRY\_BIT**

- VUID-vkCmdDrawIndexedIndirectCount-None-08688

If there is no bound graphics pipeline, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_FRAGMENT\_BIT**

- VUID-vkCmdDrawIndexedIndirectCount-None-08689

If there is no bound graphics pipeline, and the **taskShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_TASK\_BIT\_EXT**

- VUID-vkCmdDrawIndexedIndirectCount-None-08690

If there is no bound graphics pipeline, and the **meshShader** feature is enabled, **vkCmdBindShadersEXT** **must** have been called in the current command buffer with **pStages** with an element of **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT**

- VUID-vkCmdDrawIndexedIndirectCount-None-08693

If there is no bound graphics pipeline, and at least one of the **taskShader** and **meshShader** features is enabled, one of the **VK\_SHADER\_STAGE\_VERTEX\_BIT** or **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT** stages **must** have a valid **VkShaderEXT** bound, and the other **must** have no **VkShaderEXT** bound

- VUID-vkCmdDrawIndexedIndirectCount-None-08696

If there is no bound graphics pipeline, and a valid **VkShaderEXT** is bound to the **VK\_SHADER\_STAGE\_VERTEX\_BIT** stage, there **must** be no **VkShaderEXT** bound to either the **VK\_SHADER\_STAGE\_TASK\_BIT\_EXT** stage or the **VK\_SHADER\_STAGE\_MESH\_BIT\_EXT** stage

- VUID-vkCmdDrawIndexedIndirectCount-None-08698

If any graphics shader is bound which was created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag, then all shaders created with the **VK\_SHADER\_CREATE\_LINK\_STAGE\_BIT\_EXT** flag in the same **vkCreateShadersEXT** call **must** also be bound

- VUID-vkCmdDrawIndexedIndirectCount-None-08699

If any graphics shader is bound which was created with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag, any stages in between stages whose shaders which did not create a shader with the [VK\\_SHADER\\_CREATE\\_LINK\\_STAGE\\_BIT\\_EXT](#) flag as part of the same [vkCreateShadersEXT](#) call **must** not have any [VkShaderEXT](#) bound

- VUID-vkCmdDrawIndexedIndirectCount-None-08878

All bound graphics shader objects **must** have been created with identical or [identically defined](#) push constant ranges

- VUID-vkCmdDrawIndexedIndirectCount-None-08879

All bound graphics shader objects **must** have either been created with the [VK\\_SHADER\\_CREATE\\_DESCRIPTOR\\_HEAP\\_BIT\\_EXT](#) flag set, or with identical or [identically defined](#) arrays of descriptor set layouts

- VUID-vkCmdDrawIndexedIndirectCount-pDynamicStates-08715

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_DEPTH\\_WRITE\\_ENABLE](#) dynamic state enabled, and the fragment shader declares the [EarlyFragmentTests](#) execution mode and uses [OpDepthAttachmentReadEXT](#), the [depthWriteEnable](#) parameter in the last call to [vkCmdSetDepthWriteEnable](#) **must** be [VK\\_FALSE](#)

- VUID-vkCmdDrawIndexedIndirectCount-pDynamicStates-08716

If a shader object is bound to the [VK\\_SHADER\\_STAGE\\_FRAGMENT\\_BIT](#) stage or a graphics pipeline is bound which was created with the [VK\\_DYNAMIC\\_STATE\\_STENCIL\\_WRITE\\_MASK](#) dynamic state enabled, and the fragment shader declares the [EarlyFragmentTests](#) execution mode and uses [OpStencilAttachmentReadEXT](#), the [writeMask](#) parameter in the last call to [vkCmdSetStencilWriteMask](#) **must** be 0

- VUID-vkCmdDrawIndexedIndirectCount-None-09116

If a shader object is bound to any graphics stage or the bound graphics pipeline was created with [VK\\_DYNAMIC\\_STATE\\_COLOR\\_WRITE\\_MASK\\_EXT](#), and the format of any color attachment is [VK\\_FORMAT\\_E5B9G9R9\\_UFLOAT\\_PACK32](#), the corresponding element of the [pColorWriteMasks](#) parameter of [vkCmdSetColorWriteMaskEXT](#) **must** either include all of [VK\\_COLOR\\_COMPONENT\\_R\\_BIT](#), [VK\\_COLOR\\_COMPONENT\\_G\\_BIT](#), [VK\\_COLOR\\_COMPONENT\\_B\\_BIT](#), and [VK\\_COLOR\\_COMPONENT\\_A\\_BIT](#), or none of them

- VUID-vkCmdDrawIndexedIndirectCount-maxFragmentDualSrcAttachments-09239

If [blending](#) is enabled for any attachment where either the source or destination blend factors for that attachment [use the secondary color input](#), the maximum value of [Location](#) for any output attachment [statically used](#) in the [Fragment Execution Model](#) executed by this command **must** be less than [maxFragmentDualSrcAttachments](#)

- VUID-vkCmdDrawIndexedIndirectCount-None-09548

If the current render pass was begun with [vkCmdBeginRendering](#), there is no shader object bound to any graphics stage, the value of each element of [VkRenderingAttachmentLocationInfo::pColorAttachmentLocations](#) in the bound pipeline **must** match the value for the corresponding locations set currently in the current render pass instance

- VUID-vkCmdDrawIndexedIndirectCount-None-09549  
If the current render pass was begun with [vkCmdBeginRendering](#), and there is no shader object bound to any graphics stage, for each element of [VkRenderingInputAttachmentIndexInfo::pColorAttachmentInputIndices](#) in the bound pipeline, if either [pColorAttachmentInputIndices\[i\]](#) or the value for the corresponding index set currently in the current render pass instance is [statically used](#) in the bound pipeline in an [InputAttachmentIndex](#) decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount-None-10927  
If the current render pass was begun with [vkCmdBeginRendering](#), and there is no shader object bound to any graphics stage, if either the value of [VkRenderingInputAttachmentIndexInfo::pDepthInputAttachmentIndex](#) in the bound pipeline or the corresponding value set currently in the current render pass instance is [statically used](#) in the bound pipeline in an [InputAttachmentIndex](#) decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount-None-10928  
If the current render pass was begun with [vkCmdBeginRendering](#), and there is no shader object bound to any graphics stage, if either the value of [VkRenderingInputAttachmentIndexInfo::pStencilInputAttachmentIndex](#) in the bound pipeline or the corresponding value set currently in the current render pass instance is [statically used](#) in the bound pipeline in an [InputAttachmentIndex](#) decoration, the two values **must** match
- VUID-vkCmdDrawIndexedIndirectCount-None-09642  
If the current render pass was begun with [vkCmdBeginRendering](#) with the [VK\\_RENDERING\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#) flag, the bound graphics pipeline **must** have been created with [VK\\_PIPELINE\\_CREATE\\_2\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#)
- VUID-vkCmdDrawIndexedIndirectCount-None-09643  
If the bound graphics pipeline was created with [VK\\_PIPELINE\\_CREATE\\_2\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#), the current render pass **must** have begun with [vkCmdBeginRendering](#) with the [VK\\_RENDERING\\_ENABLE\\_LEGACY\\_DITHERING\\_BIT\\_EXT](#) flag
- VUID-vkCmdDrawIndexedIndirectCount-None-10772  
If a shader object is bound to any graphics stage, *multiview* functionality **must** not be enabled in the current render pass
- VUID-vkCmdDrawIndexedIndirectCount-flags-11521  
If current render pass instance was begun with [vkCmdBeginRendering](#) with [VkRenderingInfo::flags](#) which includes [VK\\_RENDERING\\_FRAGMENT\\_REGION\\_BIT\\_EXT](#), and if [sample shading](#) is enabled (explicitly or implicitly), then the minimum fraction for sample shading **must** equal 0.0
- VUID-vkCmdDrawIndexedIndirectCount-None-11522  
If the current render pass instance was begun with [vkCmdBeginRendering](#) and contains a custom resolve, and the [dynamicRenderingUnusedAttachments](#) feature is not enabled, the graphics pipeline bound **must** have been created with a [VkCustomResolveCreateInfoEXT](#)
- VUID-vkCmdDrawIndexedIndirectCount-None-11523  
If the current render pass instance was begun with [vkCmdBeginRendering](#) and does not

contain a custom resolve, and the `dynamicRenderingUnusedAttachments` feature is not enabled, the graphics pipeline bound **must** not have been created with a `VkCustomResolveCreateInfoEXT`

- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11524

If the current render pass instance was begun with `vkCmdBeginRendering` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11525

If the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, and `vkCmdBeginCustomResolveEXT` has not been recorded in the render pass instance, the graphics pipeline bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount-None-11861

If the `dynamicRenderingUnusedAttachments` feature is not enabled and the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, the bound graphics pipeline **must** have been created with a `VkCustomResolveCreateInfoEXT::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawIndexedIndirectCount-None-11862

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount-None-11863

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-11864

If the `dynamicRenderingUnusedAttachments` feature is enabled, the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `resolveImageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats` used to create the bound graphics pipeline, or the corresponding element of `VkCustomResolveCreateInfoEXT::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-None-11865

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-None-11866

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-11867

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::depthAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-None-11868

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-None-11869

If current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-11870

If the current render pass instance was begun with `vkCmdBeginRendering`, it contains a custom resolve, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, and the value of `VkCustomResolveCreateInfoEXT::stencilAttachmentFormat` used to create the bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndexedIndirectCount-colorAttachmentCount-11871

If the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than `0` and `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, then for

each element of the `VkRenderingInfo::pColorAttachments` array with a `resolveImageView` not equal to `VK_NULL_HANDLE`, the `resolveImageView` **must** have been created with a sample count equal to the value of `rasterizationSamples` for the bound graphics pipeline

- VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-11872

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, and `VkRenderingInfo::pDepthAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-11873

If the current render pass instance was begun with `vkCmdBeginRendering`, `vkCmdBeginCustomResolveEXT` has been recorded in the render pass instance, `VkRenderingInfo::pStencilAttachment->resolveImageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->resolveImageView`

- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11529

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering`, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_TRUE`

- VUID-vkCmdDrawIndexedIndirectCount-customResolve-11530

If a shader object is bound to the fragment stage, the current render pass instance was begun with `vkCmdBeginRendering` and contains a custom resolve, a fragment density map attachment is active, and `vkCmdBeginCustomResolveEXT` has not yet been called, then the fragment shader object bound **must** have been created with `VkCustomResolveCreateInfoEXT::customResolve` as `VK_FALSE`

- VUID-vkCmdDrawIndexedIndirectCount-flags-13361

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, then all bound shader objects **must** have been created with the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit

- VUID-vkCmdDrawIndexedIndirectCount-flags-13362

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `setLayoutCount` not equal to 0, and with `pSetLayouts` not equal to `NULL`, then the pipeline layout of the bound descriptor sets **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexedIndirectCount-flags-12491

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, with a `pushConstantRangeCount` not equal to 0, and with `pPushConstantRanges` not equal to `NULL`, then the pipeline layout of the bound push constants **must** have been created with `VK_PIPELINE_LAYOUT_CREATE_INDEPENDENT_SETS_BIT_EXT` set

- VUID-vkCmdDrawIndexedIndirectCount-flags-13363

If there are any shader objects bound that were created with `flags` that includes the `VK_SHADER_CREATE_INDEPENDENT_SETS_BIT_KHR` bit, and any of the descriptor set

layouts used to create the pipeline layout of the bound descriptor sets were created with any binding's `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then there **must** be no binding with `VkDescriptorSetLayoutBinding::stageFlags` set with `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount-None-04007

All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** have either valid or `VK_NULL_HANDLE` buffers bound

- VUID-vkCmdDrawIndexedIndirectCount-None-04008

If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface **must** not be `VK_NULL_HANDLE`

- VUID-vkCmdDrawIndexedIndirectCount-None-02721

If the `robustBufferAccess` feature is not enabled, and that pipeline was created without enabling `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS` for `vertexInputs`, then for a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#)

- VUID-vkCmdDrawIndexedIndirectCount-format-10389

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is a `packed format`, and the `legacyVertexAttributes` feature is not enabled, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `size of the format`

- VUID-vkCmdDrawIndexedIndirectCount-format-10390

For each vertex attribute accessed by this command, if its `VkVertexInputAttributeDescription::format` or `VkVertexInputAttributeDescription2EXT::format` is not a `packed format`, and either the `legacyVertexAttributes` feature is not enabled or `format` has 64-bit components, the value of `attribAddress`, calculated as described in [Vertex Input Calculation](#), **must** be a multiple of the `component size of the format`

- VUID-vkCmdDrawIndexedIndirectCount-None-07842

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-dynamicPrimitiveTopologyUnrestricted-07500

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` **must** be of the same `topology class` as the pipeline

VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDrawIndexedIndirectCount-primitiveTopology-10286  
If a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage is bound, then the `current value` of `primitiveTopology` **must** be `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command
- VUID-vkCmdDrawIndexedIndirectCount-primitiveTopology-10747  
If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST` prior to this drawing command, then a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount-primitiveTopology-10748  
If `vkCmdSetPrimitiveTopology` set `primitiveTopology` to `VK_PRIMITIVE_TOPOLOGY_POINT_LIST` prior to this drawing command, the `maintenance5` feature is not enabled, both a `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` and `VK_SHADER_STAGE_GEOMETRY_BIT` stage are not bound, then the `Vertex Execution Model` **must** have a `PointSize` decorated variable that is statically written to
- VUID-vkCmdDrawIndexedIndirectCount-pStrides-04913  
If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, but without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffers2` with a non-NULL `pStrides` parameter or `vkCmdBindVertexBuffers3KHR` with `setStride` set to `VK_TRUE` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirectCount-None-13118  
If the bound graphics pipeline was created without the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE` dynamic state enabled, without the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `vkCmdBindVertexBuffers3KHR` was called and not subsequently `invalidated` in the current command buffer prior to this draw command, the value of `setStride` in each of its `pBindInfos` elements must have been `VK_FALSE`
- VUID-vkCmdDrawIndexedIndirectCount-None-04914  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then `vkCmdSetVertexInputEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this draw command
- VUID-vkCmdDrawIndexedIndirectCount-Input-07939  
If the `maintenance9` feature is not enabled, and there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` **must** contain a location in `VkVertexInputAttributeDescription2EXT::location`
- VUID-vkCmdDrawIndexedIndirectCount-Input-08734  
If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the

`VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and either the `legacyVertexAttributes` feature is not enabled or the SPIR-V Type associated with a given `Input` variable of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDrawIndexedIndirectCount-format-08936

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** be 64-bit

- VUID-vkCmdDrawIndexedIndirectCount-format-08937

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` **must** have a 64-bit component

- VUID-vkCmdDrawIndexedIndirectCount-None-09203

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` **must** not use components that are not present in the format

- VUID-vkCmdDrawIndexedIndirectCount-None-04875

If there is a shader object bound to the `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage or the bound graphics pipeline state was created with both a `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT` stage and the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled, and the current value of `primitiveTopology` is `VK_PRIMITIVE_TOPOLOGY_PATCH_LIST`, then `vkCmdSetPatchControlPointsEXT` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-04879

If there is a shader object bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage or the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` **must** have been called and not subsequently `invalidated` in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-09637

If the `primitiveTopologyListRestart` feature is not enabled, the `input assembly` is `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, `VK_PRIMITIVE_TOPOLOGY_LINE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`,

VK\_PRIMITIVE\_TOPOLOGY\_LINE\_LIST\_WITH\_ADJACENCY, or  
VK\_PRIMITIVE\_TOPOLOGY\_TRIANGLE\_LIST\_WITH\_ADJACENCY, there is a shader object bound to the VK\_SHADER\_STAGE\_VERTEX\_BIT stage or the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE dynamic state enabled, then vkCmdSetPrimitiveRestartEnable **must** be VK\_FALSE

- VUID-vkCmdDrawIndexedIndirectCount-None-10909

If the primitiveTopologyPatchListRestart feature is not enabled, the input assembly is VK\_PRIMITIVE\_TOPOLOGY\_PATCH\_LIST, there is a shader object bound to the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT stage or the bound graphics pipeline state was created with the VK\_DYNAMIC\_STATE\_PRIMITIVE\_RESTART\_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable **must** be VK\_FALSE

- VUID-vkCmdDrawIndexedIndirectCount-stage-06481

The bound graphics pipeline **must** not have been created with the VkPipelineShaderStageCreateInfo::stage member of any element of VkGraphicsPipelineCreateInfo::pStages set to VK\_SHADER\_STAGE\_TASK\_BIT\_EXT or VK\_SHADER\_STAGE\_MESH\_BIT\_EXT

- VUID-vkCmdDrawIndexedIndirectCount-None-08885

There **must** be no shader object bound to either of the VK\_SHADER\_STAGE\_TASK\_BIT\_EXT or VK\_SHADER\_STAGE\_MESH\_BIT\_EXT stages

- VUID-vkCmdDrawIndexedIndirectCount-None-07619

If a shader object is bound to the VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stage or a graphics pipeline is bound which was created with both a VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stage and the VK\_DYNAMIC\_STATE\_TESSELLATION\_DOMAIN\_ORIGIN\_EXT dynamic state enabled, then vkCmdSetTessellationDomainOriginEXT **must** have been called and not subsequently invalidated in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12239

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the type of subdivision, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12240

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the orientation of triangles, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12241

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the segment spacing, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount-OpExecutionMode-12242

If a shader is bound to both the VK\_SHADER\_STAGE\_TESSELLATION\_CONTROL\_BIT and VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT stages, and if both stages contain an OpExecutionMode instruction specifying the output patch size, they **must** be the same

- VUID-vkCmdDrawIndexedIndirectCount-buffer-02708

If **buffer** is non-sparse then it **must** be bound completely and contiguously to a single **VkDeviceMemory** object

- VUID-vkCmdDrawIndexedIndirectCount-buffer-02709  
**buffer** **must** have been created with the **VK\_BUFFER\_USAGE\_INDIRECT\_BUFFER\_BIT** usage flag set
- VUID-vkCmdDrawIndexedIndirectCount-offset-02710  
**offset** **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-02711  
**commandBuffer** **must** not be a protected command buffer
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02714  
If **countBuffer** is non-sparse then it **must** be bound completely and contiguously to a single **VkDeviceMemory** object
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02715  
**countBuffer** **must** have been created with the **VK\_BUFFER\_USAGE\_INDIRECT\_BUFFER\_BIT** usage flag set
- VUID-vkCmdDrawIndexedIndirectCount-countBufferOffset-02716  
**countBufferOffset** **must** be a multiple of 4
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02717  
The count stored in **countBuffer** **must** be less than or equal to **VkPhysicalDeviceLimits::maxDrawIndirectCount**
- VUID-vkCmdDrawIndexedIndirectCount-countBufferOffset-04129  
(**countBufferOffset** + **sizeof(uint32\_t)**) **must** be less than or equal to the size of **countBuffer**
- VUID-vkCmdDrawIndexedIndirectCount-None-04445  
If the **drawIndirectCount** feature is not enabled this function **must** not be used
- VUID-vkCmdDrawIndexedIndirectCount-None-07312  
If the **maintenance6** feature is not enabled, a valid index buffer **must** be bound
- VUID-vkCmdDrawIndexedIndirectCount-primitiveRestartIndex-12401  
If the primitive restart index for this draw operation was set with **vkCmdSetPrimitiveRestartIndexEXT**, then **primitiveRestartIndex** **must** not be greater than the maximum representable value for the bound **VkIndexType**
- VUID-vkCmdDrawIndexedIndirectCount-stride-03142  
**stride** **must** be a multiple of 4 and **must** be greater than or equal to **sizeof(VkDrawIndexedIndirectCommand)**
- VUID-vkCmdDrawIndexedIndirectCount-maxDrawCount-03143  
If **maxDrawCount** is greater than or equal to 1, (**stride** × (**maxDrawCount** - 1) + **offset** + **sizeof(VkDrawIndexedIndirectCommand)**) **must** be less than or equal to the size of **buffer**

### Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-parameter  
**commandBuffer** **must** be a valid **VkCommandBuffer** handle

- VUID-vkCmdDrawIndexedIndirectCount-buffer-parameter  
**buffer** **must** be a valid [VkBuffer](#) handle
- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-parameter  
**countBuffer** **must** be a valid [VkBuffer](#) handle
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-recording  
**commandBuffer** **must** be in the [recording state](#)
- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-cmdpool  
The [VkCommandPool](#) that **commandBuffer** was allocated from **must** support [VK\\_QUEUE\\_GRAPHICS\\_BIT](#) operations
- VUID-vkCmdDrawIndexedIndirectCount-renderpass  
This command **must** only be called inside of a render pass instance
- VUID-vkCmdDrawIndexedIndirectCount-suspended  
This command **must** not be called between suspended render pass instances
- VUID-vkCmdDrawIndexedIndirectCount-videocoding  
This command **must** only be called outside of a video coding scope
- VUID-vkCmdDrawIndexedIndirectCount-commonparent  
Each of **buffer**, **commandBuffer**, and **countBuffer** **must** have been created, allocated, or retrieved from the same [VkDevice](#)

## Host Synchronization

- Host access to **commandBuffer** **must** be externally synchronized
- Host access to the [VkCommandPool](#) that **commandBuffer** was allocated from **must** be externally synchronized

## Command Properties

| Command Buffer Levels | Render Pass Scope | Video Coding Scope | Supported Queue Types | Command Type |
|-----------------------|-------------------|--------------------|-----------------------|--------------|
| Primary<br>Secondary  | Inside            | Outside            | VK_QUEUE_GRAPHICS_BIT | Action       |

## Conditional Rendering

vkCmdDrawIndexedIndirectCount is affected by [conditional rendering](#)

### 25.4.1. Drawing Transform Feedback

It is possible to draw vertex data that was previously captured during active [transform feedback](#) by binding one or more of the transform feedback buffers as vertex buffers. A pipeline barrier is

required between using the buffers as transform feedback buffers and vertex buffers to ensure all writes to the transform feedback buffers are visible when the data is read as vertex attributes. The source access is `VK_ACCESS_TRANSFORM_FEEDBACK_WRITE_BIT_EXT` and the destination access is `VK_ACCESS_VERTEX_ATTRIBUTE_READ_BIT` for the pipeline stages `VK_PIPELINE_STAGE_TRANSFORM_FEEDBACK_BIT_EXT` and `VK_PIPELINE_STAGE_VERTEX_INPUT_BIT` respectively. The value written to the counter buffer by `vkCmdEndTransformFeedbackEXT` can be used to determine the vertex count for the draw. A pipeline barrier is required between using the counter buffer for `vkCmdEndTransformFeedbackEXT` and `vkCmdDrawIndirectByteCountEXT` where the source access is `VK_ACCESS_TRANSFORM_FEEDBACK_COUNTER_WRITE_BIT_EXT` and the destination access is `VK_ACCESS_INDIRECT_COMMAND_READ_BIT` for the pipeline stages `VK_PIPELINE_STAGE_TRANSFORM_FEEDBACK_BIT_EXT` and `VK_PIPELINE_STAGE_DRAW_INDIRECT_BIT` respectively.

To record a non-indexed draw call, where the vertex count is based on a byte count read from a memory range and the passed in vertex stride parameter, call:

```
// Provided by VK_KHR_device_address_commands with VK_EXT_transform_feedback
void vkCmdDrawIndirectByteCountEXT(
    VkCommandBuffer                commandBuffer,
    uint32_t                       instanceCount,
    uint32_t                       firstInstance,
    const VkBindTransformFeedbackBuffer2InfoEXT* pCounterInfo,
    uint32_t                       counterOffset,
    uint32_t                       vertexStride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `instanceCount` is the number of instances to draw.
- `firstInstance` is the instance ID of the first instance to draw.
- `pCounterInfo` is a pointer to a `VkBindTransformFeedbackBuffer2InfoEXT` defining the range of memory that the byte count is read from.
- `counterOffset` is subtracted from the byte count.
- `vertexStride` is the stride in bytes between each element of the vertex data that is used to calculate the vertex count from the counter value. This value is typically the same value that was used in the graphics pipeline state when the transform feedback was captured as the `XfbStride`.

When the command is executed, primitives are assembled in the same way as done with `vkCmdDraw` except the `vertexCount` is calculated based on the byte count read from `counterBuffer` at offset `counterBufferOffset`. The assembled primitives execute the bound graphics pipeline.

The effective `vertexCount` is calculated as follows:

```
const uint32_t * counterBufferPtr = (const uint8_t *)counterRange.address;
vertexCount = floor(max(0, (*counterBufferPtr - counterOffset)) / vertexStride);
```

The effective `firstVertex` is zero.

## Valid Usage

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08606  
If the `shaderObject` feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08600  
If a `bound shader` was created with a pipeline layout and statically uses a set  $n$ , a descriptor set **must** have been bound to  $n$  at the same pipeline bind point, with layouts compatible for set  $n$  with the layout(s) used to create the shader, as described in [Pipeline Layout Compatibility](#)
- VUID-vkCmdDrawIndirectByteCount2EXT-commandBuffer-02707  
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` **must** not be a protected resource
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08114  
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are accessed as described by [descriptor validity](#) by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08115  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08116  
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08117  
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` **must** have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08119  
If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, or a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory **must** be resident
- VUID-vkCmdDrawIndirectByteCount2EXT-magFilter-04553  
If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain

## VK\_FORMAT\_FEATURE\_SAMPLED\_IMAGE\_FILTER\_LINEAR\_BIT

- VUID-vkCmdDrawIndirectByteCount2EXT-magFilter-09598

If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirectByteCount2EXT-mipmapMode-04770

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR`, `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE`, and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- VUID-vkCmdDrawIndirectByteCount2EXT-mipmapMode-09599

If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `reductionMode` equal to either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_MINMAX_BIT`

- VUID-vkCmdDrawIndirectByteCount2EXT-unnormalizedCoordinates-09635

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `levelCount` and `layerCount` **must** be 1

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08609

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the image view's `viewType` **must** be `VK_IMAGE_VIEW_TYPE_1D` or `VK_IMAGE_VIEW_TYPE_2D`

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08610

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08611

If a `VkSampler` created with `unnormalizedCoordinates` equal to `VK_TRUE` is used to sample a `VkImageView` as a result of this command, then the sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values

- VUID-vkCmdDrawIndirectByteCount2EXT-None-06479

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- VUID-vkCmdDrawIndirectByteCount2EXT-None-02691

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- VUID-vkCmdDrawIndirectByteCount2EXT-None-07888  
If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's `format features` **must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-02692  
If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-02693  
If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`
- VUID-vkCmdDrawIndirectByteCount2EXT-filterCubic-02694  
Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`
- VUID-vkCmdDrawIndirectByteCount2EXT-filterCubicMinmax-02695  
Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07027  
For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07028  
For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's `format features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07029  
For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's `buffer features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndirectByteCount2EXT-OpTypeImage-07030  
Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's `buffer features` **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`
- VUID-vkCmdDrawIndirectByteCount2EXT-None-08601  
If a `bound shader` was created with a pipeline layout or specified push constant ranges and statically uses a push constant value, that value **must** have been set for the same

pipeline bind point, with push constant ranges that are [compatible](#) with the push constant range used to create the shader

- VUID-vkCmdDrawIndirectByteCount2EXT-None-10068

For each array of resources that is used by a [bound shader](#), the indices used to access members of the array **must** be less than the descriptor count for the identified binding in the descriptor sets used by this command

- VUID-vkCmdDrawIndirectByteCount2EXT-imageLayout-00344

If an image descriptor is accessed by a shader, the [VkImageLayout](#) **must** match the subresource accessible from the [VkImageView](#) as defined by the [image layout matching rules](#) or a [VkShaderEXT](#) created with a [VkDescriptorSetLayout](#) that was created with [VK\\_DESCRIPTOR\\_SET\\_LAYOUT\\_CREATE\\_DESCRIPTOR\\_BUFFER\\_BIT\\_EXT](#), the descriptor memory **must** be resident

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08608

If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state specified statically in the [VkPipeline](#) object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndirectByteCount2EXT-uniformBuffers-06935

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [uniformBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08612

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectByteCount2EXT-storageBuffers-06936

If any stage of the [VkPipeline](#) object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS](#) or [VK\\_PIPELINE\\_ROBUSTNESS\\_BUFFER\\_BEHAVIOR\\_ROBUST\\_BUFFER\\_ACCESS\\_2](#) for [storageBuffers](#), and the [robustBufferAccess](#) feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectByteCount2EXT-None-08613

If the [robustBufferAccess](#) feature is not enabled, and any [VkShaderEXT](#) bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawIndirectByteCount2EXT-viewType-07752

If a [VkImageView](#) is accessed as a result of this command, then the image view's [viewType](#)

**must** match the **Dim** operand of the **OpTypeImage** as described in [Compatibility Between SPIR-V Image Dimensions and Vulkan ImageView Types](#)

- VUID-vkCmdDrawIndirectByteCount2EXT-format-07753

If a **VkImageView** or **VkBufferView** is accessed as a result of this command, then the **numeric type** of the view's **format** and the **Sampled Type** operand of the **OpTypeImage** **must** match

- VUID-vkCmdDrawIndirectByteCount2EXT-OpImageWrite-08795

If a **VkImageView** created with a format other than **VK\_FORMAT\_A8\_UNORM** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the image view's format

- VUID-vkCmdDrawIndirectByteCount2EXT-OpImageWrite-08796

If a **VkImageView** created with the format **VK\_FORMAT\_A8\_UNORM** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have four components

- VUID-vkCmdDrawIndirectByteCount2EXT-OpImageWrite-04469

If a **VkBufferView** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction **must** have at least as many components as the buffer view's format

- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04470

If a **VkImageView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64

- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04471

If a **VkImageView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32

- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04472

If a **VkBufferView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 64

- VUID-vkCmdDrawIndirectByteCount2EXT-SampledType-04473

If a **VkBufferView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction **must** have a **Width** of 32

- VUID-vkCmdDrawIndirectByteCount2EXT-sparseImageInt64Atomics-04474
